# Modifications to the Harmonized Tariff Schedule of the United States to Implement the United States-Chile Free Trade Agreement 

Pursuant to the letter of request from the United States Trade Representative of December 3, 2003, set forth in the Appendix hereto, and pursuant to section 1207(a) of the Omnibus Trade and Competitiveness Act of 1988, the Commission is publishing the following modifications to the Harmonized Tariff Schedule of the United States (HTS) to implement the United States-Chile Free Trade Agreement, as approved in the United States-Chile Free Trade Agreement Implementation Act.

The Honorable Deanna Tanner Okun
Chairman
U.S. International Trade Commission

DEC - 32003
500 E Street, SW
Washington, D.C. 20436
Dear Chairman Okun:
The U.S. International Trade Commission (ITC) has played an important role in supporting the negotiation of the United States-Singapore Free Trade Agreement and the United States-Chile Free Trade Agreement (FTAs). USTR appreciates the tremendous efforts the ITC made in connection with these Agreements.

President Bush will be proclaiming tariff cuts and other measures that are to enter into effect on January 1, 2004. Over the past few months, the ITC has been providing critical support to USTR in the preparation of the draft modifications to the Harmonized Tariff Schedule of the United States (HTSUS) that the President will proclaim. Although past practice has been to publish these changes in the Federal Register as an annex to a proclamation, we would prefer to use a different publication method for the proclamations implementing these FTAs.

Accordingly, we request that the ITC publish the documents that reflect the modifications to the HTSUS that the President will proclaim to implement the United States-Singapore FTA and the United States-Chile FTA. The President's proclamations will refer to the annexes that we are requesting the ITC to publish. We will supply the Commission with the texts for publication. We understand that the ITC has agreed to exercise its discretion under section 1207 (a) of the Omnibus Trade and Competitiveness Act of 1988 to make these publications available to the public and that the modifications to the HTSUS that the President proclaims will be posted to the ITC website. In addition, the Federal Depository Libraries will receive this information.

Please provide, as quickly as possible, a publication number for each document that can be referenced in the Presidential proclamation implementing the respective agreements. We would like to transmit the draft proclamations to the President for his consideration and approval as soon as possible.

The ITC's willingness to exercise its authority to use this cost effective means of informing the public of the changes to the HTSUS greatly assists our efforts to bring these agreements into effect.

Robert B. Zoellick

The Honorable Deanna Tanner Okun
Chairman
U.S. International Trade Commission

500 E Street, SW
Washington, D.C. 20436
Dear Chairman Okun:
Pursuant to Ambassador Zoellick's letter of December 3, 2003, we have enclosed the texts of the modifications to the Harmonized Tariff Schedules of the United States that the President will proclaim in connection with the entry into force of the United States-Singapore Free Trade Agreement and the United States-Chile Free Trade Agreement. We request that the U.S. International Trade Commission (ITC) publish these texts and transmit copies of the publications to the Office of the U.S. Trade Representative as quickly as possible.

We greatly appreciate the ITC's assistance on this matter. Please contact Catherine Field, of my staff, at 202-395-9621, if further information is required.

## (d) <br> Textile and apparel articles.

(i) Except as provided in subdivision (ii) below, a good provided for in chapters 50 through 63 of the tariff schedule that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision ( n ) of this note, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Chile or of the United States.
(ii) Notwithstanding the rules set forth in subdivision (n) of this note, textile and apparel goods classifiable as goods put up in sets for retail sale as provided under general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed 10 percent of the value of the set determined for purposes of assessing customs duties.
(e) De minimis.
(i) Except as provided in subdivision (ii) below, a good (other than a textile or apparel good described in subdivision (d) above) that does not undergo a change in tariff classification pursuant to subdivision ( n ) of this note shall nonetheless be considered to be an originating good if-
(A) the value of all nonoriginating materials that are used in the production of the good and do not undergo the applicable change in tariff classification does not exceed 10 percent of the adjusted value of the good;
(B) the value of such nonoriginating materials is included in calculating the value of nonoriginating materials for any applicable regional value-content requirement under this note; and
(C) the good meets all other applicable requirements of this note.
(ii) Subdivision (e)(i) does not apply to-
(A) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 or 2106.90 that is used in the production of a good provided for in chapter 4;

## Annex I (continued) <br> -5-

(B) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 that is used in the production of the following goods:
(1) infant preparations containing over 10 percent by weight of milk solids, the foregoing provided for in subheading 1901.10;
(2) mixes and doughs, containing over 25 percent by weight of butterfat, not put up for retail sale, the foregoing provided for in subheading 1901.20;

(i) For purposes of this note, originating goods or materials from the territory of either Chile or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
(ii) A good that is produced in the territory of Chile or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.

## Annex I (continued) <br> -6-

(g) Regional value content.
(i) Where a rule set forth in subdivision ( n ) of this note specifies a regional value content for a good, the regional value content of such good shall be calculated, at the choice of the person claiming the tariff treatment authorized by this note for such good, on the basis of the builddown method or the build-up method described below, unless otherwise specified in this note:
(A) For the build-down method, the regional value content may be calculated on the basis of the formula $\mathrm{RVC}=((\mathrm{AV}-\mathrm{VNM}) / \mathrm{AV}) \times 100$, where RVC is the regional value content, expressed as a percentage; $A V$ is the adjusted value; and VNM is the value of nonoriginating materials used by the producer in the production of the good; or
(B) For the build-up method, the regional value content may be calculated on the basis of the formula RVC $=(\underline{V O M} / A V) x 100$, where $R V C$ is the regional value content, expressed as a percentage; AV is the adjusted value; and VOM is the value of originating materials used by the producer in the production of the good.
(ii) Value of materials.
(A) For purposes of calculating the regional value content of a good under subdivision (i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
(1) in the case of a material imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory where the good is produced, except for a material to which subdivision (3) below applies, the producer's price actually paid or payable for the material;
(3) in the case of a material provided to the producer without charge, or at a price reflecting a discount or similar reduction, the sum of:
(I) all expenses incurred in the growth, production or manufacture of the material, including general expenses, and
(II) an amount for profit; or
(4) in the case of a material that is self-produced, the sum of-
(I) all expenses incurred in the production of the material, including general expenses, and
(II) an amount for profit.
(B) The value of materials may be adjusted as follows:
(1) for originating materials, the following expenses, if not included under subdivision (A) above, may be added to the value of the originating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and

## Annex I (continued) <br> -7-

(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
(2) for non-originating materials, if included under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; or
(IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Chile or of the United States.
(C) Any cost or value referred to in this note shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Chile or the United States). Such principles are the principles, rules and procedures, including both broad and specific guidelines, that define the accounting practices accepted in the territory of Chile or of the United States, as the case may be.
(h) Accessories, spare parts or tools.

Accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall be treated as a material used in the production of the good, if:
(i) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and
(ii) the quantities and value of the accessories, spare parts or tools are customary for the good.
(i) Fungible goods and materials.
(i) A person claiming the tariff treatment provided in this note for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management method. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Chile or the United States) or otherwise accepted by that country.

## Annex I (continued) <br> -8-

The term "fungible goods" or fungible materials" means goods or materials, as the case may be, that are interchangeable for commercial purposes and the properties of which are essentially identical.
(ii) A person selecting an inventory management method under subdivision (i) above for particular fungible goods or materials shall continue to use that method for those fungible goods or materials throughout the fiscal year of that person.
(j) Packaging materials and containers.
(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( $n$ ) of this note and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) Packing materials and containers for shipment shall be disregarded in determining whether-
(A) the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision ( n ) of this note; and
(B) the good satisfies a regional value-content requirement.
(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the goods;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
(I) Record-keeping requirements and verification.
(i) An importer of a good, for which treatment as an originating good of a UCFTA country is claimed under the provisions of this note, shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations, and shall be prepared to submit, upon request by the appropriate customs officer, a certificate of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.

## Annex I (continued) <br> -9-

(ii) Importers shall maintain for a period of five years after the date of importation of the good a certificate of origin or other information demonstrating that the good qualifies as originating, and all other documents that are required under applicable regulations relating to the importation of the good, in relating to the importation of the good, including records concerning:
(A) the purchase of, cost of, value of and payment for the good;
(B) where appropriate, the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
(C) where appropriate, the production of the good in the form in which the good is exported;
and shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
(iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Chile qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Chile may agree, as set forth in pertinent regulations.
(m) Interpretation of rules of origin.
(i) Unless otherwise specified, a rule in subdivision ( n ) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision ( $n$ ) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
(ii) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
(iii) A requirement of a change in tariff classification in subdivision ( n ) of this note applies only to nonoriginating materials.
(iv) A good shall not be considered to be originating solely by virtue of having undergone:
(A) simple combining or packaging operations, or
(B) mere dilution with water or another substance that does not materially alter the characteristics of the good
(v) For purposes of applying this note to goods of chapters 6 through 14, inclusive, of the tariff schedule, agricultural and horticultural goods grown in the territory of Chile or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a country other than Chile or the United States.
(v) For purposes of applying this note to goods of chapters 27 through 38, inclusive (except a good of heading 3823), of the tariff schedule, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
(A) dissolving in water or other solvents;
(B) the elimination of solvents including solvent water; or
