

## Food and Nutrition Service, USDA

## § 210.10

(6) Claim reimbursement for no more than one meal supplement per child per day;

(7) Review each afterschool care program two times a year; the first review shall be made during the first four weeks that the school is in operation each school year, except that an afterschool care program operating year round shall be reviewed during the first four weeks of its initial year of operation, once more during its first year of operation, and twice each school year thereafter; and

(8) Comply with all requirements of this part, except that, claims for reimbursement need not be based on "point of service" meal supplement counts (as required by § 210.9(b)(9)).

[53 FR 29147, Aug. 2, 1988, as amended at 54 FR 12581, Mar. 28, 1989; 56 FR 32941, July 17, 1991; 58 FR 42488, Aug. 10, 1993; 60 FR 31208, June 13, 1995; 62 FR 901, Jan. 7, 1997; 63 FR 9104, Feb. 24, 1998; 64 FR 50740, Sept. 20, 1999; 64 FR 72471, Dec. 28, 1999; 65 FR 26912, May 9, 2000]

### **§ 210.10 What are the nutrition standards and menu planning approaches for lunches and the requirements for afterschool snacks?**

(a) *What are the general requirements?*

(1) *General nutrition requirements.* Schools must provide nutritious and well-balanced meals to all the children they serve.

(i) *Requirements for lunch.* For children age 2 or older, schools must offer lunches that meet, at a minimum, the nutrition standards in paragraph (b) of this section. Compliance with the nutrition standards and the appropriate nutrient and calorie levels is determined by averaging lunches planned to be offered over a school week. Under any menu planning approach, schools must plan and produce at least enough food to meet the appropriate calorie and nutrient levels for the ages/grades of the children in the school (see paragraphs (c), (d), (i)(1) or (l) of this section, depending on the menu planning approach used). Also, if schools use one of the food-based menu planning approaches, they must plan and produce at least enough food to offer each child the minimum quantities under the meal pattern (see paragraph (k) of this section). Schools offering lunches to infants must meet the meal pattern re-

quirements in paragraph (o) of this section.

(ii) *Requirements for afterschool snacks.* Schools offering afterschool snacks in afterschool care programs must meet the meal pattern requirements in paragraph (n) of this section. Schools must plan and produce enough food to offer each child the minimum quantities under the meal pattern in paragraph (n) of this section. The component requirements for meal supplements served under the Child and Adult Care Food Program authorized under part 226 of this chapter also apply to afterschool snacks served in accordance with paragraph (n) of this section.

(2) *Unit pricing.* Schools must price each meal as a unit. Schools need to consider participation trends in an effort to provide one reimbursable lunch and, if applicable, one reimbursable afterschool snack for each child every day. If there are leftover meals, schools may offer them to the students but cannot get reimbursement for them.

(3) *Production and menu records.* Schools must keep production and menu records for the meals they produce. These records must show how the meals contribute to the required food components, food items or menu items every day. In addition, for lunches, these records must show how the lunches contribute to the nutrition standards in paragraph (b) of this section and the appropriate calorie and nutrient levels for the ages/grades of the children in the school (see paragraphs (c), (d), or (i)(1) or (l) of this section, depending on the menu planning approach used) over the school week. If applicable, schools or school food authorities must maintain nutritional analysis records to demonstrate that lunches meet, when averaged over each school week:

(i) The nutrition standards provided in paragraph (b) of this section; and

(ii) The nutrient and calorie levels for children for each age or grade group in accordance with paragraphs (c) or (i)(1) of this section or developed under paragraph (l) of this section.

(b) *What are the specific nutrition standards for lunches?* Children age 2 and above must be offered lunches that meet the following nutrition standards for their age/grade group:

§210.10

7 CFR Ch. II (1-1-01 Edition)

(1) Provision of one-third of the Recommended Dietary Allowances (RDAs) for protein, calcium, iron, vitamin A and vitamin C in the appropriate levels for the ages/grades (see paragraphs (c), (d), (i)(1) or (l) of this section, depending on the menu planning approach used);

(2) Provision of the lunchtime energy allowances (calories) in the appropriate levels (see paragraphs (c), (d),(i)(1) or (l) of this section, depending on the menu planning approach used);

(3) These applicable recommendations from the 1995 Dietary Guidelines for Americans:

- (i) Eat a variety of foods;
- (ii) Limit total fat to 30 percent of total calories;
- (iii) Limit saturated fat to less than 10 percent of total calories;
- (iv) Choose a diet low in cholesterol;
- (v) Choose a diet with plenty of grain products, vegetables, and fruits; and
- (vi) Choose a diet moderate in salt and sodium.

(4) These measures of compliance with the applicable recommendations of the 1995 Dietary Guidelines for Americans:

- (i) Limit the percent of calories from total fat to 30 percent of the actual number of calories offered;
- (ii) Limit the percent of calories from saturated fat to less than 10 per-

cent of the actual number of calories offered;

(iii) Reduce sodium and cholesterol levels; and

(iv) Increase the level of dietary fiber.

(5) School food authorities have several ways to plan menus. The minimum levels of nutrients and calories that lunches must offer depends on the menu planning approach used and the ages/grades served. The menu planning approaches are:

(i) Nutrient standard menu planning (see paragraphs (c) and (i) of this section);

(ii) Assisted nutrient standard menu planning (see paragraphs (c) and (j) of this section);

(iii) Traditional food-based menu planning (see paragraphs (d)(1) and (k) of this section);

(iv) Enhanced food-based menu planning (see paragraphs (d)(2) and (k) of this section); or

(v) Alternate menu planning (see paragraph (l) of this section).

(c) *What are the levels for nutrients and calories for lunches planned under the nutrient standard or assisted nutrient standard menu planning approaches?*

(1) *Required levels.* The required levels are:

MINIMUM NUTRIENT AND CALORIE LEVELS FOR SCHOOL LUNCHES NUTRIENT STANDARD MENU PLANNING APPROACHES (SCHOOL WEEK AVERAGES)				
NUTRIENTS AND ENERGY ALLOWANCES	MINIMUM REQUIREMENTS			OPTIONAL
	Preschool	Grades K-6	Grades 7-12	Grades K-3
Energy allowances (calories)	517	664	825	633
Total fat (as a percentage of actual total food energy)	<sup>1</sup>	1.2	2	1.2
Saturated fat (as a percentage of actual total food energy)	<sup>1</sup>	1.3	3	1.3
RDA for protein (g)	7	10	16	9
RDA for calcium (mg)	267	286	400	267
RDA for iron (mg)	3.3	3.5	4.5	3.3
RDA for Vitamin A (RE)	150	224	300	200
RDA for Vitamin C (mg)	14	15	18	15

<sup>1</sup> The Dietary Guidelines recommend that after 2 years of age "...children should gradually adopt a diet that, by about 5 years of age, contains no more than 30 percent of calories from fat."

<sup>2</sup> Not to exceed 30 percent over a school week

<sup>3</sup> Less than 10 percent over a school week

(2) *Optional levels.* Optional levels are:

OPTIONAL MINIMUM NUTRIENT AND CALORIE LEVELS FOR SCHOOL LUNCHES NUTRIENT STANDARD MENU PLANNING APPROACHES (SCHOOL WEEK AVERAGES)				
NUTRIENTS AND ENERGY ALLOWANCES	AGES 3-6	AGES 7-10	AGES 11-13	AGES 14 AND ABOVE
Energy allowances (calories)	558	667	783	846
Total fat (as a percentage of actual total food energy)	1.2	2	2	2
Saturated fat (as a percentage of actual total food energy)	1.3	3	3	3
RDA for protein (g)	7.3	9.3	15.0	16.7
RDA for calcium (mg)	267	267	400	400
RDA for iron (mg)	3.3	3.3	4.5	4.5
RDA for Vitamin A (RE)	158	233	300	300
RDA for Vitamin C (mg)	14.6	15	16.7	19.2

<sup>1</sup> The Dietary Guidelines recommend that after 2 years of age "...children should gradually adopt a diet that, by about 5 years of age, contains no more than 30 percent of calories from fat."

<sup>2</sup> Not to exceed 30 percent over a school week

<sup>3</sup> Less than 10 percent over a school week

(3) *Customized levels.* Schools may also develop a set of nutrient and calorie levels for a school week. These levels are customized for the age groups of the children in the particular school or school food authority.

(d) *What are the nutrient and calorie levels for lunches planned under the food-based menu planning approaches?*

(1) *Traditional approach.* For the traditional food-based menu planning approach, the required levels are:

NUTRIENTS AND ENERGY ALLOWANCES	MINIMUM NUTRIENT AND CALORIE LEVELS FOR SCHOOL LUNCHES TRADITIONAL FOOD-BASED MENU PLANNING APPROACH (SCHOOL WEEK AVERAGES)			
	MINIMUM REQUIREMENTS		RECOMMENDED	
	GROUP I PRESCHOOL AGES 3-4	GROUP II GRADES K-3 AGES 5-8	GROUP III GRADES 4-12 AGES 9 AND OLDER	GROUP IV GRADES 7-12 AGES 12 AND OLDER
Energy allowances (calories)	617	633	768	825
Total fat (as a percentage of actual total food energy)	1	1.3	1	1
Saturated fat (as a percentage of actual total food energy)	1	1.3	1	1
RDA for protein (g)	7	9	15	16
RDA for calcium (mg)	267	267	370	400
RDA for iron (mg)	3.3	3.3	4.3	4.5
RDA for Vitamin A (RE)	158	200	285	300
RDA for Vitamin C (mg)	14	15	17	18

<sup>1</sup> The Dietary Guidelines recommend that after 2 years of age "...children should gradually adopt a diet that, by about 5 years of age, contains no more than 30 percent of calories from fat."

<sup>2</sup> Not to exceed 30 percent over a school week

<sup>3</sup> Less than 10 percent over a school week

(2) *Enhanced approach.* For the enhanced food-based menu planning approach, the required levels are:

MINIMUM NUTRIENT AND CALORIE LEVELS FOR SCHOOL LUNCHES ENHANCED FOOD-BASED MENU PLANNING APPROACH (SCHOOL WEEK AVERAGES)				
NUTRIENTS AND ENERGY ALLOWANCES	MINIMUM REQUIREMENTS			OPTIONAL
	PRESCHOOL	GRADES K-6	GRADES 7-12	GRADES K-3
Energy allowances (calories)	517	664	825	633
Total fat (as a percentage of actual total food energy)	1	1, 2	2	1, 2
Saturated fat (as a percentage of actual total food energy)	1	1, 3	3	1, 3
RDA for protein (g)	7	10	16	9
RDA for calcium (mg)	267	286	400	267
RDA for iron (mg)	3.3	3.5	4.5	3.3
RDA for Vitamin A (RE)	150	224	300	200
RDA for Vitamin C (mg)	14	15	18	15

<sup>1</sup> The Dietary Guidelines recommend that after 2 years of age "...children should gradually adopt a diet that, by about 5 years of age, contains no more than 30 percent of calories from fat."

<sup>2</sup> Not to exceed 30 percent over a school week

<sup>3</sup> Less than 10 percent over a school week

(e) *Must schools offer choices at lunch?* FNS encourages schools to offer children a selection of foods and menu items at lunch. Choices provide variety and encourage consumption. Schools may offer choices of reimbursable lunches or foods within a reimbursable lunch. Children who are eligible for free or reduced price lunches must be allowed to take any reimbursable lunch or any choices offered as part of a reimbursable lunch. Schools may establish different unit prices for each lunch offered provided that the benefits made available to children eligible for free or reduced price lunches are not affected.

(f) *What are the requirements for lunch periods?*

(1) *Timing.* Schools must offer lunches meeting the requirements of this section during the period the school has designated as the lunch period. Schools must offer lunches between 10:00 a.m. and 2:00 p.m. Schools may request an exemption from these times only from FNS.

(2) *Lunch periods for young children.* With State agency approval, schools are encouraged to serve children ages one through five over two service periods. Schools may divide the quantities and/or the menu items, foods, or food items offered each time any way they wish.

(3) *Adequate lunch periods.* FNS encourages schools to provide sufficient

lunch periods that are long enough to give all students enough time to be served and to eat their lunches.

(g) *What exceptions and variations are allowed in meals?*

(1) *Exceptions for medical or special dietary needs.* Schools must make substitutions in lunches and afterschool snacks for students who are considered to have a disability under 7 CFR part 15b and whose disability restricts their diet. Schools may also make substitutions for students who do not have a disability but who cannot consume the regular lunch or afterschool snack because of medical or other special dietary needs. Substitutions must be made on a case by case basis only when supported by a statement of the need for substitutions that includes recommended alternate foods, unless otherwise exempted by FNS. Such statement must, in the case of a student with a disability, be signed by a physician or, in the case of a student who is not disabled, by a recognized medical authority.

(2) *Variations for ethnic, religious, or economic reasons.* Schools should consider ethnic and religious preferences when planning and preparing meals. Variations on an experimental or continuing basis in the food components for the food-based menu planning approaches in paragraphs (k) or (n) of this section may be allowed by FNS. Any variations must be nutritionally

sound and needed to meet ethnic, religious, or economic needs.

(3) *Exceptions for natural disasters.* If there is a natural disaster or other catastrophe, FNS may temporarily allow schools to serve meals for reimbursement that do not meet the requirements in this section.

(h) *What must schools do about nutrition disclosure?* To the extent that school food authorities identify foods in a menu, or on the serving line or through other available means of communicating with program participants, school food authorities must identify products or dishes containing more than 30 parts fully hydrated alternate protein products (as specified in appendix A of this part) to less than 70 parts beef, pork, poultry or seafood on an uncooked basis, in a manner which does not characterize the product or dish solely as beef, pork, poultry or seafood. Additionally, FNS encourages schools to inform the students, parents, and the public about efforts they are making to meet the nutrition standards (see paragraph (b) of this section) for school lunches.

(i) *What are the requirements for lunches under the nutrient standard menu planning approach?*

(1) *Nutrient levels.*

(i) *Adjusting nutrient levels for young children.* Schools with children who are age 2 must at least meet the nutrition standards in paragraph (b) of this section and the preschool nutrient and calorie levels in paragraph (c)(1) of this section over a school week. Schools may also use the preschool nutrient and calorie levels in paragraph (c)(2) of this section or may calculate nutrient and calorie levels for two year olds. FNS has a method for calculating these levels in guidance materials for menu planning.

(ii) *Minimum levels for nutrients.* Lunches must at least offer the nutrient and calorie levels for the required grade groups in the table in paragraph (c)(1) of this section. Schools may also offer lunches meeting the nutrient and calorie levels for the age groups in paragraph (c)(2) of this section. If only one grade or age group is outside either of these established levels, schools may follow the levels for the majority of the children. Schools may also customize

the nutrient and calorie levels for the children they serve. FNS has a method for calculating these levels in guidance materials for menu planning.

(2) *Reimbursable lunches.*

(i) *Contents of a reimbursable lunch.* A reimbursable lunch must include at least three menu items. One of those menu items must be an entree, and one must be fluid milk as a beverage. An entree is a combination of foods or is a single food item offered as the main course. All menu items or foods offered in a reimbursable lunch contribute to the nutrition standards in paragraph (b) of this section and to the levels of nutrients and calories that must be met in paragraphs (c) or (i)(1) of this section. Unless offered as part of a menu item in a reimbursable lunch, foods of minimal nutritional value (see appendix B to part 210) are not included in the nutrient analysis. Reimbursable lunches planned under the nutrient standard menu planning approach must meet the nutrition standards in paragraph (b) of this section and the appropriate nutrient and calorie levels in either paragraph (c) or paragraph (i)(1) of this section.

(ii) *Offer versus serve.* Schools must offer at least three menu items for lunches. Senior high (as defined by the State educational agency) school students must select at least two menu items and are allowed to decline a maximum of two menu items. The student must always take the entree. The price of a reimbursable lunch does not change if the student does not take a menu item or requests smaller portions. At the discretion of the school food authority, students below the senior high level may also participate in offer versus serve.

(3) *Doing the analysis.* Schools using nutrient standard menu planning must conduct the analysis on all menu items and foods offered in a reimbursable lunch. The analysis is conducted over a school week. Unless offered as part of a menu item in a reimbursable lunch, foods of minimal nutritional value (see appendix B to part 210) are not included in the nutrient analysis.

(4) *Software elements.*

(i) *The Child Nutrition Database.* The nutrient analysis is based on the Child Nutrition Database. This database is

## §210.10

## 7 CFR Ch. II (1–1–01 Edition)

part of the software used to do a nutrient analysis. Software companies or others developing systems for schools may contact FNS for more information about the database.

(ii) *Software evaluation.* FNS or an FNS designee evaluates any nutrient analysis software before it may be used in schools. FNS or its designee determines if the software, as submitted, meets the minimum requirements. The approval of software does not mean that FNS or USDA endorses it. The software must be able to do all functions after the basic data is entered. The required functions include weighted averages and the optional combined analysis of the lunch and breakfast programs.

### (5) *Nutrient analysis procedures.*

(i) *Weighted averages.* Schools must include all menu items and foods offered in reimbursable lunches in the nutrient analysis. Menu items and foods are included based on the portion sizes and projected serving amounts. They are also weighted based on their proportionate contribution to the lunches offered. This means that menu items or foods more frequently offered are weighted more heavily than those not offered as frequently. Schools calculate weighting as indicated by FNS guidance and by the guidance provided by the software. Through September 30, 2003, schools are not required to conduct a weighted analysis.

(ii) *Analyzed nutrients.* The analysis includes all menu items and foods offered over a school week. The analysis must determine the levels of: Calories, protein, vitamin A, vitamin C, iron, calcium, total fat, saturated fat, sodium, cholesterol and dietary fiber.

(iii) *Combining the analysis of the lunch and breakfast programs.* At their option, schools may combine the analysis of lunches offered under this part and breakfasts offered under part 220 of this Chapter. The analysis is done proportionately to the levels of participation in each program based on FNS guidance.

(6) *Comparing the results of the nutrient analysis.* Once the procedures in paragraph (i)(5) of this section are completed, schools must compare the results of the analysis to the appropriate nutrient and calorie levels, by age/

grade groups, in paragraph (c) of this section or those developed under paragraph (i)(1) of this section. This comparison determines the school week's average. Schools must also make comparisons to the nutrition standards in paragraph (b) of this section to determine how well they are meeting the nutrition standards over the school week.

(7) *Adjustments to the menus.* Once schools know the results of the nutrient analysis based on the procedures in paragraphs (i)(5) and (i)(6) of this section, they must adjust future menu cycles to reflect production and how often the menu items and foods are offered. Schools may need to reanalyze menus when the students' selections change and, consequently, production levels change. Schools may need to change the menu items and foods offered given the students' selections and may need to modify the recipes and other specifications to make sure that the nutrition standards in paragraph (b) and either paragraphs (c) or (i)(1) of this section are met.

(8) *Standardized recipes.* If a school follows the nutrient standard menu planning approach, it must develop and follow standardized recipes. A standardized recipe is a recipe that was tested to provide an established yield and quantity using the same ingredients for both measurement and preparation methods. Any standardized recipes developed by USDA/FNS are in the Child Nutrition Database. If a school has its own recipes, they must be standardized and analyzed to determine the levels of calories, nutrients, and dietary components listed in paragraph (i)(5)(ii) of this section. Schools must add any local recipes to their local database as outlined in FNS guidance.

(9) *Processed foods.* The Child Nutrition Database includes a number of processed foods. Schools may use purchased processed foods and menu items that are not in the Child Nutrition Database. Schools or the State agency must add any locally purchased processed foods and menu items to their local database as outlined in FNS guidance. Schools or the State agency must obtain the levels of calories, nutrients, and dietary components listed in paragraph (i)(5)(ii) of this section.

(10) *Menu substitutions.* Schools may need to substitute foods or menu items in a menu that was already analyzed. If the substitution(s) occurs more than two weeks before the planned menu is served, the school must reanalyze the revised menu. If the substitution(s) occurs two weeks or less before the planned menu is served, the school does not need to do a reanalysis. However, schools should always try to substitute similar foods.

(11) *Meeting the nutrition standards.* The school's analysis shows whether their menus are meeting the nutrition standards in paragraph (b) of this section and the appropriate levels of nutrients and calories in paragraph (c) of this section or customized levels developed under paragraph (i)(1) of this section. If the analysis shows that the menu(s) are not meeting these standards, the school needs to take action to make sure that the lunches meet the nutrition standards and the calorie, nutrient, and dietary component levels. Actions may include technical assistance and training and may be taken by the State agency, the school food authority or by the school as needed.

(12) *Other Child Nutrition Programs and nutrient standard menu planning.* School food authorities that operate the Summer Food Service Program (part 225 of this chapter) and/or the Child and Adult Care Food Program (part 226 of this chapter) may, with State agency approval, prepare lunches for these programs using the nutrient standard menu planning approach for children age two and over. FNS has guidance on the levels of nutrients and calories for adult lunches under the Child and Adult Care Food Program. However, afterschool snacks continue to use the appropriate program's meal pattern.

(j) *What are the requirements for lunches under the assisted nutrient standard menu planning approach?* (1) *Definition of assisted nutrient standard menu planning.* Some school food authorities may not be able to do all of the procedures necessary for nutrient standard menu planning. The assisted nutrient standard menu planning approach provides schools with menu cycles developed and analyzed by other sources. These sources include the State agen-

cy, other school food authorities, consultants, or food service management companies.

(2) *Elements of assisted nutrient standard menu planning.* School food authorities using menu cycles developed under assisted nutrient standard menu planning must follow the procedures in paragraphs (i)(1) through (i)(10) of this section. The menu cycles must also incorporate local food preferences and accommodate local food service operations. The menu cycles must meet the nutrition standards in paragraph (b) of this section and meet the nutrient and calorie levels for nutrient standard menu planning in paragraph (c) or paragraph (i)(1) of this section. The supplier of the assisted nutrient standard menu planning approach must also develop and provide recipes, food product specifications, and preparation techniques. All of these components support the nutrient analysis results of the menu cycles used by the receiving school food authorities.

(3) *State agency approval.* Prior to its use, the State agency must approve the initial menu cycle, recipes and other specifications of the assisted nutrient standard menu planning approach. The State agency needs to ensure that all the steps required for nutrient analysis were followed. School food authorities may also ask the State agency for assistance with implementation of their assisted nutrient standard menu planning approach.

(4) *Required adjustments.* After the initial service of the menu cycle developed under the assisted nutrient standard menu planning approach, the nutrient analysis must be reassessed and appropriate adjustments made as discussed in paragraph (i)(7) of this section.

(5) *Final responsibility for meeting the nutrition standards.* The school food authority using the assisted nutrient standard menu planning approach retains responsibility for meeting the nutrition standards in paragraph (b) of this section and the calorie and nutrient levels in paragraph (c) or paragraph (i)(1) of this section.

(6) *Adjustments to the menus.* If the nutrient analysis shows that the lunches offered are not meeting the nutrition

§210.10

7 CFR Ch. II (1-1-01 Edition)

standards in paragraph (b) of this section and the calorie and nutrient levels in paragraph (c) or paragraph (i)(1) of this section, the State agency, school food authority or school must take action to make sure the lunches offered meet these requirements. Actions needed include technical assistance and training.

(7) *Other Child Nutrition Programs and assisted nutrient standard menu planning.* School food authorities that operate the Summer Food Service Program (part 225 of this chapter) and/or the Child and Adult Care Food Program (part 226 of this chapter) may, with State agency approval, prepare lunches for these programs using the assisted nutrient standard menu planning approach for children age two and over. FNS has guidance on the levels of nutrients and calories for adult lunches

under the Child and Adult Care Food Program. However, afterschool snacks continue to use the appropriate program's meal pattern.

(k) *What are the requirements for lunches under the food-based menu planning approaches?* There are two menu planning approaches based on meal patterns, not nutrient analysis. These approaches are the traditional food-based menu planning approach and the enhanced food-based menu planning approach. Schools using one of these approaches offer food components in at least the minimum quantities required for the various grade groups.

(1) *Quantities for the traditional food-based menu planning approach—(i) Minimum quantities.* At a minimum, schools must offer five food items in the quantities in the following table:

TRADITIONAL FOOD-BASED MENU PLANNING APPROACH—MEAL PATTERN FOR LUNCHES						
FOOD COMPONENTS AND FOOD ITEMS	MINIMUM QUANTITIES					RECOMMENDED QUANTITIES
	GROUP I AGES 1-2 PRESCHOOL	GROUP II AGES 3-4 PRESCHOOL	GROUP III, AGES 5-8 GRADES K-3	GROUP IV AGES 9 AND OLDER GRADES 4-12	GROUP V AGES 12 AND OLDER GRADES 7-12	
Milk (as a beverage)	6 fluid ounces	6 fluid ounces	8 fluid ounces	8 fluid ounces	8 fluid ounces	
Meat or Meat Alternate (quantity of the edible portion as served):						
Lean meat, poultry, or fish	1 ounce	1½ ounces	1½ ounces	2 ounces	3 ounces	
Alternate Protein Products <sup>1</sup>	1 ounce	1½ ounces	1½ ounces	2 ounces	3 ounces	
Cheese	1 ounce	1½ ounces	1½ ounces	2 ounces	3 ounces	
Large egg	½	¾	¾	1	1½	
Cooked dry beans or peas	¼ cup	3/8 cup	3/8 cup	¼ cup	¾ cup	
Peanut butter or other nut or seed butters	2 tablespoons	3 tablespoons	3 tablespoons	4 tablespoons	6 tablespoons	
Yogurt, plain or flavored, unsweetened or sweetened	4 ounces or ½ cup	6 ounces or ¾ cup	6 ounces or ¾ cup	8 ounces or 1 cup	12 ounces or 1½ cups	
The following may be used to meet no more than 50% of the requirement and must be used in combination with any of the above:						
Peanuts, soynuts, tree nuts, or seeds, as listed in program guidance, or an equivalent quantity of any combination of the above meat/meat alternate (1 ounce of nuts/seeds = 1 ounce of cooked lean meat, poultry, or fish)	½ ounce = 50%	¾ ounce = 50%	¾ ounce = 50%	1 ounce = 50%	1½ ounces = 50%	
Vegetable or Fruit: 2 or more servings of vegetables, fruits or both	½ cup	½ cup	½ cup	¾ cup	¾ cup	
Grains/Breads: (servings per week): Must be enriched or whole grain. A serving is a slice of bread or an equivalent serving of biscuits, rolls, etc., or ½ cup of cooked rice, macaroni, noodles, other pasta products or cereal grains	5 servings per week <sup>2</sup> -- minimum of ½ serving per day	8 servings per week <sup>2</sup> -- minimum of 1 serving per day	8 servings per week <sup>2</sup> -- minimum of 1 serving per day	8 servings per week <sup>2</sup> -- minimum of 1 serving per day	10 servings per week <sup>2</sup> -- minimum of 1 serving per day	

<sup>1</sup> Must meet the requirements in appendix A of this part.  
<sup>2</sup> For the purposes of this table, a week equals five days.

(ii) *Use of Group IV quantities.* Schools that are able to provide quantities of food to children solely on the basis of their ages or grade level should do so.

**Food and Nutrition Service, USDA**

**§ 210.10**

Schools that cannot serve children on the basis of age or grade level must provide all school age children Group IV portions as specified in the table in paragraph (k)(1)(i) of this section. Schools serving children on the basis of age or grade level must plan and produce sufficient quantities of food to provide Groups I-IV no less than the amounts specified for those children in the table in paragraph (k)(1)(i) of this section, and sufficient quantities of food to provide Group V no less than the specified amounts for Group IV. FNS recommends that schools plan and produce sufficient quantities of food to provide Group V children the larger amounts specified in the table in para-

graph (k)(1)(i) of this section. Schools that provide increased portion sizes for Group V may comply with children's requests for smaller portion sizes of the food items; however, schools must plan and produce sufficient quantities of food to at least provide the serving sizes required for Group IV. Schools must ensure that lunches are served with the objective of providing the per lunch minimums for each age and grade level as specified in the table in paragraph (k)(1)(i) of this section.

(2) *Quantities for the enhanced food-based menu planning approach.* Schools must at least offer five food items in the quantities in the following table:

ENHANCED FOOD-BASED MENU PLANNING APPROACH-MEAL PATTERN FOR LUNCHES					
FOOD COMPONENTS AND FOOD ITEMS	MINIMUM REQUIREMENTS				OPTION FOR
	AGES 1-2	PRESCHOOL	GRADES K-6	GRADES 7-12	GRADES K-3
Milk (as a beverage)	6 fluid ounces	6 fluid ounces	8 fluid ounces	8 fluid ounces	8 fluid ounces
Meat or Meat Alternate (quantity of the edible portion as served):					
Lean meat, poultry, or fish	1 ounce	1 ½ ounces	2 ounces	2 ounces	1 ½ ounces
Alternate protein products <sup>1</sup>	1 ounce	1 ½ ounces	2 ounces	2 ounces	1 ½ ounces
Cheese	1 ounce	1 ½ ounces	2 ounces	2 ounces	1 ½ ounces
Large egg	½	¾	1	1	¾
Cooked dry beans or peas	¼ cup	3/8 cup	½ cup	½ cup	3/8 cup
Peanut butter or other nut or seed butters	2 tablespoons	3 tablespoons	4 tablespoons	4 tablespoons	3 tablespoons
Yogurt, plain or flavored, unsweetened or sweetened	4 ounces or ½ cup	6 ounces or ¾ cup	8 ounces or 1 cup	8 ounces or 1 cup	6 ounces or ¾ cup
The following may be used to meet no more than 50% of the requirement and must be used in combination with any of the above:					
Peanuts, soynuts, tree nuts, or seeds, as listed in program guidance, or an equivalent quantity of any combination of the above meat/meat alternate (1 ounce of nuts/seeds equals 1 ounce of cooked lean meat, poultry or fish).	½ ounce =50%	¾ ounce =50%	1 ounce =50%	1 ounce =50%	¾ ounce =50%
Vegetable or Fruit: 2 or more servings of vegetables, fruits or both	½ cup	¾ cup	¾ cup plus an extra ½ cup over a week <sup>2</sup>	1 cup	¾ cup
Grains/Breads (servings per week): Must be enriched or whole grain. A serving is a slice of bread or an equivalent serving of biscuits, rolls, etc., or ½ cup of cooked rice, macaroni, noodles, other pasta products or cereal grains	5 servings per week <sup>2</sup> – minimum of ½ serving per day	8 servings per week <sup>2</sup> – minimum of 1 serving per day	12 servings per week <sup>2</sup> – minimum of 1 serving per day <sup>3</sup>	15 servings per week <sup>2</sup> – minimum of 1 serving per day <sup>3</sup>	10 servings per week <sup>2</sup> – minimum of 1 serving per day <sup>3</sup>

<sup>1</sup> Must meet the requirements in appendix A of this part.  
<sup>2</sup> For the purposes of this table, a week equals five days.  
<sup>3</sup> Up to one grains/breads serving per day may be a dessert.

(3) *Requirements for the meat/meat alternate component.* The quantity of the meat/meat alternate component must be the edible portion as served. If the portion size of a food item for this component is excessive, the school must re-

duce that portion and supplement it with another meat/meat alternate to meet the full requirement. This component must be served in a main dish or in a main dish and only one other food item. Schools without daily choices in

## §210.10

this component should not serve any one meat alternate or form of meat (for example, ground, diced, pieces) more than three times in the same week.

(i) *Enriched macaroni*. Enriched macaroni with fortified protein as defined in appendix A to this part may be used to meet part of the meat/meat alternate requirement when used as specified in appendix A to this part. An enriched macaroni product with fortified protein as defined in appendix A to this part may be used to meet part of the meat/meat alternate component or the grains/breads component but not as both food components in the same lunch.

(ii) *Nuts and seeds*. Nuts and seeds and their butters are allowed as meat alternates in accordance with program guidance. Acorns, chestnuts, and coconuts must not be used because of their low protein and iron content. Nut and seed meals or flours may be used only as allowed under appendix A to this part. Nuts or seeds may be used to meet no more than one-half of the meat/meat alternate component with another meat/meat alternate to meet the full requirement.

(iii) *Yogurt*. Yogurt may be used to meet all or part of the meat/meat alternate requirement. Yogurt may be either plain or flavored, unsweetened or sweetened. Noncommercial and/or non-standardized yogurt products, such as frozen yogurt, homemade yogurt, yogurt flavored products, yogurt bars, yogurt covered fruit and/or nuts or similar products are not creditable. Four ounces (weight) or ½ cup (volume) of yogurt equals one ounce of the meat/meat alternate requirement.

(4) *Requirements for the vegetable/fruit component*.

(i) *General*. Full strength vegetable or fruit juice may be used to meet no more than one-half of the vegetable/fruit requirement. Cooked dry beans or peas may be counted as either a vegetable or as a meat alternate but not as both in the same meal.

(ii) *Minimum quantities for the enhanced food-based menu planning*. Under the enhanced food-based menu planning approach, children in kindergarten through grade six are offered vegetables/fruits in minimum daily servings plus an additional one-half

## 7 CFR Ch. II (1-1-01 Edition)

cup in any combination over a five day period.

(5) *Requirements for the grains/breads component*.

(i) *Enriched or whole grains*. All grains/breads must be enriched or whole grain or made with enriched or whole grain meal or flour.

(ii) *Daily and weekly servings*. The requirement for the grain/bread component is based on minimum daily servings plus total servings over a five day period. Schools serving lunch 6 or 7 days per week should increase the weekly quantity by approximately 20 percent (⅕th) for each additional day. When schools operate less than 5 days per week, they may decrease the weekly quantity by approximately 20 percent (⅕th) for each day less than five. The servings for biscuits, rolls, muffins, and other grain/bread varieties are specified in the Food Buying Guide for Child Nutrition Programs (PA 1331), an FNS publication.

(iii) *Minimums under the traditional food-based menu planning approach*. Schools must offer at least one-half serving of the grain/bread component to children in Group I and at least one serving to children in Groups II-V daily. Schools which serve lunch at least 5 days a week shall serve a total of at least five servings of grains/breads to children in Group I and eight servings per week to children in Groups II-V.

(iv) *Desserts under the enhanced food-based menu planning approach*. Under the enhanced food-based menu planning approach, schools may count up to one grain-based dessert per day for children in grades K-12 towards meeting the grains/breads component.

(6) *Offer versus serve*. Schools must offer all five required food items. Senior high (as defined by the State educational agency) school students may decline up to two of the five food items. At the school food authority's option, students below senior high may decline one or two of the five food items. The price of a reimbursable lunch does not change if the student does not take a menu item or requests smaller portions.

(7) *Meal pattern exceptions for outlying areas*. Schools in American Samoa, Puerto Rico and the Virgin Islands

may serve a starchy vegetable such as yams, plantains, or sweet potatoes to meet the grain/bread requirement.

(1) *What are the requirements for lunches planned using an alternate menu planning approach?*

(1) *Definition.* Alternate menu planning approaches are those adopted or developed by school food authorities or State agencies that differ from the standard approaches established in paragraphs (i) through (k) of this section. There are two types of alternate approaches. First, there are specific modifications provided in paragraph (1)(2) of this section. Second, there are major changes to the standard menu planning approaches or new menu planning approaches developed by school food authorities or State agencies (see paragraph (1)(3) of this section).

(2) *Use of modifications.* There are three modifications available to schools using one of the food-based menu planning approaches for lunches. State agencies may or may not require prior approval or may establish guidelines for using these modifications.

(i) *Modification to the meat/meat alternate component.* The required minimum quantities of the meat/meat alternate component in the food-based menu planning approaches may be offered as a weekly total with a one ounce (or its equivalent for certain meat alternates) minimum daily serving size. This modification does not apply if the minimum serving of meat/meat alternate is less than one ounce.

(ii) *Modification to age/grade groups under the traditional food-based menu planning approach.* Schools using the traditional food-based menu planning approach may:

(A) For children in grades K–6, use the portion sizes in Group IV in the table in paragraph (k)(1) of this section and follow the nutrient levels for children in grades K–6 in paragraphs (c)(1) and (d)(2) of this section; and/or

(B) For children in grades 7–12, use the portion sizes in Group IV in the table in paragraph (k)(1) of this section and follow the nutrient levels for children in grades 7–12 in paragraphs (c)(1) and (d)(2) of this section.

(iii) *Modification for the majority of children.* Under the traditional or enhanced food-based menu planning ap-

proaches, if only one age or grade is outside the established levels, schools may follow the levels for the majority of children for both quantities (see paragraph (k)) and the nutrition standards in paragraphs (b) and (d) of this section.

(3) *Use and approval of major changes or new alternate approaches.* Within the guidelines established for developing alternate menu planning approaches, school food authorities or State agencies may modify one of the established menu planning approaches in paragraphs (i) through (k) of this section or may develop their own menu planning approach. The alternate menu planning approach must be available in writing for review and monitoring purposes. No formal plan is required; guidance material, a handbook or protocol is sufficient. As appropriate, the material must address how the guidelines in paragraph (1)(4) of this section are met. A State agency that develops an alternate approach that is exempt from FNS approval under paragraph (1)(3)(iii) of this section must notify FNS in writing when implementing the alternate approach.

(i) *Approval of local level approaches.* Any school food authority-developed menu planning approach must have prior State agency review and approval.

(ii) *Approval of State agency approaches.* Unless exempt under paragraph (1)(3)(iii) of this section, any State agency-developed menu planning approach must have prior FNS approval.

(iii) *State agency approaches not subject to approval.* A State agency-developed menu planning approach does not need FNS approval if:

(A) Five or more school food authorities in the State use it; and

(B) The State agency maintains ongoing oversight of the operation and evaluation of the approach and makes any needed adjustments to its policies and procedures to ensure that the appropriate guidelines of paragraph (1)(4) of this section are met.

(4) *Elements for major changes or new approaches.* Any alternate menu planning approach must:

(i) Offer fluid milk, as provided in paragraph (m) of this section;

## §210.10

(ii) Include offer versus serve for senior high students. Alternate menu planning approaches should follow the offer versus serve procedures in paragraphs (i)(2)(ii) and (k)(6) of this section, as appropriate. If these requirements are not followed, the plan must indicate:

(A) The affected age/grade groups;

(B) The number and type of items (and, if applicable, the quantities for the items) that constitute a reimbursable lunch under offer versus serve;

(C) How such procedures will reduce plate waste; and

(D) How a reasonable level of calories and nutrients for the lunch as taken is provided;

(iii) Meet the Recommended Dietary Allowances and lunchtime energy allowances (nutrient levels) and indicate the age/grade groups served and how the nutrient levels are met for those age/grade groups;

(iv) Follow the requirements for competitive foods in §210.11 and appendix B to this part;

(v) Follow the requirements for counting food items and products towards the meal patterns. These requirements are found in paragraphs (k)(3) through (k)(5) and paragraph (m) of this section, in appendices A through C to this part, and in instructions and guidance issued by FNS. This only applies if the alternate approach is a food-based menu planning approach;

(vi) Identify a reimbursable lunch at the point of service;

(A) To the extent possible, the procedures provided in paragraph (i)(2)(i) of this section for the nutrient standard or assisted nutrient standard menu planning approaches or for food-based menu planning approaches provided in paragraph (k) of this section must be followed. Any instructions or guidance issued by FNS that further defines the elements of a reimbursable lunch must be followed when using the existing regulatory provisions.

(B) Any alternate approach that deviates from the provisions in paragraph (i)(2)(i) or paragraph (k) of this section must indicate what constitutes a reimbursable lunch, including the number and type of items (and, if applicable, the quantities for the items) which

## 7 CFR Ch. II (1-1-01 Edition)

comprise the lunch, and how a reimbursable lunch is to be identified at the point of service;

(vii) Explain how the alternate menu planning approach can be monitored under the applicable provisions of §210.18 and §210.19, including a description of the records that will be maintained to document compliance with the program's administrative and nutrition requirements. However, if the procedures under §210.19 cannot be used to monitor the alternate approach, a description of procedures which will enable the State agency to assess compliance with the nutrition standards in paragraphs (b)(1) through (b)(4) of this section must be included; and

(viii) Follow the requirements for weighted analysis and for approved software for nutrient standard menu planning approaches as required by paragraphs (i)(4) and (i)(5) of this section unless a State agency-developed approach meets the criteria in paragraph (1)(3)(iii) of this section. Through September 30, 2003, schools are not required to conduct a weighted analysis.

(m) *What are the requirements for offering milk?*

(1) *Types of milk.* (i) Under all menu planning approaches for lunches, schools must offer students fluid milk. The types of milk offered must be consistent with the types of milk consumed in the previous year. However, if a particular type of milk constituted less than one percent (1%) of the total amount of milk consumed in the previous year, a school does not need to offer this type of milk. This does not preclude schools from offering additional types of milk.

(ii) All milk served in the Program must be pasteurized fluid milk which meets State and local standards for such milk. However, infants under 1 year of age must be served breast milk or iron-fortified infant formula. All milk must have vitamins A and D at levels specified by the Food and Drug Administration and must be consistent with State and local standards for such milk.

(2) *Inadequate milk supply.* If a school cannot get a supply of milk, it can still participate in the Program under the following conditions:

**Food and Nutrition Service, USDA**

**§ 210.10**

(i) If emergency conditions temporarily prevent a school that normally has a supply of fluid milk from obtaining delivery of such milk, the State agency may allow the school to serve meals during the emergency period with an alternate form of milk or without milk.

(ii) If a school is unable to obtain a supply of any type of fluid milk on a continuing basis, the State agency may approve the service of meals without fluid milk if the school uses an equivalent amount of canned milk or dry milk in the preparation of the meals. In Alaska, Hawaii, American Samoa, Guam, Puerto Rico, and the Virgin Islands, if a sufficient supply of fluid milk cannot be obtained, "milk" includes reconstituted or recombined milk, or as otherwise allowed by FNS through a written exception.

(n) *Supplemental food.* Eligible schools operating afterschool care programs may be reimbursed for one meal supplement served to an eligible child (as defined in §210.2) per day.

(1) Eligible schools mean schools that:

- (i) Operate school lunch programs under the National School Lunch Act;
- (ii) Sponsor afterschool care programs as defined in §210.2; and
- (iii) Were participating in the Child and Adult Care Food Program as of May 15, 1989.

(2) Meal supplements shall contain two different components from the following four:

- (i) A serving of fluid milk as a beverage, or on cereal, or used in part for each purpose;
- (ii) A serving of meat or meat alternate. Nuts and seeds and their butters listed in program guidance are nutritionally comparable to meat or other meat alternates based on available nutritional data. Acorns, chestnuts, and coconuts are excluded and shall not be used as meat alternates due to their

low protein content. Nut or seed meals or flours shall not be used as a meat alternate except as defined under appendix A: Alternate Foods for Meals of this part;

(iii) A serving of vegetable(s) or fruit(s) or full-strength vegetable or fruit juice, or an equivalent quantity of any combination of these foods. Juice may not be served when milk is served as the only other component;

(iv) A serving of whole-grain or enriched bread; or an equivalent serving of cornbread, biscuits, rolls, muffins, etc., made with whole-grain or enriched meal or flour; or a serving of cooked whole-grain or enriched pasta or noodle products such as macaroni, or cereal grains such as rice, bulgur, or corn grits; or an equivalent quantity of any combination of these foods.

(3) Infant supplements shall contain the following:

(i) Birth through 3 months: 4-6 fluid ounces of breast milk or iron fortified infant formula.

(ii) 4 through 7 months: 4-6 fluid ounces of breast milk or iron fortified infant formula.

(iii) 8 through 11 months: 2-4 fluid ounces of breast milk or iron fortified infant formula or full strength fruit juice; 0-½ slice of crusty bread or 0-2 cracker type products made from whole-grain or enriched meal or flour that are suitable for an infant for use as a finger food when appropriate. To improve the nutrition of participating children over one year of age, additional foods may be served with the meal supplements as desired.

(4) The minimum amounts of food components to be served as meal supplements as set forth in paragraphs (n)(2) and (n)(3) of this section are as follows. Select two different components from the four listed. (Juice may not be served when milk is served as the only other component.)

**MEAL SUPPLEMENT CHART FOR CHILDREN**

Snack (supplement) for children	Children 1 and 2	Children 3 through 5	Children 6 through 12
(Select two different components from the four listed)			
Milk, fluid .....	½ cup .....	½ cup .....	1 cup.
Meat or meat alternate <sup>4</sup> .....	½ ounce .....	½ ounce .....	1 ounce.
Juice or fruit or vegetable .....	½ cup .....	½ cup .....	¾ cup.
Bread and/or cereal: Enriched or whole grain bread or .....	½ slice .....	½ slice .....	1 slice.
Cereal: Cold dry or .....	¼ cup <sup>1</sup> .....	⅓ cup <sup>2</sup> .....	¾ cup <sup>3</sup> .

§210.10

7 CFR Ch. II (1-1-01 Edition)

MEAL SUPPLEMENT CHART FOR CHILDREN—Continued

Snack (supplement) for children	Children 1 and 2	Children 3 through 5	Children 6 through 12
Hot cooked .....	1/4 cup .....	1/4 cup .....	1/2 cup.

<sup>1</sup> 1/4 cup (volume) or 1/3 ounce (weight), whichever is less.  
<sup>2</sup> 1/3 cup (volume) or 1/2 ounce (weight), whichever is less.  
<sup>3</sup> 3/4 cup (volume) or 1 ounce (weight), whichever is less.  
<sup>4</sup> Yogurt may be used as meat/meat alternate. You may serve 4 ounces (weight) or 1/2 cup (volume) of plain, or sweetened and flavored yogurt to fulfill the equivalent of 1 ounce of the meat/meat alternate component. For younger children, 2 ounces (weight) or 1/4 cup (volume) may fulfill the equivalent of 1/2 ounce of the meat/meat alternate requirement.  
 Caution: Children under five years of age are at the highest risk of choking. USDA recommends that nuts and/or seeds be served to them ground or finely chopped in a prepared food.

SUPPLEMENTS FOR INFANTS

	Birth through 3 months	4 through 7 months	8 through 11 months
Supplement (snack) .....	4-6 fl. oz. breast milk <sup>2,3</sup> or formula <sup>1</sup>	4-6 fl. oz. breast milk <sup>2,3</sup> or formula <sup>1</sup>	2-4 fl. oz breast milk <sup>2,3</sup> , formula <sup>1</sup> , or fruit juice <sup>4</sup> ; 0-1/2 bread <sup>5</sup> or 0-2 crackers <sup>5</sup> .

<sup>1</sup> Infant formula shall be iron-fortified.

<sup>2</sup> It is recommended that breast milk be served in place of formula from birth through 11 months.

<sup>3</sup> For some breastfed infants who regularly consume less than the minimum amount of breast milk per feeding, a serving of less than the minimum amount of breast milk may be offered with additional breast milk offered if the infant is still hungry.

<sup>4</sup> Fruit juice shall be full-strength.

<sup>5</sup> Bread and bread alternates shall be made from whole-grain or enriched meal or flour. A serving of this component shall be optional.

§210.10

7 CFR Ch. II (1-1-01 Edition)

(o) *What are the requirements for the infant lunch pattern?*

(1) *Definitions.* (i) Infant cereal means any iron-fortified dry cereal especially formulated and generally recognized as cereal for infants which is routinely mixed with breast milk or iron-fortified infant formula prior to consumption.

(ii) Infant formula means any iron-fortified formula intended for dietary use solely as a food for normal, healthy infants. Formulas specifically formulated for infants with inborn errors of metabolism or digestive or absorptive problems are not included in this definition. Infant formula, when served, must be in liquid state at recommended dilution.

(2) *Requirements for lunches for infants under the age of one.* Infants under 1 year of age must be served an infant lunch as specified in this paragraph (o). Foods served in the infant lunch pattern must be of a texture and consistency appropriate for the particular age group served. Foods must be served to the infant during a span of time consistent with the infant's eating habits. For infants 4 through 7 months of age, solid foods are optional and should be introduced only when the infant is developmentally ready. Whenever possible, the school should consult with the infant's parents in making the decision to introduce solid foods. Solid foods should be introduced one at a time on a gradual basis with the intent of ensuring health and nutritional well-being. For infants 8 through 11 months of age, the total amount of food in the meal patterns in paragraph (o)(2)(iii) of this section must be provided to qualify for reimbursement. Additional foods may be served to in-

fants 4 months of age and older with the intent of improving their overall nutrition. Breast milk, provided by the infant's mother, may be served in place of infant formula from birth through 11 months of age. Either breast milk or iron-fortified infant formula must be served for the entire first year. For some breastfed infants who regularly consume less than the minimum amount of breast milk per feeding, a serving of less than the minimum amount of breast milk may be offered with additional ounces offered if the infant is still hungry. The infant lunch pattern must have at least each of the following components in the amounts indicated for the appropriate age group:

(i) Birth through 3 months—4 to 6 fluid ounces of breast milk or iron-fortified infant formula.

(ii) 4 through 7 months:

(A) 4 to 8 fluid ounces of breast milk or iron-fortified infant formula;

(B) 0 to 3 tablespoons of iron-fortified dry infant cereal (optional); and

(C) 0 to 3 tablespoons of fruit or vegetable of appropriate consistency or a combination of both (optional).

(iii) 8 through 11 months:

(A) 6 to 8 fluid ounces of breast milk or iron-fortified infant formula;

(B) 2 to 4 tablespoons of iron-fortified dry infant cereal and/or 1 to 4 tablespoons of meat, fish, poultry, egg yolk, or cooked dry beans or peas, or ½ to 2 ounces (weight) of cheese or 1 to 4 ounces (weight or volume) of cottage cheese, cheese food or cheese spread of appropriate consistency; and

(C) 1 to 4 tablespoons of fruit or vegetable of appropriate consistency or a combination of both.

LUNCH PATTERN FOR INFANTS

	Birth through 3 months	4 through 7 months	8 through 11 months
Lunch	4-6 fluid ounces of breast milk <sup>2,3</sup> or formula <sup>1</sup>	4-8 fluid ounces of breast milk <sup>2,3</sup> or formula <sup>1</sup> ;  0-3 tablespoons of infant cereal <sup>1,4</sup> ;  0-3 tablespoons of fruit and/or vegetable <sup>4</sup>	6-8 fluid ounces of breast milk <sup>2,3</sup> or formula <sup>1</sup> ;  and  2-4 tablespoons of infant cereal <sup>1</sup> ; and/or  1-4 tablespoons of meat, fish, poultry, egg yolk, cooked dry beans, or peas; or  ½-2 ounces of cheese; or  1-4 tablespoons of cottage cheese, cheese food, or cheese spread; and  1-4 tablespoons of fruit and/or vegetable

<sup>1</sup> Infant formula and dry infant cereal must be iron-fortified.  
<sup>2</sup> It is recommended that breast milk be served in place of formula from birth through 11 months.  
<sup>3</sup> For some breastfed infants who regularly consume less than the minimum amount of breast milk per feeding, a serving of less than the minimum amount of breast milk may be offered, with additional breast milk offered if the infant is still hungry.  
<sup>4</sup> A serving of this component is optional.

[60 FR 31208, June 13, 1995, 60 FR 57146, Nov. 14, 1995, as amended at 62 FR 10189, Mar. 6, 1997; 64 FR 61773, Nov. 15, 1999; 65 FR 26913, May 9, 2000; 65 FR 31371, May 17, 2000; 65 FR 36317, June 8, 2000]

**§210.11 Competitive food services.**

(a) *Definitions.* For the purpose of this section:

(1) *Competitive foods* means any foods sold in competition with the Program to children in food service areas during the lunch periods.

(2) *Food of minimal nutritional value* means: (i) In the case of artificially sweetened foods, a food which provides less than five percent of the Reference Daily Intakes (RDI) for each of eight specified nutrients per serving; and (ii) in the case of all other foods, a food which provides less than five percent of the RDI for each of eight specified nutrients per 100 calories and less than five percent of the RDI for each of eight specified nutrients per serving. The eight nutrients to be assessed for this purpose are—protein, vitamin A, vitamin C, niacin, riboflavin, thiamine,

calcium, and iron. All categories of food of minimal nutritional value and petitioning requirements for changing the categories are listed in appendix B of this part.

(b) *General.* State agencies and school food authorities shall establish such rules or regulations as are necessary to control the sale of foods in competition with lunches served under the Program. Such rules or regulations shall prohibit the sale of foods of minimal nutritional value, as listed in appendix B of this part, in the food service areas during the lunch periods. The sale of other competitive foods may, at the discretion of the State agency and school food authority, be allowed in the food service area during the lunch period only if all income from the sale of such foods accrues to the benefit of the nonprofit school food service or the school or student organizations approved by the school. State agencies and school food authorities may impose additional restrictions on the sale of and income from all foods sold at
