Chief Statistician

Division of Science Resources Statistics

The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

About This Report	1
-------------------------	---

Figures

A-1	U.S. population 18–24 years old, by race/ethnicity: July 1990–99 and projections to 2050	3
B-1	Minority undergraduate engineering students, by race/ethnicity: 1995–2005	4
C-1	Bachelor’s degrees awarded in S&E and non-S&E fields, by sex: 1966–2004	5
C-2	Bachelor’s and associate’s degrees awarded in computer sciences, by sex: 1985–2004	6
C-3	Bachelor’s degrees awarded to racial/ethnic groups in S&E fields: 2004	7
C-4	Bachelor’s and master’s degrees awarded in psychology, by sex: 1985–2004	8
D-1	Female share of S&E graduate students, by field: 1994 and 2004	9
D-2	Field distribution of S&E graduate students, by race/ethnicity: 2004	10
D-3	Field distribution of graduate students, by disability status: 2004	11
E-1	Master’s degrees awarded in S&E and non-S&E fields, by sex: 1966–2004	12
E-2	Minority share of S&E master’s degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 1989–2004	13
F-1	Doctoral degrees awarded in S&E and non-S&E fields to U.S. citizens and permanent residents, by sex: 1966–2004	14
F-2	Field distribution of S&E and non-S&E doctoral degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 2004	15
H-1	Employed doctoral scientists and engineers, by race/ethnicity and occupation: 2003	16
H-2	Employment status of scientists and engineers, by disability status and age at onset of disability: 2003	17
H-3	Science and engineering faculty, by sex and highest degree: 2003	18
H-4	Age distribution of employed scientists and engineers, by disability status: 2003	19
H-5	Doctoral science and engineering faculty, by sex and Carnegie classification of employer: 2003	20
H-6	Doctoral science and engineering faculty, by race/ethnicity and country of birth: 2003	21
H-7	Median number of subordinates of scientists and engineers employed in business or industry, by sex, race/ethnicity, and disability status: 2003	22

Tables

A-1	Resident population of United States, by age and sex: 2004	23
A-2	Resident population of United States, by race/ethnicity and age: 2004	24

A-3	U.S. civilian noninstitutionalized population 5 years old and older, by disability status, type of disability, sex, and age: 2003	25
B-1	Undergraduate enrollment at all institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1997–2004	27
B-2	Enrollment of first-time, first-year undergraduate students at all institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1997–2004	28
B-3	Undergraduate enrollment at 2-year institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1997–2004	29
B-4	Undergraduate enrollment at 4-year institutions, by race/ethnicity, citizenship, sex, and enrollment status: 1997–2004	30
B-5	Undergraduate enrollment status, by sex, race/ethnicity, citizenship, institutional control, and enrollment status: 2004	31
B-6	Disability status of undergraduate students, by age, institution type, financial aid, and enrollment status: 2004	32
B-7	Major field of study of undergraduates, by disability status: 2004	33
B-8	Intentions of freshmen to major in S&E fields, by race/ethnicity and sex: 2004	34
B-9	Undergraduate enrollment in engineering programs, by sex, race/ethnicity, and citizenship: 1995–2005	35
B-10	Undergraduate enrollment in engineering programs, by sex, race/ethnicity, and citizenship: 2005	36
C-1	Associate’s degrees, by field and sex: 1995–2004	37
C-2	Associate’s degrees, by field, citizenship, and race/ethnicity: 1995–2004	38
C-3	S&E and S&E technologies associate’s degrees, by sex, citizenship, race/ethnicity, and field: 2004	41
C-4	Bachelor’s degrees, by sex and field: 1995–2004	42
C-5	Bachelor’s degrees, by field and sex: 1995–2004	43
C-6	Bachelor’s degrees, by field, citizenship, and race/ethnicity: 1995–2004	46
C-7	Racial/ethnic distribution of S&E bachelor’s degrees awarded to U.S. citizens and permanent residents, by field: 1995–2004	53
C-8	Bachelor’s degrees awarded in engineering, by sex, race/ethnicity, and citizenship: 1990–2005	58
C-9	Bachelor’s degrees awarded by historically black colleges and universities to U.S.-citizen and permanent-resident blacks, by field: 1995–2004	59
C-10	Bachelor’s degrees awarded to U.S.-citizen and permanent-resident Hispanics, by institution type and field: 1994–2001	60
C-11	Bachelor’s degrees awarded by tribal colleges and universities to U.S.-citizen and permanent-resident American Indians/Alaskan Natives, by field: 1995–2004	61

C-12	Bachelor’s degrees awarded to women, by field, citizenship, and race/ethnicity: 1995–2004	62
C-13	Bachelor’s degrees awarded to men, by field, citizenship, and race/ethnicity: 1995–2004	69
C-14	Bachelor’s degrees, by race/ethnicity, citizenship, sex, and field: 2004	76
C-15	First university degrees in selected countries, by sex and field: 2003	77
C-16	S&E associate’s degrees awarded by leading institutions, by sex: 2000–2004	80
C-17	S&E associate’s degrees awarded by leading institutions, by race/ethnicity of minority graduates: 2000–2004	81
C-18	S&E bachelor’s degrees awarded by leading institutions, by sex: 2000–2004	82
C-19	S&E bachelor’s degrees awarded by leading institutions, by race/ethnicity of minority graduates: 2000–2004	83
D-1	S&E graduate students, by field, citizenship, and race/ethnicity: 1997–2004	84
D-2	Female S&E graduate students, by field, citizenship, and race/ethnicity: 1997–2004	94
D-3	Male S&E graduate students, by field, citizenship, and race/ethnicity: 1997–2004	104
D-4	First-time enrollment of full-time S&E graduate students, by field and sex: 1997–2004	114
D-5	First-time enrollment of full-time S&E graduate students, by field, citizenship, and race/ethnicity: 2000–2004	118
D-6	Black U.S.-citizen and permanent-resident S&E graduate students in all institutions and HBCUs, by field and sex: 2004	129
D-7	Hispanic U.S.-citizen and permanent-resident S&E graduate students in all institutions and HSIs, by field and sex: 2003	131
D-8	Disability status of S&E graduate students, by sex, age, race/ethnicity, enrollment and citizenship status: 2004	133
D-9	Field distribution of graduate student enrollment, by disability status: 2004	134
D-10	Enrollment status of S&E graduate students, by field and sex: 2004	135
D-11	Enrollment status of S&E graduate students, by field, citizenship, and race/ethnicity: 2004	137
D-12	Primary source of support for full-time S&E graduate students, by sex and field: 2004	141
E-1	Master’s degrees, by field: 1995–2004	146
E-2	Master’s degrees awarded to women, by field: 1995–2004	147
E-3	Master’s degrees, by field, citizenship, and race/ethnicity: 1995–2004	148
E-4	Racial/ethnic distribution of S&E master’s degrees awarded to U.S. citizens and permanent residents, by field: 1995–2004	155
E-5	Master’s degrees awarded to women, by field, citizenship, and race/ethnicity: 1995–2004	160
E-6	Master’s degrees awarded to men, by field, citizenship, and race/ethnicity: 1995–2004	167
F-1	S&E doctoral degrees awarded, by field: 1997–2004	174

F-2	S&E doctoral degrees awarded to women, by field: 1997–2004	175
F-3	S&E doctoral degrees awarded to men, by field: 1997–2004	176
F-4	Top 50 baccalaureate institutions of S&E doctorate recipients, by sex: 2000–2004	177
F-5	Field distribution of doctorate recipients, by race/ethnicity and citizenship: 2004	178
F-6	S&E doctorates awarded to U.S. citizens and permanent residents, by field and race/ethnicity: 1997–2004	180
F-7	Top baccalaureate institutions of black S&E doctorate recipients: 2000–2004	185
F-8	Top baccalaureate institutions of Hispanic S&E doctorate recipients: 2000–2004	186
F-9	Top baccalaureate institutions of American Indian/Alaska Native S&E doctorate recipients: 2000–2004	188
F-10	Top baccalaureate institutions of Asian/Pacific Islander S&E doctorate recipients: 2000–2004	189
F-11	S&E doctorates awarded to U.S. citizens and permanent residents, by field, sex, and race/ethnicity: 1997–2004	190
F-12	S&E doctorates awarded to U.S. citizens and permanent residents, by sex, race/ethnicity, and field: 2004	195
F-13	S&E doctorate recipients, by disability status: 1997–2004	197
F-14	Top baccalaureate institutions of S&E doctorate recipients with disabilities, by disability type: 2000–2004	198
F-15	S&E doctorate recipients, by field and disability status: 2004	200
F-16	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by sex and doctorate field: 2000–2004	201
F-17	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by race/ethnicity and doctorate field: 2000–2004	203
F-18	Primary source of support for U.S.-citizen and permanent-resident S&E doctorate recipients, by disability status: 2000–2004	207
F-19	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctorate recipients with definite postgraduate plans, by sex: 2004	208
F-20	S&E doctoral degrees awarded by leading institutions, by sex: 2000–2004	209
F-21	S&E doctoral degrees awarded by leading institutions, by race/ethnicity of minority graduates: 2000–2004	210
F-22	S&E doctoral degrees awarded by leading institutions to persons with disabilities: 2000–2004	211
G-1	Definite postgraduation plans of U.S.-citizen and permanent-resident S&E doctoral degree recipients, by major field, sex, and location: 2004	212
G-2	S&E postdoctoral fellows, by field and sex: 1997–2004	214

G-3	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctoral degree recipients with definite postgraduate plans, by race/ethnicity: 2004	219
G-4	Location and type of postgraduate activity for U.S.-citizen and permanent-resident S&E doctoral degree recipients with definite postgraduate plans, by disability status: 2004	220
H-1	Employed persons 16 years and older, by detailed occupation: Selected years, 1984–2004 annual averages	221
H-2	Employed females 16 years and older, by detailed occupation: Selected years, 1984–2004 annual averages	223
H-3	Employed males 16 years and older, by detailed occupation: Selected years, 1983–2004 annual averages	225
H-4	Employed persons 16 years and older, by detailed occupation and race/ethnicity: 1994–2004 annual averages	227
H-5	Employed scientists and engineers, by occupation, highest degree level, and sex: 2003	235
H-6	Employed scientists and engineers, by occupation, highest degree level, and race/ethnicity: 2003	237
H-7	Employed scientists and engineers, by occupation, highest degree level, race/ethnicity and sex: 2003	241
H-8	Employed scientists and engineers, by occupation, highest degree level, and disability status: 2003	243
H-9	Employment status of scientists and engineers, by age, sex, race/ethnicity, and disability status: 2003	245
H-10	Employment status of scientists and engineers with disabilities, by age at onset of disability: 2003	246
H-11	Scientists and engineers employed part time, by preference for full-time employment and reason for working part time, sex, race/ethnicity, and disability status: 2003	247
H-12	S&E doctorate holders who are unemployed or out of labor force, by reason for not working, sex, race/ethnicity, and disability status: 2003	248
H-13	Primary education/employment status and median salary of 2001 and 2002 S&E bachelor’s degree recipients, by field, sex, race/ethnicity, and disability status: 2003	249
H-14	Primary education/employment status and median salary of 2001 and 2002 S&E master’s degree recipients, by field, sex, race/ethnicity, and disability status: 2003	251
H-15	Employment status and median salary of 2001 and 2002 S&E doctoral degree recipients, by broad field of doctorate, sex, race/ethnicity, and disability status: 2003	253
H-16	Median annual salary of scientists and engineers employed full time, by highest degree, broad occupation, age group, and sex: 2003	255
H-17	Median annual salary of scientists and engineers employed full time, by sex, broad occupation, age, and race/ethnicity: 2003	257

H-18	Median annual salary of scientists and engineers employed full time, by broad occupation, age, and disability status: 2003	261
H-19	Employed scientists and engineers, by sector of employment, broad occupation, sex, race/ethnicity, and disability status: 2003	263
H-20	Scientists and engineers employed in schools and academic institutions, by institution type, sex, race/ethnicity, and disability status: 2003	266
H-21	S&E doctorate holders employed full time in universities and 4-year colleges, by Carnegie classification of academic institution, sex, race/ethnicity, and disability status: 2003	267
H-22	S&E doctorate holders employed in universities and 4-year colleges, by broad occupation, sex, years since doctorate, and faculty rank: 2003	268
H-23	S&E doctorate holders employed in universities and 4-year colleges, by occupation, race/ethnicity, years since doctorate, and faculty rank: 2003	271
H-24	S&E doctorate holders employed in academic institutions, by type of academic position, sex, race/ethnicity, and disability status: 2003	272
H-25	S&E doctorate holders employed in universities and 4-year colleges, by broad occupation, sex, race/ethnicity, and faculty rank: 2003	273
H-26	S&E doctorate holders employed in universities and 4-year colleges, by occupation, disability status and faculty rank: 2003	276
H-27	S&E doctorate holders employed in universities and 4-year colleges, by occupation, sex, years since doctorate, and tenure status: 2003	277
H-28	S&E doctorate holders employed in universities and 4-year colleges, by occupation, race/ethnicity, years since doctorate, and tenure status: 2003	280
H-29	S&E doctorate holders employed in universities and 4-year colleges, by occupation, disability status, and tenure status: 2003	282
H-30	Percentage of full-time ranked S&E doctorate holders employed in 4-year colleges or universities who are supported by federal grants or contracts, by occupation, sex, race/ethnicity, and disability status: 2003	283
H-31	Full-time natural science and engineering doctorate holders employed in 4-year colleges or universities, by sex, race, disability status, and number of refereed publications and patents since 1998: 2003	284
H-32	Scientists and engineers employed in government, by managerial status, age, sex, race/ethnicity, and disability status: 2003	285
H-33	Primary or secondary work activity of scientists and engineers employed in business or industry, by age, sex, race/ethnicity, and disability status: 2003	286
H-34	Median number of direct subordinates for managerial scientists and engineers employed in business or industry, by age, sex, race/ethnicity, and disability status: 2003	287

H-35	Scientists and engineers employed full time in business or industry, by occupation, number of publications since 1998, applications for a U.S. patent since 1998, sex, race/ethnicity, and disability status: 2003	288
H-36	Demographic characteristics of employed scientists and engineers, by sex: 2003	289
H-37	Demographic characteristics of employed S&E doctorate holders, by race/ethnicity and sex: 2003	290
H-38	Demographic characteristics of employed scientists and engineers, by disability status and sex: 2003	292

About This Report

Women, Minorities, and Persons with Disabilities in Science and Engineering provides information about the participation of women, minorities, and persons with disabilities in science and engineering education and employment. Its primary purpose is to serve as an information source; it offers no endorsement of or recommendations about policies or programs. National Science Foundation reporting on this topic is mandated by the Science and Engineering Equal Opportunities Act (Public Law 96-516).

The Web site (<http://www.nsf.gov/statistics/wmpd>) contains data tables organized by topic (e.g., undergraduate enrollment, graduate degrees, employment) and also by group (e.g., Hispanics, minority women, persons with disabilities). Presentation slides, which are charts in PowerPoint, graphic, and spreadsheet formats, are provided for easy downloading. Furthermore, links to additional data sources (e.g., National Center for Education Statistics, American Council on Education) and reports on these topics are provided.

A complete update of the report is issued every 2 years. Tables and figures in the report are current as of the Web-release date, which appears at the bottom of each table and figure. The site is updated as new information becomes available.

Racial/Ethnic Information

In October 1997, the U.S. Office of Management and Budget announced new government-wide standards for the collection of data on race and ethnicity (published as U.S. OMB 1999) effective January 1, 2003. Previously, racial/ethnic groups were identified as white, non-Hispanic; black, non-Hispanic; Hispanic; Asian or Pacific Islander; and American Indian or Alaskan Native. Because the old standards were in effect when the data for this report were collected, the racial/ethnic groups described here are designated by the old standards. Where data collection permits, subgroups of the Hispanic population are identified (e.g., Mexican, Puerto Rican).

Many of the groups of particular interest are quite small, so that it is difficult to measure them accurately without surveys of the entire population. In some instances,

sample surveys may not have been of sufficient scope to permit calculation of reliable racial/ethnic population estimates; consequently, results are not shown for all groups. The Bureau of the Census's Current Population Survey, for example, cannot provide data on American Indians. Data on this population are available only from the decennial census. Another issue related to race/ethnicity is that it is easy to overlook or minimize heterogeneity within subgroups when only a single statistic is reported for an entire racial/ethnic group.

Data on race/ethnicity are often based on self-identification. These data are less reliable for certain racial/ethnic groups than for others. For example, data collected at two points in time indicate that self-identification of American Indians is much less reliable than self-identification of other racial/ethnic groups.¹

Information About People with Disabilities

Data on people in science and engineering who have disabilities are seriously limited for several reasons. First, the operational definitions of disability vary, include a wide range of physical and mental conditions, and thus are not totally comparable. The Americans With Disabilities Act of 1990 (ADA) encouraged progress toward standard definitions. Under ADA, an individual is considered to have a disability if he or she has a physical or mental impairment that substantially limits one or more of his or her major life activities, has a record of such impairment, or is regarded as having such an impairment. ADA also contains definitions of specific disabilities. See <http://www.ada.gov/pubs/ada.htm>.

Second, data on disabilities frequently are not included in comprehensive institutional records (e.g., in registrars' records in institutions of higher education). If included at all, such information is likely to be kept only in confidential files at an office responsible for providing special services to students. Institutions of higher

¹ U.S. Bureau of Labor Statistics, *A Test of Methods for Collecting Racial and Ethnic Information* (Washington, DC: U.S. Department of Labor, 1995).

education are unlikely to have information regarding any students with disabilities who have not requested special services. In elementary and secondary school programs receiving funds to provide special education, however, statistics on all students identified as having special needs are centrally available.

Third, information about people with disabilities that is gathered from surveys is often obtained from self-reported responses. Typically, respondents are asked whether they have a disability and to specify what kind of disability it is. Resulting data therefore reflect individual perceptions rather than objective measures.

The attempt to provide estimates of the proportion of the undergraduate student population with disabilities is an

example of how these factors coalesce. Self-reported data on the undergraduate student population, collected through a survey to ascertain patterns of student financial aid, suggest that about 10 percent of this population have a disability. Estimates from population surveys of higher education institutions, in contrast, place the estimate much lower, between 1 and 5 percent. Whether this discrepancy is the result of self-perception, incomplete reporting, nonevident disabilities, or differing definitions is difficult to ascertain.

In the final analysis, although considerable information is available about the number of individuals with disabilities in the education system and in the science and engineering workforce, it is often impossible to compare statistics from different sources.

FIGURE A-1. U.S. population 18–24 years old, by race/ethnicity: July 1990–99 and projections to 2050

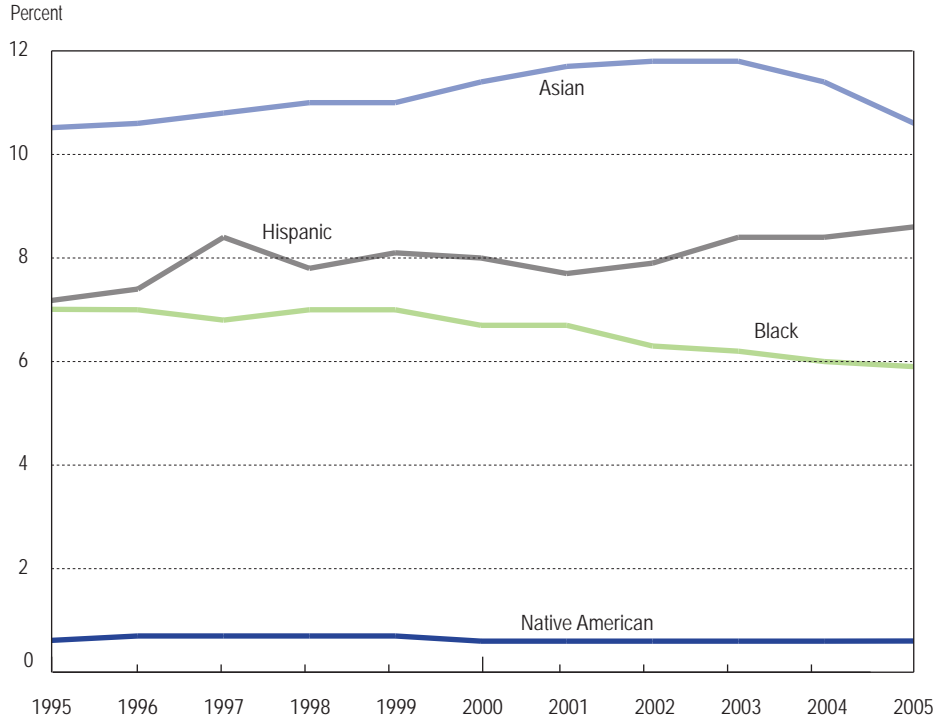

NOTE: Hispanics may be of any race. Data for American Indians/Alaskan Natives are not shown but can be found in table A-2.

SOURCE: U.S. Bureau of the Census, Current Population Survey, annual series; and U.S. Bureau of the Census, *Projections of the Total Resident Population by 5-Year Age Groups, and Sex With Special Age Categories: Middle Series, 1999 to 2100*, NP-T3, <http://www.census.gov/population/www/projections/natsum-T3.html>

The proportion of the U.S. population that is minority will continue to rise in the first half of the 21st century.

- According to the latest population projections, minorities (Asians/Pacific Islanders, blacks, Hispanics, and American Indians/Alaskan Natives) are expected to be more than half (52 percent) of the resident college-age (18–24 years old) population of the United States by 2050, up from 34 percent in 1999.
- By 2050, whites would constitute 48 percent of the U.S. population 18–24 years old, down from 66 percent in 1999.
- The greatest growth among minority groups is projected for Hispanics and Asians/Pacific Islanders, reflecting immigration trends.
- Relatively little growth is projected for college-age blacks and American Indians/Alaskan Natives; these populations would remain 14 and 0.9 percent, respectively, of all U.S. 18–24-year-olds in 2050.

FIGURE B-1. Minority undergraduate engineering students, by race/ethnicity: 1995–2005

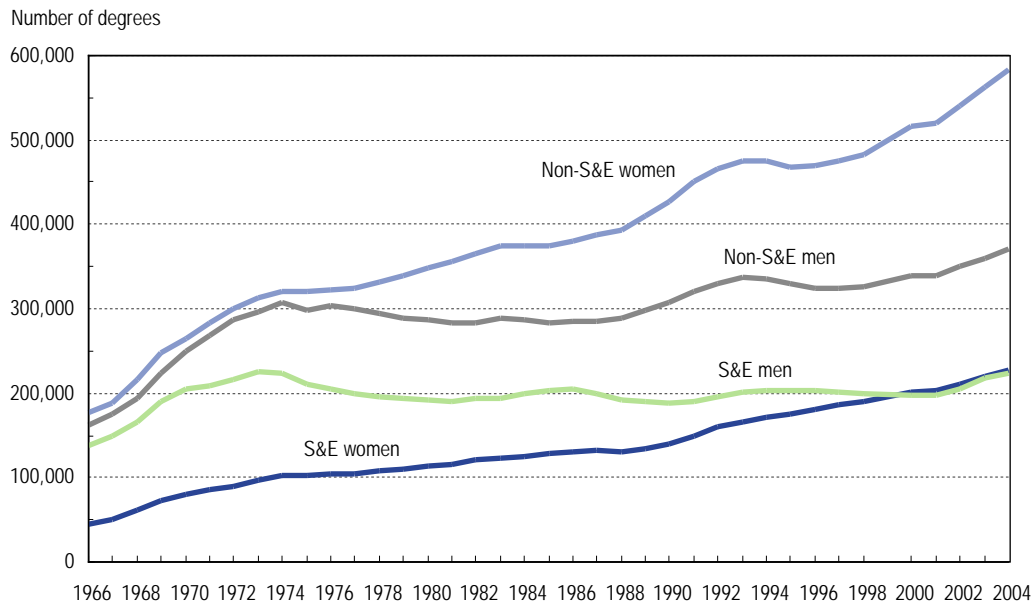

NOTE: Race/ethnicity breakouts are for U.S. citizens and permanent residents only.

SOURCE: Engineering Workforce Commission, Engineering & Technology Enrollments: Fall 2005 (Washington, DC, 2006).

Minorities, with the exception of Hispanics, show no increase in their proportion of undergraduate engineering enrollment over the past 10 years.

- The percentage of undergraduate engineering students who are white was 69 percent in 1995 and in 2005.
- The Asian share of undergraduate engineering enrollment increased between 1990 and 2003 and has decreased since then.
- Black students were roughly 7 percent of engineering undergraduates from 1995 through 2001 and roughly 6 percent since then.
- Native Americans were 0.6 to 0.7 percent of undergraduate engineering enrollment from 1995 through 2005.
- Hispanic enrollment generally increased over this period, from 7 percent in 1995 to close to 9 percent in 2005.

FIGURE C-1. Bachelor's degrees awarded in S&E and non-S&E fields, by sex: 1966–2004

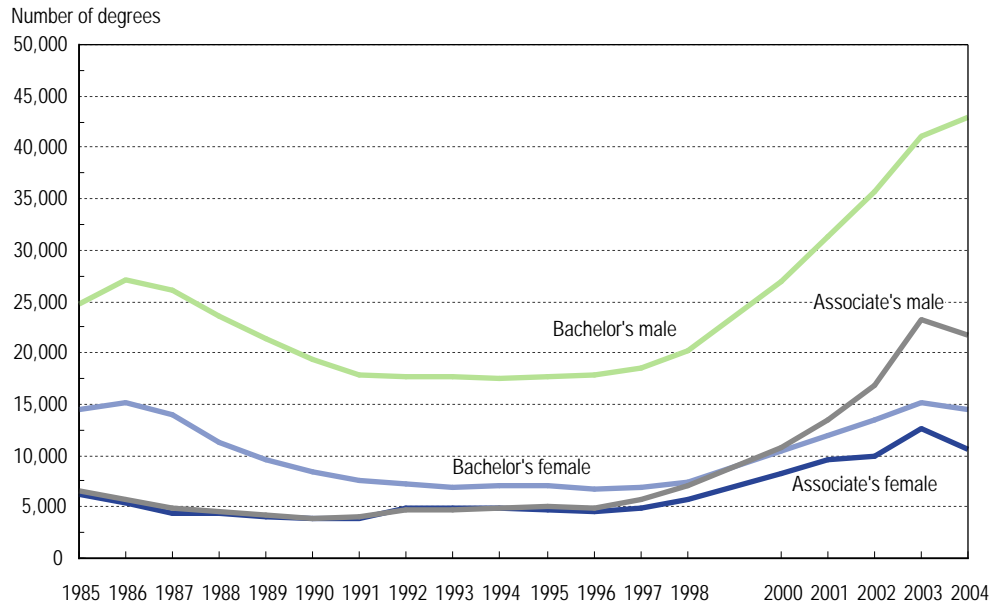

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2004.

Beginning in 2000, women earned more S&E bachelor's degrees than men.

- The number of S&E bachelor's degrees awarded to women has increased every year since 1966 (excluding 1988), reaching 227,813 in 2004.
- The number of bachelor's degrees in S&E awarded to men has fluctuated around 200,000 from 1976 to about 2001 and increased since then, reaching 224,525 in 2004.
- Women earn substantially more bachelor's degrees in non-S&E fields than men.

FIGURE C-2. Bachelor's and associate's degrees awarded in computer sciences, by sex: 1985–2004

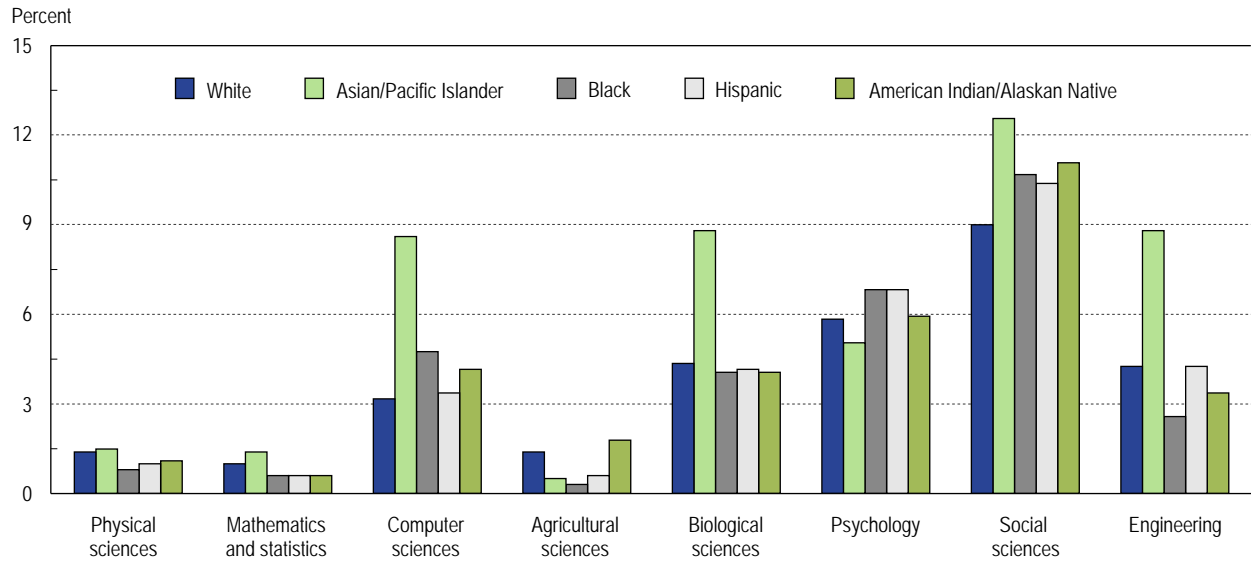

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1985–2004.

The gap in male and female degree earners in computer science widened in recent years.

- Computer sciences bachelor's and associate's degrees earned by women dropped sharply in 2004, as did computer sciences associate's degrees earned by men.
- The number of associate's and bachelor's degrees awarded in computer sciences increased substantially since 1997, especially for men.
- The female share of bachelor's degrees in computer sciences dropped between 1985 and 2004 from 37 to 25 percent, as the number of such degrees awarded to women was about the same in 2004 as in 1985.

FIGURE C-3. Bachelor's degrees awarded to racial/ethnic groups in S&E fields: 2004

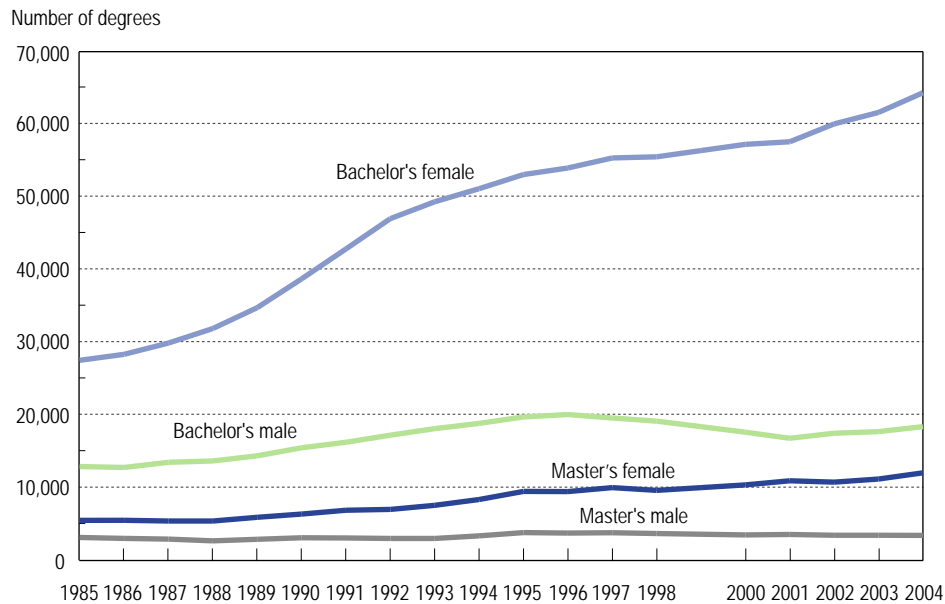

NOTE: Percents refer to percentage of each racial/ethnic group earning degrees in a given field. Physical sciences include earth, atmospheric, and ocean sciences.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 2004.

White, Black, Hispanic, and American Indian/Alaskan Native S&E bachelor's degree recipients are similarly distributed across most broad S&E fields.

- With the exception of Asians/Pacific Islanders, for whom almost half (48 percent) of all bachelor's degrees received are in S&E, about 31 percent of bachelor's degrees earned by each racial/ethnic group are in S&E.
- A higher percentage of Asians/Pacific Islanders than of other racial/ethnic groups earned their bachelor's degrees in computer sciences, biological sciences, and engineering.

FIGURE C-4. Bachelor's and master's degrees awarded in psychology, by sex: 1985–2004

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1985–2004.

The gap in male and female degree earners in psychology widened in recent years.

- The male share of bachelor's and masters's degrees in psychology dropped between 1985 and 2004 from 32 to 22 percent and from 36 to 22 percent, respectively.
- The number of bachelor's degrees awarded in psychology increased every year for women over this time period, whereas the number of bachelor's degrees awarded to men increased more slowly through 1996, dropped through 2001, and increased gradually through 2004.

FIGURE D-1. Female share of S&E graduate students, by field: 1994 and 2004

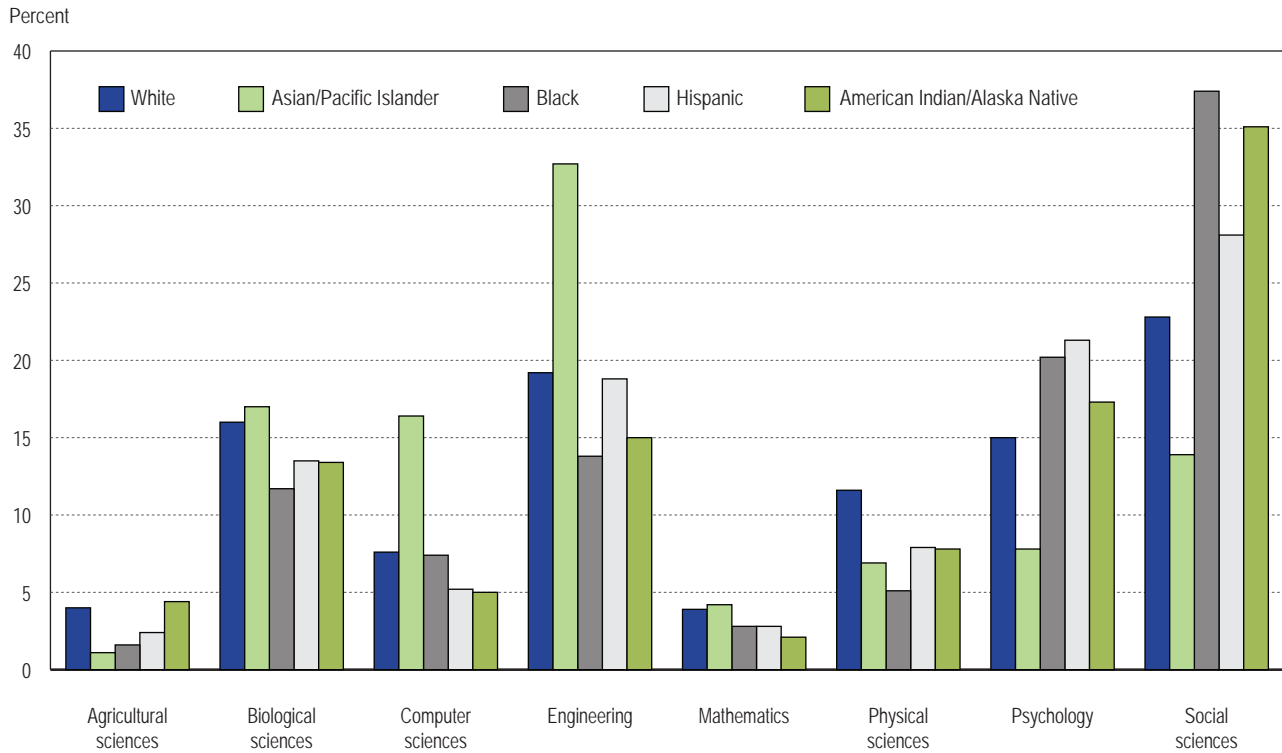

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Graduate Students and Postdoctorates in Science and Engineering, 1994 and 2004.

Women constituted a greater percentage of graduate students in S&E in 2004 (42 percent) than in 1994 (37 percent).

- Women accounted for more than half of all graduate students in some science fields. In 2004, women made up 74 percent of the graduate students in psychology, 56 percent in biological sciences, and 53 percent in social sciences.
- Women accounted for 22 percent of graduate students in engineering and 27 percent of graduate students in computer sciences in 2004.
- Roughly 30–45 percent of the graduate students in most other science fields were female.

FIGURE D-2. Field distribution of S&E graduate students, by race/ethnicity: 2004

NOTES: Data are for U.S. citizens and permanent residents only. Physical sciences include earth, atmospheric, and ocean sciences.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Graduate Students and Postdoctorates in Science and Engineering, 2004.

Asian/Pacific Islander S&E graduate students are distributed among S&E fields differently from graduate students of other racial/ethnic groups.

- In 2004, about 50 percent or more of black, Hispanic, and American Indian/Alaska Native graduate students and 38 percent of white students were in psychology or social sciences, compared to 22 percent of Asian/Pacific Islander students.
- Larger percentages of Asian/Pacific Islander graduate students than of other groups were in computer sciences and engineering.

FIGURE D-3. Field distribution of graduate students, by disability status: 2004

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 2004.

Graduate students with disabilities differ somewhat from students without disabilities in their distribution across disciplines.

- A higher percentage of graduate students with disabilities than without disabilities were in social/behavioral sciences and in education.
- Similar percentages of graduate students with and without disabilities were enrolled in graduate programs in three broad field groups: life/physical sciences; humanities; and law in 2004.
- A lower percentage of graduate students with disabilities than without was in the combined engineering/computer sciences/mathematics fields.

FIGURE E-1. Master's degrees awarded in S&E and non-S&E fields, by sex: 1966–2004

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2004.

The number of master's degrees earned by women rose more rapidly than for men since 1990.

- By 2004, women earned 44 percent of the 118,051 S&E and 63 percent of the 437,486 non-S&E master's degrees, up from 34 and 58 percent, respectively, in 1990.
- For men, the proportion of master's degrees earned in S&E fields declined throughout the 1990s.

FIGURE E-2. Minority share of S&E master's degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 1989–2004

NOTE: National data not available for 1999.

SOURCE: National Science Foundation, Division of Science Resources Statistics, special tabulations of U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, Completions Survey, 1966–2004.

The percentages of S&E master's degrees earned by Asians/Pacific Islanders, blacks, Hispanics, and American Indians/Alaskan Natives increased since 1990.

- The number of S&E master's degrees awarded increased for all minority groups and for white women since 1990.
- The number of S&E master's degrees earned by white men decreased from 1990 through 2002 and increased in 2003 and 2004.
- The proportion of S&E master's degrees awarded to underrepresented minorities between 1990 and 2004 more than doubled from 6 to 16 percent.

FIGURE F-1. Doctoral degrees awarded in S&E and non-S&E fields to U.S. citizens and permanent residents, by sex: 1966–2004

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Earned Doctorates, 1966–2004.

Both the number of U.S. citizen and permanent resident women earning doctoral degrees and their percentage of total awards in S&E and non-S&E fields rose between 1966 and 2004.

- The number of U.S. citizen and permanent resident women earning S&E doctorates rose from 784 in 1966 to 6,914 in 1995 and remained at approximately 7,000 doctorates per year through 2004.
- The number of U.S. citizen and permanent resident men earning S&E doctoral degrees dropped from 1971 through the late 1980s and again from 1995 through 2002.
- By 2004, women earned 44 percent of S&E and 60 percent of non-S&E doctoral degrees to U.S. citizens and permanent residents, up from 8 and 18 percent, respectively, in 1966.

FIGURE F-2. Field distribution of S&E and non-S&E doctoral degrees awarded to U.S. citizens and permanent residents, by race/ethnicity: 2004

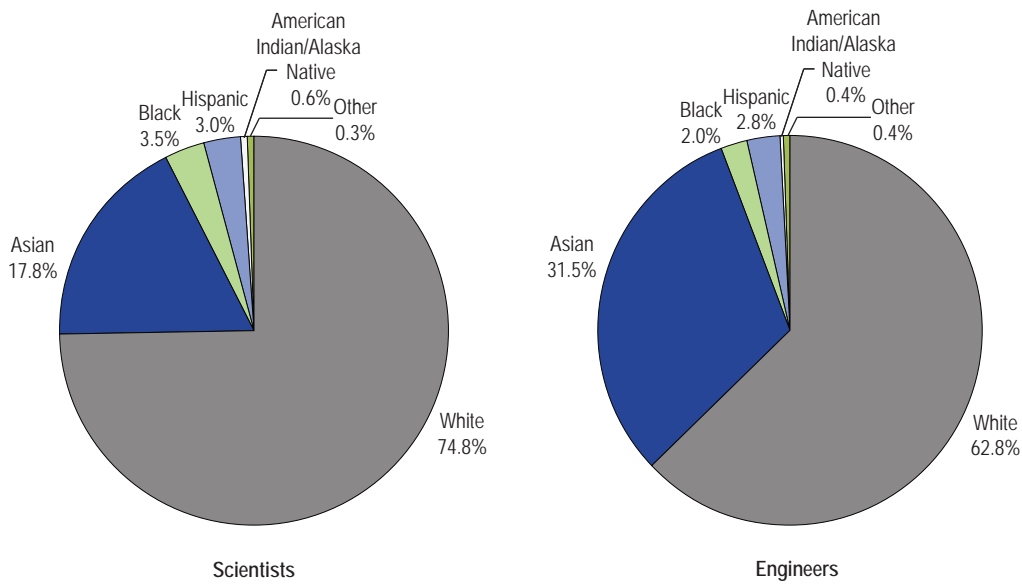

SOURCE: National Science Foundation, Division of Science Resources Statistics, Survey of Earned Doctorates, 2004.

The proportion of all doctorates earned in S&E fields varies considerably across racial/ethnic groups.

- More than half of all doctorates awarded to U.S. citizens and permanent residents were earned in S&E fields in 2004.
- Among blacks, more than half of the doctorates earned in 2004 were in non-S&E fields, primarily education.
- In contrast, 73 percent of doctorates earned by Asians were in S&E fields, 8 percent were in education in 2004.

FIGURE H-1. Employed doctoral scientists and engineers, by race/ethnicity and occupation: 2003

NOTE: Other includes Native Hawaiian/other Pacific Islander and multiple race.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

The racial/ethnic composition of doctoral engineers differs markedly from that of doctoral scientists.

- Asians comprised a far larger share and whites a much smaller share of doctoral engineers than of doctoral scientists in 2003.
- Blacks and Hispanics each constituted 3–4 percent of doctoral scientists and 2–3 percent of doctoral engineers.
- American Indians/Alaska Natives were 0.6 percent of doctoral scientists and 0.4 percent of doctoral engineers in 2003.

FIGURE H-2. Employment status of scientists and engineers, by disability status and age at onset of disability: 2003

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

The labor force participation rates of scientists and engineers with and without disabilities are quite different, and among those with disabilities, age at onset is related to labor force participation.

- Almost a third (31 percent) of scientists and engineers whose disability occurred at age 25 or older were out of the labor force, compared with 18 percent of those whose disability occurred before age 25 and 13 percent of those without disabilities.
- Almost 6 percent of scientists and engineers whose disability occurred before age 25 and 4 percent of those whose disability occurred at age 25 or older were unemployed, compared with 3 percent of those without disabilities.

FIGURE H-3. Science and engineering faculty, by sex and highest degree: 2003

NOTE: Includes full, associate, and assistant professors and instructors.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

Male science and engineering faculty are more likely than their female counterparts to have doctoral degrees.

- More than half (56 percent) of male S&E faculty have doctoral degrees, compared with 40 percent of female S&E faculty.
- Thirty-five percent of female S&E faculty, compared with 20 percent of male S&E faculty, have a master's as the highest degree.

FIGURE H-4. Age distribution of employed scientists and engineers, by disability status: 2003

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

Employed scientists and engineers with disabilities are older, on average, than those without disabilities.

- Only 5 percent of employed scientists and engineers with disabilities were 29 or younger in 2003, compared with 12 percent of those without disabilities.
- Conversely, 54 percent of those with disabilities and 30 percent of those without were 50 or older.

FIGURE H-5. Doctoral science and engineering faculty, by sex and Carnegie classification of employer: 2003

NOTE: Includes full, associate, and assistant professors and instructors.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

Male doctoral S&E faculty outnumber female S&E faculty by more than 2 to 1.

- Research I institutions were the largest employer of male and female doctoral S&E faculty in 2003.
- Almost 60,000 male doctoral S&E faculty were employed in Research I institutions in 2003, compared with about 25,000 female S&E faculty.
- Comprehensive institutions employed 32,000 male doctoral S&E faculty and 14,000 female S&E faculty.

FIGURE H-6. Doctoral science and engineering faculty, by race/ethnicity and country of birth: 2003

NOTE: Includes full, associate, and assistant professors and instructors.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

Substantial percentages of some doctoral S&E faculty were born outside the United States.

- A majority of Asian (90 percent) and Native Hawaiian/other Pacific Islander (60 percent), and 40 percent of Hispanic doctoral S&E faculty were born outside the United States.
- More than 80 percent of white, American Indian/Alaska Native, and multiple race doctoral S&E faculty were born in the United States.

FIGURE H-7. Median number of subordinates of scientists and engineers employed in business or industry, by sex, race/ethnicity, and disability status: 2003

NOTE: Includes only those with supervisory status.

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

Among supervisory scientists and engineers in business or industry, minorities, women, and those without disabilities have fewer subordinates than do whites, men, or those with disabilities.

- Men, on average, have 12 subordinates, compared to 9 for women.
- Asians and Native Hawaiians/other Pacific Islanders, have the fewest subordinates, 6 and 5, respectively, compared with 10 for blacks, Hispanics, and American Indians/Alaska Natives, and 12 for whites.
- Scientists and engineers with disabilities have, on average, 13 subordinates, compared with 10 for those without disabilities.
- Age differences are likely to account for some of these differences.

TABLE A-1. Resident population of United States, by age and sex: 2004

Age (years)	All residents	Female		Male	
		Number	Percent	Number	Percent
All ages	293,655,404	149,117,996	50.8	144,537,408	49.2

TABLE A-3. U.S. civilian noninstitutionalized population 5 years old and older, by disability status, type of disability, sex, and age: 2003

Disability status, type, and age (years)	Total		Male		Female	
	Number	Percent	Number	Percent	Number	Percent
With two or more types of disability	7,478,709	22.1	2,729,446	19.0	4,749,263	24.3
Includes self-care disability	3,152,279	9.3	1,089,580	7.6	2,062,699	10.6
Does not include self-care disability	4,326,430	12.8	1,639,866	11.4	2,686,564	13.8
No disability	20,369,355	60.1	8,957,867	62.3	11,411,488	58.5

NOTES: Data on disability status were derived from answers to two items in the American Community Survey. One asked about the existence of the following long-lasting conditions: blindness, deafness, severe vision or hearing impairment (sensory disability) or a condition that substantially limits physical activities such as walking, climbing stairs, reaching, lifting, or carrying (physical disability). The second question asked if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform certain activities: (a) learning, remembering, or concentrating (mental disability); (b) dressing, bathing, or getting around inside the home (self-care disability); (c) going outside the home alone to shop or visit a doctor's office (go-outside-home disability); and (d) working at a job or business (employment disability). People aged 16 to 64 were classified by Census as having a disability if they responded yes to at least one of the above 6 conditions. People aged 5 to 15 were classified as having a disability if they reported any one of the four conditions: sensory disability, physical disability, mental disability, or self-care disability. People over 65 were classified as having a disability if they reported any one of five conditions: sensory disability, physical disability, mental disability, self-care disability, or go-outside-home disability. Data are based on a sample and are subject to sampling variability. See source table for confidence intervals for these estimates. Age categories drawn from published Census tables.

NOTES: Race/ethnicity breakouts are for U.S. citizens and permanent residents only. Temporary resident includes all racial/ethnic groups. In 1997, data on "other or unknown race/ethnicity" were distributed across other race/ethnicity categories, excluding temporary resident. Data are not available for 1999.

NOTES: For disability status, those who reported any type of disability related to blindness, deafness, severe vision or hearing impairment, substantial limitation of mobility, or any other physical, mental, or emotional condition that lasted 6 months or more were classified as "with disability." Differences in number of undergraduates in this table and tables B-1 through B-5 primarily reflect differences in the population of institutions surveyed. See U.S. Department of Education, National Center for Education Statistics, *Estimating Undergraduate Enrollment in Postsecondary Education Using National Center for Education Statistics Data* (NCES 2005-063) at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2005063> for further explanation of these differences. Age categories used are consistent with those used in National Center for Education Statistics tables based on this survey.

NOTES: Physical sciences include earth, atmospheric, and ocean sciences; physics; astronomy; and chemistry. Data on race/ethnicity were collected on broad fields of study only until 1994; therefore, 1994 data could not be adjusted to the exact field taxonomies used by the National Science Foundation (NSF). The primary difference between 1994 and later years is that history was included in social sciences in 1994 but is included in non-S&E from 1995 on. Data are not available for 1999.

TABLE D-8. Disability status of S&E graduate students, by sex, age, race/ethnicity, enrollment, and citizenship status: 2004

(Percent)

Sex, age, race/ethnicity, and enrollment and citizenship status	All students	No disability	With disability
All S&E graduate students	100.0	93.3	6.7
Female	44.3	43.5	57.2
Male	55.7	56.6	42.8
Age (years)			
15-23	15.1	15.6	7.5
24-29	44.8	45.0	41.4
39 and older	40.1	39.4	51.1
Race/ethnicity			
White	59.7	59.0	70.5
Asian	22.4	23.3	9.4
Black	7.1	7.2	5.5
Hispanic	6.3	6.2	8.5
American Indian/Alaska Native	0.6	0.6	0.0
Native Hawaiian/Pacific Islander	0.7	0.8	0.0
Other	1.4	1.5	0.6
More than one race	1.7	1.5	5.4
Enrollment status			
Mostly full time	70.0	70.4	64.9
Mostly part time	25.9	25.4	32.3
Mix of full and part time	4.1	4.2	2.8
Citizenship status			
U.S. citizen	73.0	72.0	88.1
Resident alien	5.8	5.8	5.8
Foreign/international student	21.2	22.2	6.1

NOTES: Enrollment status was determined by graduate student responses to the question, *Since you started working on your degree, have you been enrolled mainly as a full-time student or part-time student?* For disability status, those who reported any type of disability at all related to blindness, deafness, a severe vision or hearing impairment, substantial limitation of mobility, or any other physical, mental, or emotional condition that lasted 6 months or more are classified as "with disability."

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 2004.

TABLE D-9. Field distribution of graduate student enrollment, by disability status: 2004
(Percent distribution)

Field	All students	No disability	With disability
All fields	100.0	100.0	100.0
Business/management	17.8	18.1	14.1
Education	26.2	25.7	32.8
Health	14.6	14.8	11.0
Humanities	8.1	8.1	7.0
Law	6.0	6.0	6.2
S&E	18.9	19.0	17.3
Life/physical sciences	3.9	3.8	3.9
Math/Engineering/Computer science	9.0	9.3	4.7
Social/behavioral sciences	6.1	5.9	8.6
Others	8.5	8.2	11.8

na = not applicable; no nonzero values in this cell.

^a Excludes Native Hawaiian/other Pacific Islander per revised Office of Management and Budget guidelines.

^b This category was expanded to include Native Hawaiian/other Pacific Islander and respondents choosing multiple races (excluding those selecting Hispanic ethnicity).

^a Includes Native Hawaiians/other Pacific Islanders through 2000 but excludes them in 2001–2004 per revised Office of Management and Budget guidelines.

^b Includes only those with unknown race/ethnicity through 2000. In 2001, this category was expanded to include Native Hawaiians/other Pacific Islanders and respondents choosing multiple races (excluding those selecting an Hispanic ethnicity).

^a Includes Native Hawaiians/other Pacific Islanders through 2000 but excludes them in 2001-2004 per revised Office of Management and Budget guidelines.

^b Includes only those with unknown race/ethnicity through 2000. In 2001, this category was expanded to include Native Hawaiians/other Pacific Islanders and respondents choosing multiple races (excluding those selecting an Hispanic ethnicity).

S&E = Science and engineering.

^a Includes those with unknown gender.

NOTES: Definite postgraduate plans are defined as *Am returning to, or continuing in, postdoctoral employment* or *Have signed contract or made definite commitment for other work or study* by doctoral degree recipients who responded to the question, *How definite are your immediate (within the next year) postgraduate plans?* "Other" includes elementary/secondary schools, government, nonprofit, and other/unknown.

Abroad	4.1	4.3	4.8	0.7	2.5	2.5	4.1
Location unknown	0.1	0.1	0.4	0.0	0.2	0.0	0.3

S&E = Science and engineering.

^a Excludes Native Hawaiians/other Pacific Islanders per revised OMB guidelines.^b This category includes Native Hawaiians/other Pacific Islanders and respondents choosing multiple races (excluding those selecting an Hispanic ethnicity).

NOTES: Definite postgraduate plans are defined as *Am returning to, or continuing in, postdoctoral employment* or *Have signed contract or made definite commitment for other work or study* by doctoral degree recipients who responded to the question, *How definite are your immediate (within the next year) postgraduate plans?* "Other" includes elementary/secondary schools, government, nonprofit, and other/unknown.

na = not applicable; not an occupation category. S = suppressed because fewer than 50,000 weighted cases.

NOTES: Differences in estimates of scientists and engineers in the tables in this report reflect different data sources. Data from the Current Population Survey cover employed persons 16 years and older regardless of degree status. Data based on the SESTAT surveys cover persons with bachelor's or higher degrees who were either educated as or working as scientists or engineers. In 2001, the Current Population Survey taxonomy for occupations was revised, thus data for 2002 and 2004 may not be comparable to data for previous years. Data for 2001 through 2004 reflect weights calculated on the basis of the 2000 decennial census; data for 1994 through 2000 reflect weights based on the 1990 decennial census. Detail may not add to total because of rounding.

SOURCE: Bureau of Labor Statistics, Current Population Survey, 1984–2004.

Other occupations	9,118	9,396	9,810	10,664	11,147	11,475	13,308	13,580	13,872	14,669	15,066

na = not applicable; not an occupation category.

S = suppressed because fewer than 50,000 weighted cases.

NOTES: Data for 2000 through 2004 reflect weights calculated on the basis of the 2000 decennial census; data for 1994 through 1999 reflect weights based on the 1990 decennial census. In 2001, the Current Population Survey taxonomy for occupations was revised, thus data for 2002, 2003, and 2004 may not be comparable to data for previous years. Hispanics may be of any race and are classified by race as well as ethnicity. Total includes other races, e.g., Asian, American Indian/Alaska Native (all years), and multiple race (from 2000 on) not shown separately due to small sample. Differences in estimates of scientists and engineers in the tables in this report reflect different data sources. Data from the Current Population Survey cover employed persons 16 years and older regardless of degree status. Data based on the SESTAT surveys cover persons with bachelor's or higher degrees who were either educated as or working as scientists or engineers. Detail may not add to total because of rounding.

SOURCE: Bureau of Labor Statistics, Current Population Survey, 1994–2004.

TABLE H-5. Employed scientists and engineers, by occupation, highest degree level, and sex: 2003

Occupation	All degrees			Bachelor's			Master's			Doctorate

S = suppressed because fewer than 50 weighted cases.

NOTES: Numbers are rounded to nearest 100. Detail may not add to total because of rounding. Total includes Native Hawaiian/Other Pacific Islander and multiple race not shown separately. All degrees includes professional degrees not shown separately. Differences in estimates of scientists and engineers in the tables in this report reflect different data sources. Data from the Current Population Survey cover employed persons 16 years and older regardless of degree status. Data based on the SESTAT surveys cover persons with bachelor's or higher degrees who were either educated as or working as scientists or engineers.

S = suppressed because fewer than 50 weighted cases.

NOTES: Numbers are rounded to nearest 100. Detail may not add to total because of rounding. All degrees includes professional degrees not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability." Differences in estimates of scientists and engineers in the tables in this report reflect different data sources. Data from the Current Population Survey cover employed persons 16 years and older regardless of degree status. Data based on the SESTAT surveys cover persons with bachelor's or higher degrees who were either educated as or working as scientists or engineers.

S = suppressed data with weighted cases less than 100 or unweighted sample sizes less than 20 for reasons of respondent confidentiality or data reliability.

^a Salary data are for principal jobs only. Full-time employed are those working at least 35 hours per week at their principal jobs. Full-time students are excluded from salary data.

NOTES: Numbers are rounded to nearest 100, and median salaries are rounded to nearest \$1,000. Detail may not add to total because of rounding. The underrepresented minority category includes black, Hispanic, American Indian/Alaska Native, and Native Hawaiian/other Pacific Islander. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

S = suppressed data with weighted cases less than 50 or fewer than 5 respondents and with weighted cases less than 200 for salary data.

^a Salary data for those whose principal job was less than 35 hours per week are not included. Salary data are for principal job only.

NOTES: Numbers are rounded to nearest 10 and median salaries to nearest \$1,000. Detail may not add to total because of rounding. Total includes Native Hawaiian/other Pacific Islander and multiple race not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

S = suppressed because fewer than 50 weighted cases.

NOTES: Numbers rounded to nearest 100. Detail may not add to total because of rounding. Total includes Native Hawaiian/other Pacific Islander and multiple race not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability." Differences in estimates of scientists and engineers in the tables in this report reflect different data sources. Data from the Current Population Survey cover employed persons 16 years and older regardless of degree status. Data based on the SESTAT surveys cover persons with bachelor's or higher degrees who were either educated as or working as scientists or engineers.

Other	29,700	10,200	19,500	24,400	2,700	1,300	800	200	26,800	2,900

S = suppressed because fewer than 50 weighted cases.

NOTES: Numbers rounded to nearest 100. Detail may not add to total because of rounding. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability." Total includes Native Hawaiian/other Pacific Islander and multiple race not shown separately. Respondents could answer "yes" to more than one category.

NOTES: Numbers rounded to nearest 100. Detail may not add to total because of rounding. Total includes Native Hawaiian/other Pacific Islander and multiple race not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability." Managers include anyone who reported management as either a primary or secondary work activity.

S = suppressed because fewer than 50 weighted cases.

NOTES: Numbers rounded to nearest 100. Detail may not add to total because of rounding. Sum of primary/secondary work activity categories exceeds total because of multiple response. Total includes Native Hawaiian/other Pacific Islander and multiple race not shown separately. For disability status, those who reported any difficulty (from moderate to unable to do) in any category of seeing (with glasses/contact lenses), hearing (with hearing aid), walking, or lifting are classified as "with disability."

SOURCE: National Science Foundation, Division of Science Resources Statistics, Scientists and Engineers Statistical Data System (SESTAT).

The data in this report come from many sources, including surveys conducted by the National Science Foundation (NSF), other federal agencies, and nonfederal organizations. Many methods of data collection are represented. Therefore, users should take great care when comparing data from different sources. These data often will not be strictly comparable because of differences in definitions, survey procedures, and phrasing of questions, among other things.

Survey accuracy is determined by the joint effects of sampling and nonsampling errors.¹ Sampling errors arise when estimates based on a sample differ from figures that would have been obtained if a complete population had been surveyed. Nonsampling errors can arise from design, reporting, and processing errors as well as from errors due to faulty responses or nonresponses. Nonsampling errors include respondent-based events, such as some respondents interpreting questions differently from other respondents; respondents making estimates rather than giving actual data; and respondents being unable or unwilling to provide complete, correct information. Errors can also arise during the processing of responses, such as during recording and keying.

Reporting Categories

This report draws on data collected from many sources, many of which use differing terms to describe the various statistics presented here. Efforts have been made to maintain consistency throughout these tables, but in some tables, it has been necessary to use distinct terminology that does not match that used in other tables.

Racial/Ethnic Information

The collection and reporting of race/ethnicity data pose several additional problems. First, both the naming of population subgroups and their definitions have changed over time. Second, many of the groups of particular interest are quite small, so it is difficult to measure them accurately without surveys of the entire population of interest. In some instances, sample surveys may not have had sufficient sample size to permit the calculation of reliable racial/ethnic population estimates for all groups;

¹ In all surveys cited as sources of data for this report, efforts were made to minimize these errors.

consequently, data are not shown for some groups. The U.S. Bureau of the Census's Technical Notes Current Population Survey, for example, cannot provide data on American Indians. Data on this population are available only from the decennial census. Third, data on race/ethnicity are often based on self-identification. These data are less reliable for certain racial/ethnic groups than for others. Data collected at two points in time indicate that self-identification of American Indians is much less reliable than self-identification of other racial/ethnic groups.² Fourth, it is easy to overlook or minimize heterogeneity within subgroups when only a single statistic is reported for a total racial/ethnic group.

Information About People with Disabilities

Data on people with disabilities who study or work in science and engineering (S&E) are seriously limited for several reasons. First, the operational definitions of disability vary, can include a wide range of physical and mental conditions, and may not be comparable. The Americans With Disabilities Act of 1990 (ADA) encouraged progress toward standard definitions. Under ADA, an individual is considered to have a disability if he or she has a physical or mental impairment that substantially limits one or more of his or her major life activities, has a record of such impairment, or is regarded as having such an impairment. ADA also contains definitions of specific disabilities.

Second, data on disabilities frequently are not included in comprehensive institutional records (e.g., in registrars' records in institutions of higher education). If included at all, such information may be kept only in confidential files at an office responsible for providing special services to students. Institutions of higher education are unlikely to have information regarding students with disabilities who have not requested special services related to their disability from the institution. In elementary/secondary school programs receiving funds to provide special education, however, statistics on all students identified as having special needs are centrally available.

Third, information about people with disabilities that is gathered from surveys is often obtained from self-reported

² U.S. Bureau of Labor Statistics, *A Test of Methods for Collecting Racial and Ethnic Information* (Washington, DC: U.S. Department of Labor, 1995).

responses. Typically, respondents are asked whether they have a disability and to specify what kind of disability it is. Resulting data therefore reflect individual perceptions rather than objective measures.

The attempt to provide estimates of the proportion of the undergraduate student population with disabilities is an example of how these factors coalesce. Self-reported data on the undergraduate student population, collected through a survey to ascertain patterns of student financial aid, suggest that about 10 percent of this population have some disability. Estimates from population surveys of higher education institutions, in contrast, place the estimate much lower, between 1 and 5 percent. Whether this discrepancy is the result of self-perception, incomplete reporting, nonevident disabilities, or differing definitions is difficult to ascertain.

In the final analysis, although considerable information is available about individuals with disabilities in the education system and in the S&E workforce, it is often impossible to compare statistics from different sources.

Several sources of data on people with disabilities are cited here. They include the National Postsecondary Student Aid Study (NPSAS) conducted by the Department of Education's National Center for Education Statistics (NCES), NSF's Survey of Earned Doctorates (SED), and the integrated Scientists and Engineers Data System (SESTAT). These sources are described in more detail later in this appendix; the following is a brief description of how each treats the issue of disability.

- NPSAS asked students in 2000 whether they have any disabilities "such as hearing, speech, or mobility impairment, or vision problems that can't be corrected with glasses." Response categories are: legally blind or have a vision impairment that cannot be corrected with glasses; hearing impairment; speech disability or limitation; orthopedic or mobility limitation; specific learning disability; and other health-related disability or limitation.
- SED asks if the respondent has a disability, then asks the respondent to mark which categories describe the disability(ies). Response categories include: blind/visually impaired; deaf/hard of hearing; physical/ orthopedic disability; learning/cognitive disability; vocal/speech disability; other disability.

- The SESTAT surveys ask the degree of difficulty—none, slight, moderate, severe, or unable to do—an individual has in seeing (with glasses), hearing (with hearing aid), walking without assistance, or lifting. Those respondents who answered "moderate," "severe," or "unable to do" for any activity were classified as disabled.

Primary Data Sources

Data from several sources are presented here. This section provides summary descriptions of major sources and information about the location of more detailed survey descriptions.

Primary NSF Sources

The following sources from NSF's Division of Science Resources Statistics (SRS) were used for data tables in this publication. Published data tables from these surveys can be accessed on the SRS website at <http://www.nsf.gov/statistics>. In addition, researchers may access data directly from the Scientists and Engineers Statistics Data System (SESTAT) or the WebCASPAR database system, which also can be accessed from the SRS website.

Survey of Earned Doctorates

SED has been conducted annually since 1957 for NSF, the U.S. Department of Education, the National Endowment for the Humanities, the National Institutes of Health, the National Aeronautics and Space Administration, and the U.S. Department of Agriculture. This is a survey of all recipients of research doctoral degrees from U.S. institutions. SED data are restricted to research doctorates such as the doctor of philosophy (Ph.D.) or doctor of science (D.Sc.); it excludes the recipients of first professional degrees such as the juris doctor (J.D.) or doctor of medicine (M.D.).

Data for SED are collected directly from individual doctorate recipients contacted through graduate deans at all U.S. universities awarding research doctorates. The recipients are asked to provide information about the field and specialty of their degree as well as their personal educational history, selected demographic data, and information about their postgraduate work and study plans. Over time, more than 90 percent of the annual cohort of doctorate recipients respond to the questionnaire.

Partial data from public sources, such as field of study, are added to the file for nonrespondents. No imputations are made, however, for nonresponse for data not available elsewhere, such as race/ethnicity information. The data for a given year include all doctorates awarded in the 12-month period ending on June 30 of that year. Information about SED can be found at <http://www.nsf.gov/statistics/srvydoctorates/>.

Survey of Graduate Students and Postdoctorates in Science and Engineering

The data collected in the Survey of Graduate Students and Postdoctorates in Science and Engineering (GSS) represent national estimates of graduate enrollment and postdoctoral employment at the beginning of the academic year in all academic institutions in the United States that offer doctoral or master's degree programs in any S&E or health field. Included are data for all branch campuses; affiliated research centers; and separately organized components such as medical or dental schools, schools of nursing, and schools of public health. The survey population consists of approximately 600 graduate institutions. Data are collected at the academic department level.

Approximately 99 percent of institutions and departments respond to the survey. Missing data for partially nonrespondent departments are imputed using the departments' previous year's data, where available, or data from peer institutions in cases where data had not been reported the previous year. Data for completely nonrespondent departments are imputed using data from the previous year, where available.

Available information includes counts of full-time graduate students by source and mechanism of support, including data on women and first-year students enrolled full time, part-time graduate students by sex, and citizenship and racial/ethnic background of all graduate students. In addition, data on postdoctorates are available by source of support, sex, and citizenship, including separate data on those holding first professional doctorates in the health fields; summary information about other doctoral nonfaculty research personnel is also included.

NSF has collected data on graduate S&E enrollment and postdoctoral appointees since 1966. From fall 1966 through fall 1971, data from a limited number of doctorate-granting institutions were collected through the NSF Graduate Traineeship Program, which requested data only on those S&E fields supported by NSF. During the

period 1972–75, this data collection effort was gradually expanded to include additional S&E fields as well as all institutions known to have programs leading to the master's or doctoral degree. Because of this expansion, data for 1974 and earlier years are not strictly comparable with 1975 and later data.

In 1999, the survey presented respondents with new race/ethnicity categories:

- The “Asian/Pacific Islander” category used in previous years' surveys became two categories: “Asian” and “Native Hawaiian/Pacific Islander.”
- The categories “more than one race Hispanic/Latino” and “more than one race non-Hispanic/Latino” were added.
- The “other” category included in previous years' surveys was removed.

These changes are not reflected in the tables in this report. Currently, only about 8 percent of the departments report data in any of the new categories. For the tables in this report, as in other publications using these data, the data reported in the new categories are combined into previous survey categories. The data are combined for the tables as follows: the “Asian” category and the “Native Hawaiian/Pacific Islander” category form the “Asian/Pacific Islander” category; the “one race only Hispanic/Latino” category and the “more than one race Hispanic/Latino” category form the “Hispanic” category; and the “more than one race non-Hispanic” category and the “unknown” category form the “other or unknown” category.

Information about GSS can be found at <http://www.nsf.gov/statistics/srvygradpostdoc/>.

SESTAT Data System

The SESTAT data system integrates data from three SRS surveys—the Survey of Doctorate Recipients, the National Survey of College Graduates, and the National Survey of Recent College Graduates. The integration of the SESTAT surveys requires complementary sample populations and reference periods, matching survey questions, procedures, and field definitions, as well as weighting adjustments for any overlapping populations.

The surveys provide data on educational background, occupation, employment, and demographic characteristics. These surveys are of individuals and currently have

a combined sample size of about 102,300, representing a population of about 22 million scientists and engineers, including people trained in S&E or S&E-related fields or working in S&E or S&E-related occupations. Each of the three surveys that makes up the SESTAT data system collects new data every 2 years. The data reported in this publication were collected in 2003.

SESTAT defines scientists and engineers as residents of the United States with a baccalaureate degree or higher who, as of the study's reference period, were not institutionalized, were age 75 or less, and were either educated as or working as a scientist or engineer. A baccalaureate or higher degree is a bachelor's, master's, doctorate, or professional degree. To meet the scientist or engineer requirement, the U.S. resident had to (1) have at least one baccalaureate or higher degree in an S&E or S&E-related field or (2) have a baccalaureate or higher degree in a non-S&E field but worked in an S&E or S&E-related occupation as of October 1, 2003. Some elements of SESTAT's desired target population were not included within the target populations of any of the three SESTAT component surveys. Bachelor's and master's level S&E or S&E-related personnel missing from the survey frames are predominately:

- U.S. residents as of the survey reference date whose bachelor's and/or master's degrees in S&E or S&E-related fields were received prior to April 2000 or from a foreign institution, who resided outside the United States on April 1, 2000, but not with the U.S. armed forces stationed abroad; or
- U.S. residents as of the survey reference date with no baccalaureate or higher degree in any field as of April 1, 2000, who were awarded a degree in S&E or an S&E-related field after June 2002 by a U.S. institution or after April 2000 by a foreign institution.

Doctorate level S&E or S&E-related personnel missing from the survey frames are predominately:

- U.S. residents as of the survey reference date with doctorates in S&E or health fields received after June 2002 or from a foreign institution, with no baccalaureate or higher degree in any field as of April 1, 2000, and no bachelor's or master's degree in S&E or S&E-related fields received from a U.S. institution between April 1, 2000, and June 2002; or

- U.S. residents as of the survey reference date with doctorates in S&E or health fields received after June 2002 or from a foreign institution but with no bachelor's or master's S&E or S&E-related degree received from a U.S. institution between April 1, 2000, and June 2002, who resided outside the United States on April 1, 2000, but not with the U.S. armed forces stationed abroad.

SESTAT classifies the following broad categories as S&E occupations: computer and mathematical scientists, life and related scientists, physical and related scientists, social and related scientists, and engineers. Postsecondary teachers are included within each of these groups. The following are considered S&E-related occupations: health and related occupations, S&E managers, S&E precollege teachers, S&E technicians and technologists, including computer programmers, and other S&E-related occupations, such as architects and actuaries. Non-S&E occupations include non-S&E managers; non-S&E teachers; non-S&E technicians/technologists; social services and related occupations; sales and marketing occupations; art, humanities, and related occupations; and other non-S&E occupations—for example, clerical and administrative support personnel, farmers, foresters, fishermen, lawyers, judges, librarians, archivists, curators, food service personnel, construction tradespeople, mechanics and repairers, and those involved in precision/production occupations, operators (for example, machine set-up, machine operators and tenders, fabricators, assemblers) and related occupations, transportation/material moving occupations and protective and other service occupations. Information on SESTAT can be found on the Web at <http://sestat.nsf.gov/>.

Primary Non-NSF Sources

The following non-NSF sources were used for data tables in this report.

The Integrated Postsecondary Education Data System Survey: Fall Enrollment, Completions, and Institutional Characteristics

National Center for Education Statistics
U.S. Department of Education
1990 K Street, NW
Washington, DC 20006
(202) 502-7300
<http://nces.ed.gov/ipeds>

The Integrated Postsecondary Education Data System (IPEDS) Survey began in 1986 as a supplement to and replacement for the Higher Education General Information Survey (HEGIS), which began in 1966. HEGIS annually surveyed institutions listed in the current NCES Education Directory of Colleges and Universities; IPEDS surveys all postsecondary institutions, including universities and colleges and the institutions that offer technical and vocational education. IPEDS consists of several integrated component surveys that obtain information about types of institutions where postsecondary education is available, student participants, fall enrollments, programs offered and completed, graduation rates, and the human and financial resources involved in the delivery of postsecondary education. Descriptions of these surveys follow.

The IPEDS Institutional Characteristics Survey provides the basis for the list of institutions reported in the Education Directory of Colleges and Universities. The list includes institutions that meet specific accreditation criteria and offer at least a 1-year program of college-level studies leading to a degree. Each fall, institutions listed in the previous year's directory are asked to update information about their school's characteristics.

The IPEDS Completions Survey replaces and extends the HEGIS Degrees and Other Formal Awards Conferred Survey. It is administered to all institutions offering degrees at the bachelor's degree level and above, 2-year institutions, and less-than-2-year institutions.

The IPEDS Fall Enrollment Survey replaces and extends the previous HEGIS surveys of enrollment in institutions of higher education.

The National Postsecondary Student Aid Study

National Center for Education Statistics
U.S. Department of Education
1990 K Street, NW
Washington, DC 20006
(202) 502-7300
<http://nces.ed.gov/npsas>

NPSAS was established by NCES to collect information about financial aid allocated to students enrolled in U.S. postsecondary institutions. NPSAS was first administered in the fall of the 1986-87 academic year. NCES conducted

subsequent cycles of NPSAS during the 1989-90, 1992-93, 1995-96, and 1999-2000 academic years.

The 1999-2000 survey gathered information from about 62,000 undergraduate and graduate students selected from registrars' lists of enrollees at more than 900 postsecondary institutions. The sample included students who did and did not receive financial aid, as well as students' parents. Student information, such as field of study, educational level, and attendance status (part time or full time), was obtained from registrars' records. Types and amounts of financial aid and family financial characteristics were abstracted from school financial aid records. Data pertaining to family circumstances, background demographic data, educational and work experiences, and expectations were collected from students using a computer-assisted telephone interview. The response rate for obtaining institutional record data for all students was 97.0 percent, and the weighted overall student interview response rate was 65.6 percent.

Survey of Engineering and Technology Enrollments and Survey of Engineering and Technology Degrees

Dan Bateson
Engineering Workforce Commission

The Engineering Workforce Commission (EWC) annually conducts surveys of engineering enrollments and degrees conferred in almost 600 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). EWC counts the number of students studying for engineering degrees at all ABET-accredited engineering schools throughout the United States and also some schools that are not ABET-accredited for a variety of reasons unique to each school. Some schools are in the process of obtaining ABET accreditation; others have simply asked to be included in the survey. The enrollments and degrees surveys obtain responses from about 91 to 93 percent of the schools. Each year, EWC obtains data from all schools included in the previous year's survey to ensure accurate time-series comparisons.

Sampling Errors

Sampling errors occur when estimates are derived from a sample rather than the entire population. The sample used for any particular survey is only one of a large number of possible samples of the same size and design that could have been selected. Even if all other aspects of the survey remained fixed, such as the questionnaire and instructions, the estimates from each sample would differ from other samples. This difference, termed *sampling error*, occurs by chance, and its variability is measured by the standard error associated with a particular estimate.

The standard error of a sample survey estimate measures the precision with which an estimate from one sample approximates the true population value, and it can be used to construct a confidence interval for a survey parameter to assess the accuracy of the estimate. See <http://sestat.nsf.gov/docs/method.html> for information about calculation of standard errors for data from SESTAT, <http://www.bls.gov/cps/home.htm> for Current Population Survey design and methodology, and <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2006180> for information on standard errors for NPSAS data.
