

Federal Crop Insurance Corporation, USDA

§ 407.12

§ 407.11 Group risk plan for corn.

The provisions of the Group Risk Plan for Corn for the 2000 and succeeding crop years are as follows:

1. Definitions

Harvest. Combining or picking corn for grain, or severing the stalk from the land and chopping the stalk and ear for the purpose of livestock feed.

NASS yield. The yield calculated by dividing the NASS estimate of the corn for grain production in the county, by the NASS estimate of the acres of corn for grain in the county, as specified in the actuarial documents. The actuarial documents will specify whether harvested or planted acreage is used to calculate the yield used to establish the expected county yield and calculate indemnities.

Planted acreage. Land in which the corn seed has been placed by a machine appropriate for the insured crop and planting method, at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice. Broadcast and subsequent mechanical incorporation of the corn seed is not allowed.

2. Crop Insured

(a) The insured crop will be all field corn:

- (1) Grown on insurable acreage in the county listed in the accepted application;
 - (2) Properly planted and reported by the acreage reporting date;
 - (3) Planted with the intent to be harvested as grain, silage, or green chop; and
 - (4) Not planted into an established grass or legume or interplanted with another crop.
- (b) Hybrid seed corn, popcorn, sweet corn, and other specialty corn may only be insured if a written agreement exists between you and us. Your request to insure such crop must be in writing and submitted to your agent not later than the sales closing date.

3. Payment

- (a) A payment will be made only if the payment yield for the insured crop year is less than your trigger yield.
- (b) Payment yields will be determined prior to April 16 following the crop year.
- (c) We will issue any payment to you prior to the May 16 immediately following our determination of the payment yield.
- (d) The payment is equal to the payment calculation factor multiplied by your policy protection for each insured crop practice and type specified in the actuarial documents.
- (e) The payment will not be recalculated even though the NASS yield may be subsequently revised.

4. Program Dates

State and county	Cancellation and termination dates	Contract change date
Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof.	January 15	November 30.
El Paso, Hudspeith, Culberson, Reeves, Loving, Winkler, Ector, Upton, Reagan, Sterling, Coke, Tom Green, Concho, McCulloch, San Saba, Mills, Hamilton, Bosque, Johnson, Tarrant, Wise, and Cooke Counties, Texas, and all Texas Counties lying south and east thereof to and including Terrell, Crockett, Sutton, Kimble, Gillespie, Blanco, Comal, Guadalupe, Gonzales, De Witt, Lavaca, Colorado, Wharton, and Matagorda Counties, Texas.	February 15	November 30.
Alabama; Arizona; Arkansas; California; Florida; Georgia; Louisiana; Mississippi; Nevada; North Carolina; South Carolina.	February 28	November 30.
All other Texas counties and all other states	March 15	November 30.

§ 407.12 Group risk plan for cotton.

The provisions of the Group Risk Plan for Cotton for the 2000 and succeeding crop years are as follows:

1. Definitions

Harvest. Removal of the seed cotton from the stalk.

NASS yield. The yield calculated by dividing the NASS estimate of upland cotton production in the county, by the NASS estimate of the acres of upland cotton in the county, as specified in the actuarial documents. The actuarial documents will specify whether harvested or planted acreage is used to calculate the yield used to establish the expected county yield and calculate indemnities.

calculate the yield used to establish the expected county yield and calculate indemnities.

Planted acreage. Land in which the cotton seed has been placed by a machine appropriate for the insured crop and planting method, at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice. Broadcast and subsequent mechanical incorporation of the cotton seed is not allowed.

2. Crop Insured

The insured crop will be all upland cotton:
