

Residency and Fellowship Training

The National Institutes of Health (NIH) sponsors Accreditation Council for Graduate Medical Education (ACGME)-accredited residency and fellowship training in multiple specialty fields on its campus in Bethesda, Maryland. Trainees develop skills in diagnosis, disease management, and clinical investigation at the cutting edge of modern medicine by seeing patients and working with internationally renowned physician investigators at the world's largest hospital devoted to human subject research, the NIH Clinical Center. NIH's accredited residency and fellowship training programs have an established track record of educating highly competent academic physicians; many becoming renowned clinical or translational researchers.

Clinical Research Training at the National Institutes of Health

Training the Next Generation of Clinician-Scientists

NIH CLINICAL CENTER | Office of Clinical Research Training and Medical Education

Accredited training programs, sponsored by the NIH Clinical Center, include: Allergy and Immunology, Anatomic Pathology, Blood Banking/Transfusion Medicine, Critical Care Medicine, Cytopathology, Dermatology (PGY-3 and above), Endocrinology and Metabolism, Hematology, Hematopathology, Infectious Diseases, Medical Genetics, Medical Biochemical Genetics, Medical Oncology, Pediatric Endocrinology, Rheumatology and Psychiatry (PGY-4 and above). The NIH also offers clinical fellowship training in non-ACGME accredited fields in fulfillment of its commitment to training the next generation of clinician-scientists.
