

EDIS - Who Should Register?

Registration is not required to use this system for research. Public documents may be viewed by both registered and non-registered users.

A person who represents a party to an investigation before the Commission must become a Registered User before filing a document electronically. The USITC encourages any person who is not yet but anticipates becoming a party representative to become a registered user.

Users that submit documents regularly may find it more convenient to become a registered user if they want to submit documents electronically using a simplified method offered only to registered users.

In the future, access to confidential documents through EDIS will be available only to registered users. The Office of the Secretary to the Commission will control such access by assigning specific user permissions, per investigation.
