Subject: peer review comments

Dear Mr. Bolten,

This letter concerns the Peer Review and Information Quality proposal. I agree that scientific review is critical to the decision-making process but it must be done efficiently and by objective parties. This proposal will be expensive to implement and may result in expensive consequences for human health and the environment. The Office of Management and Budget should withdraw this proposal and work with the scientific community to find a better solution.

Sincerely,

Nicole Pauly Hyslop
