

§ 1478.18

(1) Barley; canola; corn; cotton; crambe , flaxseed; grain sorghum; mustard seed; oats; peanuts; rapeseed; rice; safflower; soybeans; sugar beets; sunflower-oil; sunflower-seed; tobacco; wheat; and

(2) Crops with multiple market uses such as fresh, processed or juice, as supported by NASS data or other data determined acceptable.

(c) The producer must submit documentation for determining the grade and other discount factors that were applied to the crop.

(d) Quality adjustments will be applied after production has been adjusted to standard moisture, when applicable.

(e) Except for cotton, if a quality adjustment has been made for multi-peril crop insurance purposes, an additional adjustment will not be made.

(f) Quality adjustments for crops, other than cotton, peanuts, sugar beets and tobacco, listed in paragraph (b)(1) of this section may be made by applying an adjustment factor based on dividing the Federal marketing assistance loan rate applicable to the crop and producer determined according to part 1421 of this chapter by the unadjusted county marketing assistance loan rate for the crop. For crops that grade "sample" and are marketed through normal channels, production will be adjusted as determined by CCC. County committees may, with state committee concurrence, establish county average quality adjustment factors.

(g) Quality adjustments for cotton shall be based on the difference between:

(1) The loan rate applicable to the crop and producer determined according to part 1427 of this chapter; and

(2) The adjusted county loan rate. The adjusted county rate is the county loan rate adjusted for the 5-year county average historical quality premium or discount, as determined by CCC.

(h) Quality adjustments for quota peanuts shall for unused quota be based on the difference between the adjusted sales price and the quota price. The adjusted sales price is the quota price minus discounts for quality, regardless of the actual sales price received. Adjustments for non-quota peanuts may

7 CFR Ch. XIV (1-1-01 Edition)

also be made to reflect diminished quality as determined by CCC.

(i) Quality adjustments for sugar beets shall be based on sugar content. The 1999 actual production for the producer shall be adjusted upward or downward to account for sugar content as determined by CCC.

(j) Quality adjustments for tobacco shall be based on the difference between the sales price and the support price except that the market price may be used instead of the support price where market prices for the tobacco are normally in excess of the support price.

(k) Quality adjustments for crops with multiple market uses such as fresh, processed and juice, shall be applied based on the difference between the producer's historical marketing percentage of each market use compared to the actual percentage for 1999.

(l) Quality adjustments for aflatoxin shall be based on the aflatoxin level. The producer must provide the county committee with proof a price reduction because of aflatoxin. The aflatoxin level must be 20 parts per billion or more before a quality adjustment will be made. The quality adjustment factor applied to affected production is .50 if the production is marketable. If the production is unmarketable due to aflatoxin levels of at least 20 parts per billion, production will be adjusted to zero. Any value received will be considered salvage.

(m) Any quantity of the crop determined to be salvage will not be considered production. Salvage values shall be factored by 0.60.

(n) Quality adjustments do not apply to value loss crops.

(o) Quality adjustments shall not apply to: hay, honey, maple sap, turfgrass sod, crops marketed for a use other than an intended use for which there is not an established county price or yield.

§ 1478.18 Value loss crops.

(a) Special provisions to assess losses and calculate disaster assistance under this part apply to the following crops and such other crops as determined by CCC: ornamental nursery; Christmas

Commodity Credit Corporation, USDA

§ 1479.2

trees; vegetable and root stock including ginseng root; and aquaculture, including ornamental fish.

(b) Disaster benefits under this part are calculated based on the loss of value at the time of disaster, as determined by CCC.

(c) For aquaculture, disaster benefits under this part for aquacultural species are limited to those aquacultural species that were placed in the aquacultural facility by the producer. Disaster benefits under this part shall not be made available for aquacultural species that are growing naturally in the aquaculture facility. Disaster benefits under this part are limited to aquacultural species that were planted or seeded on property owned or leased by the producer where that land has readily identifiable boundaries, and over which the producer has total control of the waterbed and the ground under the waterbed. Producers who only have control over a column of water will not be eligible for disaster benefits under this part.

(d) For ornamental nursery crops, disaster benefits under this part are limited to ornamental nursery crops that were grown in a container or controlled environment for commercial sale on property owned or leased by the producer, and cared for and managed using good nursery growing practices. Indigenous crops are not eligible for benefits under this part.

(e) For Christmas trees, disaster benefits under this part are limited to losses that exceed 35 percent of the value of the Christmas trees present at the time of the disaster. Christmas tree producers seeking disaster assistance under this part must provide acreage data, dates of plantings and the quantity of trees planted on each date.

(f) For vegetable and root stock, disaster benefits under this part are limited to plants grown in a container or controlled environment for use as transplants or root stock by the producer for commercial sale or property owned or leased by the producer and managed using good rootstock or fruit and vegetable plant growing practices.

§ 1478.19 Other specialty crops.

(a) For turfgrass sod, disaster benefits under this subpart are limited to

turfgrass sod that would have matured and been harvested during 1999, when a disaster caused in excess of 35 percent of the expected production to die.

(b) For honey, disaster benefits under this part are limited to table and nontable honey produced commercially for human consumption. For calculating benefits, all honey is considered a single crop, regardless of type or variety of floral source or intended use.

(c) For maple sap, disaster benefits under this part are limited to maple sap produced on private property in a controlled environment by a commercial operator for sale as sap or syrup. The maple sap must be produced from trees that are: located on land the producer controls by ownership or lease; managed for production of maple sap; and are at least 30 years old and 12 inches in diameter.

PART 1479—HARNEY COUNTY FLOOD ASSISTANCE

Sec.

1479.1 Applicability.

1479.2 Administration.

1479.3 Definitions.

1479.4 Application process.

1479.5 County committee determinations of general applicability.

1479.6 Loss criteria.

1479.7 Producer eligibility.

1479.8 Calculation of assistance.

1479.9 Availability of funds; payments.

AUTHORITY: Sec. 207, Pub. L. 106-113, 113 Stat. 1501.

SOURCE: 65 FR 36583, June 8, 2000, unless otherwise noted.

§ 1479.1 Applicability.

This subpart sets forth the terms and conditions applicable to flood assistance for Harney County, Oregon. Benefits will be provided to eligible producers in Harney County, Oregon, on land where flooding occurred during the 1999 crop year, and has been subject to flooding, one of the years 1994 through 1998.

§ 1479.2 Administration.

(a) This program shall be, to the extent practicable and to the extent not inconsistent with the provisions of this part, be administered in the same manner as the program provided for in 7
