#### § 168.121 Dried glucose sirup.

(a) Dried glucose sirup is glucose sirup from which the water has been partially removed and conforms to the specifications of § 168.120, except that:

(1) The total solids content is not less than 90.0 percent m/m when the reducing sugar content (dextrose equivalent), expressed as D-glucose, is not less than 88.0 percent m/m, calculated on a dry basis; or

(2) The total solids content is not less than 93.0 percent m/m when the reducing sugar content, (dextrose equivalent) expressed as D-glucose, is less than 88.0 percent m/m, calculated on a dry basis.

(b) The name of the food is “Dried glucose sirup” or “Glucose sirup solids”. When the food is derived from a specific type of starch, the name may alternatively be “Dried \_\_\_\_\_ sirup” or “\_\_\_\_\_ sirup solids”, the blank to be filled in with the name of the starch; for example, “Dried corn sirup”, “Corn sirup solids”, “Dried wheat sirup”,
