

§ 76.54 Significantly viewed signals; method to be followed for special showings.

(a) Signals that are significantly viewed in a county (and thus are deemed to be significantly viewed within all communities within the county) are those that are listed in Appendix A of the memorandum opinion and order on reconsideration of the Cable Television Report and Order (Docket 18397 et al.), FCC 72-530.

(b) Significant viewing in a cable television community for signals not shown as significantly viewed under paragraph (a) or (d) of this section may be demonstrated by an independent professional audience survey of non-cable television homes that covers at least two weekly periods separated by at least thirty (30) days but no more than one of which shall be a week between the months of April and September. If two surveys are taken, they shall include samples sufficient to assure that the combined surveys result in an average figure at least one standard error above the required viewing level. If surveys are taken for more than 2-weekly periods in any 12 months, all such surveys must result in an average figure at least one standard error above the required viewing level. If a cable television system serves more than one community, a single survey may be taken, provided that the sample includes non-cable television homes from each community that are proportional to the population.

(c) Notice of a survey to be made pursuant to paragraph (b) of this section shall be served on all licensees or permittees of television broadcast stations within whose predicted Grade B contour the cable community or communities are located, in whole or in part, and on all other system community units, franchisees, and franchise applicants in the cable community or communities at least (30) days prior to the initial survey period. Furthermore, if a survey is undertaken pursuant to the provisions of § 76.33(a)(2)(i) of the rules, notice shall also be served on the franchising authority. Such notice shall include the name of the survey organization and a description of the procedures to be used. Objections to survey organizations or procedures shall be

served on the party sponsoring the survey within twenty (20) days after receipt of such notice.

(d) Signals of television broadcast stations not encompassed by the surveys (for the periods May 1970, November 1970 and February/March 1971) used in establishing appendix B of the *Memorandum Opinion and Order on Reconsideration of Cable Television Report and Order*, FCC 72-530, 36 FCC 2d 326 (1972), may be demonstrated as significantly viewed on a county-wide basis by independent professional audience surveys which cover three separate, consecutive four-week periods and are otherwise comparable to the surveys used in compiling the above-referenced appendix B: *Provided, however*, That such demonstration shall be based upon audience survey data for the first three years of the subject station's broadcast operations.

[37 FR 3278, Feb. 12, 1972, as amended at 37 FR 13866, July 14, 1972; 40 FR 48930, Oct. 20, 1975; 41 FR 32429, Aug. 3, 1976; 42 FR 19346, Apr. 13, 1977; 53 FR 17051, May 13, 1988; 56 FR 33392, July 22, 1991]

§ 76.55 Definitions applicable to the must-carry rules.

For purposes of the must-carry rules set forth in this subpart, the following definitions apply:

(a) *Qualified noncommercial educational (NCE) television station.* A qualified NCE television station is any television broadcast station which

(1)(i) Under the rules and regulations of the Commission in effect on March 29, 1990, is licensed by the Commission as an NCE television broadcast station and which is owned and operated by a public agency, nonprofit foundation, corporation, or association; and

(ii) Has as its licensee an entity which is eligible to receive a community service grant, or any successor grant thereto, from the Corporation for Public Broadcasting, or any successor organization thereto, on the basis of the formula set forth in section 396(k)(6)(B) of the Communications Act of 1934, as amended; or

(2) Is owned and operated by a municipality and transmits noncommercial programs for educational purposes, as defined in

§ 73.621 of this chapter, for at least 50 percent of its broadcast week.

(3) This definition includes:

(i) The translator of any NCE television station with five watts or higher power serving the franchise area,

(ii) A full-service station or translator if such station or translator is licensed to a channel reserved for NCE use pursuant to § 73.606 of this chapter, or any successor regulations thereto, and

(iii) Such stations and translators operating on channels not so reserved but otherwise qualified as NCE stations.

NOTE TO PARAGRAPH (a): For the purposes of § 76.55(a), "serving the franchise area" will be based on the predicted protected contour of the NCE translator.

(b) *Qualified local noncommercial educational (NCE) television station.* A qualified local NCE television station is a qualified NCE television station:

(1) That is licensed to a community whose reference point, as defined in § 76.53 is within 80.45 km (50 miles) of the principal headend, as defined in § 76.5(pp), of the cable system; or

(2) Whose Grade B service contour encompasses the principal headend, as defined in § 76.5(pp), of the cable system.

(3) Notwithstanding the provisions of this section, a cable operator shall not be required to add the signal of a qualified local noncommercial educational television station not already carried under the provision of § 76.56(a)(5), where such signal would be considered a distant signal for copyright purposes unless such station agrees to indemnify the cable operator for any increased copyright liability resulting from carriage of such signal on the cable system.

(c) *Local commercial television station.* A local commercial television station is any full power television broadcast station, other than a qualified NCE television station as defined in paragraph (a) of this section, licensed and operating on a channel regularly assigned to its community by the Commission that, with respect to a particular cable system, is within the same television market, as defined below in paragraph (e) of this section, as the cable system, except that the term local commercial television station does not include:

(1) Low power television stations, television translator stations, and passive repeaters with operate pursuant to part 74 of this chapter.

(2) A television broadcast station that would be considered a distant signal under the capable compulsory copyright license, 17 U.S.C. 111, if such station does not agree to indemnify the cable operator for any increased copyright liability resulting from carriage on the cable system; or

(3) A television broadcast station that does not deliver to the principal headend, as defined in § 76.5(pp), of a cable system either a signal level of -45dBm for UHF signals or -49dBm for VHF signals at the input terminals of the signal processing equipment, *i.e.*, the input to the first active component of the signal processing equipment relevant to the signal at issue, if such station does not agree to be responsible for the costs of delivering to the cable system a signal of good quality or a baseband video signal.

(d) *Qualified low power station.* A qualified low power station is any television broadcast station conforming to the low power television rules contained in part 74 of this chapter, only if:

(1) Such station broadcasts for at least the minimum number of hours of operation required by the Commission for full power television broadcast stations under part 73 of this chapter;

(2) Such station meets all obligations and requirements applicable to full power television broadcast stations under part 73 of this chapter, with respect to the broadcast of nonentertainment programming; programming and rates involving political candidates, election issues, controversial issues of public importance, editorials, and personal attacks; programming for children; and equal employment opportunity; and the Commission determines that the provision of such programming by such station would address local news and informational needs which are not being adequately served by full power television broadcast stations because of the geographic distance of such full power stations from the low power station's community of license;

§ 76.55

47 CFR Ch. I (10-1-03 Edition)

(3) Such station complies with interference regulations consistent with its secondary status pursuant to part 74 of this chapter;

(4) Such station is located no more than 56.32 km (35 miles) from the cable system's principal headend, as defined in § 76.5(pp), and delivers to that headend an over-the-air signal of good quality;

(5) The community of license of such station and the franchise area of the cable system are both located outside of the largest 160 Metropolitan Statistical Areas, ranked by population, as determined by the Office of Management and Budget on June 30, 1990, and the population of such community of license on such date did not exceed 35,000; and

(6) There is no full power television broadcast station licensed to any community within the county or other equivalent political subdivision (of a State) served by the cable system.

NOTE TO PARAGRAPH (d): For the purposes of this section, a good quality signal shall mean a signal level of either -45 dBm for UHF signals or -49 dBm for VHF signals at the input terminals of the signal processing equipment, or a baseband video signal.

(e) *Television market.* (1) Until January 1, 2000, a commercial broadcast television station's market, unless amended pursuant to § 76.59, shall be defined as its Area of Dominant Influence (ADI) as determined by Arbitron and published in the Arbitron 1991-1992 Television ADI Market Guide, as noted below, except that for areas outside the contiguous 48 states, the market of a station shall be defined using Nielsen's Designated Market Area (DMA), where applicable, as published in the Nielsen 1991-92 DMA Market and Demographic Rank Report, and that Puerto Rico, the U.S. Virgin Islands, and Guam will each be considered a single market.

(2) Effective January 1, 2000, a commercial broadcast television station's market, unless amended pursuant to § 76.59, shall be defined as its Designated Market Area (DMA) as determined by Nielsen Media Research and published in its Nielsen Station Index Directory and Nielsen Station Index US Television Household Estimates or any successor publications.

(i) For the 1999 election pursuant to § 76.64(f), which becomes effective on January 1, 2000, DMA assignments specified in the 1997-98 Nielsen Station Index Directory and September 1997 Nielsen Station Index US Television Household Estimates, available from Nielsen Media Research, 770 Broadway, New York, NY, shall be used.

(ii) The applicable DMA list for the 2002 election pursuant to § 76.64(f) will be the DMA assignments specified in the 2000-2001 list, and so forth for each triennial election pursuant to § 76.64(f).

(3) In addition, the county in which a station's community of license is located will be considered within its market.

(4) A cable system's television market(s) shall be the one or more ADI markets in which the communities it serves are located until January 1, 2000, and the one or more DMA markets in which the communities it serves are located thereafter.

(5) In the absence of any mandatory carriage complaint or market modification petition, cable operators in communities that shift from one market to another, due to the change in 1999-2000 from ADI to DMA, will be permitted to treat their systems as either in the new DMA market, or with respect to the specific stations carried prior to the market change from ADI to DMA, as in both the old ADI market and the new DMA market.

(6) If the change from the ADI market definition to the DMA market definition in 1999-2000 results in the filing of a mandatory carriage complaint, any affected party may respond to that complaint by filing a market modification request pursuant to § 76.59, and these two actions may be jointly decided by the Commission.

NOTE TO PARAGRAPH (e): For the 1996 must-carry/retransmission consent election, the ADI assignments specified in the 1991-1992 *Television ADI Market Guide*, available from the Arbitron Ratings Co., 9705 Patuxent Woods Drive, Columbia, MD, will apply. For the 1999 election, which becomes effective on January 1, 2000, DMA assignments specified in the 1997-98 *DMA Market and Demographic Rank Report*, available from Nielsen Media Research, 299 Park Avenue, New York, NY, shall be used. The applicable DMA list for the 2002 election will be the 2000-2001 list, etc.

(f) *Network*. For purposes of the must-carry rules, a commercial television network is an entity that offers programming on a regular basis for 15 or more hours per week to at least 25 affiliates in 10 or more states.

[58 FR 17359, Apr. 2, 1993, as amended at 58 FR 44951, Aug. 25, 1993; 59 FR 62344, Dec. 5, 1994; 61 FR 29313, June 10, 1996; 64 FR 42617, Aug. 5, 1999; 68 FR 17312, Apr. 9, 2003]

§ 76.56 Signal carriage obligations.

(a) *Carriage of qualified noncommercial educational stations*. A cable television system shall carry qualified NCE television stations in accordance with the following provisions:

(1) Each cable operator shall carry on its cable television system any qualified local NCE television station requesting carriage, except that

(i) Systems with 12 or fewer usable activated channels, as defined in § 76.6(o), shall be required to carry the signal of one such station;

(ii) Systems with 13 to 36 usable activated channels, as defined in § 76.5(o), shall be required to carry at least one qualified local NCE station, but not more than three such stations; and

(iii) Systems with more than 36 usable activated channels shall be required to carry the signals of all qualified local NCE television stations requesting carriage, but in any event at least three such signals; however a cable system with more than 36 channels shall not be required to carry an additional qualified local NCE station whose programming substantially duplicates the programming of another qualified local NCE station being carried on the system.

NOTE: For purposes of this paragraph, a station will be deemed to "substantially duplicate" the programming of another station if it broadcasts the same programming, simultaneous or non-simultaneous, for more than 50 percent of prime time, as defined in § 76.5(n), and more than 50 percent outside of prime time over a three-month period.

(2)(i) In the case of a cable system with 12 or fewer channels that operates beyond the presence of any qualified local NCE stations, the cable operator shall import one qualified NCE television station.

(ii) A cable system with between 13 and 36 channels that operates beyond

the presence of any qualified local NCE stations, the cable operator shall import at least one qualified NCE television station.

(3) A cable system with 12 or fewer usable activated channels shall not be required to remove any programming service provided to subscribers as of March 29, 1990, to satisfy these requirements, except that the first available channel must be used to satisfy these requirements.

(4) A cable system with 13 to 36 usable activated channels which carries the signal of a qualified local NCE station affiliated with a State public television network shall not be required to carry more than one qualified local NCE station affiliated with such network, if the programming of such additional stations substantially duplicates, as defined in the note in paragraph (a)(1) of this section, the programming of a qualified local NCE television station receiving carriage.

(5) Notwithstanding the requirements of paragraph (a)(1) of this section, all cable operators shall continue to provide carriage to all qualified local NCE television stations whose signals were carried on their systems as of March 29, 1990. In the case of a cable system that is required to import a distance qualified NCE signal, and such system imported the signal of a qualified NCE station as of March 29, 1990, such cable system shall continue to import such signal until such time as a qualified local NCE signal is available to the cable system. This requirements may be waived with respect to a particular cable operator and a particular NCE station, upon the written consent of the cable operator and the station.

(b) *Carriage of local commercial television stations*. Effective June 2, 1993, a cable television system shall carry local commercial broadcast television stations in accordance with the following provisions:

(1) A cable system with 12 or fewer usable activated channels, as defined in § 76.5(o), shall carry the signals of at least three qualified local commercial television stations, except that if such system serves 300 or fewer subscribers it shall not be subject to these requirements as long as it does not delete from carriage the signal of a broadcast
