## An Infusion of Energy!

STAT-USA® is thrilled to announce the addition of **U.S. Energy Statistics** from the Department of Energy to STAT-USA®/Internet™. This new set of data provides state and national data for various energy sectors, such as electricity and petroleum. That's over **2,000** current and historical U.S. energy reports at your fingertips!

## Background

STAT-USA has carefully selected 15 different report series from the following energy sectors: Coal, Electricity, Natural Gas, Nuclear Energy, Petroleum and Renewable Alternative Fuels. While the majority of the reports fall under those specific categories, there are several integrated releases, such as: Short-Term Energy Outlook, Monthly Energy Review and the Annual Energy Review.

## About the Data

The energy report series that STAT-USA/Internet is now offering include:

- **Monthly Energy Review** – Recent energy statistics, including prices, overviews, energy production, consumption and trade
- **Short-Term Energy Outlook** – U.S. monthly projections
- **Annual Energy Review** – U.S. annual projections
- **U.S. Weekly Gasoline Prices** – Regular grade prices for regional, selected states and cities
- **Quarterly Coal Report** – Production, consumption and trade
- **State Electricity Profiles** – Retail price and sales and net generation by state
- **Natural Gas Monthly** – Price, supply, trade and storage nationally and by state
- **And several others...**

All of these reports can be found on the State of the Nation page in the Library section. You can browse through the different categories and individual reports in the SOTN Library or you can go directly to the [Energy Page](#). Historical energy reports are located in the [Archive](#). Should you have any questions or need assistance, contact STAT-USA at 1-800-STAT-USA (782-8872) or [statmail@doc.gov](mailto:statmail@doc.gov).
