

National Institutes of Health/Office of Extramural Research

Interagency Edison (iEdison II) Edison Reporting Lite (ERL)

Release Notes

Version 1.2.0.0 – October 29, 2004

Introduction

The enhancements related to this release of iEdison Extramural Web involve the addition of new features and the correction of several system defects to iEdison II as well as the web query and reporting tools in Edison Reporting Lite (ERL) and Interagency Edison Reporting Lite (IAERL).

Overview

➤ Home Page

No changes

➤ Enhancements

Administrators allowed to make user account modifications

Updated ERL login process

Enhanced several .pl files

➤ Issues Resolved in this Release

Users can include wildcard in a Grant Number search

Enhancements

One update to the ERL application allows administrators within an Institute to have the ability to make certain modifications to user accounts within their Institute. These modifications include creating and deleting accounts, as well as being able to change an account's password.

Another update expands the ERL login process to include features similar to the Extramural Web, including recognizing locked and deactivated accounts (i.e., due to deletion and lack of use), updating the Account Last Login Date, and counting the number of failed login attempts. Control access to iEdison is based on the Account Type.

Issues Resolved in this Release

The program "erl_grantee_name_search.pl" was modified so that the statements in the beginning of the program (which indicate the modules that are used in the program specified by the IAERL directory path) are used instead of the ERL directory path.

The programs "erl_report1.pl", "erl_report2.pl", and "erl_report4.pl" were modified so that users can perform a wildcard search on the left side of the Grant Number. The user may type a "%" at the end of the string to apply the wildcard to the right side of the Grant Number.
