

Information Notice: Reports Migration - ESAR A2.1 and M1

Attention All ACE Report Users

The A2.1/M1 release requires a more robust data warehouse to handle additional reporting capabilities. As part of the deployment of A2.1, the existing data warehouse information must be migrated to the new data warehouse. To accomplish this, the following migration activities will occur:

- Between January 19 and January 24, 2009, Account Management, Authorized Data Extract and Transactions reports will remain “static.” **No nightly updates will occur. Data will be complete on January 25, 2009.**
- Account Revenue reports will not be migrated until the afternoon of January 24, 2009.
- A message will be posted to the ACE News Tab when the data migration is completed.
