Conversation: Genistein and Soy Formula

Dear Dr. Shelby:

I am writing to comment on the National Toxicology Program's draft reports on Genistein and Soy Formula.

I am concerned about the expert panel's conclusion that soy infant formula should be considered "safe until proven otherwise." It is my request that this email be considered part of the public record for the applicable discussions.

I personally know of the dangers of soy infant formula. [REDACTED]

I hope this letter will encourage the panel to reconsider its conclusions.

Sincerely,

Marc Sanders, Esq.
