FOR IMMEDIATE RELEASE

PACIFIC COAST GROUNDFISH FISHERY

Changes to Areas Closed to Commercial and Recreational Fisheries Changes to Limited Entry Trawl DTS Trip Limits

Effective November 21, 2003

The National Marine Fisheries Service (NMFS) announces changes to the commercial trawl and non-trawl rockfish conservation areas, changes to the areas closed to recreational fishing, and changes to the limited entry trawl DTS trip limits effective November 21, 2003. These changes will be effective for both the trawl "A" and "B" platoons at this time.

At the November Pacific Fishery Management Council (Pacific Council) meeting in Del Mar, California, the Groundfish Management Team (GMT) reviewed updated catch estimates from the commercial and recreational groundfish fisheries. The GMT noted that the recreational fisheries off California had significantly higher than expected participation in July and August 2003. Based on early California recreational fisheries catch estimates from the Recreational Fisheries Information Network, the GMT determined that the lingcod Acceptable Biological Catch (ABC) and canary rockfish Optimum Yield (OY) had likely been exceeded. Therefore, the Pacific Council made several inseason management recommendations to minimize further mortality of lingcod and canary rockfish, both overfished species, for the remainder of the fishing year.

Rockfish Conservation Area Boundaries

The Pacific Council recommended that the trawl rockfish conservation area (RCA) be expanded to extend between the shoreline and specific

latitude and longitude coordinates that approximate the 200 fathom depth contour (modified to allow fishing in petrale sole areas) coastwide. Expanding the trawl RCA will protect canary rockfish and lingcod by prohibiting trawling in nearshore areas and on the continental shelf.

The Pacific Council also recommended that the non-trawl RCA be similarly expanded to limit further mortality of canary rockfish and lingcod. Therefore, for the remainder of the fishing year, the non-trawl RCA will be as follows:

- & Between the U.S. border with Canada and 46°16.00' N. lat., the non-trawl RCA will extend between the shoreline and specific latitude and longitude coordinates approximating the 200 fathom depth contour (modified to in petrale sole areas).
- & Between 46°16.00' N. lat. and the U.S. border with Mexico, the non-trawl RCA will extend between the shoreline and specific latitude and longitude coordinates approximating the 150 fathom depth contour.

In the last inseason adjustment to Pacific Coast annual specifications and management measures for October - December (68 FR 60865, October 24, 2003), NMFS announced a western trawl RCA boundary with specific latitude and

longitude coordinates approximating the 200 fathom depth contour which was modified to allow for petrale sole fishing. That boundary contained several errors; specifically, it omitted boundary modifications to allow for fishing in the petrale sole areas off the states of Oregon and California. Therefore, the 200 fathom trawl RCA boundary is corrected by modifying it to allow for petrale fishing in areas where petrale sole aggregate.

The corrected 200 fathom and the 150 fathom RCA boundaries appear at the end of this public notice.

Recreational Fisheries

To further protect canary rockfish and lingcod, the Pacific Council recommended inseason adjustments to recreational groundfish fisheries coastwide.

Washington

For the remainder of the fishing year, recreational groundfish fisheries off the state of Washington will be prohibited seaward of the Federal/State three mile boundary. The state of Washington has already taken independent action to prohibit the retention of canary rockfish shoreward of the three mile boundary. Because inclement weather curtails recreational groundfish fisheries off Washington during winter months, the additional mortality of either canary rockfish or lingcod associated with this fishery occurring in State waters is predicted to be near zero. Recreational fishing for lingcod off Washington closed on October 16, 2003.

Oregon

Off the state of Oregon, recreational groundfish fisheries for the remainder of the fishing year will be prohibited seaward of specific latitude and longitude coordinates approximating the 27 fathom depth contour. Retention of canary and lingcod will be prohibited shoreward of the 27 fathom depth contour. Similarly to Washington, effort in Oregon's recreational groundfish fisheries during November and December is low. Because of this low effort, Oregon Department of Fish and Wildlife has predicted

that the additional mortality associated with this fishery would be approximately 0.11 mt of canary rockfish and 0.09 mt of lingcod.

California

Off the state of California, all recreational groundfish fisheries, with the exception of the fixed gear sanddab fishery, will be prohibited for the remainder of the fishing year. Because of the small hooks used in this recreational sanddab fishery, California Department of Fish and Game has predicted that the additional mortality of canary rockfish, lingcod, and California nearshore rockfish species would be near zero.

Limited Entry Trawl Trip Limits

Throughout 2003, differential trip limits, or trip limits that vary with gear type, have been in place for DTS (Dover sole, thornyheads, sablefish) species in the area between the U.S./Canada border and 40°10' N. lat. The intent of the differential trip limits was to encourage fishing seaward of the trawl RCA using large footrope rather than shoreward of the trawl RCA using small footrope. However, because the eastern trawl RCA boundary is being extended to the shoreline for the remainder of there year, there will be no trawling opportunity shoreward of the trawl RCA and no need for differential trip limits.

Therefore, the previously scheduled DTS trip limits of **7,000 lb per 2 months** of sablefish; **4,500 lb per 2 months** of longspine thornyhead; **900 lb per 2 months** of shortspine thornyhead; and **30,000 lb per 2 months** of Dover sole will be available to vessels using all limited entry trawl gear types.

Small footrope or midwater trawl gear is required shoreward of the RCA; all trawl gear (large footrope, midwater trawl, and small footrope gear) is permitted seaward of the RCA.			
A vessel may have more than one type of limited entry bottom trawl gear on board, but the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear. A vessel may not have limited entry bottom trawl gear on board if that vessel also has trawl gear on board that is permitted for use within a RCA, including limited entry midwater trawl gear, regardless of whether the vessel is intending to fish within a RCA on that fishing trip. See IV.A.(14)(iv) for details.

20 PRAWN EXEMPTED TRAWL (not subject to RCAs)

Groundfish 300 lb/trip. Limits and closures in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip.	
22 SALMON TROLL	
23	North
Salmon trollers may retain and land up to 1lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons and RCA restrictions listed in the table above.

Table 5 (South). Continued

28 PINK SHRIMP EXEMPTED TRAWL GEAR (not subject to RCAs)

<p>29 South</p>	<p>Effective April 1 - October 31, 2003: Groundfish 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.</p>	
30 PRAWN AND, SOUTH OF 38°57'30" N. LAT., CALIFORNIA HALIBUT AND SEA CUCUMBER EXEMPTED TRAWL		
<p>31 EXEMPTED TRAWL Rockfish Conservation Area^{7/} (RCA):</p>		
<p>32 40°10' - 38° N. lat.</p>	<p>60 fm - 200 fm</p>	<p>shoreline - 200 fm (line modified to incorporate petrale sole fishing grounds)</p>
<p>33 38° - 34°27' N. lat.</p>		
<p>34 South of 34°27' N. lat.</p>	<p>shoreline - 200 fm along the mainland coast; shoreline - 200 fm around islands</p>	<p>shoreline - 200 fm (line modified to incorporate petrale sole fishing grounds)</p>
<p>35</p>	<p>Groundfish 300 lb/trip. Trip limits in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57'30" N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 25).</p>	

1/ "South" means 40°10' N. lat. to the U.S.-Mexico border. 40°10' N. lat. is about 20 nm south of Cape Mendocino, CA.

2/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish and POP is included in the trip limits for minor slope rockfish.

3/ "Other flatfish" means all flatfish at 50 CFR 660.302 except those in this Table 5 with species specific management measures, including trip limits.

4/ The size limit for lingcod is 24 inches (61 cm) total length.

5/ Closed means that it is prohibited to take and retain, possess, or land the designated species in the time or area indicated. See IV. A.(7).

6/ Other fish are defined at 50 CFR 660.302, as those groundfish species or species groups for which there is no trip limit, size limit, quota, or harvest guideline.

7/ The "Rockfish Conservation Area" is a gear and/or sector specific closed area generally described by depth contours, but specifically defined by lat./long. coordinates set out at IV. A.(19)(e), that may vary seasonally.

8/ During July-August, between a line drawn due south from Point Fermin (33° 42' 30" N. lat.; 118° 17' 30" W. long.) and a line drawn due west from the Newport South Jetty (33° 35' 37" N. lat.; 117° 52' 50" W. long.,) vessels fishing for all federal groundfish species, except lingcod and all rockfish other than California scorpionfish, with hook&line and/or trap (or pot) gear may operate from shore to a seaward boundary line which approximates 50 fm.
