

chamber that has been approved for that purpose by the Animal and Plant Health Inspection Service, or under tarpaulins, according to the schedule below. The treatment period must be 2 hours.

Temperature (°F.)	Dosage—pounds of methyl bromide per 1,000 cu. ft.
80-89 (inclusive)	1½
70-79 (inclusive)	2
60-69 (inclusive)	2½
50-59 (inclusive)	3

(2) *Soapy water and wax.* The cherimoyas must be immersed in a soapy water bath consisting of 1 part soap solution (such as Deterfrut) to 3,000 parts water for a minimum of 20 seconds, followed by a pressure shower rinse to remove soapy excess, and then followed by immersion for a minimum of 20 seconds in an undiluted wax coating (such as Johnson Wax Primafresh 31 Kosher fruit coating).

(b) *APHIS inspection.* Cherimoyas from Chile are subject to inspection under the direction of an inspector, either in Chile or at the port of arrival in the United States. Imported cherimoyas inspected in Chile are subject to reinspection at the port of arrival as provided for in §319.56-6.

(c) *Trust Fund Agreement.* Cherimoyas that are treated or inspected in Chile may be imported into the United States only if the plant protection service of Chile (Servicio Agrícola Y Ganadero, referred to in this section as SAG) has entered into a trust fund agreement with APHIS. This agreement requires SAG to pay in advance of each shipping season all costs that APHIS estimates it will incur in providing inspection services in Chile during that shipping season. These costs include administrative expenses and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by APHIS in performing these services. The agreement requires SAG to deposit a certified or cashier's check with APHIS for the amount of these costs, as estimated by APHIS. If the deposit is not sufficient to meet all costs incurred by APHIS, the agree-

ment further requires SAG to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before any more cherimoyas will be treated or inspected in Chile. After a final audit at the conclusions of each shipping season, any overpayment of funds would be returned to SAG, or held on account until needed, at SAG's option.

(d) *Costs for services in the United States.* All costs of treatment and required safeguards and supervision, other than the services of the supervising inspector during regularly assigned hours of duty and at the usual place of duty, shall be borne by the owner of the fruits or a representative of the owner.

(e) *Limitation of origin.* The cherimoyas must have been grown in a province of Chile that is free from the Mediterranean fruit fly (see §319.56-2(j)).

(f) *Ports of entry.* Cherimoyas from Chile may be imported through all ports staffed by an inspector.¹

(g) *Department not responsible for damage.* The treatments prescribed in paragraph (a) of this section are judged from experimental tests to be safe for use with cherimoyas from Chile. However, the Department assumes no responsibility for any damage sustained through or in the course of such treatment or by compliance with requirements under paragraph (a) of this section.

§ 319.56-2aa Administrative instructions governing the entry of cantaloupe, honeydew melons, and watermelon from Brazil and Venezuela.

Cantaloupe, honeydew melons, and watermelon may be imported into the United States from Brazil and Venezuela only under permit, and only in accordance with this section and all

¹Information concerning ports staffed by inspectors may be obtained by contacting the Animal and Plant Health Inspection Service, Plant Protection and Quarantine, Port Operations, Permit Unit, 4700 River Road Unit 136, Riverdale, Maryland 20737-1236.

§ 319.56-2bb

7 CFR Ch. III (1-1-01 Edition)

other applicable requirements of this subpart:

(a) The cantaloupe, honeydew melons, or watermelon must have been grown in the area of Brazil or the area of Venezuela considered by the Animal and Plant Health Inspection Service to be free of the South American cucurbit fly, (*Anastrepha grandis*), in accordance with §319.56-2(e)(4) of this subpart. In addition, all shipments of cantaloupe, honeydew melons, and watermelon must be accompanied by a phytosanitary certificate issued either by the Departamento de Defesa e Inspeção Vegetal (Brazilian Department of Plant Health and Inspection) or the Servicio Autonomo de Sanidad Agropecuaria (the plant protection service of Venezuela) that includes a declaration indicating that the cantaloupe or melons were grown in an area recognized to be free of the South American cucurbit fly.

(1) *Area considered free of the South American cucurbit fly in Brazil.* The following area in Brazil is considered free of the South American cucurbit fly: That portion of Brazil bounded on the north by the Atlantic Ocean; on the east by the River Assu (Acu) from the Atlantic Ocean to the city of Assu; on the south by Highway BR 304 from the city of Assu (Acu) to Mossoro, and by Farm Road RN-015 from Mossoro to the Ceara State line; and on the west by the Ceara State line to the Atlantic Ocean.

(2) *Area considered free of the South American cucurbit fly in Venezuela.* The following area in Venezuela is considered free of the South American cucurbit fly: The Paraguana Peninsula, located in the State of Falcon, bounded on the north and east by the Caribbean Ocean, on the south by the Gulf of Coro and an imaginary line dividing the autonomous districts of Falcon and Miranda, and on the west by the Gulf of Venezuela.

(b) *Shipping requirements.* The cantaloupe, honeydew melons, and watermelon must be packed in an enclosed container or vehicle, or must be covered by a pest-proof screen or plastic tarpaulin while in transit to the United States.

(c) *Labeling.* All shipments of cantaloupe, honeydew melons, and water-

melon must be labeled in accordance with §319.56-2(g) of this subpart.

[63 FR 65656, Nov. 30, 1998]

§ 319.56-2bb Administrative instructions governing movement of Hass avocados from Mexico to Alaska.

Hass avocados may be imported from Mexico into the United States for distribution in Alaska only under a permit issued in accordance with §319.56-4, and only under the following conditions:

(a) *Commercial shipments.* The avocados may be imported in commercial shipments only.

(b) *Safeguards in Mexico.* The avocados must have been grown in the Mexican State of Michoacan by a participant in the avocado export program administered by Sanidad Vegetal. Upon request, Sanidad Vegetal will provide APHIS with a list of all participants. Under the supervision of Sanidad Vegetal personnel:

(1) The avocados must have been inspected during growing, harvesting, and packing and must have been found free from seed weevils and other pests;

(2) The avocados must have been sealed in boxes after inspection at the packing house with a seal that will be broken when the box is opened; and

(3) The avocados must be packed in an enclosed container or vehicle or under a tarpaulin cover while in transit through Mexico to prevent exposure of the fruit to fruit flies.

(c) *Certification.* All shipments of avocados must be accompanied by a document issued by Sanidad Vegetal certifying that the conditions specified in paragraph (b) of this section have been met.

(d) *Marking requirements.* The boxes of avocados must be clearly marked with the statement "Distribution limited to the State of Alaska."

(e) *Ports.* The avocados may enter the United States only at the following ports: Galveston or Houston, Texas; the border ports at Nogales, Arizona; Brownsville, Eagle Pass, El Paso, Hidalgo, or Laredo, Texas; any port in Alaska; or other ports within that area of the United States specified in paragraph (f) of this section.

(f) *Shipping areas.* Except as explained below for avocados that enter the
