*Circulation Certified
by the
American Newspaper
Annual and Directory*

DETAILS OF THE PLAN

By the audit plan and certification service described herein, the publisher is offered all the following:—

The Audit—A searching examination of all records bearing on production, distribution and earnings of circulation, by a reliable auditor, experienced in both publishing and advertising and familiar with this branch of accounting, who makes a complete, detailed report to the publishers of the Annual and Directory.

The Rating—Based on the findings in that examination and audit, the publication is given the highest rating accorded under any circumstances, not only in the general catalogue section of the Annual and Directory, but also wherever in any special classification its name and description appear; it being in each instance set forth, in bold face type, that the circulation rating given has been verified by the American Newspaper Annual and Directory.

The Enrollment—Every publisher receiving this service is given valuable standing with the advertisers of the country by the inclusion of his publication in the list of those that prove their circulation by means of this audit.

*Circulation Certified
by the
American Newspaper
Annual and Directory*

The Certificate—Formal attestation concerning the examination and audit is provided in a handsome photogravure certificate, original in design and convincing in text, size 18 x 24 inches, on heavy parchment paper, cream tint, done in sepia ink, signed and sealed by the publishers of the Annual and Directory. This certificate, framed appropriately, is delivered to the publisher, to be hung in his office and testify to the standing of his medium.

The Facsimile—A photo-engraved reproduction of the certificate, in the size of a full page, is inserted in still another section of the Annual and Directory, to which the advertisers who consult the book are referred for more detailed information.

The Book—Finally, every publisher who orders an audit receives a copy of the Annual and Directory in which it appears. This book, placed within reach, will answer many questions for him, for his staff, and for those who patronize his office.

A. M. Peterson

INTRODUCTION.

In this issue of the *AMERICAN NEWSPAPER ANNUAL AND DIRECTORY* we have listed 24,345 publications, an increase of 110 over last year.

We show in this issue 11,413 towns where newspapers are published, an increase of 194 over last year. This volume contains 1,635 new publications. The suspensions and consolidations during the year make the net gain 110, as shown above.

DAILY NEWSPAPERS.—Following the General Catalogue is a complete list of all dailies in the United States and their possessions and the Dominion of Canada which are issued continuously throughout the year, distinguishing the morning and evening issues by the use of Roman and italic type respectively and also indicating by an asterisk (*) all that have Sunday editions whether under the same or different titles. Those which issue weekly, semi-weekly or tri-weekly editions are indicated by a parallel (||).

MONTHLY AND WEEKLY PUBLICATIONS.—These are comprised in three lists—viz: Magazines, including literary, illustrated and humorous weeklies of general circulation; Women's Publications of Home Circulation, and Mail Order Journals. Attention is invited to the special note on page 1145 relative to this group.

CLASS PUBLICATIONS.—These lists have, as usual, been carefully revised from the press proofs of the catalogue. A number of new lists have been added, some of them being due to the suggestions of our friends, the purchasers of the *ANNUAL*, whom we thank for their interest. We aim to keep this important part of the book fully abreast of the needs of the times, believing that it will be found highly useful.

POPULATION.—The population figures in the United States and possessions, except in the Philippines, are from the 1910 Census.

The results of the Canadian census of 1911 had not been given out at the time we went to press. Through the kindness of Mr. A. Blue, the Chief Officer, we received the 1911 figures for the total population of all the provinces except Yukon. These figures, while subject to final revision, are approximately correct. We have also the 1911 figures for about a hundred of the largest cities. The 1911 figures are indicated by the character (||). The rest of the figures in Canada are those of the census of 1901.

Where figures from the above sources are not available, we have used the latest presumably authentic information and have marked the figures with a star (*), signifying that they are estimated. Several counties have been divided since the 1910 Census was taken. In these cases we have estimated the population from the best information we could obtain.

On pages 12 to 22 inclusive will be found the population of all places in the United States and Canada which have 3,000 inhabitants and upward, arranged alphabetically by states and by groups in each state as follows: Towns of from 3,000 to 5,000, 5,000 to 10,000, 10,000 to 20,000, 20,000 to 50,000 and 50,000 upward.

MAPS.—The maps have been carefully revised to date, so that practically every newspaper town contained in the *ANNUAL* will be found on them, each town being indexed so

that it may be readily located if reference to it is desired. The reference follows the population of each place, as (G 5), etc., the letters referring to vertical and the figures to horizontal divisions. To facilitate reference where the county in which the town is situated is large, or a number of counties are contained within any one of the divisions, and the place desired is located on, or near the horizontal line, we have marked it thus: (G 5½), etc. All places so marked will be found very near the line (above or below) between the number given and the next higher one.

STATE HEADINGS.—The state headings have been carefully revised and brought up to the present time, giving concise and valuable statements of the wonderful resources and growth of the country. The agricultural and other departments, and many of the publishers in the various states, have furnished much statistical and other information for this work, and we thank them for their assistance.

TOWN HEADINGS.—These headings have also been carefully revised. The distance of the town, and in most cases the direction from some prominent point is given; its means of communication by railroad, water or stage; whether it is a telegraph and express station or not, and if not, what the nearest telegraph or express station is. If a place has a bank the word "Bank" appears, if more than one, "Banks," if there is no bank in the place the nearest, or most accessible, or the usual banking town for that point is given. Then follows the description of the place itself, setting forth as fully as possible its advantages of location, the leading manufactures, the nature of the surrounding district, with its productions, agricultural or otherwise, and educational and other public institutions. We pay particular attention to this valuable feature of our work. The catalogue section has increased this year about twenty pages, fully four-fifths of this being due to additions to this descriptive matter.

SUB-EDITIONS.—We endeavor to distinguish between independent and distinct publications and those which are simply reprints of some other paper, usually with little or no change beyond the name. All papers so issued, as far as it was possible to trace them, are entered in the Catalogue under the name of the leading paper, and, under the place of apparent publication, the name of the sub-edition is given with a reference to the paper issuing it. It is very difficult at times to determine positively this question of similarity of issue. Publishers of such papers are frequently unwilling to give information or to send sample copies, and it is possible that in some instances an error may have been made either in quoting a paper as a sub-edition of another, when it would be fairly entitled to an independent entry if all the facts were known, or in giving a paper an independent standing when it is not entitled to it. Every effort however, is made to guard against either of these possibilities.

PUBLICATIONS EXCLUDED.—In accordance with our usual custom there are several hundred publications which we do not insert, having no value for the general advertiser or the general public. Among them are those issued by private and high schools, the smaller colleges, local church papers, papers issued by business houses primarily for the exploitation of their own goods, and generally known as "house organs," and publications issued in the interest of institutions, unless having an influence outside of the particular one by or for which they are published. Care has also been exercised in the selection of newspapers and periodicals which rightly come within the scope of this work. Experience teaches that it is not wise to insert every paper when it is first issued, for while the exclusion may be unfortunate in a few instances, much dead matter is thereby kept out of the book; as many of these ventures have very short lives.

NAMES OF EDITORS AND PUBLISHERS.—No labor has been spared in the effort to have this department of the work as accurate as possible at the time of going to press; the continual changes of ownership and places of publication, however, necessarily preclude absolute accuracy.

CONCERNING CIRCULATION

The only copies of a periodical which can have any value for the advertiser are those which are delivered to potential readers.

Because of our desire to give actual circulations for the benefit of the users of the book, we require that all statements sent us for publication therein shall be made according to the ANNUAL'S definition of circulation.

The form sent by us to every publisher when the revision of the ANNUAL commences will hereafter contain the following:

This is our definition of circulation, whether the rating be certified, estimated or based on a publisher's statement:

CIRCULATION: THE AVERAGE NUMBER OF COMPLETE COPIES OF ALL REGULAR ISSUES FOR A GIVEN PERIOD, EXCLUSIVE OF LEFT OVER, UNSOLD, RETURNED, FILE, SAMPLE, EXCHANGE OR ADVERTISERS' COPIES.

Our understanding of the term "CIRCULATION" is embodied in the above paragraph.

The word "AVERAGE", as we use it, is likely to be misunderstood. It is the custom of some publishers to issue occasionally large extra editions; to add these and the regular editions together for a given time, and divide the total by the number of days, weeks or months, as the case may be; contained within that period. This is not what we desire. By "AVERAGE CIRCULATION" we mean that number of complete copies which *usually* fills the needs of the mailing lists, and the demand either in or out of the office.

Left over, unsold, returned and file copies, having never reached the hands of a possible reader, cannot be considered as part of the circulation.

Sample copies are excluded because there is, as a rule, no method of ascertaining the actual percentage which reach the reader.

Exchanges are usually cut up in the office to which they are sent, which of course terminates their usefulness.

Advertisers' copies may be read, in some cases, but the great majority are simply checked for the advertisement concerned, and either filed or thrown away.

Statements in detail enable us to see to what extent special or extra editions figure in the issues of a given period, and also to what extent the circulation fluctuates or steadily increases. When such statements are furnished, publishers may rely on being rated accordingly. They can have no reasonable cause of complaint against us, if, in the absence of such statements, the ratings given seem to them unsatisfactory.

Ratings will not be increased, as a rule, except upon receipt of satisfactory, signed statements. They may be reduced where the publishers' continued failure to furnish such statements leaves us dependent on outside information.

SWORN DETAILED STATEMENTS covering a period of not less than nine months preceding date of report we consider the strongest kind of statements that can be made. All ratings based on such statements are printed in **bold face type** throughout the book, and marked with a star (*). Detailed statements, not sworn to, are printed in plain figures and marked with a star (*). A double dagger (‡) indicates the publisher's claim unsupported by either affidavit or detailed statement. Our own estimates are set in plain figures and unmarked.

A detailed statement covering the full nine months on our blanks, or under exceptional circumstances, covering a somewhat shorter period, not less than six months, will, if properly signed by the publisher or some responsible person for him, ordinarily entitle the paper to a rating in accordance therewith. We say *ordinarily*, because we do not believe that the rendering of such a statement is incontestable proof of its correctness, and there are instances in which such statements, even when supported by affidavits, could not be

accepted in the face of positive information to the contrary; but we believe that such instances are comparatively few in number, and in the large majority of cases a detailed statement covering the required period, properly signed, is *prima facie* evidence of its reliability. In this connection we may say that while the circulation ratings are based upon statements sent us by the publishers, and the publishers alone are responsible for them, we use our best endeavors to obtain statements showing actual circulation, and we do not print figures if we have reason to doubt their substantial accuracy.

It frequently happens that publishers sending in orders and copy for advertisements in the AMERICAN NEWSPAPER ANNUAL AND DIRECTORY include therewith statements of circulation, sometimes accompanied by a request that the ratings of their papers in the ANNUAL be made to agree with the figures thus given. This will not be done. Circulation ratings are fixed from statements made out in proper form, and signed by publishers, or, in the event of failure to receive such, from the best information accessible.

Although the greater number of ratings are determined when copy is being made in July and August, we are willing to revise the figures as late as October 1st, provided acceptable statements are sent to the editor of the ANNUAL, entirely apart from any consideration of the subject of advertising therein, with which he has nothing to do. Advertisements, however, are received up to the time of going to press, and frequently contain later information than can be given in the Catalogue. This will explain what would sometimes appear to be discrepancies between the statements made in the advertisements and the ratings given the papers in the various lists.

Circulation ratings are omitted in the following instances—where the paper has been established during the current year, or is entered for the first time in the ANNUAL; where the information received is unsatisfactory, or the reports are conflicting; or where publishers have requested omission, in which case the word "Decline" is printed in the circulation column.

We aim at absolute impartiality in this important part of our work, and desiring always to avoid injustice to publishers, in our efforts to procure accurate and trustworthy information for advertisers, we will gladly receive communications from any who may consider themselves unfairly dealt with in any statement in this volume, and will cheerfully correct in future editions any mistakes made in the present one, if furnished with satisfactory evidence of error.

Papers which are believed to decline general advertising are indicated in the Catalogue by the words "No Advts." in the circulation column.

PUBLISHERS' ADVERTISEMENTS.—An alphabetical index to the advertisements will be found commencing with page 1233. A careful examination of these advertisements will result in the acquisition of a mass of valuable information which, for the sake of compactness and facility of reference, must necessarily be excluded from the Catalogue. We invite attention to the article on this subject on the insert preceding the advertisement section.

THE REVISION of this book for the edition of 1913 has already been begun, and publishers will confer a favor by notifying us of the establishment, suspension or change of any papers within their knowledge, or by calling our attention to any inaccuracies in newspaper descriptions, town headings, state headings or any other department of the ANNUAL.

N. W. AYER & SON.

Philadelphia, December 28th, 1911.

HOW THIS DIRECTORY IS MADE

Sometimes an unobservant publisher asks us the question, "Why don't you revise the ANNUAL every year?" Our answer is, "We do."

We try to make this book perfect, not because we hope to attain perfection, but because we know that by striving for perfection we shall grow better all the time.

By the system we follow, no publisher can justly say that we have neglected to describe his paper correctly. If its description is incorrect, it is because he failed to give us correct information, when we gave him his annual opportunity to do so. Every year, a printed proof of the entry of each and every one of the 24,000 newspapers in the ANNUAL is cut out, mounted on a blank, and mailed to the publisher, with the request that he make any necessary corrections and return it to us. This blank also provides space for his circulation figures. Another blank, printed and ruled for a detailed statement, is also sent him, as well as a stamped and addressed envelope in which to return his proof and statements. It costs a publisher little effort and no money to have his paper's correct description and his circulation statement properly set before the thousands of discriminating advertisers who use the ANNUAL. An increasing number of publishers each year take advantage of the service we offer them, although there are still too many who indulge the common propensity for procrastination, to their own detriment.

This sending of proof slips and blanks to each paper for each edition of the ANNUAL, and writing up the facts obtained for the new book, is only a part of the work of revision. The description of each of the 11,000 towns named in the ANNUAL is also sent out for correction every year. This brings back a mass of valuable gazetteer matter for each issue.

In preparing the 1912 Edition we found 3,136 new journalistic ventures of such apparent importance as to warrant our sending for copies. We received 1,957 of these. Of the remainder, some were merged with others, some reached us too late to get into the ANNUAL, some failed to respond to our repeated requests for copies, and the greater part died in infancy.

Of the 1,957 received, there were many which, although no doubt of considerable value and interest to their readers, were not considered of sufficient importance to be entered in the ANNUAL. These were papers evidently issued for campaign purposes, or published by single churches, by schools and other institutions, or as house organs, etc. As a result of careful investigation of those received, 1,787 were judged as worthy of being listed in the ANNUAL, and were written up, and proofs of their descriptions sent to their publishers. Before the ANNUAL was printed, however, 152 of these had given up the struggle, for various reasons, leaving 1635 survivors who consequently make their bow to the advertisers of the country in this volume. We wish them all success, and trust they will annually fill out and return their statement blanks with care and promptitude, eschewing the pigeon-hole habit.

There were numerous consolidations during the year. These and other causes which lead to the suspension of newspapers made it necessary for us to eliminate 1525 names from the catalogue during 1911.

Of the fifteen or sixteen thousand newspapers whose publishers felt sufficient interest in their correct representation to return our blanks, many were found to have changed in size, price, issue, name, politics or ownership. A conservative estimate of the number of these changes made every year from the above and other sources would be at least 15,000. This does not include circulation changes, which probably reached 20,000; the insertion of new papers, nor the taking out of dead ones.

This summary of the changes made in a single year instances the truth of the statement of the late George P. Rowell, the first publisher of a newspaper directory, when he declared that a last year's newspaper directory had about as much value as a cancelled postage stamp.

Our rule is to make no changes upon hearsay. We receive every year thousands of communications relating to newspapers, in the shape of clippings, correspondence and voluntary items of information from other sources. Every one, unless coming directly from the paper concerned, is verified before the information is used for the new ANNUAL.

The work of making a new ANNUAL each year calls for a large outlay for postage. The postal matter used in the preparation of the 1912 edition included 33,800 two cent stamps, about 28,000 stamped return envelopes, 8,000 stamped wrappers, 500 single postal cards, 5,000 double postal cards, about 2,000 Canadian stamps and sundry West Indian, Cuban and other stamps. These stamps and cards were used solely for the work of revision, and do not include any of those used in selling the ANNUAL, or in connection with the advertising in it, these being matters entirely outside the province of the department having charge of the editorial work on the book.

We have given much time, thought, effort and cash to the preparation of the ANNUAL AND DIRECTORY. We do so every year. We have tried to avoid errors of every kind, but in the listing of over 24,000 newspapers, with ten separate and distinct items of information about each one; and of 11,000 towns with a dozen or more particulars of each, and in the making up of two hundred lists of different classes of periodicals; it would be a marvel indeed if every one of the half million distinct pieces of information should be absolutely correct. We shall consider it a favor to be informed of any error that exists.

We bespeak from our friends an appreciation of the merits of the book and a frank and friendly criticism of what they consider its faults.

N. W. AYER & SON;
Publishers.

CATALOGUE

—OF—

AMERICAN NEWSPAPERS

GIVING THE PLACES IN WHICH THEY ARE PUBLISHED IN THE UNITED STATES, TERRITORIES, INSULAR POSSESSIONS, AND DOMINION OF CANADA. ARRANGED ALPHABETICALLY IN STATES, ETC.; A DESCRIPTION OF EACH PLACE, ITS LOCATION, RAILROAD AND OTHER MEANS OF COMMUNICATION, TELEGRAPH AND EXPRESS ROUTES AND BANKING FACILITIES; THE COUNTIES IN WHICH THE PLACES ARE SITUATED, WITH THE LOCATION AND POPULATION OF EACH; AND, IN CONNECTION WITH THE PAPERS, THE FREQUENCY OF ISSUE, POLITICS, DENOMINATION OR GENERAL CHARACTER, YEAR OF ESTABLISHMENT, SIZE, SUBSCRIPTION PRICE, CIRCULATION AND NAMES OF EDITORS AND PUBLISHERS.

Populations, unmarked, in the United States are from the United States Census of 1910. Canadian populations are from the Census of 1901. The general figures for the 1911 Canadian Census had not been given out at this time we went to press. We give the 1911 figures for all the provinces except Yukon, and for about a hundred of the larger cities. 1911 figures in Canada are marked with a parallel (§). All populations marked with an asterisk (*) are estimated.

Circulation statements for which affidavits have been furnished, and the net average circulations of those papers whose circulation records have been audited by the AMERICAN NEWSPAPER ANNUAL AND DIRECTORY, are printed in **bold-face** figures; detailed statements are designated by a six-pointed star (*); signed statements, neither detailed nor sworn to, are designated by a double-dagger (§); those unmarked are estimated.

Where circulation figures are omitted, we have been unable to obtain any satisfactory information, or the paper was established during the current year, or is entered for the first time in the ANNUAL, or else is issued for advertising purposes. The word "decline" indicates that the publishers have declined or objected to furnish any statement for publication.

County seats are indicated by a dagger(†).

PRESIDENTIAL ELECTION, 1908.

ALABAMA.

Population 2,138,093.

STATE CAPITAL, MONTGOMERY.

ALABAMA is bounded north by Tennessee, east by Georgia and Florida, south by Florida and the Gulf of Mexico, and west by Mississippi. Its extreme length north to south is 336 miles; breadth varying from about 150 to 200 miles; land area, 51,540 square miles. The Alleghany range enters the state at the northeast and extends toward the centre, finally losing itself in mere hills; then follows a tract of rolling prairies, interspersed with pine barrens and exceedingly rich alluvial bottoms, including the cane brake region, one of the richest cotton producing districts in the world. From this to the Florida border and the Gulf the land is gently undulating. This part is covered with forests of yellow pine, which is growing valuable, since the available supply of better timber has become small. Over a billion feet is cut annually. The product of naval stores here is very considerable. The cut over pine lands are being settled by white farmers and good crops of corn, cotton, truck and fruit are grown. North of this is a broad belt of rich black soil, constituting the great cotton producing section of the state. The soil then becomes sandy and poor, but abundant water power renders it capable of becoming a fine manufacturing district. The mineral region occupies the northeast part, while the northwest is a good agricultural and stock raising country. The mountain district and the valley of the Tennessee possess fine forests of hardwood timber. Cotton is grown throughout the state, but mainly in the central belt alluded to, 1,200,000 bales being produced in 1910. Tobacco is also grown everywhere and the light sandy loams of the central and southern portions produce a remarkably good quality of wrappers, of both the Sumatra and Cuban varieties. Very fine wheat is grown in the north and northeast; rice in the south; corn largely all over the state. Dairy products, fruits, wool, oats, and sweet potatoes are produced in considerable quantities and immense quantities of truck of all kinds, berries and small fruits are grown and shipped north, the climate and other local conditions being peculiarly favorable to this industry. Manufacturing and mineral development have become very important. The chief manufactures are iron, steel and their products, machinery and heavy castings, iron and soil pipe, cotton gins, flour, lumber, leather, cotton goods, yarns, thread, turpentine, etc. Cotton manufacturing is growing fast and there are nearly a million spindles in the various mills in the state. Alabama's export and import trade centers at Mobile. Cotton, lumber, iron and naval stores are the chief exports. Extensive beds of brown and red iron ore are found in the counties of Jefferson, Bibb, Cleburne, Blount, St. Clair, Franklin, Shelby, Talladega and Etowah, covering a total area of over 7,500 square miles. Coal deposits are found over a large section of North Alabama in and around the Birmingham district, the total area of coal bearing lands being estimated at 5,500 square miles. Bituminous coal of several kinds is found and the mining of it now gives employment to many thousand men. The state's coal production in 1907 was 14,417,868 tons; iron ore, 3,995,098 tons; lime, 97,402 tons; pig iron, 1,674,848 tons; coke, 3,217,068 tons. Birmingham is the center of the iron and coal region. Here are situated large steel works, many furnaces and scores of foundries, machine shops and pipe plants. The manufacture of basic steel from Alabama ores has proved a practical success and steel rails are now being manufactured at Ensley and other towns in Jefferson county, to the amount of about 50,000 tons each month. Considerable gold has been mined; silver and copper are also found; potter's, porcelain and fire clays, hydraulic limestone, manganese, mica, graphite, asbestos, emery and many other minerals exist in considerable quantities; there are various building stones. The statuary granite and white marble of Coosa county and the variegated marbles of Talladega and adjacent counties are not surpassed by any in the country. In Fayette and other counties natural gas is found.

The number of newspapers and periodicals published in Alabama is 256, including 27 daily, 7 semi-weekly, 201 weekly, 8 semi-monthly, 12 monthly and 1 quarterly. The places of publication number 137, of which 69, designated by a dagger (†), are county seats.

BIRMINGHAM †, pop. 132,685 (E 3½); JEFFERSON Co. (N.C.), pop. 226,476. 95 m. N.N.W. of Montgomery, Cent. of Ga.; St. L. & S. Fran.; Louisv. & Nash.; Queen & Cres.; Seab. Air Line; Ill. Cent.; Atl. Birm. & Atl. R.R.s.; S'th'n Ry. Tel. Exp. Banks. In the vicinity are immense coal and iron deposits. Birmingham has numerous blast furnaces, and its iron industry is large, and growing steadily; also railroad machine shops and many other industries. The total steel product of Jefferson county averages over 2,500 tons per day. Of this about 50,000 tons each month is made into steel rails. Almost all the coke of the state, over 3,000,000 tons annually, is produced in the Birmingham district. Trade center for a large agricultural district.

ALASKA.

Population, 64,365.

TERRITORIAL CAPITAL, SITKA.

ALASKA is bounded north by the Arctic Ocean, east by the Yukon district of Canada and British Columbia, south by the Pacific Ocean, and west by Behring's Sea and Strait, and numerous islands. It has a total area of about 580,884 square miles, its greatest length, from north to south, being 1100 miles and greatest breadth over 700 miles. The northern half is low with great swampy morasses along the streams, running back into low, rolling hills. Native Indians inhabit that section, living along the streams in small bands. The southern half is mountainous, and along the southeast coast are some of the highest mountain peaks on the American continent; Mount St. Elias, the principal one, is over 18,000 feet. Near the center of the territory is Mt. McKinley, the loftiest on the entire continent, summit over 20,000 feet. The southwesterly section comprises the peninsula of Alaska and the Aleutian islands, the latter the seat of the valuable fur seal and sea otter fisheries. The production of the latter fur has greatly decreased, as the animal is now almost extinct. This district is mountainous and actively volcanic. The principal industry at present is mining, the country being seamed by the largest quartz veins in the world. The production of gold in 1908 reached a value of over \$20,000,000. Valuable deposits of copper are also being developed, 2,197 tons being produced in 1908. Coal, which was first discovered in 1855 by the Russians, has been worked to a small extent, the output in 1909 being about 10,000 tons, all lignitic and bituminous. Large deposits of anthracite of high quality have recently been discovered, as well as new fields of bituminous, the new coal fields covering an area of almost a thousand square miles, and it is believed that Alaska, with improved transportation facilities, will be able to supply the needs of the whole Pacific coast. Some small deposits of petroleum have been found, also gypsum, antimony and graphite. Marble is quarried on Prince of Wales Island. The fisheries in 1908 employed 256 vessels of a total of 64,189 tons, and 13,337 persons, the product being worth \$11,847,443. Over \$10,000,000 is invested in this industry. The agricultural industries in Alaska are confined to a few small truck farms near the cities, but the Department of Agriculture has established experiment stations in various places and oats and wheat have been brought to maturity in favored situations. Some cattle have been raised on the Aleutian Islands, and it is believed that the enterprise will be successful. The Department of Agriculture is also raising sheep there. The exports amount to over \$30,000,000 per year, and consist chiefly of gold, canned salmon and other fish, copper ore and furs. The imports, chiefly hardware, machinery and provisions, have a value of \$17,000,000 yearly. About 27,000,000 acres of forest land are set apart as national forests under the care of the Forest Service of the Department of Agriculture and their timber will be cut under the supervision of the department in such a manner as to make them a permanent source of supply. The Seal Islands in Behring Sea pay a large yearly revenue to the government. The principal towns are Sitka, the capital, and Juneau, the metropolis and supply point. The coast, from the southern boundary to Cape Spencer, is lined with a continuous chain of islands, between which and the main land are salt water channels, navigable for the largest sized steam ships. In the interior is one of the largest rivers in the world, the Yukon, which has a course of between 1,500 and 1,600 miles through the territory, navigable the entire distance, and which is 60 miles wide at the mouth.

The number of newspapers and periodicals published in Alaska is 25, including 11 daily and 14 weekly. The places of publication number 16.

ARIZONA.

Population 204,354.

TERRITORIAL CAPITAL, PHOENIX.

ARIZONA is bounded north by Utah and Nevada, south by Mexico, east by New Mexico, and west by California and Nevada; length, north to south, 390 miles, breadth averaging about 300 miles; land area, 113,000 square miles. It lies entirely within the valley of the Colorado, which stream forms nearly all the western boundary. The streams generally flow through deeply eroded chasms, among them being the remarkable "Grand Canon of the Colorado." The soil of the valleys is very fertile when irrigated; and the mountain lands are well adapted to stock raising and wool growing. The raising of ostriches is one of the great industries of the territory, which has more than eighty per cent of all the ostriches in the United States. The ostrich farms are all in the Salt River valley, which seems to be peculiarly well adapted to their needs. Over 5,000 birds are in the valley, and feathers of the finest quality are abundantly produced. Their principal food is alfalfa, and that they thrive on it is shown by the fact that nearly 2,000 young birds were successfully raised in 1909. The great Roosevelt dam, constructed under the national irrigation law, and dedicated in the spring of 1910, stores the flood waters of Salt River and Tonto Creek, and forms a reservoir which will hold water sufficient to cover 1,284,000 acres, or a little over 2,000 square miles, a foot deep. Its purpose is to irrigate 240,000 acres of land in the Salt River valley, sixty miles distant from the reservoir. The annual rainfall in this district is only five inches, and the average temperature 69°. Without irrigation it is barren, but a sufficient supply of water demonstrates that the soil has remarkable fertility, and a succession of crops can be grown throughout the year. Oranges, lemons, grape fruit, canteloupes, dates and deciduous fruits thrive, as well as every variety of fruits and vegetables which will grow in the temperate and semi-tropic zones. Alfalfa and grain are the principal crops grown on the irrigated lands, and with the division of the farms into smaller holdings, the dairy industry is increasing and will soon take a prominent position. Sugar beets have been successfully grown, and the acreage will be considerably increased as soon as the factories can take care of the crops. "Dry farming" has been carried on with good results in some parts of the territory, and fair crops of grain and fruit have been secured, but the results are yet somewhat doubtful. It is believed, however, that the establishment of an experimental station in the district suited to this branch of agriculture will result in discoveries that will be of great benefit. The chief wealth of the territory, however, lies in its mineral deposits. Gold, silver, lead, and copper abound, and the mining and working of gold and copper ores is at present the leading industry. Gold to the value of \$2,500,000, silver, worth over \$1,500,000 and 145,084 tons of copper were produced in 1908. An extensive system of good roads is provided for under a special tax and will be of material assistance in opening up the territory to settlement.

The number of newspapers and periodicals published in Arizona is 69, including 16 daily, 48 weekly, 2 semi-monthly and 3 monthly. The places of publication number 31, of which 14, designated by a dagger (†) are county seats.

ARKANSAS.

Population 1,574,449.

STATE CAPITAL, LITTLE ROCK.

ARKANSAS is bounded north by Missouri, east by Missouri, Tennessee, and Mississippi south by Louisiana, southwest by Texas, and west by Oklahoma; greatest length from north to south, 240 miles, and breadth from 170 to 250 miles; land area, 53,045 square miles. The eastern part is low and level, originally covered with dense forests and many swamps and lakes, and frequently more or less inundated by the Mississippi, Arkansas, and other rivers, but this part of the state is being drained, and the land, which is of great fertility, brought into use, a great part of it being devoted to the culture of rice. The surface rises toward the centre, where it is hilly and diversified with forests and rolling prairies. Further west are branches of the Ozark Mountains, comprising the Black Hills in the north, Cane Hills in the northwest, and the Ouachita Hills in the south. The valley of the St. Francis, in the northeast, like the Mississippi valley, is gradually being drained; the valley of the Arkansas, from the Oklahoma line entirely across the state, is unsurpassed as a cotton producing country; the valley of the White in the north, abounding in forests, is also rich in agriculture and has deposits of zinc and marble. In the southern part of the state are the Saline, Ouachita, Little Missouri and Red rivers, while in the southeast the Bayou Bartholomew drains a large area, giving it communication with the Mississippi. The soil is very varied in character, and its elevation reaches up 2,500 feet, so that almost every crop which can be grown between the lakes and the Gulf of Mexico can be successfully grown in Arkansas. The river bottoms are very fertile, and yield large crops of cotton, corn, sweet potatoes, rice, tobacco and fruit. Over 1,000,000 bales of cotton are grown annually. The soil on the uplands, particularly in the north, produces good crops of wheat, oats, and fruit, especially apples. Two crops of potatoes are frequently grown in one year. Cotton is the chief staple; corn next. Rice is becoming one of the state's great products, and the small grains and hay are important crops. Stock raising is growing rapidly, the mild winters making it unnecessary to house the stock during that season. The principal manufactures are cotton seed oil, rice and rice flour, flour and grist mill products, cotton gins, leather, wool carding, furniture, wagons and lumber. The production of hardwood lumber for cabinet purposes is an important industry. Coal, argentiferous galena, zinc, copper, and iron, marble, grindstone, granite and kaolin are among the minerals. Diamonds have been discovered in Pike county, and the mines are being worked by English capital. Good coal is mined in Crawford, Conway, Franklin, Johnson, Perry, Pope, Pulaski, Sebastian, Scott, Washington, White, and Yell counties. Silver is found in connection with galena in Pulaski, and Sevier counties, and with lead in Benton, Carroll, Independence, Izard, Lawrence, Madison, Marion, Newton, Pulaski, Randolph, Searcy, and Washington counties; excellent marble, especially in Madison county. Slate for all purposes is quarried in Pike, Pulaski, Polk, Garland and Sevier counties; Garland county has extensive quarries of Arkansas hone or oilstone. In Pulaski county, a few miles south of Little Rock, very extensive quarries of blue granite have been opened up, and valuable discoveries of iron have also been made. The mineral deposits in general are being rapidly developed, and much eastern capital is being invested. Among the mineral springs, the "Hot Springs of Arkansas," at Hot Springs are the most renowned. There are also others celebrated for their medicinal qualities at Eureka Springs, Heber and Searcy.

The number of newspapers and periodicals published in Arkansas is 303, including 31 daily, 8 semi-weekly, 248 weekly, 3 semi-monthly, 9 monthly, 1 bi-monthly. The places of publication number 169, of which 84, designated by a dagger (†), are county seats.

CALIFORNIA.

Population 2,377,549.

STATE CAPITAL, SACRAMENTO.

CALIFORNIA is bounded north by Oregon, east by Nevada and Arizona, south by Lower California, and west by the Pacific Ocean. A line drawn through its centre, following the curves of the eastern and western borders, would measure about 770 miles. Its greatest breadth is about 330 miles; least breadth, 150 miles; average breadth, 230 miles; land area, 155,980 square miles. It is the largest state in the Union except Texas. The surface is traversed by two great ranges, the Sierra Nevada in the east and the Coast Range in the west, while between them are the beautiful and fertile valleys of the Sacramento and San Joaquin, which form what is practically one immense basin, over 400 miles long. The Yosemite and other valleys are on the western slope of the Sierra Nevadas, and the entire range teems with minerals, so also does the Coast range to a lesser degree. The extreme north is an elevated mountain region, with a great deal of good land, and is becoming celebrated for timber, mines, and fresh fruits, such as apples, etc. The soil of a large part of the state is very deep and rich, and the yield of agricultural products generally is very great. Irrigation, originally introduced by the mission fathers, has been largely increased since the American occupation. The Mormons introduced a very elaborate system in San Bernardino county in 1853, and the big Riverside Canal was built in 1869. A large project at Orland in the Sacramento valley, under construction by the government, is nearly completed. Some large private enterprises in the San Joaquin valley have been finished and are now in operation. California occupies an eminent position in agriculture. Her 125,000 farms produced in 1908 an average of \$2,632 per farm, the highest average in the United States. For every kind of fruit that grows in semi-tropical and temperate climates, California is, in soil and climate, pre-eminently favorable. The wheat crop was 12,500,000 bushels in 1910. Barley was 20,170,000 bushels, the largest crop of any state. Cattle and sheep are largely raised, dairy cows number over 3,000,000, other cattle and calves, over 1,100,000; sheep, over 5,000,000. There are several celebrated stock farms, some of which have produced famous trotters. The wool clip is estimated at 22,000,000 pounds. There are several "ostrich farms" in the state, and the feathers produced are equal to the best of those imported from Africa. The largest farms are at South Pasadena, where there are about 1,000 birds. Several others at different places in the state have each 100 birds or more. It is estimated that each ostrich will produce each year feathers of a value of about \$30 raw, and \$100 after undergoing the various treatments necessary to prepare them for use. The yield of raisins in 1910 was about 120,000,000 pounds; the yield of wine, 45,500,000 gallons, and of brandy, 2,500,000 gallons. Dried fruits are extensively produced. The yield of prunes was 755,000,000 pounds; other dried fruits, over 100,000,000 pounds; walnuts and almonds, 16,000,000 pounds; oranges and lemons of a value of \$25,000,000; canned fruits, 3,200,000 cases. Honey, tobacco, corn, barley, oats and hops are raised in various parts of the state. In beet sugar, the state is surpassed only by Colorado. The 1910 output was 140,000 tons. There were also produced 45,819,471 pounds of butter, 4,648,348 pounds of cheese, 160,000,000 pounds of beans and large quantities of asparagus, potatoes and other vegetable products. Lumber was worth \$22,500,000. The olive is attracting a great deal of attention, and the fruit produced in the California olive groves is fully equal to that from the Mediterranean. Cotton is grown on irrigated lands in the Imperial Valley. California is famous for her wheat, fruit, vineyard produce and agricultural products generally, scarcely less than for her yield of the precious metals. The gold produced in 1910 was worth \$19,000,000, and the copper output \$8,478,142. It is estimated that the production of mercury is over 2,000,000 pounds annually. There are numerous other minerals, including valuable deposits of lead, coal, copper, iron, chromium, antimony, borax, rock salt, soda, potash, sulphur, etc. Petroleum output is large, being 75,000,000 barrels in 1910, and the supply will last many years, while natural gas is being used at Sacramento, Stockton, Santa Barbara, Redwood City, and other places. Manufacturing interests are growing rapidly, the products for 1910 being worth \$485,000,000, the principal being lumber, flour, woolens, wine, brandy, tobacco, cigars, cement, machinery, and metallic wares. The annual value of the fisheries is about \$6,000,000. A large number of interurban electric lines have been built within the past few years, especially in the vicinity of San Francisco, Los Angeles and Sacramento, one of them from Sacramento to Chico being ninety miles long.

The number of newspapers and periodicals published in California is 818, including 161 daily, 4 tri-weekly, 31 semi-weekly, 502 weekly, 2 fortnightly, 9 semi-monthly, 101 monthly, 5 bi-monthly, and 1 quarterly. The places of publication number 309, of which 57, designated by a dagger (†), are county seats.

LOS ANGELES†, pop. 319,198 (G 8½); LOS ANGELES Co. (S.), pop. 504,131. On Los Angeles R., 345 m. S.E. of San Francisco. Steamers to San Francisco. Center of R.R. system of Southern California. S'thrn Pac.; Santa Fe; San Ped., Los Ang. & S. Lake R.Rs. Tel. Exp. Banks. The city now embraces the territory along the Los Angeles R. from the ocean to about 15 miles up the river, the coast cities of San Pedro and Wilmington having been consolidated with Los Angeles. Fine harbor and docks. Commercial metropolis of Southern California, and second city of the state in population. In a highly fertile fruit growing country, with extensive orange groves and vineyards. Large exports of fruits, raisins, wine, wool, etc. Gold and petroleum in vicinity. Favorite health resort. The world's greatest aqueduct is being built by the city for its water supply. It will reach a distance of 250 miles to the Owens River, near the Nevada line, part of it being a tunnel over five miles long through the Coast Range, and will provide, in addition to the 35,000,000 gallons needed daily by the city, about 250,000,000 gallons for irrigation and electrical power plants. University of Southern California, a State Normal School, Catholic, Baptist and Presbyterian colleges.

COLORADO.

Population 799,024.

STATE CAPITAL, DENVER.

COLORADO is bounded north by Nebraska and Wyoming, east by Nebraska and Kansas, south by Oklahoma and New Mexico, and west by Utah. Length, from east to west, 380 miles, breadth, 280 miles; land area, 103,645 square miles. The surface consists of three divisions—the mountains and parks, the foothills and the plains. It is intersected near the center by the main range of the Rocky Mountains, otherwise known as the "Continental Divide," and including the highest peaks, among which are Pike's and Long's, Mts. Torrey, Lincoln, Gray, Yale and Harvard, the Spanish Peaks, etc. The mountains enclose wonderful valleys or basins known as parks, many of which are small, but others larger than some entire states. These parks are well timbered, and abound with beautiful scenery, being diversified with low hills and ridges, which contain the sources of all the great rivers that rise in the state. The eastern part of Colorado is an immense plain which was for many years devoted to cattle raising, but is now being rapidly developed into one of the finest agricultural districts in the country. Much of the land will always no doubt be better fitted for grazing than for other uses, but the cultivated area is steadily increasing. Extensive irrigating ditches have been constructed in all parts of the state, and are being rapidly added to. The total length of canals and ditches is now over 20,000 miles; acres irrigated, at the end of 1909, 4,000,000. Where water can be had the soil is very productive. The leading farm products are wheat, corn, sugar beets, alfalfa, barley, oats, flax, hay, melons, potatoes, fruits, honey, garden and dairy products. The annual yield of wheat is 6,000,000 bushels; of oats, over 7,000,000; of corn, over 2,500,000, and of potatoes about 2,500 carloads. Colorado stands first in production of beet sugar, the 1909 output being 140,000 tons, worth \$12,600,000, over twenty-five per cent. of the total production of the country. Fruit growing is becoming one of the leading industries. In 1909 8170 carloads of fruit were exported, 5100 being apples. The total fruit crop for that year was valued at \$7,500,000, double the value of any previous year. The western slope is particularly adapted to the apple, more than two-thirds of the state's crop coming from that region. Berries and other small fruits do well. Cattle, sheep and hog raising are among the chief agricultural pursuits. Colorado is estimated to have 18,000,000 sheep, and 1,300,000 cattle, while the wool clip is over 10,000,000 pounds. Lumbering is an important industry, but the mining of gold, silver and other metals is a chief source of wealth. The annual production of the precious and semi-precious metals is very large, the gold alone produced in 1908 being valued at \$22,871,000. Over \$5,000,000 worth of silver was produced in the same year. Other mineral products are also abundant. Large beds of anthracite, lignite, bituminous and semi-bituminous coal, of good quality, exist, the total extent of coal-bearing strata in the state being estimated at more than 20,000 square miles. The production of coal in 1909 was 10,736,459 tons, including 60,944 tons of anthracite. Petroleum has been discovered, and there are about 125 producing wells in the Florence field alone. Copper, cement, slate, sandstone, marble, granite, fire clay and manganese are being worked, and the iron of the state is manufactured into steel and iron rails. Thirty-three separate minerals are produced in commercial quantities, and the total annual mineral production is valued at \$50,000,000.

The number of newspapers and periodicals published in Colorado is 337, including 47 daily, 2 tri-weekly, 6 semi-weekly, 306 weekly, 3 semi-monthly, 31 monthly, 1 bi-monthly and 1 quarterly. The places of publication number 181, of which 59, designated by a dagger (†), are county seats.

 POPULATION: U. S. Census, 1910. * Estimated. † County Seat. ‡ Size of page.

CONNECTICUT.

Population 1,114,756.

STATE CAPITAL, HARTFORD.

CONNECTICUT is bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York. Its average length from east to west is 86 miles; its average breadth, 55 miles; land area, 5,004 square miles. The eastern part is principally composed of rounded hills, which, though stony, afford rich pasturage; and the valleys support a thrifty agricultural and manufacturing population. The Connecticut valley, near the river, and at a distance from the Sound, is very fertile. In the south the land is broken and the soil sandy and gravelly, but when well manured yields good crops of potatoes, rye, oats, and corn. In the west the surface is rough and the hills are abrupt. There are several good harbors on the coast, and a large business is done in oyster fishing and in the taking of fish for oil and fish-guano. Agriculture employs less than one-third of the working population and the capital invested in agriculture is estimated at \$115,000,000. Dairy products and hay are the principal staples of the east and west. Tobacco is largely grown, chiefly in the Connecticut valley, which produces the finest cigar wrappers grown in the United States. In 1909, 12,000 acres were planted, resulting in a crop of about 19,200,000 pounds, with a total value, at the farm, of over \$3,000,000. Corn, rye, oats, and potatoes are grown in nearly all sections. The land near the large cities and towns is chiefly devoted to market gardening. The total value of the agricultural products is about \$30,000,000. The Connecticut river is open to steamboat navigation from its mouth to Hartford. The Thames river is likewise navigable by Sound steamers as far as its formation by the Yantic and Shetucket rivers in Norwich city, and steamers ply regularly between that city and New York, and, in the summer season, to the seaside resorts. Connecticut is mainly a manufacturing state, having an unusual abundance of water power, and its industries are very extensive and varied; among the leading productions are clocks, hardware, india-rubber goods, firearms, machinery, tools, automobiles, bicycles and textile fabrics. Excellent iron is made from Connecticut ores, and very large quantities of brown stone are taken from the celebrated Portland sandstone quarries. The state of Connecticut, and especially its capital city of Hartford, has become celebrated for the extent and solidity of its insurance interests,—the nineteen life and fire companies of Hartford alone representing in capital and assets nearly two hundred millions of dollars.

The number of newspapers and periodicals published in Connecticut is 153, including 86 daily, 8 semi-weekly, 89 weekly, 2 fortnightly, 1 semi-monthly, 14 monthly, and 4 quarterly. The places of publication number 65, of which 9, designated by a dagger (†), are county seats.

DELAWARE.

Population 202,322.

STATE CAPITAL, DOVER.

DELAWARE is bounded north by Pennsylvania, east by the Delaware River and Bay, and the Atlantic Ocean, south and west by Maryland. Its length from north to south is 96 miles, its breadth ranging from 9 to 12 miles in the north to about 36 miles in the south; land area 1,960 square miles. The surface in the north is finely diversified with hill and dale, and southward the land is rolling, with fringes of marshes and swampy tracts along the indentations of Delaware Bay. The southern portion of the state is in great part a sandy region but by skillful farming has been made highly productive. Kaolin and iron ore are found in the north. The soil in the interior of the state is light and easily cultivated. The agricultural products are grain, corn, fruit, potatoes, and market garden produce; peach growing and small fruits—berries,—are prominent industries. Over one hundred evaporators and canneries are engaged in preserving all kinds of fruits, berries and garden vegetables, at Seaford, Dover, Milford, Georgetown, Smyrna and other towns in the lower half of the state. In 1908, the state produced 6,000,000 bushels of corn, 18,845,538 quarts of berries, 1,212,110 cases of canned tomatoes, 628,786 baskets of fresh tomatoes, 258,982 bushels of canteloupes, and other fruit and vegetables in abundance. Manufactures are various, and are carried on chiefly in Wilmington and its vicinity. Iron goods, iron and wooden steam and sailing vessels, cars, bridges, structural steel, fibre products, crates and boxes for the canneries, gun-powder, paper, pulp, leather, carriages, machinery, cotton and woolen goods, and flour are the leading products. Seaford ships immense quantities of oysters, and Lewes is a station for menhaden and other fisheries. Oyster growing and fishing are important industries. Large quantities of timber are cut for ship building and railroad ties. A bill is now in Congress providing for increasing the depth and width of the Chesapeake and Delaware Canal, which connects the upper portions of the bays, and converting it into a free ship canal, which would greatly facilitate traffic between Philadelphia and Baltimore, and other ports in Maryland and Virginia. Other projects are being pushed for the drainage of swamp lands in Sussex County, and for the building of good roads, New Castle County alone spending \$600,000 for the latter purpose.

The number of newspapers and periodicals published in Delaware is 35, including 3 daily, 27 weekly, 1 semi-monthly and 4 monthly. The places of publication number 14, of which 3, designated by a dagger (†), are county seats.

DISTRICT OF COLUMBIA.

Population 331,069.

(For map see map of Maryland).

The DISTRICT OF COLUMBIA is inclosed by the state of Maryland, except on the southwest, which is bounded by the Potomac River; land area, 60 square miles. Surface undulating, with a fine fertile soil on the small portion, about twenty per cent., which is available for cultivation. Floriculture, truck growing and dairying are the chief agricultural industries, flowers and foliage plants leading with a production of fully sixty per cent. of the total value of all agricultural products. The number and total area of the farms are declining year by year. The United States Government has large plants for engraving, printing, bookbinding and the manufacture of various articles, employing altogether about 15,000 persons. The private manufacturing industries are varied, the most important being the brewing of malt liquors, and the manufacture of ice, pottery, brick and clay products, lumber and planing mill products, marble and stone, roasted and ground coffee and spices, flour, structural iron work, castings and bottled mineral and carbonated waters. A considerable coasting trade is carried on.

The number of newspapers and periodicals published in the District of Columbia is 77, including 7 daily, 22 weekly, 37 monthly, 4 bi-monthly and 7 quarterly.

POPULATION: U. S. Census, 1910. ‡ Size of page.

FLORIDA.

Population 752,619.

STATE CAPITAL, TALLAHASSEE.

FLORIDA is bounded north by Alabama and Georgia, east by the Atlantic Ocean, south and west by the Gulf of Mexico and Alabama. The peninsular portion of the state is about 375 miles long by an average breadth of 90 miles; the upper portion 360 miles from east to west by from 30 to 90 miles from north to south; land area, 54,249 square miles. The surface is diversified with numerous lakes, the largest, Okeechobee, being 46 miles long by about 30 miles broad. There is a coast line of about 1150 miles, while the water surface comprises one fifteenth of the whole. The larger portion of that part of the peninsula south of Lake Okeechobee is occupied by the Everglades, an evergreen marsh or swamp, fifty-five miles wide by one hundred and fifty miles long, and covered with a dense growth of "saw grass," eight to ten feet high and so thick as to be practically impenetrable, except where it is intersected by numerous winding channels. The surface is dotted with innumerable islands of from half an acre to hundreds of acres in extent, almost all being subject to overflow during rainy seasons. The state has made good progress on a project for draining the Everglades, by cutting through the rim of limestone rock which confines the waters, and by controlling the overflow of Lake Okeechobee. This project when carried to completion, will add millions of acres of most fertile soil to the area of tillable land. From the northern end of the swamp to Georgia is mostly a dead level, with occasional undulations and small hills. The pine lands, which cover the greater part of the state, are studded, at intervals of a few miles, with stretches of extremely rich soil, called hammocks, varying in extent from small patches up to thousands of acres. The swamp lands, when drained, are remarkably fertile. Sugar cane is raised chiefly along the Gulf coast. Both long and short staple cotton and tobacco are grown, corn, rice and oats are the principal cereals. Oranges, lemons, limes, pineapples, figs, olives, and grapes flourish luxuriantly; garden vegetables are largely produced for the northern market. The total value of the farm products is nearly \$50,000,000. Cattle require little care, are not housed in winter, and large numbers are raised and shipped to Havana. Hogs form an important part of the live stock. Sponges are found on many parts of the coast. Pine lumber, ship timber, tar, rosin, turpentine, cotton seed oil and cake, palmetto hats and braids are manufactured; salt is made by solar evaporation; cigars are manufactured at Key West and Ybor City, near Tampa, in large quantities. Naval stores form a very important part of the products, the value of turpentine and rosin alone amounting to over \$15,000,000 each year. Immense deposits of phosphate rock underlying parts of several counties furnish material for large fertilizer industries, the product being shipped not only to other states but to European countries. The total product is estimated at \$1,600,000 annually. The fisheries are of great value, the inland and coast waters being full of fish; oysters are abundant, and the sponge and coral fisheries are of considerable importance, the annual production of sponges being estimated to have a value of \$2,000,000. The winter climate of Florida is exceedingly mild, frost being of rare occurrence, and it has become a most fashionable resort at that season. The Coast Line Canal, with a depth of five feet from Miami to Jacksonville has been completed. It is 370 miles long. A ship canal across the state from Jacksonville is under consideration and U. S. engineers have made preliminary surveys.

The number of newspapers and periodicals published in Florida is 176, including 19 daily, 3 semi-weekly, 144 weekly and 10 monthly. The places of publication number 93, of which 46, designated by a dagger (†), are county seats.

GEORGIA.

Population 2,609,121.

STATE CAPITAL, ATLANTA.

GEORGIA is bounded north by Tennessee and North Carolina, northeast by South Carolina, southeast by the Atlantic Ocean, south by Florida, and west by Alabama. Its extreme length from north to south is 320 miles, extreme breadth 251 miles; land area, 58,980 square miles. The surface is varied; along the coast, it is intersected by numerous rivers and sounds, and the country for miles inland is a succession of ridges of pines and live oaks and swamps of cypress; the great Okeefnokee swamp is in the southeast. Back from the coast is a stretch of sandy land, mostly pine barrens, and yielding large amounts of timber and naval stores. A series of terraces bring the land in the middle of the state to about 575 feet above tidewater, from which elevation it rises toward the north more rapidly, until it becomes mountainous, being there crossed by spurs of the Appalachians. The soil of the islands is sandy, producing sea island cotton; that of the mainland, rich alluvial, producing corn, cotton, and rice; the middle region is red loam, yielding good cotton, corn, tobacco, etc. In the north there is much fertile soil; grain, tobacco, fruits, and vegetables are largely grown, but not much cotton, which is mainly raised in the central, west central, and southwestern regions. Georgia's fruit and vegetables, especially peaches and watermelon, are greatly celebrated and enjoy a great sale in the northern markets. In the production of cotton Georgia ranks second among the states, her crop in 1909 reaching nearly 2,000,000 bales with a value of \$150,000,000 for cotton and \$22,000,000 for cotton seed. Sugar cane is grown in the south, and considerable pork fattened, mainly for home consumption; sweet potatoes are largely produced; wool is prominent, but corn and cotton are the leading staples. Wheat and oats are grown in considerable quantities. Among the leading industries are lumber, flour, boots and shoes, carriages, cotton and woolen goods, wool carding and cloth dressing, leather, saddlery, metallic wares, furniture, castings, machinery, farm implements, etc. There are many cotton factories in the state. The most important are at Augusta and Columbus, the other chief seats of the cotton manufacture are Athens, Atlanta, Decatur, Macon, Savannah, and West Point. Savannah is the most important South Atlantic seaport. The city is the seat of a large foreign and domestic commerce. Its railroads extend to all parts of the country, and its steamships ply daily to the principal North Atlantic ports. Savannah is the largest naval stores and second largest cotton and rice port in the United States, and holds an important place in the manufacture and shipment of lumber and fertilizers. Atlanta has large iron works, and has developed into a great manufacturing city. Rome, Dalton, Marietta and Thomasville are manufacturing towns. The iron and steel trade is overtaking the cotton manufacture in importance. Other important branches of manufacture are lumber, flour, pulp, etc. Darien, Brunswick and St. Marys manufacture and export lumber. Minerals: bituminous coal in the northwestern portion; immense deposits of iron ore in Bartow and Cherokee counties; copper ore in Gilmer county; gold is most plentiful in Cherokee, Carroll, Cobb, and Lumpkin counties, the annual production being about \$50,000; silver, lead, and many other minerals, granite, marble, gypsum, slate, and petroleum; excellent marble in Pickens and Cherokee counties; hydraulic limestone in Bartow county. There are numerous mineral springs of which the Indian Spring in Butts county and the Bowden Lithia, or Salt Spring, in Douglas county, are the best known. The development of the rich marble resources in north Georgia during recent years has been wonderful. There are inexhaustible quarries of the finest marble in Pickens, Cherokee, Murray and adjoining counties, and millions of dollars have been invested in opening them.

The number of newspapers and periodicals published in Georgia is 374, including 28 daily, 2 tri-weekly, 12 semi-weekly, 269 weekly, 2 fortnightly, 8 semi-monthly, 49 monthly, 3 bi-monthly and 1 quarterly. The places of publication number 297, of which 137, designated by a dagger (†) are county seats.

IDAHO.

Population, 325,594.

STATE CAPITAL, BOISE.

IDAHO is bounded north by British Columbia, east by Montana and Wyoming, south by Utah and Nevada, and west by Oregon and Washington; its length from north to south is about 480 miles, width varying from 44 to 325 miles; land area, 84,313 square miles. Surface is diversified, mountainous in the northern and central portions with arid plains in the south. In the southeast is a volcanic region, abounding in geysers and saline springs. The valley lands in many parts of the state are unsurpassed in fertility, and almost all crops of the temperate zone can be successfully grown, except those which are classed as sub-tropical. Fruits of all kinds, except those of the citrus group, are produced in abundance, and their quality is unexcelled. The chief products are wheat, live stock, fruits, potatoes, sugar beets, hay, oats and barley. The wheat crop in 1909 was over 12,000,000 bushels, that of oats 6,000,000 bushels, barley 2,400,000 bushels, potatoes 3,200,000 bushels, hay 1,320,000 tons. The live stock produced was worth over \$9,000,000, the fruit over \$7,000,000. Mutton and wool are largely produced. The production of sugar beets and the manufacture of beet sugar form an important industry. The output of beet sugar in 1909 was over 32,000 tons. Many of the arid plains have been irrigated, and make excellent wheat growing districts. There is abundant water in the streams and lakes to reclaim the 10,000,000 acres which are susceptible of irrigation. The water power is said to be sufficient for all the needs of the state for transportation, manufacturing and all other purposes requiring power. Irrigation work to cost about \$150,000,000 has been planned and work already done on the various projects to the value of \$30,000,000. Dry farming is successfully carried on in various parts of the state. It is estimated that about 10,000,000 acres can be made productive by this means. The forest-covered area is very large, embracing about 20,000,000 acres, much of the timber "lodge pole" pine of small diameter, but growing very thickly. Other trees are fir, spruce, cedar, etc., some of these being very large. The total value of the forest products for 1909 was over \$8,000,000. Gold, silver and lead are plentiful in all parts of the state and are largely produced, especially lead, the value of the output of this metal in 1909 being \$9,356,571, and silver, the yield of which was valued at \$3,025,617. Gold to the amount of almost \$1,500,000 was produced in the same year, and copper worth over \$1,000,000. Coal and zinc are also mined, and there are immense deposits of coal and phosphate rock which have not yet been developed. Manufacturing industries are increasing with the rapid extension of transportation facilities, and the increase of population.

The number of newspapers and periodicals published in Idaho is 152, including 10 daily 6 semi-weekly, 128 weekly, 7 monthly and 1 quarterly. The places of publication number 102 of which 27, designated by a dagger (†), are county seats.

 POPULATION: U. S. Census, 1910. * Estimated. † County Seal. ‡ Size of page.

ILLINOIS.

Population, 5,638,591.

STATE CAPITAL, SPRINGFIELD.

ILLINOIS is bounded north by Wisconsin, northeast by Lake Michigan, east by Indiana, southeast and south by Kentucky, and west by Missouri and Iowa; extreme length north and south 385 miles; extreme breadth 218 miles; land area, 58,980 square miles. The surface is mostly level table land, inclining gently toward the south, with bluffs along the principal rivers. A small tract in the northwest, around Galena, is somewhat broken, and a low mountain ridge extends across the southern end from Grand Tower, on the Mississippi River to Shawneetown, on the Ohio, about 850 feet above sea level. This is a great fruit region. The prairies are sometimes level, but generally undulating. More than two thirds of the state is a productive bituminous coal field, the output in 1909 reaching 49,163,710 tons, the largest coal production of any state except Pennsylvania. In the production of petroleum, being credited with more than 38,000,000 barrels in 1908, it is exceeded only by California. The iron ore is good only when mixed with Michigan and Missouri ores. Lead and zinc are mined extensively in the northwest. Copper ore, gypsum and marble are found in various places. Limestone and freestone abound. The prairie soils are deep and fertile; that of the river bottoms often seems inexhaustible. A tract called the American Bottom, extending along the Mississippi River a length of ninety miles by about five in breadth, has an alluvial soil about twenty-five feet in depth. Illinois is unexcelled as an agricultural state, and is among the first in manufactures. According to the 1900 census Illinois had five out of the nine counties in the United States which produced the greatest value in farm crops, the counties being McLean, Champaign, La Salle, Livingston and Iroquois. Spring and winter wheat, corn, and other cereals, dairy produce, wool, and hay, are leading products. Some tobacco is grown. Illinois stands first in corn, The 1909 crop was 369,770,000 bushels with a value of over \$200,000,000, surpassing the crop of Iowa, the next largest, by 70,000,000 bushels. The state is second in oats, of which in 1908 she grew 94,300,000 bushels, and in poultry, in both of which she is exceeded only by Iowa. The total value of farm lands and buildings, according to the 1910 census, is over \$3,500,000,000, an average of \$108.12 per acre, the highest value of any state. The industrial pursuits embrace a wide range of articles, and the seats of manufacture are distributed generally throughout the state. The leading articles of manufacture include iron and steel and their products, woodenware, furniture, farming implements, cars and carriages, flour, watches, woolen goods, bridge work, lumber, tiles, glassware, soap, malt and distilled liquors, etc. Illinois produces fifty per cent. more pig iron than Alabama. In 1905 the total production of iron and steel goods was valued at \$87,352,761. The total value of manufactured goods in 1905 was over \$1,400,000,000. Illinois is exceeded, in this respect, by only New York and Pennsylvania. Fishing interests are extensive on the large rivers and on Lake Michigan. They center chiefly at Chicago, which is also the center of an immense business in live stock and lumber, and the slaughtering and meat packing industries in the country. The value of the meat products from these establishments in 1905 was \$317,206,082. Natural gas in large quantities has been discovered at various points in the state. The state is amply supplied with transportation facilities, by rail, river and lake. It has 12,216 miles of railroad within its borders.

The number of newspapers and periodicals published in Illinois is 1,765, including 170 daily, 3 tri-weekly, 31 semi-weekly, 1,073 weekly, 5 fortnightly, 26 semi-monthly, 433 monthly, 1 six times a year, 1 semi-quarterly, 7 bi-monthly and 13 quarterly. The places of publication number 645, of which 102, designated by a dagger (†), are county seats.

INDIANA.

Population 2,700,876.

STATE CAPITAL, INDIANAPOLIS.

INDIANA is bounded north by Michigan and Lake Michigan, east by Ohio, south by Kentucky, and west by Illinois. Its extreme length north and south is 276 miles; average breadth 140 miles; land area 35,910 square miles. About two-thirds of the surface is undulating or level prairie; near the Ohio and other rivers the surface is hilly. In the extreme northwest there is a sandy tract, with considerable marsh land, where peat abounds and is an article of considerable commercial importance. The northeast abounds in oak openings and prairie land, interspersed with many small lakes. The soil is generally fertile, much of it exceedingly so; the richest is found along the Wabash, White, and White Water rivers. There is abundance of coal of good quality, the annual output being about 12,000,000 tons. The iron manufacture is extensive, Indiana coal being particularly suited to this industry, but the ores used come mainly from the Lake Superior region, Missouri, and Tennessee. Indiana has some bog ore and local deposits of better grades which have been worked to some extent. There are some salt springs, good sandstone, limestone, fire brick, potter's clays, and kaolin. Limestone is particularly abundant, being practically inexhaustible in quantity. Indiana ranks high as a grain producing and stock raising state. Corn, wheat, oats, tobacco, and potatoes are raised in large quantities. Corn, of which 5,120,000 acres were planted in 1911, is the largest single product; cattle, hogs and horses are raised in all parts of the state. Butter, wool, hay, maple sugar, and sorghum molasses are also important products; lumber is largely exported. Manufactures are numerous and extensive, the principal goods being flour and grist mill products, lumber, woollen goods, furniture, carriages and wagons, iron and iron ware, machinery, agricultural implements, pork products, liquors, metallic wares, leather, boots, shoes, clothing and automobiles. The manufacturing of automobiles is now an immense industry in Indiana, which is surpassed by only one state in the number built. The natural gas belt, said to be the largest known in the world, extends over 21 counties, or more than 6,000 square miles. No state is better supplied with transportation facilities, as it lies directly in the path of almost all the great trunk lines, which have branches extending into all parts of the state; and fully half the borders of the state are on navigable waters.

The number of newspapers and periodicals published in Indiana is 787, including 158 daily, 5 tri-weekly, 23 semi-weekly, 525 weekly, 6 semi-monthly, 61 monthly, 1 bi-monthly and 8 quarterly. The places of publication number 374, of which 91, designated by a dagger (†), are county seats.

KANSAS.

Population 1,690,949.

STATE CAPITAL, TOPEKA.

KANSAS is bounded north by Nebraska, east by Missouri, south by Oklahoma, and west by Colorado. Its length from east to west is 410 miles, and from north to south 207 miles; land area, 81,700 square miles. The surface is chiefly undulating in the east, while the western part has a rolling and varied surface, and until recently has been devoted to stock raising, but irrigation works are gradually changing it to an agricultural district of great fertility. There are no mountains, very few lakes, and those small and shallow; no marshes but salt marshes, and these are valuable. The bottom and table lands are chiefly a rich black loam, and highly productive. When the state was settled only five per cent. of the area was forest, and this was distributed mainly along streams and in occasional groves and small tracts; but it is estimated that the area of forest trees has since doubled by voluntary growth, transplanting, and by seed. Kansas is rapidly developing her rich mineral resources. She is said to produce fully half of the zinc of the United States, which would give Kansas an output of from 90,000 to 100,000 tons; coal is annually produced to the amount of over 6,000,000 tons; petroleum, 1,000,000 barrels, and rapidly increasing; Portland cement, 750,000 barrels; clay products to the value of more than \$1,000,000, and she stands third among the states in production of salt. But Kansas is primarily an agricultural state. Winter and spring wheat, corn, rye, oats, live stock and potatoes are the chief products, while broom corn, sorghum, flax, hemp, castor beans, sugar beets, tobacco, and hay are also largely produced. Within the past twenty years, the growing of alfalfa has become one of the chief agricultural industries of the state, and large quantities of alfalfa hay are shipped east. Alfalfa meal mills have been established in many places, and the product is a valuable stock food which is becoming more generally used each year. The wheat crop of 1909 was the largest in the country, over 80,000,000 bushels; corn was 147,005,120 bushels; oats and other grains are also largely grown. Cattle raising is a prominent industry, and sheep farming is increasing in the western part. The number of cattle in the state in 1909 was 2,690,627; of hogs, 2,157,048, of horses, 958,325, and of sheep, 159,271. The total value of the live stock products of the state in 1909 was \$90,000,000, and the value of all agricultural and animal products was \$307,538,164.91. The live stock market and the packing house industry in Kansas City, Kansas, are exceeded only by Chicago. Dairy products are increasing rapidly, and in 1909 had a value of \$12,344,099. Over 1,000,000 pounds of honey is gathered annually. The manufacture of sugar from sugar beets and the making of glass are important industries. Manufactures are being developed, and the number of establishments is rapidly increasing, especially in the southeastern part of the state, where industrial enterprises are greatly assisted by the strong flow of natural gas, the most extensive gas belt on the continent being situated in that district.

The number of newspapers and periodicals published in Kansas is 733, including 67 daily, 1 tri-weekly, 8 semi-weekly, 628 weekly, 3 semi-monthly, 23 monthly, 1 bi-monthly and 1 quarterly. The places of publication number 450, of which 105, designated by a dagger (†), are county seats.

KENTUCKY.

Population 2,259,905.

STATE CAPITAL, FRANKFORT.

KENTUCKY is bounded north by Ohio and Indiana, northwest by Illinois, east by West Virginia and Virginia, south by Tennessee, and west by Missouri; greatest length from east to west, 350 miles; greatest breadth, 178 miles; land area, 40,000 square miles. The surface in the east and southeast is mountainous, being broken by numerous parallel ranges of the Alleghany system, with deep and fertile valleys. Northwest of this section, and in the centre of the state, is the famous blue grass region, with a gently undulating upland surface, and deep valleys at the rivers. Between the Green and Cumberland rivers the surface is level and known as the "Barrens," from the scarcity of heavy timber. The western part is generally level with slight undulations. The soil of the whole state is remarkably fertile; that part between Lexington and the Ohio river is known as the "Garden of Kentucky." Cereals grow to greater perfection in Kentucky than in almost any other state. The chief products are tobacco, hemp, corn, wheat, oats, rye, barley and potatoes. The corn crop averages about 55,000,000 bushels, and the wheat crop about 9,000,000 bushels annually. Hemp averages over 6,000,000 pounds. Kentucky has acquired a world wide fame for its thoroughbred horses, shorthorn cattle, and mules. Kentucky, until recently, was said to raise more mules than any other state, but has been far surpassed, in late years, by Texas. The wool clip is very large, and immense numbers of hogs are raised. Dairy products are very extensive; also sorghum molasses, maple sugar, honey, and wax; some cotton is raised in the southwest near the Tennessee line. Tobacco is of great importance, about one-fourth of the American crop being grown within the state. In 1908, Kentucky grew 195,600,000 pounds, over sixty millions more than North Carolina, which was second in tobacco production. Louisville is the greatest leaf market in the world. Coal, iron, limestone, building stones, clays, etc., are abundant. The forests are extensive and valuable, although not more than one per cent. of the timbered land is virgin forest. There is a large quantity of valuable timber of second growth, but as it is being cut off at least twice as fast as it grows, the lumbering industry will soon be a thing of the past unless modern methods of forestry are introduced. The growth consists chiefly of the various species of oak, with other valuable hardwoods. In southeastern Kentucky there are 10,000 square miles underlaid with coking and bituminous coals of superior grade. The greatest known area of coking and fine cannel coals exists at the head of the Kentucky river. The total coal production in 1907 was 10,207,000 tons. Large quantities of so-called Red River and Oriskany ores used in the manufacture of car wheels and other fine iron products are annually mined, the product averaging over 50,000 tons annually. Petroleum and natural gas are found in various places. The manufacturing interests are varied and important, and are carried on chiefly in the towns on the Ohio river; an extensive industry is the smelting and working of iron, while all wood manufacturing industries flourish, especially those making railroad ties, spokes, handles, staves and headings. Whisky is an important product of the central counties. Salt is made from springs in the mountain counties.

The number of newspapers and periodicals published in Kentucky is 331, including 31 daily, 2 tri-weekly, 25 semi-weekly, 231 weekly, 10 semi-monthly, 27 monthly, 4 quarterly and 1 three times a year. The places of publication number 154, of which 117, designated by a dagger (†), are county seats.

LOUISIANA.

Population 1,656,388.

STATE CAPITAL, BATON ROUGE.

LOUISIANA is bounded north by Arkansas and Mississippi, east by Mississippi and the Gulf of Mexico, south by the Gulf of Mexico, and west by Texas. Its extreme length from east to west is about 300 miles, breadth 240 miles; land area, 45,966 square miles. Surface is generally low and level. There are low hills in the north and northwest, from which the land slopes gradually to the Mississippi and the Gulf. Much of the land along the river is below the water level during the spring freshets, and is protected from overflow by the levees, which are built on both banks below Baton Rouge, and on the west bank throughout the state. Many of the principal rivers and bayous are protected in like manner so that but a small portion of the land is subject to overflow. The extent of navigable water surpasses that of any other state in the Union, as also does the area of alluvial land. The soil of the river bottoms is exceedingly fertile, and yields large crops of cotton, sugar cane, rice, etc. The prairies are productive, and afford good pasture in places. The hilly section yields good cotton crops, but about half is covered with pine barrens. The wooded area of the state is estimated at half of the total area. Louisiana has a greater area of long leaf pine and more cypress timber than any other state. There are also large quantities of oak, hickory, and other hard woods. The great staples are cotton, sugar, rice, and corn, but other crops of infinite variety are grown abundantly. Cotton varies much in production, having ranged in five years between 1,110,000 bales and 508,000 bales, which was the 1908 crop, but the average is nearly 1,000,000 bales. The state produces nearly all the cane sugar made in the United States. The sugar product has rapidly increased of recent years, and in 1909 reached a total of 350,000 tons. The yield of rice is very large, and the quality excellent. The genuine Perique tobacco is grown only in this state. Cattle raising is an important interest. The fisheries, especially oyster fisheries, are large and valuable. The leading manufactures are refined sugar, cotton goods, lumber, naval stores, castings, machinery, clothing, flour mill products, cotton seed oil, and beer. Its commerce, carried on chiefly through New Orleans, is extensive and important. Iron ores, ochre, gypsum, lignite coal and marl are abundant; large deposits of sulphur exist in Calcasieu Parish, the deposits being among the largest in the world, and the sulphur produced is 98 per cent. pure. Immense deposits of rock salt are found, much of it being 99 per cent. pure, on Petit Anse and Weeks islands. There are numerous oil wells in the western part of the state, and the natural gas fields are extensive and their development has been the cause of a rapid increase in manufacturing industries, especially in and near New Orleans. On account of the great extent of navigable waters and the net work of railroads penetrating every part of the state, the products of her fields, mines, factories and fisheries are readily and rapidly moved, and none of the state's resources need be neglected for lack of transportation facilities.

The number of newspapers and periodicals published in Louisiana is 223, including 19 daily, 1 tri-weekly, 7 semi-weekly, 171 weekly, 1 fortnightly, 5 semi-monthly and 19 monthly. The places of publication number 107, of which 56, designated by a dagger (†), are county seats.

MAINE.

Population 742,371.

STATE CAPITAL, AUGUSTA.

MAINE is the most northeasterly state in the Union, bounded on the north by Quebec and New Brunswick, east by New Brunswick, south by the Atlantic Ocean, and west by New Hampshire and Quebec; its extreme length is 302 miles, width 285 miles, which is extended to 2500 miles by the many indentations; land area, 29,895 square miles. The northern part is mainly a wilderness of forest land with rugged surface and groups of detached mountains; thinly peopled, except in the fertile tracts of Aroostook county. In the northeast, on the St. John's river are several French Canadian settlements. The southern part is varied, seldom much broken, and has tracts of great fertility, while others are only moderately fertile, especially in the southeast. The potato crop is large and excellent, and Maine potatoes bring high prices as seed potatoes; hay is an important product, 1,260,000 tons being grown in 1908; corn thrives in the south, and winter wheat is grown to some extent in the northeast; oats are very fine and prolific, and barley next. Dairy products are of great value. Large numbers of horses and cattle are exported, Wool is abundant and of good quality. The principal fruit is the apple, which is largely grown. The state holds a prominent position in the lumber trade; fisheries are important, and the canning of fish, lobsters, green corn, fruits, and vegetables is extensively carried on. The seaboard towns enjoy a large coasting and West Indian trade. Large quantities of lime are exported from Camden, Rockland, and Thomaston. Granite is extensively quarried at various points. Slate is quarried in large quantities at Brownsville and Monson. Ice is an important and profitable article of export. Maine is a fishing, hunting and summer resort of considerable popularity, and sportsmen and summer visitors are said to leave behind them every year from \$12,000,000 to \$15,000,000. Manufacturing industries are of great importance. Water power is abundant and regular, and there is an enormous amount of undeveloped power of this class available for manufacturing purposes. The leading articles of manufacture are cotton goods, lumber, woolen goods, leather, paper, boots and shoes, foundry and machine shop products, ships, agricultural implements, etc. The chief seats of the lumber trade are Augusta, Bangor, Biddeford, Calais, Eastport, Fairfield, Lewiston and Machias; of cotton manufacture, Augusta, Biddeford, Lewiston, Brunswick, Saco and Waterville; of ship building, Bath, Bangor, Belfast, Calais, Damariscotta, Machias, Rockland, Thomaston and Waldoboro. Woolens are made at Bridgton, Dexter, Dover, Lewiston, Madison, Oxford, Sanford, and Warren; boots and shoes at Auburn, Bangor, Fairfield, Farmington, Lewiston, Richmond, Skowhegan, Norway, Paris, and Mechanic Falls. Bangor and Portland have foundry and machine shops, furniture factories, and steam planing mills. Extensive hemlock sole leather tanneries are located at Brookton, Grand Lake Stream, Kingman, Lincoln, Lowell, Medway, and Winn. Large spool factories are located at Foxcroft, South Lincoln and Willimantic. Apart from these special branches of trade, Belfast, Ellsworth, Gardiner, Hallowell, Portland, Rockland, Skowhegan, and Waterville are seats of varied and extensive manufactures.

The number of newspapers and periodicals published in Maine is 137, including 13 daily, 1 tri-weekly, 1 semi-weekly, 95 weekly, 1 semi-monthly, 22 monthly and 4 quarterly. The places of publication number 71, of which 15, designated by a dagger (†), are county seats.

MARYLAND.

Population 1,295,346.

STATE CAPITAL, ANNAPOLIS.

MARYLAND is bounded north by Pennsylvania, east and southeast by Delaware and the Atlantic Ocean, west by West Virginia, and south and southwest by Virginia, West Virginia, and the District of Columbia. The Chesapeake Bay divides the greater part of it into two unequal parts, known as the Eastern and Western Shores. Its extreme length from east to west on its northern border is 198 miles, and its width, following the course of the Potomac, varies from 3 or 4 miles to about 120 miles; land area, 9,860 square miles. The surface of the Eastern Shore is mostly level, and in parts low and swampy, but towards the north rocky and broken. The Western Shore, between the Potomac River and Chesapeake Bay, presents mainly the same general features. The northwest is very mountainous; five or six ridges of the Alleghenies, principally the Blue and Laurel, traverse that section. In the extreme west are the beautiful elevated valleys named "glades." The soil of the Eastern Shore and the lower part of the Western is generally light and sandy, well adapted for peaches and market gardening, that of the central and northern parts very rich, yielding immense crops of tobacco, wheat, oats, and corn. Wheat and corn are the chief crops. Dairy products are next in value. A very important agricultural industry in the eastern portion of the state is the growing of truck and fruits for shipment to the northern cities and for the numerous canneries in the state. Especial attention is given to tobacco growing in the lower counties of the Western Shore. Over 18,000,000 pounds were grown on 26,000 acres in 1908. The mountain slopes are thickly wooded. The oyster fisheries are more extensive than in any other state. Clams, herring, menhaden, crabs, shad, and other salt and fresh water products bring the total value of the annual fishery output to over \$4,000,000. The value of the fisheries of the whole of Chesapeake Bay and its tributaries is estimated at \$10,000,000 annually. The manufactures are very numerous—canned goods (fruits, meats, and oysters,) being one of the most important. The manufacture of boots and shoes, bricks, cement, chemicals, clothing, cotton and woolen goods, cooperage, tobacco, flour, leather, lumber, machinery, and metallic wares are leading industries. Its commerce is confined principally to Baltimore, whose foreign trade is very important, amounting to \$150,000,000 yearly. Maryland is bountifully supplied with minerals of great variety. Maryland coal is used extensively in all the Atlantic states, the product in 1909 being over 6,000,000 tons. Fire clays are abundant, those of Mt. Savage having a wide reputation. Brown hematite is found in the Trenton limestone, and bog ore on the Eastern Shore. There are numerous quarries of marble, granite, serpentine, and other building stone, limestone for burning, and roofing slate. Kaolin is found in Anne Arundel county; magnesite near Baltimore, from which large quantities of magnesia, carbonate, and epsom salts are manufactured. There are many other minerals, including glass sand, mineral waters, alum, amber, barytes, breccia, soap stone, kaolin, mica, cements, tripoli, chromium, hone stone, mill stone, iron pyrites, ochres, etc., some of which are very plentiful. Gold and copper exist in small quantities.

The number of newspapers and periodicals published in Maryland is 189, including 16 daily, 1 tri-weekly, 2 semi-weekly, 117 weekly, 1 fortnightly, 6 semi-monthly, 29 monthly, 1 bi-monthly, 1 five times a year and 6 quarterly. The places of publication number 62, of which 23, designated by a dagger (†), are county seats.

MASSACHUSETTS.

Population 3,326,416.

STATE CAPITAL, BOSTON.

MASSACHUSETTS is bounded north by Vermont and New Hampshire, east by the Atlantic Ocean, south by the Atlantic Ocean and by Rhode Island and Connecticut, and west by Rhode Island and New York. Its extreme length is 160 miles, and breadth from 47 to about 90 miles; land area, 8,040 square miles. The surface is greatly diversified; mountainous in the extreme west, hilly and broken in the east and northeast, and in the southeast mainly low and sandy. Toward the west is the fertile valley of the Connecticut river. The mountains are the Taconic and the Hoosac (continuations of the Green Mountain ranges of Vermont), with detached members of the White Mountains. The soil is generally somewhat sterile, but energy and intelligence have succeeded in making it very productive. The Connecticut valley, however, can hardly be excelled for fertility. The chief agricultural productions are dairy products, potatoes, hay, maple sugar, and honey. Seed potatoes grown in the "hill towns" of Hampshire and Berkshire counties are much in demand for planting in the lower lands of Massachusetts and Connecticut. Corn is raised chiefly for home consumption. Of grain, the crop of oats, rye, and barley is large. The tobacco crop, grown entirely in the Connecticut valley, is large, over 7,000,000 pounds being grown in 1908. It produces cigar wrappers of good quality, excelled in this country only by those grown further down the river, in Connecticut. The fishery interests are larger than any other state, and almost half the fishing vessels owned in the United States belong to Massachusetts. Manufactures, however, constitute by far the largest of its industries. It ranks fourth among the states in the total value of its manufactured goods, although it stands seventh in point of population. Not only is it the leading center of the American cotton, boot, shoe, leather, wool, and paper trades, but all the large towns are busy seats of more or less numerous branches of manufacture. The largest industries are the cotton and shoe trades, in each of which, in normal years, the product is nearly \$200,000,000. About 100,000 persons are employed in the cotton mills, and over 70,000 in the shoe factories. The chief seats of the ship building interests are Boston, Quincy, Newburyport and Salem. The state is rich in building stone, principally granite, which is largely quarried at Rockport, Graniteville, Fall River, Monson, and Quincy; a handsome brown sandstone in the Connecticut valley, and marble and limestone in Berkshire county, in which there are also deposits of excellent iron ore. Except Rhode Island, it is the most densely peopled state. Fall River, Lowell, New Bedford and Lawrence are, in the order named, the chief cotton manufacturing centers of the country. The Cape Cod Canal, an eight mile cut between Buzzard's Bay and Sandwich, is under construction, and will be finished about 1913. It will enable coasting vessels to avoid the long trip around the Cape Cod peninsula.

The number of newspapers and periodicals published in Massachusetts is 653, including 65 daily, 2 tri-weekly, 6 semi-weekly, 374 weekly, 3 fortnightly, 1 three times a month, 9 semi-monthly, 134 monthly, 8 bi-monthly, 30 quarterly, and 1 three times a year. The places of publication number 204, of which 20, designated by a dagger (†), are county seats.

NEW BEDFORD†, pop. 96,652 (L 7); BRISTOL Co. (S.E.), pop. 318,573. On Acushnet R., near Buzzard's Bay, 56 m. S. of Boston. N. Y., N. H. & H. R.R. Tel. Exp. Banks. Port of entry, with commodious harbor, has whale fisheries, with an annual product of over \$800,000, and is a large coal distributing center. New Bedford has sixty-five cotton and yarn mills, operating over 2,500,000 spindles, about ten per cent of the whole number in the United States. There are over 50,000 looms for weaving cotton goods, and more fine cotton goods are produced here than in any other city. The mills use about 300,000 bales of cotton in one year. There are also silk and woolen mills, twist drill, copper, leather, cordage, glass, iron, paper, soap and candle, silverware, shoe, screw, sash and door, sperm and whale oil, carriage, chair and eyelet factories, numerous glass cutting establishments and many other industries.

MICHIGAN.

Population 2,810,173.

STATE CAPITAL, LANSING.

MICHIGAN is bounded north by Lake Superior, east by Lakes Huron, St. Clair, and Erie, and their connecting rivers, south by Ohio and Indiana, and west by Lake Michigan and Wisconsin; land area, 57,430 square miles. It consists of two peninsulas, of which the southern is the principal seat of wealth and population, its length, north to south, being about 300 miles; width, about 200; coast line of state on lakes not less than 1600 miles. This part of the state is a very level region, abounding in lakes and streams, with very extensive forests of pine and other timber in the north, oak openings or natural parks in the south, and prairies in the southwest. The soil contains sufficient sand to make it easily tilled, and few sections excel it as a farming region. In the west and southwest is the great fruit belt. Beans, winter wheat, oats, and potatoes are abundant, and of excellent quality; corn and other cereals are largely grown. In 1909 the crop of wheat was estimated at 12,000,000 bushels, corn 53,000,000 bushels, oats 41,000,000 bushels, potatoes 26,000,000 bushels, beans, over 6,000,000 bushels. Dairy products are very valuable. Wool is raised in very large quantities, the product being about 15,000,000 pounds; livestock is plentiful. Peppermint and celery are raised extensively in the southwest, and grapes in the south. Sugar beets are grown in large quantities, and 79,597 tons of beet sugar was made in 1909. The surface of the northern peninsula is somewhat rough and mountainous, with a good soil in most parts outside the mining regions; its mineral wealth is very great, especially in copper and iron. Large quantities of iron ore are mined and shipped to Pennsylvania, Ohio, Indiana, and Illinois to be smelted either alone or with the inferior ores found in those states. Marquette, Ishpeming, Negaunee, Gladstone, St. Ignace and Escanaba are the principal points of shipment. By far the most important copper mines of the country, and what is claimed to be the largest iron mine in the world, are in this state. The production of copper in Michigan is almost equal to that of Montana, and the two states combined have more than half the total output of the country. Michigan produced 111,134 tons in 1908. There is a large quantity of coal in the lower peninsula, used chiefly for local and railroad purposes, the production in 1907 reaching 1,898,446 tons. The salt producing territory covers about 9,500 square miles, and the annual product is not far from 5,000,000 barrels, which is more than double that of New York; it is procured from artesian wells, and the Saginaw river and the mouth of the Manistee are the chief centres of manufacture. About 100,000 barrels of dairy salt are produced, pronounced by competent judges to be the best in the world. 3600 persons are employed in the salt manufacture. Gypsum, fire clay, and glass sand are also found. The manufacture of cement is becoming a very important industry, over 3,000,000 barrels being turned out each year. Michigan ranks high in the value and extent of its lumber product; the largest interest centering in East Saginaw. The lumber product, however, is rapidly falling off, through the rapid and wasteful reduction of the forest area. The fisheries on the great lakes are very valuable, the fish sold each year having a value of nearly \$2,000,000. \$2,500,000 is invested in this industry, which keeps nearly 7000 men employed. Manufactures are important and varied. Among the leading products are iron, lumber, salt, paper, wooden ware, furniture, farm implements, leather, cotton and woolen goods, machinery, castings, and hollowware. The great extent of the coast line gives Michigan a commanding position in lake commerce. The ship canal at Sault Ste. Marie handles more traffic than any similar thoroughfare in the world. In 1906, 41,276,862 tons passed through, three times as much as went through the Suez canal.

The number of newspapers and periodicals published in Michigan is 738, including 83 daily, 5 tri-weekly, 24 semi-weekly, 535 weekly, 1 fortnightly, 4 semi-monthly, 85 monthly and 1 quarterly. The places of publication number 393, of which 82, designated by a dagger (†), are county seats.

DETROIT †, pop. 465,766 (H 7); WAYNE Co. (S.E.), pop. 531,590. On Detroit R., 18 m. abv. L. Erie, Gr. Trunk; Mich. Cent.; Wabash; and six other R.Rs. Tel. Exp. Banks. Largest city of Michigan. Excellent harbor; a large commerce in grain with Canada and a very large shipping trade in grain, pork, wool and copper ore to Eastern markets. About 30,000 vessels traverse the river every year, carrying from 60,000,000 to 75,000,000 tons of freight, chiefly iron and copper ore. The Michigan Central R.R. tracks are carried through a tunnel under the river, connecting Detroit with Windsor, Ont. Manufactures numerous and important, including immense railroad car works and iron working establishments, numerous tanneries and tobacco factories and stove, adding machine, varnish, pharmaceutical supplies, emery wheel, ship building, locomotive, and other works. There are 1,650 factories, employing 98,000 wage earners, who produce goods to the value of over \$300,000,000 each year. Much capital invested in iron and copper mines and lumbering interests. Export trade in 1910, \$41,000,000.

MINNESOTA.

Population 2,075,705.

STATE CAPITAL, ST. PAUL.

MINNESOTA is bounded north by Ontario and Manitoba, east by Wisconsin and Lake Superior, south by Iowa, and west by North and South Dakota. Its extreme length from north to south is 380 miles; breadth varies from 183 miles in the center to 262 on the south line, and about 330 on the north border; land area, 79,205 square miles. The climate, although the cold during the winter season is somewhat severe, is healthful and invigorating. The surface is generally an undulating plain, diversified with rolling prairies, dotted with lakes and groves, with frequent timber belts. The northeast is generally hilly, and was formerly entirely covered with immense forests. The greater part of the salable pine has been cut, but there is a vast quantity of valuable timber, both pine and hardwood, still standing. There are thirty-two varieties of marketable timber found in the state. This region also contains innumerable lakes, which abound with almost every species of fresh water fish; and much marsh land. The Red River valley is almost a dead level. The southeast is a beautiful rolling prairie region, while the surface rises from the undulating prairies of the south and southwest to the *Hauteur des Terres* or Heights of Land in the northwest. In St. Louis county in the northeast is located one of the greatest iron producing regions in the world. 300,000 persons are employed in the mining industries, and 30,000,000 tons of iron ore were produced in 1909. There are productive fisheries of white fish and lake trout in Lake Superior. The soil is fertile, about two-thirds of it being adapted to the cultivation of cereals and general farm produce, although little more than one-third of this is under cultivation. The rainfall averages 28½ inches per annum, which provides ample moisture for all crops which can be grown in the latitude of Minnesota. In the northern part of the state drainage ditches are being constructed, and millions of acres will thereby be made suitable for agricultural purposes. Minnesota's largest and most valuable crop is wheat, for which its soil is peculiarly adapted. Instances are known where wheat has been produced for twenty-five years on the same land, which still continues to yield abundantly. Corn of high quality grows well all over the state, even in the northern counties. Wool growing is remunerative in the southwest. Maple sugar is an important product. Cattle, horses, and swine of the finest class are largely exported, and pork packing is a valuable industry. In 1909 Minnesota raised 94,500,000 bushels of wheat, 89,400,000 bushels of oats, 60,000,000 bushels of corn and 81,600,000 bushels of barley, besides large crops of rye, flax, hay and potatoes. The 1909 crop of cereals was estimated to be worth \$200,000,000, of live stock, \$125,000,000, of dairy products, \$50,000,000. The value of other farm crops, together with poultry, eggs, and miscellaneous produce, made the total agricultural wealth produced in 1909 close to \$500,000,000. Manufactures are rapidly increasing in number and value, and their value in 1909 amounted to about \$400,000,000. The leading branches are flour and grist mill products, lumber and woodenware, carriages, furniture, and cooperage, while boots and shoes, brick, leather, lime, saddlery, and woolen goods are also extensively manufactured. It is estimated that the state's streams have sufficient undeveloped water power to supply the future needs of every industry, public or private, in the state.

The number of newspapers and periodicals published in Minnesota is 745, including 38 daily, 1 tri-weekly, 3 semi-weekly, 636 weekly, 2 fortnightly, 11 semi-monthly, 51 monthly, 2 bi-monthly and 1 quarterly. The places of publication number 434, of which 85, designated by a dagger (†), are county seats.

E. M. WILSON, Editor and Publisher.					
MINNEAPOLIS†, pop. 301,408 (D 5½); HENNEPIN Co. (S.E.C.), pop. 333,480. On Mississippi R., at Falls of St. Anthony, 19 m. W. by N. of St. Paul. A railroad center, including Chic. & N. West.; Chic., Burl. & Quin.; Chic. Gt. West. Gt. N'thrn; N'thrn Pac.; Minn., St. P. & S. Ste. Marie, and other R.Rs. Tel. Exp. Banks. The river here falls about 80 feet, furnishing immense water power. Flour and lumber manufactures are of the highest importance, there being 23 large lumber and 27 flour mills, of which one is the largest in the world. Numerous other manufactures. The total value of manufactured goods in 1910 was \$147,000,000, an increase of 50 per cent. in ten years. Shipping trade is very extensive, the city claiming to be the greatest wheat market in the world. The grain receipts for 1910 were 161,825,000 bushels, and 15,675,000 barrels of flour were shipped. University of Minnesota (non-sectarian and open to both sexes), Augsburg Theological Seminary (Lutheran), etc. The Falls of St. Anthony are in the center of the city.

 POPULATION: U. S. Census, 1910. * Estimated. † County Seat. ‡ Size of page.

MISSISSIPPI.

Population 1,797,114.

STATE CAPITAL, JACKSON.

MISSISSIPPI is bounded north by Tennessee, east by Alabama, south by the Gulf of Mexico and Louisiana, and west by the Mississippi River, which separates it from Louisiana and Arkansas. Its extreme length from north to south is 322 miles; average breadth, 142 miles; land area, 46,840 square miles. The surface is generally hilly or undulating, except in the Mississippi bottom, from Vicksburg to the Tennessee line, and between the Mississippi and Yazoo rivers, where it is low and swampy, subject to inundation, and covered with a dense growth of timber, but with soil which, if reclaimed, would be exceedingly fruitful. Below Vicksburg the surface for some miles inland is hilly, and known as the "cane hills" or "bluffs," and with a generally productive soil. There is a very fertile prairie region in the northeast where alfalfa, producing from three to five heavy crops each year, is one of the principal products. The southern part is chiefly a level pine region, and furnishes good pasturage and large quantities of timber, tar, turpentine, etc. In the production of yellow pine, Mississippi ranks third among the states. The soil of this tract, although sandy, is with suitable fertilization particularly well adapted to truck farming, and is being largely taken up for that purpose, as soon as the timber is cut off. Cotton and corn are the great staples. The average crop of cotton is about 1,500,000 bales, and its value, including its by-products, is about \$100,000,000. The crop in 1908 was 1,735,000 bales. While cotton is still king in Mississippi, the doctrine of diversified farming is spreading, with benefit both to the land and the farmers. It is estimated that the corn acreage of 1910 was almost double that of 1900. The corn crop for 1909 was over 55,000,000 bushels; that of oats 2,000,000. Wheat is grown in the north, and rice and sugar cane in the south. Dairy products, sorghum, and sweet potatoes are produced in considerable quantities. A little tobacco is grown. In the coast counties the growing of semi-tropical fruits is meeting with decided success. The pecan crop in these counties is worth over \$150,000. Among other agricultural products, there were produced in the year 1900, 1,000,000 tons of hay, 400,000 pounds of wool and over 1,500,000 hogs. Drainage districts in the Yazoo-Mississippi delta have been organized, one project calling for the expenditure of \$8,000,000. This will change the swamp lands into farming land unexcelled anywhere for fertility, as the soil has for ages been enriched and augmented in depth by the alluvial deposits of the two rivers. The manufactures are neither varied nor very extensive, lumber and grist mill products being the most important, while cotton goods and cotton seed oil and cake rank next in importance. Its commerce is carried on principally through New Orleans and Mobile; coasting and river trade is large. The coast ports of Gulfport and South Pascagoula have a large commerce which is growing rapidly, both in exports and imports. These two ports send out over 400,000,000 feet of lumber annually. The state has no coal or iron of practical value. Its mineral deposits are confined mainly to fertilizers, soft limestone and clays. Tishomingo county has large beds of fine pipe and potter's clay, there is also some sandstone suitable for rough masonry.

The number of newspapers and periodicals published in Mississippi is 256, including 14 daily, 6 semi-weekly, 214 weekly, 2 fortnightly, 5 semi-monthly and 15 monthly. The places of publication number 148, of which 85, designated by a dagger (†), are county seats.
