National Toxicology Program; National Toxicology Program (NTP) Board of Scientific Counselors' Meeting; Review of Draft NTP Technical Reports

Pursuant to Public Law 92–463, notice is hereby given of the next meeting of the NTP Board of Scientific Counselors' Technical Reports Review Subcommittee on June 20 and 21, 1995, in the Conference Center, Building 101, South Campus, National Institute of Environmental Health Sciences (NIEHS), 111 Alexander Drive, Research Triangle Park, North Carolina. The meeting will begin at 8:30 a.m. on both days and is open to the public. The primary agenda topic is the peer review of draft Technical Reports of long-term toxicology and carcinogenesis studies and one short-term toxicity study from the National Toxicology Program.

Additionally, on June 21, a series of presentations will be made concerning the toxicologic findings from collaborative prechronic inhalation studies on carbon disulfide. There will be a presentation titled "Update on the New Diet (NTP–2000) for Rats and Mice in NTP Toxicology and Carcinogenesis Studies".

Tentatively scheduled to be peer reviewed on June 20 and 21 are draft Technical Reports of six two-year studies, listed alphabetically, along with supporting information in the attached table. Similar information is given for the short-term report on 1,4-butanediol. All studies were done using Fischer 344 rats and B6C3F1 mice, while one twoyear study also employed Sencar mice. The order of review is given in the far right column of the table. Copies of the draft Reports may be obtained, as available, from: Central Data Management, MD A0-01, P.O. Box 12233, Research Triangle Park, NC 27709 (919/541-3419).

In addition to the traditional two-year study results, the studies with butyl benzyl phthalate, t-butylhydroquinone, salicylazosulfapyridine, and scopolamine hydrobromide trihydrate included groups run under mild dietary restrictions. A separate report (see table) will deal with the effects of dietary restrictions on the results of these four studies, and will draw some conclusions about the usefulness of this approach to performing toxicology and carcinogenesis studies.

Persons wanting to make a formal presentation regarding a particular Technical Report must notify the Executive Secretary by telephone, by FAX, or by mail no later than June 14, 1995, and provide a written copy in advance of the meeting so copies can be made and distributed to all Subcommittee members and staff and made available at the meeting for attendees. Written statements should supplement and may expand on the oral presentation. Oral presentations should be limited to no more than five minutes.

The program would welcome receiving toxicology and carcinogenesis information from completed, ongoing, or planned studies by others, as well as current production data, human exposure information, and use patterns for any of the chemicals listed in this announcement. Please contact Central Data Management at the address given above, and they will relay the information to the appropriate staff scientist.

The Executive Secretary, Dr. Larry G. Hart, P.O. Box 12233, Research Triangle Park, North Carolina 27709 (telephone 919/541–3971; FAX 919/541–0719) will furnish a final agenda and a roster of Subcommittee members prior to the meeting. Summary minutes subsequent to the meeting will be available upon request.
