(10) Each individual consumer package shall bear the name and address, including the zip code, of the shipper and the net weight. When a consumer package is not in a master container, it must also bear the number of nectarines contained in the package and be marked as specified in paragraph (a)(3) of this section.

(b) As used in this section, "standard pack" and "fairly uniform in size" shall have the same meaning as set forth in the U.S. Standards for Grade of Nectarines (Secs. 51.3145 to 51.3160) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. All dimensions are given in depth (inside dimensions) by width and by length (outside dimensions). "Individual consumer packages" means packages holding 15 pounds or less net weight of peaches. "Tree ripe" means "tree ripened" and fruit shipped and marked as "tree ripe," "tree ripened," or any similar terms using the words "tree" and "ripe" must meet the minimum California Well Matured standards.

(c) Each container of nectarines in plastic, 12×19 $\frac{3}{4}$ inch reusable and recyclable containers shall meet and bear, on the container lid or on the outside end, all applicable marking requirements under the order.

(d) During the period April 1 through October 31, each container or package when packed with nectarines meeting the "CA Utility" quality requirements, shall bear the words "CA Utility," along with all other required container markings, in letters at least $\frac{3}{8}$ inch in height on the visible display panel. Subpart—Grade and Size Regulation

§ 916.356 California Nectarine Grade and Size Regulation.

(a) During the period beginning April 1 and ending October 31, no handler shall ship any package or container of any variety of nectarines marked "CA WELL MAT" or "California Well Matured" except in accordance with the following terms and conditions:

(1) Any lot or package or container of any variety of nectarines shall meet the requirements of U.S. No. 1 grade: *Provided*, That nectarines 2 inches in diameter or smaller, shall not have fairly light-colored, fairly smooth scars which exceed an aggregate area of a circle $\frac{3}{8}$ inch in diameter, and nectarines larger than 2 inches in diameter shall not have fairly light-colored, fairly smooth scars which exceed an aggregate area of a circle $\frac{1}{2}$ inch in diameter: *Provided further*, That an additional tolerance of 25 percent shall be permitted for fruit that is not well formed but not badly misshapen: *Provided further*, That nectarines of the Peento type shall be permitted blossom end cracking that is well healed and does not exceed the aggregate area of a circle $\frac{3}{8}$ inch in diameter, and/or does not exceed a depth that exposes the pit: *Provided further*, That any handler may handle nectarines if such nectarines meet "CA Utility" quality requirements. The term "CA Utility" means that not more than 40 percent of the nectarines in any container meet or exceed the requirements of the U.S. No. 1 grade, except that when more than 30 percent of the nectarines in any container meet or exceed the requirements

§916.356

7 CFR Ch. IX (1-1-08 Edition)

of the U.S. No. 1 grade, the additional 10 percent shall have non-scoreable blemishes as determined when applying the U.S. Standards for Grades of Nectarines; and that such nectarines are well mature and are:

(i) Free from insect injury which has penetrated or damaged the flesh; split pits which cause an unhealed crack or one or more well healed cracks which, either singly or in the aggregate, are more than 3/8 inch in length; mold, brown rot, and decay which has affected the edible portion; and

(ii) Free from serious damage due to skin breaks, cuts, growth cracks, bruises, or other causes. Damage to any nectarine is serious when it causes a waste of 10 percent or more, by volume, of the individual nectarine.

(iii) *Tolerances.* Not more than 10 percent, by count, of the nectarines in any one container may be below the requirements which are prescribed by this paragraph, including not more than 5 percent, by count, for any one defect, except split pits. An additional tolerance of 10 percent, by count, of the nectarines in any one container or bulk lot may contain nectarines affected with split pits. This means a total tolerance of 20 percent is allowed for all defects, including split pits, but not to exceed 15 percent for split pits alone.

(iv) The Federal or Federal-State Inspection Service shall make final determinations on maturity through the use of color guides or such other tests as determined appropriate by the inspection agency. The Federal or Federal-State Inspection Service will use the maturity guides listed in table 1 to paragraph (a)(1)(iv) in making maturity determinations for the specified varieties when inspecting to the "well matured" level of maturity. For these varieties, not less than 90 percent of any lot shall meet the color guide established for the variety, and an aggregate area of not less than 90 percent of the fruit surface shall meet the color guide established for the variety, except that for the Tom Grand variety of nectarines, not less than an aggregate area of 80 percent of the fruit surface shall meet the color guide established for the variety. For varieties not listed, the Federal or Federal-State Inspection Service will use such tests as

it deems proper. A variance for any variety from the application of the maturity guides specified in table 1 to paragraph (a)(1)(iv) may be granted during the season to reflect changes in crop, weather, or other conditions that would make the specified guides an inappropriate measure of "well matured."

* Predominant ground color must be breaking yellowish green.

NOTE: Consult with the Federal or Federal-State Inspection Service Supervisor for the maturity guides applicable to the varieties

not listed above. On varieties with less than 10 percent surface ground color required to determine California Well-Matured, the stem cavity color will be utilized to make the determination. As a guide, stem cavities for most varieties should be at least yellowish-green as defined by the H maturity guide. Confirmation may be further established by using other California well matured characteristics. *Predominant ground color must be breaking yellowish green.

(v) If a grower or handler believes his/her fruit is meeting the appropriate maturity level but the fruit has not been so graded by the inspector, he/she may appeal the inspection by calling the officer-in-charge of the local Federal-State Inspection Service office to arrange for an on-site examination of the fruit.

A sample consisting of one-half of the number of fruit specified for a 16-pound sample for a particular size category shall be used, provided such sample weighs at least eight pounds. When one-half the specified number of fruit in a sample results in

a number ending with one-half a fruit, the smaller full number of fruit shall be used to determine the sample weight. If a sample fails with respect to minimum size requirements on the basis of an 8-pound sample, a 16-pound sample shall be used to determine if the fruit meets the minimum size requirements.

(c) *Container tolerances.* The contents of individual packages in the lot are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified in this part:

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided, individual packages shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages shall have not more than double the tolerance specified.

(2) For packages which contain 10 pounds or less, individual packages are not restricted as to the percentages of defects.

(d) As used herein, *U.S. No. 1, mature*, and *standard pack*, mean the same as defined in the United States Standards for Grades of Nectarines [7 CFR 51.3145 through 51.3160]; and *No. 22D standard lug box* means the same as defined in section 1380.19 (17) of the "Regulations of the California Department of Food and Agriculture". *Well matured* means a condition distinctly more advanced than *mature*.
