**§ 1.994-1**

(6) Interest received by N on producer's loans .....	200
(7) Proceeds received by N representing recognized gain (but not losses) from sales of business assets located outside the United States .....	250
(8) N's gross receipts .....	3,550

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

**§ 1.993-7 Definition of United States.**

Under section 993(g), the term "United States" includes the States, the District of Columbia, the Commonwealth of Puerto Rico, and possessions of the United States. For the requirement that a DISC must be incorporated and existing under the laws of a State or the District of Columbia, see §1.992-1(a)(1).

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

**§ 1.994-1 Inter-company pricing rules for DISC's.**

(a) *In general*—(1) *Scope*. In the case of a transaction described in paragraph (b) of this section, section 994 permits a person related to a DISC to determine the allowable transfer price charged the DISC (or commission paid the DISC) by its choice of three methods described in paragraph (c)(2), (3), and (4) of this section: The "4 percent" gross receipts method, the "50-50" combined taxable income method, and the section 482 method. Under the first two methods, the DISC is entitled to 10 percent of its export promotion expenses as additional taxable income. When the gross receipts method or combined taxable income method is applied to a transaction, the Commissioner may not make distributions, apportionments, or allocations as provided by section 482 and the regulations thereunder. For rules as to certain "incomplete transactions" and for computing combined taxable income, see paragraph (c)(5) and (6) of this section. Grouping of transactions for purposes of applying the method chosen is provided by paragraph (c)(7) of this section. The rules in paragraph (c) of this section are directly applicable only in the case of sales or exchanges of export property to a DISC for resale, and are applicable by analogy to leases, commissions, and services as provided in paragraph (d) of this section. For rules limiting the application of the gross receipts method and combined taxable

income method so that the supplier related to the DISC will not incur a loss on transactions, see paragraph (e)(1) of this section. Paragraph (e)(2) of this section provides for the applicability of section 482 to resales by the DISC to related persons. Paragraph (e)(3) of this section provides for the time by which a reasonable estimate of the transfer price (including commissions and other payments) should be paid. The subsequent determination and further adjustments to transfer prices are set forth in paragraph (e)(4) of this section. Export promotion expenses are defined in paragraph (f) of this section. Paragraph (g) of this section has several examples illustrating the provisions of this section. Section 1.994-2 prescribes the marginal costing rules authorized by section 994(b)(2).

(2) *Performance of substantial economic functions*. The application of section 994(a)(1) or (2) does not depend on the extent to which the DISC performs substantial economic functions (except with respect to export promotion expenses). See paragraph (1) of §1.993-1.

(3) *Related party and related supplier*. For the purposes of this section—

(i) The term "related party" means a person which is owned or controlled directly or indirectly by the same interests as the DISC within the meaning of section 482 and §1.482-1(a).

(ii) The term "related supplier" means a related party which singly engages in a transaction directly with the DISC which is subject to the rules of section 994 and this section. However, a DISC may have different related suppliers with respect to different transactions. If, for example, X owns all the stock of Y, a corporation, and of Z, a DISC, and sells a product to Y which is resold to Z, only Y is the related supplier of Z, and, thus, only the resale from Y to Z is subject to section 994 and this section. If, however, X sells directly to Z and Y also sells directly to Z, then, as to the transactions involving direct sales to Z, each of X and Y is a related supplier of Z.

(b) *Transactions to which section 994 applies*. Section 994(a)(3) may be applied, as described in paragraph (a) of this section, to any transaction between a related supplier and a DISC. Section 994(a)(1) or (2) may be applied,

as described in paragraph (a) of this section, to a transaction between a related supplier and a DISC only in the following cases:

(1) Where the related supplier sells export property to the DISC for resale or where the DISC is commission agent for the related supplier on sales by the related supplier of export property to third parties whether or not related parties. For purposes of this section, references to sales include exchanges.

(2) Where the related supplier leases export property to the DISC for sublease for a comparable period with comparable terms of payment or where the DISC is commission agent for the related supplier on leases by the related supplier of export property to third parties whether or not related parties.

(3) Where services are furnished by a related supplier which are related and subsidiary to any sale or lease by the DISC, acting as principal or commission agent, of export property under subparagraph (1) or (2) of this paragraph.

(4) Where engineering or architectural services for construction projects located (or proposed for location) outside of the United States are furnished by a related supplier where the DISC is acting as principal or commission agent with respect to the furnishing of such services to a third party whether or not a related party.

(5) Where the related supplier furnishes managerial services in furtherance of the production of qualified export receipts of an unrelated DISC where the related DISC is acting as principal or commission agent with respect to the furnishing of such services to an unrelated DISC.

Transactions are included, for purposes of this paragraph, only if they give rise to qualified export receipts (within the meaning of section 993(a)) in the hands of the related DISC. If a transaction is not included in subparagraph (1), (2), (3), (4), or (5) of this paragraph, the rules of section 994(a)(1) or (2) do not apply. Thus, for example, the rules of section 994(a)(1) or (2) would not apply if a DISC purchased export property from its related supplier and leased such property to a third party.

(c) *Transfer price for sales of export property*—(1) *In general.* Under this paragraph, rules are prescribed for computing the allowable price for a transfer from a related supplier to a DISC in the case of a sale of export property described in paragraph (b)(1) of this section.

(2) *The “4-percent” gross receipts method.* Under the gross receipts method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 4 percent of the qualified export receipts of the DISC derived from the sale of the export property (as defined in section 993 (c)) and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(3) *The “50-50” combined taxable income method.* Under the combined taxable income method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 50 percent of the combined taxable income (as defined in subparagraph (6) of this paragraph) of the DISC and its related supplier attributable to the qualified export receipts from such sale and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(4) *Section 482 method.* If the rules of subparagraphs (2) and (3) of this paragraph are inapplicable to a sale or a taxpayer does not choose to use them, the transfer price for a sale by the related supplier to the DISC is to be determined on the basis of the sale price actually charged but subject to the rules provided by section 482 and the regulations thereunder.

(5) *Incomplete transactions.* (i) For purposes of the gross receipts and combined taxable income methods, where property (encompassed within a transaction or group chosen under subparagraph (7) of this paragraph) is transferred by a related supplier to a DISC during a taxable year of either the DISC or related supplier, but some or

all of such property is not sold by the DISC during such year—

(a) The transfer price of such property sold by the DISC during such year shall be computed separately from the transfer price of the property not sold by the DISC during such year.

(b) With respect to such property not sold by the DISC during such year, the transfer price paid by the DISC for such year shall be the related supplier's cost of goods sold (see subparagraph (6)(ii) of this paragraph) with respect to the property, except that, with respect to such taxable years ending on or before August 15, 1975, the transfer price paid by the DISC shall be at least (but need not exceed) the related supplier's cost of goods sold with respect to the property.

(c) For the subsequent taxable year during which such property is resold by the DISC, an additional amount shall be paid by the DISC (to be treated as income for such year by the related supplier) equal to the excess of the amount which would have been the transfer price under this section had the transfer to the DISC by the related supplier and the resale by the DISC taken place during the taxable year of the DISC during which it resold the property over the amount already paid under (b) of this subdivision.

(d) The time and manner of payment of transfer prices required by (b) and (c) of this subdivision shall be determined under paragraphs (e)(3), (4), and (5) of this section.

(ii) For purposes of this paragraph, a DISC may determine the year in which it receives property from a related supplier and the year in which it sells property in accordance with the method of identifying goods in its inventory properly used under section 471 or 472 (relating respectively to general rule for inventories and to LIFO inventories). Transportation expense of the related supplier in connection with a transaction to which this subparagraph applies shall be treated as an item of cost of goods sold with respect to the property if the related supplier includes the cost of intracompany transportation between its branches, divisions, plants, or other units in its cost

of goods sold (see subparagraph (6)(ii) of this paragraph).

(6) *Combined taxable income.* For purposes of this section, the combined taxable income of a DISC and its related supplier from a sale of export property is the excess of the gross receipts (as defined in section 993(f)) of the DISC from such sale over the total costs of the DISC and related supplier which relate to such gross receipts. Gross receipts from a sale do not include interest with respect to the sale. Combined taxable income under this paragraph shall be determined after taking into account under paragraph (e)(2) of this section all adjustments required by section 482 with respect to transactions to which such section is applicable. In determining the gross receipts of the DISC and the total costs of the DISC and related supplier which relate to such gross receipts, the following rules shall be applied:

(i) Subject to subdivisions (ii) through (v) of this subparagraph, the taxpayer's method of accounting used in computing taxable income will be accepted for purposes of determining amounts and the taxable year for which items of income and expense (including depreciation) are taken into account. See §1.991-1(b)(2) with respect to the method of accounting which may be used by a DISC.

(ii) Cost of goods sold shall be determined in accordance with the provisions of §1.61-3. See sections 471 and 472 and the regulations thereunder with respect to inventories. With respect to property to which an election under section 631 applies (relating to cutting of timber considered as a sale or exchange), cost of goods sold shall be determined by applying §1.631-1(d)(3) and (e) (relating to fair market value as of the beginning of the taxable year of the standing timber cut during the year considered as its cost).

(iii) Costs (other than cost of goods sold) which shall be treated as relating to gross receipts from sales of export property are (a) the expenses, losses, and other deductions definitely related, and therefore allocated and apportioned, thereto, and (b) a ratable part of any other expenses, losses, or

other deductions which are not definitely related to a class of gross income, determined in a manner consistent with the rules set forth in § 1.861-8.

(iv) The taxpayer's choice in accordance with subparagraph (7) of this paragraph as to the grouping of transactions shall be controlling, and costs deductible in a taxable year shall be allocated and apportioned to the items or classes of gross income of such taxable year resulting from such grouping.

(v) If an account receivable arising with respect to a sale of export property is transferred by the related supplier to a DISC which is a member of the same controlled group within the meaning of § 1.993-1(k) for an amount reflecting a discount from the selling price taken into account in computing (without regard to this subdivision) combined taxable income of the DISC and its related supplier, then the combined taxable income from such sale shall be reduced by the amount of the discount.

(7) *Grouping transactions.* (i) Generally, the determinations under this section are to be made on a transaction-by-transaction basis. However, at the annual choice of the taxpayer some or all of these determinations may be made on the basis of groups consisting of products or product lines.

(ii) A determination by a taxpayer as to a product or a product line will be accepted by a district director if such determination conforms to any one of the following standards: (a) A recognized industry or trade usage, or (b) the 2-digit major groups (or any inferior classifications or combinations thereof, within a major group) of the Standard Industrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President.

(iii) A choice by the taxpayer to group transactions for a taxable year on a product or product line basis shall apply to all transactions with respect to that product or product line consummated during the taxable year. However, the choice of a product or product line grouping applies only to transactions covered by the grouping and, as to transactions not encom-

passed by the grouping, the determinations are made on a transaction-by-transaction basis. For example, the taxpayer may choose a product grouping with respect to one product and use the transaction-by-transaction method for another product within the same taxable year.

(iv) For rules as to grouping certain related and subsidiary services, see paragraph (d)(3)(ii) of this section.

(d) *Rules under section 994(a)(1) and (2) for transactions other than sales.* The following rules are prescribed for purposes of applying the gross receipts method or combined taxable income method to transactions other than sales:

(1) *Leases.* In the case of a lease of export property by a related supplier to a DISC for sublease by the DISC to produce gross receipts, for any taxable year the amount of rent the DISC must pay to the related supplier shall be determined under the DISC's lease with its related supplier but must be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales and resales of export property under the gross receipts method or combined taxable income method. For purposes of applying this subparagraph, transactions may not be so grouped on a product or product line basis under the rules of paragraph (c)(7) of this section as to combine in any one group of transactions both lease transactions and sale transactions involving the same product or product line.

(2) *Commissions.* If any transaction to which section 994 applies is handled on a commission basis for a related supplier by a DISC and such commissions give rise to qualified export receipts under section 993(a)—

(i) The amount of the income that may be earned by the DISC in any year is the amount, computed in a manner consistent with paragraph (c) of this section, which the DISC would have been permitted to earn under the gross receipts method, the combined taxable income method, or section 482 method if the related supplier had sold (or leased) the property or service to the DISC and the DISC in turn sold (or subleased) to a third party, whether or not a related party, and

(ii) The maximum commission the DISC may charge the related supplier is the sum of the amount of income determined under subdivision (i) of this subparagraph plus the DISC's total costs for the transaction as determined under paragraph (c)(6) of this section.

(3) *Receipts from services*—(i) *Related and subsidiary services attributable to the year of the export transaction.* The gross receipts for related and subsidiary services described in paragraph (b)(3) of this section shall be treated as part of the receipts from the export transaction to which such services are related and subsidiary, but only if, under the arrangement between the DISC and its related supplier and the accounting method otherwise employed by the DISC, the income from such services is includible for the same taxable year as income from such export transaction.

(ii) *Other services.* In the case of related and subsidiary services to which subdivision (i) of this subparagraph does not apply and other services described in paragraph (b)(4) or (5) of this section performed by a related supplier (relating respectively to engineering and architectural services and certain managerial services), the amount of taxable income which the DISC may derive for any taxable year shall be determined under the arrangement between the DISC and its related supplier and shall be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales for resale of export property under the gross receipts method or combined taxable income method. Related and subsidiary services to which subdivision (i) of this subparagraph does not apply may be grouped, under the rules for grouping of transactions in paragraph (c)(7) of this section, with the products or product lines to which they are related and subsidiary, so long as the grouping of services chosen is consistent with the grouping of products or product lines chosen for the taxable year in which either the product or product lines were sold or in which payment for such services is received or accrued. The rules for grouping of transactions in paragraph (c)(7) of this section shall not apply with respect to the determination of taxable income

which the DISC may derive from other services described in paragraph (b)(4) or (5) of this section performed by a related supplier or commissions on such services, and such determination shall be made only on a transaction-by-transaction basis.

(e) *Methods of applying paragraphs (c) and (d) of this section*—(1) *Limitation on DISC income (“no loss” rule)*—(i) *In general.* Except as otherwise provided in this subparagraph, neither the gross receipts method nor the combined taxable income method may be applied to cause in any taxable year a loss to the related supplier, but either method may be applied to the extent it does not cause a loss. A loss to a related supplier would result if the taxable income of the DISC would exceed the combined taxable income of the related supplier and the DISC. If, however, there is no combined taxable income of the DISC and the related supplier (because, for example, a combined loss is incurred), a transfer price (or commission) will not be deemed to cause a loss to the related supplier if it allows the DISC to recover an amount not in excess of its costs (if any).

(ii) *Special rule for applying “4 percent” gross receipts method to sales.* A transfer price or commission, determined under the “4 percent” gross receipts method (determined without regard to subdivision (i) of this subparagraph), for a sale of export property referred to in paragraph (b)(1) of this section, will not be considered to cause a loss for the related supplier if for the DISC's taxable year, the ratio that (a) the taxable income of the DISC derived from such sale by using such price or commission bears to (b) the DISC's gross receipts from such sale is not greater than the ratio that (c) all of the taxable income of the related supplier and the DISC from all sales of the same product or product line (domestic and foreign) to third parties whether or not related parties bears to (d) the total gross receipts of the related supplier and the DISC from such sales. For purposes of the preceding sentence, sales between the DISC and its related suppliers shall not be taken into account under (c) or (d) of this subdivision. For example, assume that for a taxable year of a DISC the total costs

of the related supplier and the DISC with respect to all sales (\$150 for domestic and \$44 for foreign) of a product line are \$194 and the total gross receipts of the related supplier and the DISC with respect to such sales are \$200 so that the total taxable income of the related supplier and the DISC with respect to such sales is \$6. The parties would thus be entitled to compute a transfer price determined under the gross receipts method on any given sale of product A of such product line by the related supplier to the DISC which would allocate to the DISC taxable income equal to not more than 3 percent (*i.e.*, \$6/\$200) of its gross receipts derived from its resale of such product. If the DISC were to resell an item of product A for \$10, the transfer price paid by the DISC to the related supplier determined under the gross receipts method could be as low as \$9.70.

(iii) *Grouping transactions.* For purposes of subdivision (i) of this subparagraph, the basis for grouping transactions chosen by the taxpayer under paragraph (c)(7) of this section for the taxable year shall be applied. For purposes of making the computations of subdivision (ii) (c) and (d) of this subparagraph, however, the taxpayer may choose any basis for grouping transactions permissible under paragraph (c)(7) of this section, even though it may not be the same basis as that already chosen under paragraph (c)(7) of this section for computing transfer prices or commissions to a DISC. If, for example, the taxpayer has chosen to group transactions on a product basis for computing transfer prices or commissions to a DISC for a taxable year, the taxpayer may still group transactions on a product line basis for purposes of computing taxable income and total gross receipts under subdivision (ii) (c) and (d) of this subparagraph. For a further example, if the taxpayer computes taxable income for one group of transactions under the gross receipts method and computes taxable income for a second group of transactions under the combined taxable income method, the taxpayer may aggregate these transactions for purposes of computing taxable income and total gross receipts under subdivision (ii) (c) and (d) of this subparagraph.

(2) *Relationship to section 482.* In applying the rules under section 994, it may be necessary to first take into account the price of a transfer (or other transaction) between the DISC (or related supplier) and a related party which is subject to the arm's length standard of section 482. Thus, for example, where a related supplier sells export property to a DISC which the related supplier purchased from related parties, the costs taken into account in computing the combined taxable income of the DISC and the related supplier are determined after any necessary adjustment under section 482 of the price paid by the related supplier to the related parties. In applying section 482 to a transfer by a DISC, however, the DISC and its related supplier are treated as if they were a single entity carrying on all the functions performed by the DISC and the related supplier with respect to the transaction and the DISC shall be allowed to receive under the section 482 standard the amount the related supplier would have received had there been no DISC.

(3) *Initial payment of transfer price or commission.* (i) The amount of a transfer price (or reasonable estimate thereof) actually charged by a related supplier to a DISC, or a sales commission (or reasonable estimate thereof) actually charged by a DISC to a related supplier, in a transaction to which section 994 applies must be paid no later than 60 days following the close of the taxable year of the DISC during which the transaction occurred.

(ii) Payment must be in the form of money, property (including accounts receivable from sales by or through the DISC), a written obligation which qualifies as debt under the safe harbor rule of § 1.992-1(d)(2)(ii), or an accounting entry offsetting the account receivable against an existing debt owed by the person in whose favor the account receivable was established to the person with whom it engaged in the transaction. The form of the payment to a DISC need not be a qualified export asset under § 1.993-2. However, for the requirement that the adjusted basis of the qualified export assets of the DISC at the close of its taxable year must equal or exceed 95 percent of the sum of the adjusted bases of all assets of the

DISC at the close of its taxable year, see section 992(a)(1)(B).

(iii) If the district director can demonstrate, based upon the data available as of the 60th day after the close of such taxable year, that the amount actually paid did not represent a reasonable estimate of the transfer price or commission (as the case may be) to be determined under section 994 and this section, an indebtedness will be deemed to arise, from the person required to make the payment in favor of the person to whom the payment is required to be made, in an amount equal to the difference between the amount of the transfer price or commission determined under section 994 and this section and the amount (if any) actually paid and received. Such indebtedness will be deemed to arise as of the date the transaction occurred which gave rise to the indebtedness, except that, if such transaction occurred in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the indebtedness will be deemed to arise as of the date by which payment was required under subdivision (i) of this paragraph (e)(3). Such indebtedness owed to a DISC shall be treated as an asset but shall not be treated as a trade receivable or other qualified export asset (see §1.993-2(d)(3)) as of the end of the taxable year of the DISC in which the indebtedness is deemed to arise.

(iv)(a) Except with respect to incomplete transactions to which paragraph (c)(5)(i)(b) of this section applies, if the amount actually paid results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction as reported in its tax return for the taxable year the transaction is completed, then the amount actually paid shall be deemed to be a reasonable estimate of such transfer price or commission.

(b) With respect to incomplete transactions to which paragraph (c)(5)(i)(b) of this section applies and which were initiated during a taxable year ending after August 15, 1975, the amount actually paid shall be deemed to be a reasonable estimate of such transfer price if any one of the following three tests is met:

(1) The amount actually paid by the DISC to the related supplier in respect of the property does not exceed the related supplier's cost of goods sold (see paragraph (c)(6)(ii) of this section) with respect to the property.

(2) If the transaction is completed by the date on which the DISC's return is required to be filed for the year in which the transaction was initiated, the amount actually paid by the DISC to the related supplier in respect of the property results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction when completed.

(3) The percentage that (i) an amount equal to (a) the amount actually paid by the DISC to the related supplier in respect of the property minus (b) the related supplier's cost of goods sold with respect to the property, bears to (ii) the related supplier's cost of goods sold in respect of the property, is not greater than 50 percent of the percentage that (iii) the combined taxable income for completed transactions of the same group as the property during the DISC's taxable year in which the incomplete transaction was initiated, bears to (iv) the cost of goods sold of the related supplier and DISC with respect to such transactions.

(c) For purposes of this subdivision (iv), whether the transfer price or commission actually paid is deemed a reasonable estimate may be determined on the basis for grouping transactions chosen by the taxpayer under paragraph (c)(5) and (7) of this section.

(v) An indebtedness arising under subdivision (iii) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by §1.482-2(a)(2) from the 61st day after the close of the DISC's taxable year in which the transaction occurred which gave rise to the indebtedness to the date of payment. The interest so computed shall be accrued and included in the taxable income of the person to whom the indebtedness is owed for each taxable year during which the indebtedness is unpaid.

(4) *Subsequent determination of transfer price or commission.* The DISC and its related supplier would ordinarily determine under section 994 and this section the transfer price payable by the DISC

(or the commission payable to the DISC) for a transaction before the DISC files its return for the taxable year of the transaction. After the DISC has filed its return, a redetermination of the transfer price (or commission) may only be made if permitted by the Code and the regulations thereunder. Such a redetermination would include a redetermination by reason of an adjustment under section 482 and the regulations thereunder or section 861 and § 1.861-8 which affects the amounts which entered into the determination of the transfer price or commission.

(5) *Procedure for adjustments to transfer price or commission*—(i)(a) If the transfer price (or commission) for a transaction determined under section 994 is different from the price (or commission) actually charged, the person who received too small a transfer price (or commission) or paid too large a transfer price (or commission) shall establish (or be deemed to have established), at the date of the determination or redetermination under subparagraph (4) of this paragraph of the transfer price (or commission) under section 994, an account receivable due the DISC from the person with whom it engaged in the transaction equal to the difference in amount between the transfer price (or commission) so determined and the transfer price (or commission) previously paid and received. If the account receivable is paid within 90 days after the date it is established (or deemed established), then as of the end of the taxable year of the DISC in which the transaction occurred which gave rise to the indebtedness, the account receivable shall be treated as an asset and, under § 1.993-2(d)(3) as a trade receivable, and thus as a qualified export asset.

(b) If, for example, during 1972, a DISC which uses the calendar year as its taxable year sold a product which it purchased that year from its related supplier and paid a price of \$10,000 which price is a reasonable estimate under subparagraph (3)(iii) of this paragraph but is later determined under section 994 to be \$8,000 immediately before the DISC filed its return for 1972, the DISC must be paid \$2,000 (i.e., \$10,000 - \$8,000) by its related supplier or establish an account receivable from

its related supplier of \$2,000. The account receivable may be paid without tax consequences, provided that such account receivable is paid within 90 days after the date it is established (or deemed established). Such account receivable paid within such 90 days will be considered to relate to the taxable year in which the transaction occurred which gave rise thereto rather than the taxable year during which it is established or paid.

(ii) Payment must be in a form specified in subparagraph (3) of this paragraph.

(iii) If an account receivable of a DISC described in subdivision (i) of this paragraph (e)(5) is not paid within 90 days of the date it is established (or deemed established), then, as of the end of the taxable year of the DISC in which the transaction occurred which gives rise to the indebtedness, the account receivable shall be treated as an asset except that, if the account receivable is established (or deemed established) in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the account receivable shall be treated as an asset as of the end of such taxable year. However, under § 1.993-2(d)(3), an account receivable referred to in the preceding sentence shall not be treated as a trade receivable or other qualified export asset.

(iv) An account receivable established in accordance with subdivision (i) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by § 1.482-2(a)(2) from the day after the date the account receivable is deemed established to the date of payment. The interest so computed shall be accrued and included in the taxpayer's taxable income for each taxable year during which the account receivable is outstanding.

(v)(a) In lieu of establishing an account receivable in accordance with subdivision (i) of this subparagraph for all or part of an amount due a related supplier, the related supplier and DISC are permitted to treat all or part of any distribution which was made by the DISC out of its previously taxed income with respect to the year to which the determination or redetermination

relates as an additional payment of transfer price or repayment of commission (and not as a distribution) made as of the date the distribution was made. Any additional amount arising on the determination or redetermination due the related supplier after this treatment shall be represented by an account receivable established under subdivision (i) of this subparagraph. To the extent that a distribution is so treated under this subdivision (v), it shall cease to qualify as distribution for any Federal income tax purpose, and the DISC's account for previously taxed income shall be adjusted accordingly. If all or part of any distribution made to a shareholder other than the related supplier is recharacterized under this subdivision (v), the related supplier shall establish an account receivable from that shareholder for the amount so recharacterized. Such account receivable shall be paid in the time and manner set forth in this paragraph (e)(5). In order to obtain the relief provided by this subdivision (v), the conditions and procedures prescribed by Revenue Procedure 84-3 must be met. The provisions of this paragraph (e)(5)(v) shall apply to all open taxable years ending after December 31, 1971.

(b) If, for example, during 1982, a DISC commission from a related supplier with respect to a transaction completed in 1980 was redetermined to be \$1,000 less than the commission actually charged by, and paid to, the DISC, the amount of any distribution previously made by the DISC from its 1980 previously taxed income to the related supplier as a shareholder may, to the extent of \$1,000, be treated not as a distribution but as a repayment of the commission.

(vi) The procedure for adjustments to transfer price provided by this subparagraph does not apply to incomplete transactions described in paragraph (c)(5)(i)(b) of this section. Such procedure will, however, be applied to any such transaction with respect to the taxable year in which the transaction is completed.

(6) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* (i) During 1975, a DISC which uses the calendar year as its taxable year purchased a product from its related supplier and made an initial payment of \$8,500. If \$8,500 were determined to be the transfer price under section 994, the DISC's taxable income from the transaction would be \$1,000. Immediately before the DISC filed its return for 1975, under section 994 it is determined that the transfer price is \$8,000 and the DISC's taxable income is \$1,500. Thus, the requirement of a reasonable estimate under subparagraph (3) of this paragraph was met because the amount (\$8,500) actually paid resulted in the DISC realizing taxable income of \$1,000 which is not less than 50 percent of the DISC's taxable income (\$1,500) from the transaction as determined under section 994.

(ii) Pursuant to subparagraph (5) of this paragraph, an account receivable due the DISC for \$500, i.e., \$8,500-\$8,000, is established on September 15, 1976, the date the DISC files its return for 1975, and is paid on December 1, 1976. The account receivable for \$500 will be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto and will be a qualified export asset under § 1.993-2(d)(3) for the last day of such year.

*Example 2.* Assume the same facts as in example 1 except that the account receivable for \$500 is paid on January 1, 1977. The account receivable for \$500 will still be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto. However, such account receivable will be treated as an asset which is not a qualified export asset under § 1.993-2(d)(3) for the last day of such year.

(f) *Export promotion expenses*—(1) *Purpose of expense.* (i) In order for an expense or cost of a type described in subparagraph (2) of this paragraph to be an export promotion expense, the expense or cost must be incurred or treated as incurred by the DISC (under subparagraph (7) of this paragraph) to advance the sale, lease, or other distribution of export property for use, consumption, or distribution outside the United States. Costs of services in performing installation (but not assembly) on the site and for meeting warranty commitments if such services are related and subsidiary (within the meaning of § 1.993-1(d)) to any qualified sale, lease, or other distribution of export property by the DISC (or with respect to which the DISC received a commission) will be considered to advance the sale, lease, or other distribution of export property. General and administrative

expenses attributable to billing customers, other clerical functions of the DISC, or generally operating the DISC, will also be considered to advance the sale, lease, or other distribution of export property.

(ii) Where an expense or cost incurred or treated as incurred by the DISC qualifies only in part as an export promotion expense, such expense or cost must be allocated between the qualified portion and such other portion on a reasonable basis. See § 1.994-2(b)(2) for the option of the related supplier not to claim expenses as export promotion expenses.

(2) *Types of expenses.* The only expenses or costs which may be export promotion expenses are those expenses or costs meeting the test of subparagraph (1) of this paragraph which constitute—

(i) Ordinary and necessary expenses of the DISC paid or incurred during the DISC's taxable year in carrying on any trade or business, allowable as deductions under section 162, such as expenses for market studies, advertising, salaries and wages (including contributions or compensations deductible under section 404) of sales, clerical, and other personnel, rentals on property, sales commissions, warehousing, and other selling expenses,

(ii) A reasonable allowance under section 167 for exhaustion, wear and tear, or obsolescence of the property of the DISC,

(iii) Costs of freight (subject to the limitations of subparagraph (4) of this paragraph),

(iv) Costs of packaging for export (as defined in subparagraph (5) of this paragraph), or

(v) Costs of designing and labeling packages exclusively for export markets (under subparagraph (6) of this paragraph).

(3) *Ineligible expenses.* Items ineligible to be export promotion expenses include, for example, interest expenses, bad debt expenses, freight insurance, State and local income and franchise taxes, the cost of manufacture or assembly operations, and items of cost of goods sold (except as otherwise provided in this paragraph in the case of certain freight, packaging, and designing and labeling expenses). Income or

similar taxes eligible for a foreign tax credit under sections 901 and 903 are also not eligible to be export promotion expenses.

(4) *Freight expenses—(i) In general.* Export promotion expenses include one-half of the freight expense (not including insurance) for shipping export property aboard a U.S.-flag carrier in those cases where law or regulation of the United States or of any State or political subdivision thereof or of any agency or instrumentality of any of these does not require that the export property be shipped aboard a U.S.-flag carrier. For purposes of this paragraph, the term "freight expense" includes charges paid for c.o.d. service, miscellaneous ground charges, such as charges incurred for services normally performed by U.S.-flag carriers, charges for services of loading aboard U.S.-flag carriers normally performed by such carriers, freight forwarders, or independent contractors engaged in loading property, and charges attributable to a freight consolidation function normally performed by freight forwarders. In order for one-half of freight expenses paid to the owner (or the agent of the owner) of a U.S.-flag carrier to be claimed as an export promotion expense, the DISC must obtain a written statement (such as, for example, a bill of lading) from the owner (or the agent) disclosing that the export property was shipped aboard the owner's U.S.-flag carrier or another U.S.-flag carrier, and the DISC must have no reasonable basis for disbelieving such statement of the owner (or the agent). For the requirement of a written statement from a freight forwarder, see subdivision (iv) of this subparagraph.

(ii) *U.S.-flag carrier defined.* For purposes of this paragraph, the term "U.S.-flag carrier" is an airplane owned and operated by a U.S. person or persons (as defined in section 7701(a)(30)) or a ship documented under the laws of the United States. Shipment initiated by delivery to the U.S. Postal Service shall be considered shipment aboard a U.S.-flag carrier, but not if shipped to a place to which mail shipments from the United States are

ordinarily accomplished by land transportation, such as to Canada or Mexico, unless airmail is specified.

(iii) *Shipment pursuant to law or regulation.* Shipment pursuant to law or regulation includes instances where a U.S.-flag carrier must be used in order to obtain permission from the Government to make the export. If the law or regulation requires a fixed portion of the export property to be shipped aboard a U.S.-flag carrier, the freight expense on that portion of such export property that was so shipped in order to satisfy such requirement cannot qualify as an export promotion expense.

(iv) *Freight forwarders.* A payment to a freight forwarder shall be considered freight expense within the meaning of this paragraph to the extent the forwarder utilizes a U.S.-flag carrier. For purposes of this paragraph, the term "freight forwarder" includes air freight consolidators and carriers owned and operated by U.S. persons utilizing U.S.-flag carriers such as non-vessel-owning common carriers. In order for one-half of freight expenses paid to a freight forwarder to be claimed as export promotion expenses, the DISC must obtain a written statement (such as, for example, a bill of lading) from the freight forwarder disclosing that the export property was shipped aboard a U.S.-flag carrier, and the DISC must have no reasonable basis for disbelieving such statement of the freight forwarder.

(v) *Freight within the United States.* A DISC may not claim as export promotion expense any amount that is attributable to carriage of export property between points within the United States. If, however, export property is carried from the United States to a foreign country on a through shipment pursuant to a single bill of lading or similar document aboard one or more U.S.-flag carriers, the freight expense of such carriage shall not be apportioned between the domestic and foreign portions of such carriage, even though a carrier may stop en route within the United States or the export property may be shifted from one carrier to another, and one-half of such freight expense may be claimed as an export promotion expense. Freight expense does not include the cost of

transporting the export property to the depot of the U.S.-flag carrier or freight forwarder for shipment abroad. The expense of shipment of export property initiated by delivery to the U.S. Postal Service for ultimate delivery outside the United States shall be considered as attributable entirely to carriage of such property outside the United States.

(5) *Packaging for export.* (i) Export promotion expenses include the direct and indirect cost of packaging export property (including the cost of the package) for export whether or not the packaging is the same as domestic packaging. Such packaging costs do not include costs of manufacturing (as defined in the regulations under section 993) and assembly. Thus, if a DISC buys and packages export property for resale, its costs of packaging the export property are export promotion expenses. If, however, the process of such packaging by the DISC is physically integrated with the process of manufacturing the export property by the related supplier, the costs of such packaging are not export promotion expenses.

(ii) The cost of containers leased from a shipping company to which the DISC also pays freight for the property packaged is not a cost of packaging. However, in such circumstances, one-half of the rental charge may be allowable as a freight expense if permitted under subparagraph (4) of this paragraph.

(6) *Designing and labeling packages.* Export promotion expenses include the direct and indirect costs of designing and labeling packages, including bottles, cans, jars, boxes, cartons, or containers, to the extent incurred for export markets. Thus, for example, to the extent incurred for supplying export markets, the cost of designing labels in a foreign language and the cost of printing such labels are export promotion expenses.

(7) *DISC must incur export promotion expenses—(i) In general.* In order for an expense to be an export promotion expense it must be incurred or treated as incurred under this subparagraph by the DISC. For example, an expense is incurred by a DISC if the expense results from (a) the DISC incurring an

obligation to pay compensation to its employees, (b) depreciation of property owned by the DISC and used by its employees, (c) the DISC incurring an obligation to pay for office supplies used by its employees, (d) the DISC incurring an obligation to pay space costs for use by its employees, or (e) the DISC incurring an obligation to pay other costs supporting efforts by its employees.

(ii) *Payments to independent contractors.* A payment to an independent contractor, directly or indirectly, is treated as incurred by the DISC if the cost of performing the function performed by the independent contractor would be considered an export promotion expense described in subparagraphs (1) and (2) of this paragraph if performed by the DISC, and if, in a case where the services of the independent contractor were engaged by a party related to the DISC, such related party and such DISC agreed in writing before the contract was entered into that a specified portion or all of the contract was for the benefit of the DISC and that all of the expenses of the contract (eligible to be considered as export promotion expenses) with respect to such portion would be borne by the DISC.

(iii) *Expenses incurred by related parties.* Reimbursements or other payments by a DISC to a related party are export promotion expenses only if the expenses of the related party for which reimbursement is made are for space in a building actually used by employees of the DISC or for export property owned by the DISC. Except as otherwise provided in the preceding sentence, expenses incurred by a foreign international sales corporation (FISC) or a real property holding company (as defined in section 993(e)(1) and (2), respectively) shall not be treated as export promotion expenses of its DISC.

(iv) *Selling commissions paid by a DISC.* A commission paid by a DISC to a person other than a related person, with respect to a transaction which gives rise to qualified export receipts of the DISC, is an export promotion expense of the DISC. A commission paid by a DISC to a related person is not an export promotion expense.

(v) *Sales of promotional material.* If a DISC sells promotional material to a

buyer of export property from the DISC at a price which is greater than the costs of the DISC for such material, such costs are not export promotion expenses. If, however, the DISC sells promotional material at a price which is less than its costs for such material, the excess of such costs over such price is an export promotion expense. For rules relating to the status of promotional material as qualified export assets and export property, see §§ 1.993-2 and 1.993-3, respectively.

(vi) An expense may be incurred by the DISC under subdivisions (i) through (v) of this subparagraph even if the accounting for and payment of such expense is handled by a related party and the DISC reimburses the related party for such expenses.

(8) *Incomplete transactions.* Expenses eligible to be treated as export promotion expenses which are attributable to the sale, lease, or other distribution of export property and which are incurred prior to the taxable year of sale, lease, or other distribution by the DISC are not treated as export promotion expenses until the taxable year of sale, lease, or other distribution or until the taxable year in which it is first determined that no transaction is reasonably expected to result from the expense incurred (whether or not a transaction subsequently results). Thus, for example, if a DISC incurs a packaging cost which is otherwise eligible to be treated as an export promotion expense, the DISC may not include such charge as an export promotion expense until the year in which the export property with respect to which the packaging cost was incurred is actually sold by the DISC. If no transaction is reasonably expected to result from the packaging cost, such cost should be allocated as an export promotion expense to the group of transactions to which such cost is most closely related.

(g) *Examples.* The provisions of this section may be illustrated by the following examples:

*Example 1.* J and K are calendar year taxpayers. J, a domestic manufacturing company, owns all the stock of K, a DISC for the taxable year. During 1972, J manufactures only 100 units of a product (which is eligible to be export property as defined in section

993(c)). J enters into a written agreement with K whereby K is granted a sales franchise with respect to exporting such property and K will receive commissions with respect to such exports equal to the maximum amount permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold for \$1,000. J's cost of goods sold attributable to the 100 units is \$650. J's direct selling expenses so attributable are \$100. Although J has other deductible expenses, for purposes of this example assume that J has no other deductible expenses. K pays \$230 to independent contractors which qualify as export promotion expenses under paragraph (f)(7)(ii) of this section. K does not perform functions substantial enough to entitle it to an allocation of income which meets the arm's length standard of section 482. The income which K may earn under section 994 under the franchise is \$20, computed as follows:

(1) Combined taxable income:	
(a) K's sales price .....	\$1,000
(b) Less deductions:	
J's cost of goods sold .....	\$650
J's direct selling expenses .....	100
K's export promotion expenses .....	230
Total deductions .....	980
(c) Combined taxable income .....	20
(2) K's profit under combined taxable income method (before application of loss limitation):	
(a) 50 percent of combined taxable income .....	10
(b) Plus: 10 percent of K's export promotion expenses (10% of \$230) .....	23
(c) K's profit .....	33
(3) K's profit under gross receipts method (before application of loss limitation):	
(a) 4 percent of K's sales price (4% of \$1,000) .....	40
(b) Plus: 10 percent of K's export promotion expenses (10% of \$230) .....	23
(c) K's profit .....	63

Since combined taxable income (\$20) is lower than both K's profit under the combined taxable income method (\$33) and under the gross receipts method (\$63), the maximum income K may earn is \$20. Accordingly, the commissions K may receive from J are \$250, *i.e.*, K's expenses (\$230) plus K's profit (\$20).

*Example 2.* M and N are calendar year taxpayers. M, a domestic manufacturing company, owns all the stock of N, a DISC for the taxable year. During 1972, M produces and sells a particular product line of export property to N for \$75, a price which can be justified as satisfying the standard of arm's length price of section 482. N performs substantial functions with respect to the transaction and resells the export property for \$100. M's cost of goods sold attributable to the export property is \$60. M's direct selling

expenses so attributable (relating to advertising of the product line in foreign markets) are \$12. Although M has other deductible expenses, for purposes of this example, assume that M has no other deductible expenses. N's expenses attributable to resale of the export property are \$22 of which \$20 are export promotion expenses. The maximum profit which N may earn with respect to the product line is \$6, computed as follows:

(1) Combined taxable income:	
(a) N's sales price .....	\$100
(b) Less deductions:	
M's cost of goods sold .....	\$60
M's direct selling expenses .....	12
N's expenses .....	22
Total deductions .....	94
(c) Combined taxable income .....	6
(2) N's profit under combined taxable income method (before application of loss limitation):	
(a) 50 percent of combined taxable income .....	3
(b) Plus: 10 percent of N's export promotion expenses (10% of \$20) .....	2
(c) N's profit .....	5
(3) N's profit under gross receipts method (before application of loss limitation):	
(a) 4 percent of N's sales price (4% of \$100) .....	4
(b) Plus: 10 percent of N's export promotion expenses (10% of \$20) .....	2
(c) N's profit .....	6
(4) N's profit under section 482 method:	
(a) N's sales price .....	100
(b) Less deductions:	
N's cost of goods sold (price paid by N to M) .....	75
N's expenses .....	22
Total deductions .....	97
(c) N's profit .....	3

Since the gross receipts method results in greater profit to N (\$6) than does the combined taxable income method (\$5) or section 482 method (\$3), and does not exceed combined taxable income (\$6), N may earn a maximum profit of \$6. Accordingly, the transfer price from M to N may be readjusted as long as the transfer price is not readjusted below \$72, computed as follows:

(5) Transfer price from M to N:	
(a) N's sales price .....	\$100
(b) Less:	
N's expenses .....	\$22
N's profit .....	6
Total subtractions .....	28
(c) Transfer price .....	72

*Example 3.* Q and R are calendar year taxpayers. Q, a domestic manufacturing company, owns all the stock of R, a DISC for the taxable year. During 1972, Q produces and

§ 1.994-1

26 CFR Ch. I (4-1-02 Edition)

sells a product line of export property to R for \$170, a price which can be justified as satisfying the standards of arm's length price of section 482, and R resells the export property for \$200. Q's cost of goods sold attributable to the export property is \$115 so that the combined gross income from the sale of the export property is \$85 (i.e., \$200 minus \$115). Q's expenses incurred in connection with the property sold are \$35. Q's deductible overhead and other supportive expenses allocable to all gross income are \$6. Apportionment of these supportive expenses on the basis of gross income does not result in a material distortion of income and is a reasonable method of apportionment. Q's gross income from sources other than the transaction is \$170 making total gross income of Q and R (excluding the transfer price paid by R) \$255 (i.e., \$85 plus \$170). R's expenses attributable to resale of the export property are \$20, all of which are export promotion expenses. The maximum profit which R may earn with respect to the product line is \$16, computed as follows:

(1) Combined taxable income:		
(a) R's sales price .....		\$200
(b) Less deductions:		
(i) Q's cost of goods sold .....	115	
(ii) Q's expenses incurred in connection with the property sold .....	35	
(iii) Apportionment of Q's supportive expenses:		
Q's supportive expenses .....	\$6	
Combined gross income from sale of export property .....	85	
Total gross income of Q and R .....	255	
Apportionment .....	(6×85)/255	2
(iv) R's expenses .....		20
Total deductions .....		172
(c) Combined taxable income .....		28
(2) R's profit under combined taxable income method (before application of loss limitation):		
(a) 50 percent of combined taxable income .....		14
(b) Plus: 10 percent of R's export promotion expenses (10% of \$20) .....		2
(c) R's profit .....		16
(3) R's profit under gross receipts method (before application of loss limitation):		
(a) 4 percent of R's sales price (4% of \$200) .....		8
(b) Plus: 10 percent of R's export promotion expenses (10% of \$20) .....		2
(c) R's profit .....		10
(4) R's profit under section 482 method:		
(a) R's sales price .....		200
(b) Less deductions:		
R's cost of goods sold (price paid by R to Q) .....	170	
R's expenses .....	20	

Total deductions .....	190
(c) R's profit .....	10

Since the combined taxable income method results in greater profit to R (\$16) than does the gross receipts method (\$10) or section 482 method (\$10), and does not exceed combined taxable income (\$28), R may earn a maximum profit of \$16. Accordingly, the transfer price from Q to R may be readjusted as long as the transfer price is not readjusted below \$164 computed as follows:

(5) Transfer price from Q to R:		
(a) R's sales price .....		\$200
(b) Less:		
R's expenses .....	\$20	
R's profit .....	16	
Total .....		36
(c) Transfer price .....		164

*Example 4.* S and T are calendar year taxpayers. S, a domestic manufacturing company, owns all the stock of T, a DISC for the taxable year. During 1972, S produces and sells 100 units of a particular product to T under a written agreement which provides that the transfer price between S and T shall be that price which allocates to T the maximum permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold by T for \$950. S's cost of goods sold attributable to the 100 units is \$650. S's other deductible expenses so attributable are \$300. Although S has other deductible expenses, for purposes of this example, assume that S has no deductible expenses not definitely allocable to any item of gross income. T's expenses attributable to the resale of the 100 units are \$50. S chooses not to apply the section 482 method. T may not earn any income under the gross receipts or combined taxable income method with respect to resale of the 100 units because combined taxable income is a negative figure, computed as follows:

(1) Combined taxable income:		
(a) T's sales price .....		\$950
(b) Less deductions:		
S's cost of goods sold .....	\$650	
S's expenses .....	300	
T's expenses .....	50	
Total deductions .....		1,000
(c) Combined taxable income (loss) .....		(\$50)

Under paragraph (e)(1)(i) of this section, T is permitted to recover its expenses attributable to the 100 units (\$50) even though such recovery results in a loss or increased loss to the related supplier. Accordingly, the transfer price from S to T may be readjusted as long as the transfer price is not readjusted below \$900, computed as follows:

**Internal Revenue Service, Treasury**

**§ 1.994-1**

(2) Transfer price from S to T:	
(a) T's sales price .....	\$950
(b) Less: T's expenses .....	50
(c) Transfer price .....	<u>900</u>

*Example 5.* Assume the same facts as in example 4 except that S chooses to apply the section 482 method and that under arm's length dealings T would have derived \$10 of income. Accordingly, the transfer price from S to T may be set at an amount not less than \$890, computed as follows:

(1) Transfer price from S to T:	
(a) T's sales price .....	\$950
(b) Less:	
T's expenses .....	\$50
T's profit .....	10
Total deductions .....	<u>60</u>
(c) Transfer price .....	<u>890</u>

*Example 6.* X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, a DISC for the taxable year. During March 1972, X manufactures a particular product of export property which it leases on April 1, 1972, to Y for a term of 1 year at a monthly rental of \$1,000, a rent which satisfies the standard of arm's length rental under section 482. Y subleases the product on April 1, 1972, for a term of 1 year at a monthly rental of \$1,200. X's cost for the product leased is \$40,000. X's other deductible expenses attributable to the product are \$900, all of which are incurred in 1972. Although X has other deductible expenses, for purposes of this example, assume that X has no other deductible expenses. Y's expenses attributable to sublease of the export property are \$450, all of which are incurred in 1972 and are export promotion expenses. X depreciates the property on a straight line basis without the use of an averaging convention, assuming a useful life of 8 years and no salvage value. The profit which Y may earn with respect to the transaction is \$2,895 for 1972 and \$1,175 for 1973, computed as follows:

COMPUTATION FOR 1972

(1) Combined taxable income:	
(a) Y's sublease rental receipts for year (\$1,200×9 months) .....	\$10,800
(b) Less deductions:	
X's depreciation (\$40,000×1/8×9/12) .....	\$3,750
X's other expenses .....	900
Y's expenses .....	450
Total deductions .....	<u>5,100</u>
(c) Combined taxable income .....	<u>5,700</u>
(2) Y's profit under combined taxable income method (before application of loss limitation):	
(a) 50 percent of combined taxable income .....	2,850
(b) Plus: 10 percent of Y's export promotion expenses (10% of \$450) .....	45

(c) Y's profit .....	<u>2,895</u>
(3) Y's profit under gross receipts method (before application of loss limitation):	
(a) 4 percent of Y's sublease rental receipts for year (4% of \$10,800) .....	432
(b) Plus: 10 percent of Y's export promotion expenses (10% of \$450) .....	45
(c) Y's profit .....	<u>477</u>
(4) Y's profit under section 482 method:	
(a) Y's sublease rental receipts for year .....	\$10,800
(b) Less deductions:	
Y's lease rental payments for year .....	\$9,000
Y's expenses .....	450
Total deductions .....	<u>9,450</u>
(c) Y's profit .....	<u>1,350</u>

Since the combined taxable income method results in greater profit to Y (\$2,895) than does the gross receipts method (\$477) or section 482 method (\$1,350), Y may earn a profit of \$2,895 for 1972. Accordingly, the monthly rental payable by Y to X for 1972 may be readjusted as long as the monthly rental payable is not readjusted below \$828.33, computed as follows:

(5) Monthly rental payable by Y to X for 1972:	
(a) Y's sublease rental receipts for year .....	\$10,800.00
(b) Less:	
Y's expenses .....	450.00
Y's profit .....	2,895.00
Total .....	<u>3,345.00</u>
(c) Rental payable for 1972 .....	<u>7,455.00</u>
(d) Rental payable each month (\$7,455÷9 months) .....	<u>828.33</u>

COMPUTATION FOR 1973

(1) Combined taxable income:	
(a) Y's sublease rental receipts for year (\$1,200×3 months) .....	\$3,600
(b) Less: X's depreciation (\$40,000×1/8×3/12) .....	1,250
(c) Combined taxable income .....	<u>2,350</u>
(2) Y's profit under combined taxable income method (before application of loss limitation):	
(a) 50 percent of combined taxable income .....	\$1,175
(b) Y's profit .....	<u>1,175</u>
(3) Y's profit under gross receipts method (before application of loss limitation):	
(a) 4 percent of Y's sublease rental receipts for year (4% of \$3,600) .....	144
(b) Y's profit .....	<u>144</u>
(4) Y's profit under section 482 method:	
(a) Y's sublease rental receipts for year .....	3,600
(b) Less: Y's lease rental payments for year .....	3,000
(c) Y's profit .....	<u>600</u>

Since the combined taxable income method results in greater profit to Y (\$1,175) than

**§ 1.994-2**

does the gross receipts method (§144) or section 482 method (§600), Y may earn a profit of \$1,175 for 1973. Accordingly, the monthly rental payable by Y to X for 1973 may be readjusted as long as the monthly rental payable is not readjusted below \$808.33, computed as follows:

(5) Monthly rental payable by Y to X for 1973:	
(a) Y's sublease rental receipts for year .....	\$3,600.00
(b) Less: Y's profit .....	1,175.00
(c) Rental payable for 1973 .....	2,425.00
(d) Rental payable for each month (\$2,425÷3 months) .....	808.33

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

**§ 1.994-2 Marginal costing rules.**

(a) *In general.* This section prescribes the marginal costing rules authorized by section 994(b)(2). If under paragraph (c)(1) of this section a DISC is treated for its taxable year as seeking to establish or maintain a foreign market for sales of an item, product, or product line of export property (as defined in §1.993-3) from which qualified export receipts are derived, the marginal costing rules prescribed in paragraph (b) of this section may be applied to allocate costs between gross receipts derived from such sales and other gross receipts for purposes of computing, under the "50-50" combined taxable income method of §1.994-1(c)(3), the combined taxable income of the DISC and related supplier derived from such sales. Such marginal costing rules may be applied whether or not the related supplier manufactures, produces, grows, or extracts (within the meaning of §1.993-3(c)) the export property sold. Such marginal costing rules do not apply to sales of export property which in the hands of a purchaser related under section 954(d)(3) to the seller give rise to foreign base company sales income as described in section 954(d) unless, for the purchaser's year in which it resells the export property, section 954(b)(3)(A) is applicable or such income is under the exceptions in section 954(b)(4). Such

marginal costing rules do not apply to leases of property or the performance of any services whether or not related and subsidiary services (as defined in §1.994-1(b)(3)).

(b) *Marginal costing rules for allocations of costs—(1) In general.* Marginal costing is a method under which only marginal or variable costs of producing and selling a particular item, product, or product line are taken into account for purposes of section 994. Where this section is applicable, costs attributable to deriving qualified export receipts for the DISC's taxable year from sales of an item, product, or product line may be determined in any manner the related supplier (as defined in §1.994-1(a)(3)(ii)) chooses, provided that the requirements of both subparagraphs (2) and (3) of this paragraph are met.

(2) *Variable costs taken into account.* There are taken into account in computing the combined taxable income of the DISC and its related supplier from sales of an item, product, or product line the following costs:

(i) Direct production costs (as defined in §1.471-11(b)(2)(i)) and

(ii) Costs which are export promotion expenses, but only if they are claimed as export promotion expenses in determining taxable income derived by the DISC under the combined taxable income method of §1.994-1(c)(3).

At the taxpayer's option, all, a part, or none of the costs which qualify as export promotion expenses may be so claimed as export promotion expenses.

(3) *Overall profit percentage limitation.* As a result of such determination of costs attributable to such qualified export receipts for the DISC's taxable year, the combined taxable income of the DISC and its related supplier from sales of such item, product, or product line for the DISC's taxable year does not exceed gross receipts (determined under §1.993-6) of the DISC derived from such sales, multiplied by the overall profit percentage (determined under paragraph (c)(2) of this section).

(c) *Definitions—(1) Establishing or maintaining a foreign market.* A DISC shall be treated for its taxable year as seeking to establish or maintain a foreign market with respect to sales of an item, product, or product line of export property from which qualified export
