Comments: In write in protest to continued animal testing. It is my understanding that the Interagency Coordinating Committee for the Validation of Alternative Methods (ICCVAM) has approved only one non-animal test method originating in the U.S., when ICCVAM's European counter, ECVAM, has approved dozens. Animals continue to needlessly die and human health suffers as animal tests continue to lead to less accurate and less sensitive information regarding human health.

The Physicians Committee for Responsible Medicine, <http://www.pcrm.org>, provides a wealth of alternatives to animal testing. I support ICCVAM's immediate acceptance of internationally validated non-animal tests.

Thank you.

Merrilee Cichy
