## Federal Acquisition Institute

# ANNUAL REPORT ON THE FEDERAL ACQUISITION WORKFORCE

FISCAL YEAR 2007

#### **FOREWORD**

This Report's Purpose: This is the Federal Acquisition Institute's (FAI's) annual demographic report on the federal acquisition workforce, showing trends by occupational series, employment grade and educational level, as well as turnover and hiring data for fiscal year (FY) 2007. FAI has published this report since 1977, and the purpose of the data is to assist federal managers with planning and evaluating the acquisition workforce overall and the acquisition workforce programs in respective agencies. Historical reports are located at http://www.fai.gov/fapis.asp.

FAI continuously evaluates whether this report, in its current format and content, best serves the needs of the acquisition community. Any feedback on how this report might be modified to increase its utility would be appreciated. This year's report has been modified to include new sections, additional data, and other information suggested from reader feedback. FAI welcomes your suggestions. Please send any feedback to the contact information below:

Federal Acquisition Institute 9820 Belvoir Road Fort Belvoir, VA 22060-5565 (703) 805-2300 www.fai.gov questions@fai.gov

**About the Federal Acquisition Institute:** The Federal Acquisition Institute (FAI), created in 1976, is charged with promoting the development of a professional federal acquisition workforce and performing a wide range of activities supporting management of the acquisition workforce. FAI draws its mandate from the Office of Federal Procurement Policy Act (41 U.S.C. 405(d) and 433). The Act established FAI under the Office of Federal Procurement Policy (OFPP) and located it in the General Services Administration (GSA). FAI's mission includes these workforce initiative areas:

**Workforce Shaping** – Developing a structured approach using common processes and tools across the federal acquisition community to shape a workforce to meet current and future needs. Workforce shaping includes competency development and management, strategic human capital planning, workforce data collection and management, and standardized certifications that recognize skill and experience.

**Talent Supply** – Developing and implementing an organized process to attract and retain new employees at all levels. This meets the urgent need to retain essential knowledge and skills necessary for successful acquisition management. Attracting and managing talented workers involves outreach to and alliances with government and nongovernmental organizations to consolidate resources focused on recruitment and maximize successful, innovative initiatives.

**Career Management** – Enabling career planning and retention in the federal acquisition environment through cross-agency initiatives and networking opportunities for acquisition professionals. FAI supports agency Acquisition Career Managers by highlighting agency best practices, providing opportunities for cross-agency exchanges, and augmenting agency development programs with professional association and university alliances that promote continuing acquisition education.

**Corporate University** – Integrating training and development, capability tracking and mapping, experiential assignments, and knowledge transfer governmentwide to optimize agency resources and information in support of OFPP initiatives in the priority areas above. FAI facilitates relationships and partnerships with organizations including GSA's Center for Acquisition Excellence and 508 Universe, the Defense Acquisition University (DAU), and the Treasury Acquisition Institute to provide acquisition professionals training in topics ranging from building 508 compliant requirements to green procurements.

<u>www.FAI.gov</u> Page i

Under the leadership of OFPP and the Chief Acquisition Officers Council, FAI receives input and feedback from across the federal government's acquisition community as well as from key private and public sector partners. The challenges facing the acquisition workforce are not unique, but mirror larger national and global workforce challenges. The dedicated focus that OFPP and the Chief Acquisition Officers Council are directing to the acquisition workforce and the coalition of government and private sector organizations with which FAI has built partnerships provides agencies with some of the tools, procedures, and processes they may use in planning and developing the acquisition workforce needed to meet missions.

#### **EXECUTIVE SUMMARY**

The Annual Report on the Federal Acquisition Workforce (the "report") for FY 2007 identifies acquisition workforce highlights for the past year and summarizes workforce demographics across five federal occupational series that support federal acquisition programs as well as selected agency Program and Project Managers (P/PMs). While Contracting Officer's Technical Representatives (COTRs) are included in an agency's acquisition workforce, the requirement to enter COTRs into the Acquisition Career Management Information System (ACMIS) did not take effect during the data collection period for this year's report. Preliminary P/PM and COTR data are presented here for the first time. However, because the data are not yet complete, these roles are not included in this year's analysis.

In FY 2007, the Office of Management and Budget, Office of Federal Procurement Policy (OFPP):

- ☐ Established Federal Acquisition Certification programs for Contracting Officer's Technical Representatives and Program/Project Managers (to standardize competencies within these roles and improve the collective stewardship of taxpayer dollars).
- □ Directed that agencies enhance recruiting/retaining top talent through improved acquisition intern programs, cross-agency rotational assignments, and special training for interns and new members of the workforce and supported this requirement through governmentwide activities at FAI.
- □ Directed and facilitated the first governmentwide contracting workforce competency survey, releasing initial results of the FAI survey in October 2007. The survey was voluntary and anonymous and was designed to gather baseline workforce information that agencies may use in strategic human capital planning.
- ☐ Initiated the Shine program to recognize the achievements of acquisition employees.

In January 2007, the Acquisition Advisory Panel (AAP) established under the Services Acquisition Reform Act (SARA) issued a final report with 89 recommendations for improving federal acquisition and the Congress and Executive branch launched initiatives to respond to them.

The report presents the facts of acquisition workforce distribution across occupational groupings and agencies and points out demographics of significance in conducting strategic human capital planning for the acquisition workforce and executing policy promoting effective performance of federal acquisition responsibilities. Table 7-E-1 provides an overview of this workforce:

TABLE 7-E-1 ACQUISITION WORKFORCE AT A GLANCE FY 2007

|                                                    | General<br>Business and<br>Industry<br>(GS-1101) | Contracting (GS-1102) | Purchasing<br>(GS-1105) | Procurement<br>Clerical and<br>Assistance<br>(GS-1106) | Industrial<br>Specialist<br>(GS-1150) | Total  |
|----------------------------------------------------|--------------------------------------------------|-----------------------|-------------------------|--------------------------------------------------------|---------------------------------------|--------|

**Executive Summary** 

As noted above, this report introduces two new categories of acquisition professionals that civilian agencies across the government have begun to identify in 2007 as mandated by OFPP Policy Letter 05-01—Program/Project Managers (P/PMs) and Contracting Officer's Technical Representatives (COTRs). These positions do not comprise one or more specific government position classification series. These roles may be performed by professionals in many series and are frequently time-limited. That is, individuals may take on acquisition management responsibilities related to their normal duties for months or years for a specific initiative and terminate acquisition duties when the initiative is completed or the professional moves to a new position. For these and other reasons, agencies are currently refining their identification of such positions. Data available from the Department of Defense (DOD) and preliminary data from the civilian agencies for these two new acquisition roles is presented here for the first time. Capturing data improved during the second quarter of 2008 as shown in the attached tables. However, it remains an incomplete snapshot of these disciplines. By FY 2008, more authoritative data on these newly identified acquisition professionals should be available in the Report.

Page 2 www.FAI.gov

#### FY 2007—THE ACQUISITION YEAR IN REVIEW AND CHALLENGES AHEAD

Paul A. Denett, Administrator for Federal Procurement Policy testified, "As agencies increasingly turn to contractors for their expertise and innovation, the skills and good judgment of our acquisition workforce become more closely tied to our government's ability to buy needed goods and services and deliver effective results." <sup>1</sup> The United States Government is not alone in relying on the strength of its talent to deliver mission-critical services. Both the public and private sectors in countries around the world are struggling to confront the challenges presented by the growing competition for a highly skilled workforce that is more diverse, more transient, and more mature than in previous times. The report addresses the data, the issues, and the solutions of how the federal government is managing its acquisition workforce to meet this challenge.

Fiscal Year 2007 was an active year for the acquisition workforce in the government. The Services Acquisition Reform Act (SARA) Acquisition Advisory Panel (AAP) delivered final recommendations at the end of the first quarter. The AAP supported a broader definition of the acquisition workforce, as did Congress in the Clinger-Cohen Act of 1996 and the Services Acquisition Reform Act of 2003. OFPP Policy Letter 05-01, *Developing and Managing the Acquisition Workforce*<sup>2</sup>, also incorporates a broad definition of the acquisition workforce. OFPP, with the support of FAI, instituted guidelines for identifying civilian agency acquisition workforce members and standards for certification for Program and Project Managers and Contracting Officer's Technical Representatives.

Defining and Identifying the Federal Acquisition Workforce

Each civilian agency must identify employees comprising their agency acquisition workforce and populate the Acquisition Career Management Information System (ACMIS). ACMIS is the governmentwide database containing information on the federal acquisition workforce in civilian agencies and is used to identify training needs and to support strategic human capital plans and decisions. This report not only continues to include demographic information on occupations traditionally considered part of the acquisition workforce but also adds, for the first time, similar preliminary information on Program and Project Managers and Contracting Officer's Technical Representatives.

This report for FY 2007, like its predecessors over the past 30 years, provides a snapshot across select federal acquisition occupations, the dynamics that affected them over the past year, and those that will continue to influence the federal acquisition workforce. The report's view of the acquisition workforce is defined by those occupations identified by the Chief Acquisition Officers in agencies. For the first time this year, FAI began collecting the records related to acquisition P/PMs and COTRs from civilian agencies as part of the acquisition workforce consistent with the new Office of Management and Budget (OMB) policy.

#### During FY 2007:

- □ OMB's Office of Federal Procurement Policy established new certification programs (FAC-P/PM and FAC-COTR) for acquisition professionals in civilian agencies and issued a policy creating a supplemental emergency contracting cadre.
- ☐ The Acquisition Advisory Panel (AAP) issued a 450-page final report that contained 89 recommendations for enhancing federal acquisition. Although not required by law, the Panel decided to address acquisition workforce issues, given their significance. It devoted a 40-page

<sup>&</sup>lt;sup>1</sup> Senate Subcommittee on Oversight of Government Management, The Federal Workforce, and the District of Columbia, Committee on Homeland Security and Governmental Affairs, Paul A. Denett, Administrator for Federal Procurement Policy, January 31, 2007.

<sup>&</sup>lt;sup>2</sup>To review Policy Letter 05-01 in its entirety, please refer to the following link: <a href="http://www.whitehouse.gov/omb/procurement/policy\_letters/05-01\_041505.html">http://www.whitehouse.gov/omb/procurement/policy\_letters/05-01\_041505.html</a>

chapter to this topic and made 13 recommendations for improvements to workforce skills, metrics, management, and development.

- □ Legislation was initiated to recognize and provide resources for the acquisition workforce. Congress specifically designated funds to ensure proper acquisition oversight staffing, updated skills, and continuing workforce development in the Department of Defense (DOD), and it removed the sunset provision from the Acquisition Workforce Training Fund.
- □ The Office of Management and Budget released the initial results of FAI's first Contracting Workforce Competencies Survey, which baselined the competency proficiency levels of the civilian agency acquisition workforce. Ongoing analysis of the Competencies Survey data has helped to define the strategies needed for both maintaining a healthy acquisition workforce and determining future human capital solutions to support acquisition in the federal government.

#### Office of Federal Procurement Policy Acquisition Workforce Priorities

#### **Certification Programs**

OFPP launched two new certification programs for civilian agencies in FY 2007 and early FY 2008: the Federal Acquisition Certification for Program and Project Managers (FAC-P/PM) and the Federal Acquisition Certification for Contracting Officer's Technical Representatives (FAC-COTR). These new programs are aligned with the more robust definition of the acquisition workforce and, when combined with the Federal Acquisition Certification in Contracting (FAC-C) program, launched in FY 2006, form the core around which acquisition planning, development, and management is carried out. These competency-based certification programs reflect the key skills required to perform these roles successfully across the full federal spectrum while retaining flexibility for agencies or functional communities to provide supplemental skills and guidance to continue meeting agency specific or functional community specific needs.

The FAC-P/PM promotes development of essential acquisition competencies governmentwide and facilitates employee mobility as well as achievement of agency missions. The FAC-P/PM is recognized and accepted by, at a minimum, all civilian executive branch agencies. It is built on core competencies shared across the federal spectrum (including the Department of Defense). Agencies may require additional competencies for functional areas, agency programs, or assignment as a program or project manager; however, the FAC-P/PM competencies were developed by an interagency working group<sup>3</sup> and are agreed to as essential for successful program and project managers in the federal government.

FAC-P/PM has three certification levels: Entry Level, Mid/Journeyman Level, and Senior/Expert Level. FAC-P/PM is not mandatory for all program and project managers; however, at a minimum, program and project managers assigned to major acquisitions<sup>4</sup> must be Senior/Expert Level certified within a year of assuming their duties, unless a waiver is granted by the appropriate agency official. An individual may certify at any of the levels without being certified at the lower levels, as long as the individual meets the certification requirements at the level desired.

The FAC-COTR program, announced by OMB in November 2007, establishes general training requirements for civilian agency COTRs, also known as Contracting Officer's Representatives (CORs)<sup>5</sup>—individuals who are authorized in writing by the Contracting Officer (CO) to perform prescribed administrative and/or technical functions.

OFPP Policy Letter 05-01 formalized this broader definition of the acquisition workforce and required the Federal Acquisition Institute to develop and the Chief Acquisition Officers Council (CAOC) to approve

Page 4 www.FAl.gov

 $<sup>{\</sup>begin{tabular}{ll} 3\\ The full interagency report is available at $$\underline{$http://www.fai.gov/pdfs/FAI\%20Working\%20Group\%20Report\%20FAC-PPM\%20certification.pdf}$\\ \end{tabular}$ 

<sup>&</sup>lt;sup>4</sup> Major acquisitions are defined in Office of Management and Budget Circular A-11, Part 7, Exhibit 300.

<sup>&</sup>lt;sup>5</sup> Contracting Officer's Technical Representatives, including, in this context, Contracting Officer's Representatives (CORs) and others performing the functions noted above.

better standards for training and managing COTRs as well as Program and Project Managers. The interagency working group chartered to develop the program and project management certification also recommended a separate certification for COTRs.

The FAC-COTR program applies to all executive agencies, except those subject to the Defense Acquisition Workforce Improvement Act (DAWIA, 10 U.S.C. §§ 1741-46), and its certification shall be accepted by civilian agencies as evidence that an employee meets core training requirements to perform COTR functions. Furthermore, the new standard requires certification within six months of COTRs appointed after the policy is effective and also requires meeting continuous learning requirements to maintain proficiency.<sup>6</sup>

ACMIS is currently being populated with information on COTRs/CORs, and over 11,000 acquisition-related records were added in 2007. However, current records reflect the ambiguities of identifying these positions and agency records, along with guidance on what records are required, continue to be refined. This report, therefore, defers analysis of COTR demographics until definitions and capture of accurate agency data can be verified.

#### **Contracting Workforce Competencies Survey**

The strategic approach to acquisition workforce management envisioned by OFPP required data points on the skills resident in the current acquisition workforce in order to make informed decisions. This formed the rationale for the contracting workforce competencies survey accomplished in 2007, the first ever governmentwide look at contracting skills. OFPP directed a Contracting Workforce Competencies Survey during FY 2007 to gather this information for contracting professionals (GS-1102s), the core series within the acquisition occupations. FAI provided agencies with the mechanisms to gather this baseline data. Fifty agencies used this tool to achieve a 50% response rate from the target population in civilian agencies. OFPP provided initial data results in October 2007. The DOD is using a different tool during FY 2008 to survey its contracting workforce.

Released on October 17, 2007, the initial survey results indicated that the workforce generally is well trained and would find beneficial additional instruction in project management, requirements definition, performance-based acquisition, and negotiation. Among the survey's specific findings:

- □ Overall, contracting workforce technical competencies meet expected levels. Of the 17 technical competencies surveyed, gaps requiring attention were identified in project management, defining requirements, and financial management. General business competency gaps were identified in influencing/negotiating and oral communication.
- A significant number of workers with intermediate to advanced level proficiency in both technical and general business competencies will be leaving the government acquisition workforce over the next 10 years; roughly 40% of those with intermediate to advanced level proficiency in the technical competencies and about 45% of those with intermediate to advanced level proficiency in the general business competencies.
- Respondents indicated that their normal work activities are evenly distributed among the three phases of contract planning, contract formulation, and contract administration.
- ☐ Respondents indicated that both individual and organizational training in project management, defining government requirements, performance-based acquisition, and effective management of requirements for contract administration would be beneficial.
- □ Contracting professionals indicated that training in negotiation skills, strategic planning, and the effective resolution of contract disputes and closeout would be beneficial.

<sup>&</sup>lt;sup>6</sup> More information on these certification programs can be found at: <a href="http://www.fai.gov/certification/index.asp">http://www.fai.gov/certification/index.asp</a>

The competencies for this survey were developed in 2003 by an FAI-led interagency working group and re-verified in 2006 by a DOD/DAU-led interagency workgroup. Data from this survey augment the findings of this report, and the combined conclusions will be useful at various levels: to provide a governmentwide baseline of federal contracting workforce competencies, as well as to help determine areas where training would be most beneficial to augment current contracting capabilities. Agencies and Chief Acquisition Officers are using the data to develop plans to help their acquisition workforce meet mission-critical needs as well as for broader strategic human capital planning.<sup>7</sup>

#### **Human Capital Planning**

To provide a consistent method of organizing and analyzing data on workforce composition and skills, as well as guidelines and strategies for mitigating human capital issues, FAI used Office of Personnel Management (OPM) best practices and agency input to develop the Acquisition Workforce Strategic Human Capital Plan Model for agency use in Spring 2007. This approach offers a standard civilian agency methodology for performing an acquisition workforce inventory and analysis of agency acquisition talent management, including: recruitment, retention, development, succession planning, and knowledge management of the acquisition workforce. The approach and document are based on the Human Capital Assessment and Accountability Framework (HCAAF) from OPM.

#### Federal Acquisition Intern Coalition – Be America's Buyer (www.fai.gov/careers)

The federal government is increasingly faced with a competitive market for incoming acquisition professionals. In order to address this recruiting and retention challenge, FAI implemented the Federal Acquisition Intern Coalition (FAIC) in January 2008.<sup>8</sup> This initiative is designed to raise the visibility and awareness of a career in acquisitions with the federal government as well as coordinate a variety of activities across civilian agencies, from internship opportunities and career branding messages to recruiting strategies. This interagency collaboration will focus on highlighting the advantages of the acquisition profession both to recent college graduates and mid-career candidates seeking a change. By leveraging resources, tools, and brand messages through FAI, agencies will expand their options for recruiting the best-qualified candidates and retaining stellar performers in the federal government. The FAIC will be implemented in phases with the first concentrated effort directed to the contracting profession.

The Federal Acquisition Intern Coalition program was announced on January 30, 2008, by the Administrator, OFPP and the Director, OPM. As part of the FAIC, FAI launched an expanded section on its website pertaining to the Federal Acquisition Intern Coalition and internship opportunities. At present there are 10 internship programs listed from various agencies. The Intern Coalition will be participating in several college career fairs in FY 2008. Branding and marketing materials about careers in acquisition have been developed for general use and can be customized by agencies.

#### Shine Initiative

The Administrator for OFPP, Paul Denett, launched the "Shine" initiative to increase the visibility of acquisition excellence within the workforce, stating that, "Too often, we fail to recognize when acquisitions are conducted well and miss opportunities for employees to learn through the successes of their peers." The Shine initiative consists of a series of acquisition-related awards, some carrying stipends, which cover outstanding performance by teams and individuals across the federal community. The awards have highlighted best practices and innovation. The Federal Acquisition Institute website (<a href="http://www.fai.gov/acm/awards.asp">http://www.fai.gov/acm/awards.asp</a>) features descriptions of award-winning and nominated practices to ensure that these practices can be applied in other organizations.<sup>9</sup>

#### **Technology Support for the Acquisition Workforce**

For the past decade, the government has recognized the need to address attrition and transition in the acquisition workforce. The changes in both acquisition and the acquisition workforce represent an opportunity for technology to facilitate enhancements in business processes and acquisition workforce solutions. Two potential areas for technology enhancements are: support for the acquisition process and employee training and development.

Acquisition process technology is still maturing, with solutions in the Integrated Acquisition Environment and across agencies being introduced to facilitate acquisition planning, development, and management.

Knowledge management and other acquisition tools offer key advantages in both the purchasing and management components of acquisition. Agencies such as the National Aeronautics and Space Administration, the Department of Energy, the Federal Aviation Administration, the Department of Health and Human Services, the Army, and the Navy, as well as smaller agencies such as the National Archives and Records Administration, are exploring lifecycle toolsets. In future reports, this section will examine the tools, technology, and applications that are helping the acquisition workforce accomplish their objectives and how those resources will make the acquisition function more efficient, effective, and productive.

Web 2.0 and Enterprise 2.0 applications hold tremendous potential for learning and development of the acquisition workforce, as well as knowledge management of the acquisition function. FAI is partnering with organizations such as the Defense Acquisition University, the Treasury Acquisition Institute and not-for-profit organizations such as the Partnership for Public Service to develop more technology-based acquisition workforce solutions. Tools such as automated certification management, individual development planning, and other career development efforts will supplement more on-line training and learning opportunities, making acquisition workforce solutions available around the world at the pace of the workforce. These technology-focused solutions will be essential in capturing knowledge of the existing workforce and recruiting the workforce of the future.

#### **Legislative Initiatives**

Congress emphasized the importance of the acquisition workforce with several key legislative initiatives in FY 2007. Most significantly, the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), signed by the President on January 28, 2008, did the following:

| both personnel and skills, needed to properly perform its mission, provide oversight of                                               |
|---------------------------------------------------------------------------------------------------------------------------------------|
| contractors, and ensure the best value from the expenditure of public funds.                                                          |
| Provided authority to fill shortage category positions for certain federal acquisition positions (in both DOD and civilian agencies). |
| Repealed the sunset requirement with respect to the Acquisition Workforce Training Fund.                                              |
| Directed the Administrator of OEDD to designate a member of the Conion Evecutive Compiles of                                          |

☐ Established an acquisition workforce development fund to ensure the DOD has the capacity, in

Directed the Administrator of OFPP to designate a member of the Senior Executive Service as Associate Administrator for Acquisition Workforce Programs to work with agency heads to establish workforce training programs; develop performance standards on training programs; ensure agency heads collect and maintain standardized information on the acquisition workforce; work with agency heads to develop acquisition workforce human capital plans; and work with the Office of Personnel Management to encourage agency heads to use existing authorities to recruit and retain qualified acquisition personnel.

#### **Workforce Dynamics**

Several crosscutting themes are prevalent in the 2007 events and initiatives surrounding the acquisition workforce:

| The importance of identifying and measuring the competencies and skills needed to perform acquisition work; |
|-------------------------------------------------------------------------------------------------------------|
| The need to recruit and retain skilled employees; and                                                       |
| The importance of planning for change as the roles traditionally played by the acquisition                  |
| workforce are broadened and clarified.                                                                      |

Many of these same themes are reinforced by or reflected in the statistics included in the report tables and the acquisition workforce initiatives underway across the government.

The actual size of the Federal Acquisition Workforce is becoming easier to gauge with the inclusion of key acquisition roles (Program and Project Managers and COTRs) into ACMIS. The 2007 contracting workforce competencies survey provides a "qualitative" perspective on the contracting workforce as well as supplemental demographic data to complement the "quantitative" data in this Annual Report. A follow-up survey to include Program and Project Managers and COTRs in 2008 should add to the information agencies may use in making strategic human capital decisions regarding the acquisition workforce.

The contracting workforce survey results reveal that 51% of both the total survey population and the Contracting Series (GS-1102) are eligible to retire over the next 10 years, and 47% of both populations actually plan to retire within that time frame. Results also revealed that those eligible to retire between April 2007 and April 2008 intended to delay retirement as only 3% out of 10% eligible actually planned to retire.

The survey found that the Contracting Series (GS -1102) population has:

| A higher education level than the overall survey population. |
|--------------------------------------------------------------|
| A higher percentage with 24 hours of business credits.       |
| A higher percentage with bachelor's and master's degrees.    |

The number of newly hired personnel in the Contracting Series (GS-1102) with college degrees has increased steadily, from 52% in FY 1998 to 81% in FY 2007 [see Table 7-02-1, Turnover in the Contracting Series (GS-1102) FY 1998 - FY 2007]. These new hires come with an expectation of increased training and challenging work as well as a clear path for professional development and advancement. If the expectations of these employees are not met, they could find other opportunities. Therefore, for the first time, FAI has included in this FY 2007 report statistical information regarding the movement of employees out of the GS-1102 series into other government professions.

In recognition of the retirement plans and resident skills of the senior level employees as well as the expectations of new entrants FAI is working to expand its learning and development opportunities. Activities such as seminars, rotation assignments, online knowledge sharing tools, career paths, and revised training modes are underway to share knowledge across professionals and better meet career development expectations.

#### Statistical Information on the Federal Acquisition Workforce

For the past three decades, FAI has published an Annual Report on the Federal Acquisition Workforce to provide demographic information to better understand the acquisition workforce. Because the acquisition workforce of each agency is subject to judgments by the agency as to the composition of their workforce, the report, at this time, is not structured to address the full federal acquisition workforce. Rather, it provides a comprehensive set of data on five occupational series traditionally considered to be an agency's acquisition workforce. As CAOs continue to identify members of the acquisition workforce, FAI will adjust this report. Additional data on the workforce can be found using OPM's FedScope

Page 8 www.FAI.gov

system and FAI's ACMIS system. The information in this report is based on official data as reported to OPM and can be compared with their reports in FedScope at <a href="http://www.fedscope.opm.gov/">http://www.fedscope.opm.gov/</a>.

Beginning with this year's report, coverage will focus on five series: General Business and Industry (GS-1101), Contracting (GS-1102), Purchasing (GS-1105), Procurement Clerical and Assistance (GS-1106), and Industrial Specialists (GS-1150). In addition, demographics are included on Program/Project Managers (P/PMs) and Contracting Officer's Technical Representatives (COTRs). Demographics on Industrial Property Management (GS-1103) and Property Disposal (GS-1104) will continue to be monitored but not published. Both of these series have diminished populations, limited to a few agencies.

As of September 30, 2007, there were 61,434 personnel in the five series addressed in this report. Since 1988, the size of the acquisition workforce has fluctuated from a high of 67,085 in 1992 to a low of 56,384 in 2000, consistently hovering around the 60,000 mark overall. Specific functions/series have shown more dramatic fluctuations over this time period. Here are some of the more salient statistics for the past 20 years:

| F *** | J                                                                                                                                                                                                                                                        |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | The General Business and Industry Series (GS-1101) increased by 79%, from 15,006 to 26,846.                                                                                                                                                              |
|       | The Contracting Series (GS-1102) decreased from 30,263 in 1988 to 26,608 in 2001, but has been rising steadily since 2002. The series increased 3% in FY 2005, 1% in 2006, and 2% in FY 2007, adding a total of 1,498 personnel in the last three years. |
|       | The increases to the Contracting Series (GS-1102) have been primarily in the civilian agencies, where numbers have increased from 7,995 in 2000 to a high of 9,315 in 2007.                                                                              |
|       | Overall, in civilian agencies, personnel in the Contracting Series (GS-1102) have increased from 7,250 in 1988 to 9,315 in 2007, an increase of 23%.                                                                                                     |
|       | The Purchasing Series (GS-1105) decreased by 51%, from 6,378 in 1988 to 3,114 in 2007.                                                                                                                                                                   |
|       | The Purchasing Series (GS-1105) decrease was most pronounced in DOD, where it decreased from 3,521 in 1988 to 995 in 2007.                                                                                                                               |
|       | Civilian agencies saw a decrease in the Purchasing Series (GS-1105) from 2,857 in 1988 to 2,032 in 2001; with a slight increase from 2002 onwards.                                                                                                       |
|       | Procurement Clerical and Assistance Series (GS-1106) saw the most significant decrease, from 10,016 in 1988 to 1,898 in 2007; a decrease of 81%.                                                                                                         |
|       | The decrease in the Purchasing Series (GS-1105) and the Procurement Clerical and Assistance Series (GS-1106) over the past 20 years reflects the changing nature and increasing                                                                          |

□ The percentage of college graduates has steadily risen over the past 20 years in all five of the series, most notably in the Contracting Series (GS-1102) from 52% in 1988 to 75% in 2007.

professionalism of contracting as it has moved from a primarily procurement function to a more

Appendix B provides a graphical comparison of certain DOD and civilian agency demographic information. Because the number of individuals falling outside the traditional General Schedule salary grades has risen to almost 20% of the acquisition workforce in certain agencies and series, a new set of salary-based tables is included in the FY 2007 report. A preliminary set of salary tables was introduced as Appendix B in last year's report. The data in these tables augment the grade level data, revealing comparable demographics for agencies where the migration to pay-banding and alternative pay scales is prevalent.

#### Retirement

specialized business advisor role.

Retirement eligibility in the Contracting Series (GS-1102) increased from 12% in FY 2006 to 14% in FY 2007. Eligibility for full retirement climbs to 34% in FY 2012 and 55% in FY 2017 [See Table 7-02-13, Retirement Eligibility in the Contracting Series (GS-1102) by Agency FY 2007].

For purposes of this report, retirement rates for both Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS) employees were calculated by comparing the number of employees who were eligible to retire, using the CSRS rules for regular retirement, with the number who actually retired. Despite the much-publicized risk of high attrition across the government from retirements, in FY 2007, compared to FY 2006, loss rates for those eligible to retire increased only slightly—no more than 2%—in the three series:

| slightly—       | no more than 2%—in the three series:                                                                                                                                                                                                                                                                               |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Among plittle:  | procurement and purchasing positions, loss rates for those eligible to retire actually decreased a                                                                                                                                                                                                                 |
| □ F             | Procurement Clerical and Assistance Series (GS-1106): 21% in FY 2007 vs. 22% in FY 2006.                                                                                                                                                                                                                           |
| The Puro 2007). | chasing Series (GS-1105) remained constant at 17% (See Table 7-S-3, Turnover During FY                                                                                                                                                                                                                             |
| ranging b       |                                                                                                                                                                                                                                                                                                                    |
| □ H<br>□ H      | In FY 2001, losses edged up slightly but remained under 2,000; For FY 2002, losses remained under 2,000, decreasing to 1,761; For FY 2003, losses again were in excess of 2,000, rising to 2,197, and Have remained above 2,000 since then: 2,443 (FY 2004), 2,108 (FY 2005), 2,255 (FY 2006) and 2,247 (FY 2007). |
| Hires           |                                                                                                                                                                                                                                                                                                                    |
| losses in       | the same period, agencies matched attrition by attracting new hires. New hires kept ahead of all but one (FY 2003) of the past eight years, maintaining the steady state of the workforce with o GS-1102 contracting professionals. With respect to GS-1102 hires:                                                 |
|                 | In FY 2000, hires nearly kept up with losses in the Contracting Series (GS-1102). This relationship continued in FY 2001.                                                                                                                                                                                          |
|                 | In FY 2002, hires exceeded losses by 686.                                                                                                                                                                                                                                                                          |
|                 | For FY 2003, hires fell behind losses by 445, and hires exceeded losses in FY 2004 by 87.                                                                                                                                                                                                                          |
| □ F             | For FY 2005, FY 2006 and FY 2007, hires continued to exceed losses by 653, 355 and 490 respectively.                                                                                                                                                                                                               |

Hires in the General Business and Industry Series (GS-1101) remained above losses again in FY 2007, as did those in the Purchasing Series (GS-1105). In the other series addressed in the respective tables, losses outpaced hires in FY 2007, indicating a common trend in the workforce to move away from positions in these series (see Table 7-S-5, Attrition and Attrition Rates from Acquisition Positions by Year FY 2001 - FY 2007, and Table 7-S-6, Hires and Accession Rates for the Acquisition Workforce by Year FY 2001 - FY 2007).

Page 10 www.FAI.gov

#### Average Age

The average age for internal hires in the Contracting Series (GS-1102) decreased slightly in FY 2007 to 43.6, as did the average age for external hires (34.3), as well as the age of that series as a whole (46.5) [see Table 7-02-6, Contracting Series (GS-1102) Hires During FY 2007].

The average age for the General Business and Industry Series (GS-1101) and the Purchasing Series (GS-1105) decreased slightly in FY 2007 while that for the Procurement Clerical and Assistance Series (GS-1106) and the Industrial Specialist Series (GS-1150) increased slightly. Again, agencies in general appear to be allowing incumbents to remain in the latter two series but are more actively replenishing the ranks in the three primary acquisition series (1101, 1102, and 1105).

#### Education

The percent of college graduates in the Contracting Series (GS-1102) rose from 71% in FY 2006 to 75% in FY 2007 [see Table 7-02-4, Females, Supervisors, Managers, & College Graduates in the Contracting Series (GS-1102) by Grade FY 2007].

The percentage of college graduates among external hires in the Contracting Series (88%) continued to exceed that of internal hires (74%) for FY 2007. The percentage of college graduates hired externally increased over FY 2006 (from 85% to 88%). Those hired internally also increased over the same period (from 67% to 74%) [see Table 7-02-6, Contracting Series (GS-1102) Hires During FY 2007]. These are all particularly impressive statistics given that less than 30% of the total U.S. workforce holds a college degree. The business advisor role of the contracting profession recognizes the transformative nature of education and how, combined with training and experience, this will lead to enhanced acquisition performance. At the same time, however, the government must be sensitive to the declining size of the post-boomer U.S. workforce and the increasingly attractive corporate market for professionals with acquisition knowledge and experience.

#### Supervisors and Managers

The increasing significance of acquisition occupations to their agencies and the complexity and sensitivity of the discipline are reflected in the increasing numbers of supervisors and managers in the acquisition professions. Management oversight positions increased from 8,588 in FY 2006 to 9,135 in FY 2007 (see Table 7-S-9, Supervisory and Managerial Positions by Occupation FY 2007). In FY 2007, 103 employees in the General Business and Industry Series (GS-1101) and 81 in the Contracting Series (GS-1102) were in the Senior Executive Service (SES). For FY 2007, the number of SES positions in the General Business and Industry Series stabilized, remaining the same, while those in the Contracting Series increased to 92 (see Table 7-S-2, Acquisition Workforce at a Glance FY 2007).

#### Migration from the Contracting Series GS-1102 to Other Series

Along with the expansion of acquisition occupations to include the P/PM and COTR roles, the government is tracking the career progression of acquisition professionals across agencies and out of government as well as to other occupational series within the federal government. To enable analysis of these movements, the FY 2007 report is introducing statistics on the migration of personnel from the Contracting Series (GS-1102) to other series [see Table 7-02-18, Migrations from the Contracting Series (GS-1102) to Other Occupations in the Government during FY 2007]. These data are essential to better understand the dynamics influencing career decisions by personnel in the Contracting Series (GS-1102). Preliminary data indicate that 444 individuals who held positions in the Contracting Series at the beginning of FY 2007 had migrated to other series in the federal government by the end of FY 2007. Regarding the positions to which these personnel migrated:

| □ 219, or 49%, were at the journeyman level of GS-12 or GS |  | 219, or 49% | , were at the | iournevman | level of | GS-12 or | r GS- | 1 | 1 | <b>;</b> : |
|------------------------------------------------------------|--|-------------|---------------|------------|----------|----------|-------|---|---|------------|

□ 177, or 40%, moved to the General Business and Industry Series (GS-1101);

<sup>&</sup>lt;sup>10</sup>Charting the U.S. Labor Market in 2005, Bureau of Labor Statistics, U.S. Department of Labor, Chart 2-1.

- □ 109, or 25%, entered the Miscellaneous Administration and Program Series (GS-301);
- □ 117, or 26%, migrated to either the Program Management Series (GS-340) or the Management and Program Analysis Series (GS-343);
- □ 257, or 58%, of the migrations were to or within the DOD; and
- ☐ Two civilian agencies sustained 20 or more migrations to or within their agency: the General Services Administration (27), and the Department of Homeland Security (31).

Page 12 www.FAI.gov

#### **TECHNICAL NOTES**

#### **Source of Data**

The data in this report were derived from the Central Personnel Data File (CPDF), which is established and maintained by the Office of Personnel Management (OPM). Data in this report, unless otherwise noted, are current as of September 30, 2007.

#### **Agencies**

This report covers personnel in the Executive Branch. However, it does not cover employees of the U.S. Postal Service, the Postal Rate Commission, the Board of Governors of the Federal Reserve Board, the White House Office, the Office of the Vice President, the Tennessee Valley Authority, the Defense Intelligence Agency, the Federal Bureau of Investigation, the Central Intelligence Agency, or the National Security Agency.

#### **Agency Data**

The numbers in this report may differ slightly from those reported by the personnel information system of the department or agency. Usually, such differences are a matter of timing (e.g., differences in schedules for data verification, correction, and updating during the first part of the succeeding fiscal year).

#### Retirement Eligibility

This report includes data only on employees who are eligible for regular retirement. The minimum combinations of age and years of service qualifying for regular retirement under the Civil Service Retirement System (CSRS) are:

- $\square$  Age 62 with 5 years of service,
- ☐ Age 60 with 20 years of service, and
- ☐ Age 55 with 30 years of service.

Since 1987, all new employees are covered by the Federal Employees Retirement System (FERS). Some CSRS employees also opted to transfer to the FERS system. Under FERS, the minimum age for retirement increases gradually from 55 for those born before 1948 until it reaches 57 years for those born after 1969. Unless otherwise noted, the tables in this report are based on the CSRS combination of age and years of service to qualify for retirement including those in FERS. No data are provided on employees eligible for "early" retirement. During preparation of next year's report, consideration will be given to developing retirement eligibility percentages which blend both CSRS and FERS employees.

#### Turnover

Turnover data in this report were derived by tracking data on each individual in the workforce across fiscal years. Social Security Numbers were used to locate and merge files from different fiscal years on the same individual.

For example, an individual's occupational code might read as follows:

|              | FY 2004        | FY 2005 | FY 2006 | FY 2007 |
|--------------|----------------|---------|---------|---------|
| Series:*     | 1105           | 1105    | 1102    | 0       |
| *At the Fise | cal Vear's end |         |         |         |

\*At the Fiscal Year's end.

In this report, the individual would be reported as a "loss" to the GS-1105 series during FY 2006 and an "internal hire" for the GS-1102 series in FY 2006. The individual would also be counted as a "loss" to the GS-1102 series in FY 2007.

#### Losses/Attrition

Losses include employees who left the series for any reason, such as separation from government service or promotion to a position in a different series. *Attrition* is used to characterize these losses in the statistical tables which follow this narrative.

**Technical Notes** 

#### Hires

Hires include employees who entered the series from any source, such as outside hires, transfers from other series, and returns to active duty following extended leave without pay. For the purposes of this report, "internal" hires include both:

- ☐ Movement from one to another of the five principal series (i.e., GS-1101, GS-1102, GS-1105, GS-1106, and GS-1150) tracked in this report. For example, if an employee began the fiscal year in a Purchasing Agent (GS-1105) position and ended the year in a Contracting Series (GS-1102) position, that employee has been counted as a GS-1102 internal hire.
- ☐ Hires of Tenure Group I employees. Tenure Group I, for the most part, includes "career" employees—that is, employees with at least three years of *substantially continuous creditable* civilian federal service. (See Federal Personnel Manual, Chapters 315 and 351.)

"External" hires, in contrast, include any hire of a Tenure Group II employee who was not employed in any of the five principal series at the beginning of the fiscal year. Tenure Group II, for the most part, consists of "career-conditional" employees (i.e., employees with less than three years of *substantially continuous creditable* civilian service). (Tenure Group III employees are classified as "Other.")

#### **Education Levels**

In 1974, the educational levels attained by all full-time, permanent employees were recorded in their CPDF files. Since that time, federal agencies have been required to report educational level at accession of new employees. Agencies also may, on a voluntary basis, update employee CPDF files to record changes in their educational levels after accession. Thus, data in this report may understate both educational levels and the number of employees with relevant academic majors.

#### **Grade Levels**

According to OPM, the General Schedule and Related Grade Framework was developed as an analytical tool used to fit federal employees into the General Schedule grade matrix and provide an approximation of GS grade for gross statistical analysis. However, this framework is transitioning with the advent of pay systems such as those in the Department of Commerce, Department of Homeland Security and the Department of Defense. OPM's Workforce Planning and Information Group will work toward developing a more meaningful approach and conversion algorithms that accurately capture the acquisition workforce by grade structure.

The Annual Report on the Federal Acquisition Workforce includes a number of tables that display various demographics by grade. With the advent of special pay plans, the original algorithms developed to provide those data have produced some inconsistent results, and FAI is refining the algorithms for improvement.

#### **Average Grade**

Average grade computations exclude employees in the Senior Executive Service and others whose grades are not identified at a specific GS level, such as those in payband positions.

#### Core Based Statistical Area

Past reports included tables for several of the series showing the location of those in the series by Metropolitan Statistical Area (MSA). Beginning with the report for FY 2005, the relevant tables are based on Core Based Statistical Areas (CBSA), reflecting a change to the CPDF by the Office of Personnel Management. As a result, a far larger number of locations are used to locate individuals geographically. To keep data at a manageable level, CBSA tables in the report show only locations where 15 or more personnel are located.

TABLE 7-S-1 HISTORY OF THE ACQUISITION WORKFORCE FY 1988 - FY 2007

| Fiscal Year:                               | 1988   | 1991   | 1992   | 1996     | 1997      | 1998     | 1999     | 2000    | 2001   | 2002   | 2003   | 2004   | 2005   | 2006   | 2007   |

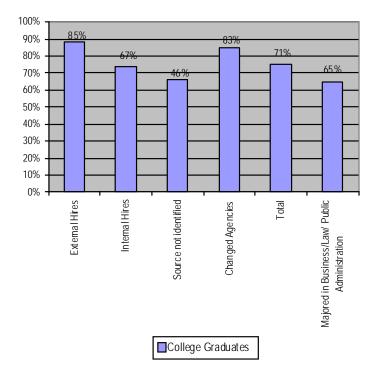

#### FIGURE 7-02-1 RECRUITMENT PATTERN FOR CONTRACTING SERIES (GS-1102) POSITIONS

During FY 2007, a total of 2,737 individuals joined the Contract Specialist (GS-1102) series and an additional 1,123 changed from one agency to another. Of those individuals new to the series, 1,509 (55%) were recruited from outside the government. Another 1,115 (41%) came from various series within the government. The hiring source was not indicated for the remaining 113 (4%) hires.

#### FIGURE 7-02-2 PERCENTAGE OF COLLEGE GRADUATES IN THE CONTRACTING SERIES (GS-1102)

In FY 2007, 88% of the external hires were college graduates, compared with 74% of the internal hires, 66% of the hires where the source was not indicated, 85% of those who changed agencies and 75% of the total Contracting Series. About 65% of all college graduates in the Contracting Series majored in business, law, or public administration.

<sup>&</sup>lt;sup>1</sup>For agencies, attrition include employees who changed agencies. Hence, the attrition rate for an individual agency includes employees who left that agency to work in some other agency. However, the attrition rate for the GS-1102 series as a whole excludes employees who changed agencies and is based only on the number who left the series.

# RECOMMENDATIONS OF THE ACQUISITION ADVISORY PANEL WITH RESPECT TO THE FEDERAL ACQUISITION WORKFORCE (CHAPTER V)

| Recommendation 1-1: Data Collection |
|-------------------------------------|
| and Workforce Definition            |

- OFPP needs to ensure, going forward, that consistent and sensible definitions of the acquisition workforce are in place, and that accurate data are consistently collected about all of the relevant categories, from year to year and across all agencies.
- Data should be collected both about the narrow contracting specialties (along the lines of the current FAI count) and about the broader acquisition-related workforce (along the lines of the current DOD AT&L workforce count methodology).

### Recommendation 1-2: Data Collection and Workforce Definition

- OFPP should prescribe a consistent definition and a method for measuring the acquisition workforce of both civilian and military agencies.
- Definitions and measures should be completed by OFPP within one year from the date of this Report.

### Recommendation 1-3: Acquisition Workforce Database

- Consistent with Recommendations 1-1 and 1-2, OFPP should be responsible for the creation, implementation, and maintenance of a mandatory single governmentwide database for members of the acquisition workforce. The database should reflect the following purpose and elements:
  - Purpose: to provide information to support effective human capital management of the acquisition workforce.
  - Elements should include: employment experience, education, training, certifications, grade, pay, career series, and retirement eligibility.

## Recommendation 2-1: Human Capital Planning for the Acquisition Workforce

 In each agency, as part of the overall agency human capital management plan, the CAO should be responsible for creating and implementing a distinct acquisition workforce human capital strategic plan designed to assess and meet the agency's needs for acquisition workforce.

## Recommendation 2-2: Human Capital Planning for the Acquisition Workforce

 Agency CAOs should be responsible for measuring and predicting, to the extent possible, the agency's needs for procurement personnel.

## Recommendation 2-3: Human Capital Planning for the Acquisition Workforce

- It is not sufficient simply to try to retain and manage existing personnel resources.
- Resources needed must be identified and gaps between needed resources and available resources must be forthrightly acknowledged.

# Recommendation 2-4: Human Capital Planning for the Acquisition Workforce

- Assessment of the role played by contractor personnel in the acquisition workforce should be part of the strategic plan.
- The strategic plan should consider whether the current use of contractor personnel to supplement the acquisition workforce is efficient or not.

### Recommendation 2-5: Qualitative Assessment

 Agencies' human capital planning for the acquisition workforce needs to address the adequacy of existing resources in meeting each agency's procurement needs throughout the acquisition life cycle. The standard should be whether the government is able to optimize the contribution of private-sector capabilities, secured through the market, to the accomplishment of federal agency missions.

#### Recommendation 3: Workforce Improvements Need Prompt Attention

- Due to the severe lack of capacity in the acquisition workforce, aggressive action to improve the acquisition workforce must begin immediately.
- All agencies should begin acquisition workforce human capital planning immediately, if such plans are not already underway.
- Agencies should complete initial assessment and planning as quickly as possible.
- If initial human capital planning reveals gaps, agencies should take immediate steps to address such gaps, whether they arise in hiring, allocation of resources, training, or otherwise.

# Recommendation 3-1: Need to Recruit Talented Entry-Level Personnel

 OFPP should establish a governmentwide acquisition internship program to attract first-rate entry-level personnel into acquisition careers.

# Recommendation 3-2: Hiring Streamlining Necessary

 In order to compete effectively for desirable personnel, OFPP and agencies need to identify and eliminate obstacles to speedy hiring of acquisition workforce personnel.

### Recommendation 3-3: Need to Retain Senior Workforce

 OFPP and agencies need to create and use incentives for qualified senior, experienced acquisition workforce personnel to remain in the acquisition workforce.

Page 76 www.FAl.gov

#### Recommendation 3-4: Training

- In order to ensure the availability of sufficient funds to provide training to the acquisition workforce, OMB should issue guidance directing agencies to:
  - Assure that funds in agency budgets identified for acquisition workforce training are actually expended for workforce training purposes, by appropriate means including "fencing" of those funds.
  - Require head of agency approval for use of workforce training funds for any other purpose.
  - Provide OFPP an annual report on the expenditure of acquisition workforce training funds identifying any excesses or shortfalls.
- OFPP should conduct an annual review to determine whether the funds identified by each agency for training of its acquisition workforce are sufficient to meet the agency's needs for acquisition workforce training.
- Once an agency's human capital strategic plan for the acquisition workforce is in place, that plan should guide this determination.
- OFPP's review should also ascertain whether funds identified for such training were actually expended for acquisition workforce training needs.
- Congress should reauthorize the SARA Training Fund and provide direct funding/ appropriations for the fund.

# Recommendation 3-5: Acquisition Workforce Education and Training Requirements

- Currently, both the Defense Acquisition
  Workforce Improvement Act (DAWIA) and
  Clinger-Cohen provide for waivers to
  Congressionally established education and
  training requirements. In order to ensure
  that the government's acquisition
  workforce has both the competencies and
  skills to manage the life cycle of the
  acquisition process:
  - Agencies should only grant permanent waivers to education and training requirements upon an objective demonstration that the grantee of the waiver possesses the competencies and skills necessary to perform his/her duties.
  - Agencies should only grant temporary waivers to allow the grantee of the waiver sufficient time to acquire the lacking education or training.
  - Agency CAOs (or equivalent) should report annually to OFPP on the agency's usage of waivers to meet statutory training and education requirements, justifying their usage consistent with the foregoing requirements and reporting on plans to overcome the need to rely excessively on waivers.
- OFPP should review these annual reports and provide an annual summary report on the use of waivers of DAWIA and Clinger-Cohen requirements.

### Recommendation 3-6: Acquisition Workforce University

 In order to promote consistent quality, efficiency, and effectiveness in the use of government training funds, OFPP should convene a twelve-month study panel to consider whether to establish a governmentwide Federal Acquisition University and/or alternative recommendations to improve training.

### Recommendation 4: An Acquisition Workforce Focus is Needed in OFPP

- There should be established in OFPP a senior executive with responsibility for acquisition workforce policy throughout the federal government.
- As part of OMB's role in reviewing and approving agency human capital plans in conjunction with OPM, OFPP should be delegated responsibility for receiving and reviewing the agency acquisition workforce human capital strategic plans, and for identifying trends, good practices and shortcomings.

### Recommendation 5: Waiving Unnecessary Paperwork

 To the extent that agencies can demonstrate they have implemented any recommendations (or parts thereof) that require a report to OFPP, the process established by OFPP should include criteria for a waiver from the reporting requirements; any waiver should include a requirement for a sunset.
