

James P. Evans, M.D., Ph.D

James P. Evans, M.D., Ph.D. (appt pending) is an Associate Professor of Genetics and of Medicine at the University of North Carolina in the Department of Medicine and the Divisions of General Medicine and Hematology, and Oncology. Dr. Evans is the Director of the Cancer Genetics Services at the University of North Carolina . Dr. Evans received his Ph.D. in Pathology and Oncology in 1983 and his M.D. in 1984 from the University of Kansas Medical Center Graduate School. Dr. Evans has served as a scientific advisor to the North Carolina Supreme Court, judicial institutes of foreign countries, and the United Nations Industrial Development Organization, addressing issues of human genetics and its relationship to domestic and international law. As a senior science Fellow of the Einstein Institute for Science, Health, and the Courts, Dr. Evans organized a United Nations conference that addressed global disparities in the use of biotechnology. Dr. Evans has lectured widely on the subjects of DNA banking, genetics in the primary-care setting, and genetic testing to advisory boards, committees, and health organizations. Dr. Evans has received numerous teaching and clinical performance awards. His research and clinical interests are in the field of clinical cancer genetics.
