## MEMORANDUM ON PROPOSED TARIFF LEGISLATION of the 110<sup>th</sup> Congress <sup>1</sup>

[Date approved: July 1, 2008]<sup>2</sup>

Bill No. and sponsor: H.R. 5093 (Mr. Howard Coble of North Carolina).

**Proponent name**,<sup>3</sup> **location:** National Spinning Co., Inc., Washington, NC, and Glen Raven, Inc., Glen Raven, NC.

**Other bills on product (110<sup>th</sup> Congress only):** H.R. 2456, H.R. 4433, H.R. 4434, H.R. 4435, H.R. 4439, H.R. 4465, H.R. 4470, H.R. 4983, H.R. 4984, and H.R. 5190.

Nature of bill: Extension of temporary duty reduction through December 31, 2011.

Retroactive effect: None.

#### Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

Acrylic or modacrylic filament tow (provided for in subheading 5501.30.00).

**Check one:**  $\underline{X}$  Same as that in bill as introduced.

\_\_\_\_ Different from that in bill as introduced (see Technical comments section).

#### **Product information, including uses/applications and source(s) of imports:**

Filament tow is "a large strand of continuous manufactured fiber filaments . . . collected in a loose, ropelike form."<sup>4</sup> Acrylic tow is made from a polymer containing at least 85 percent by weight of acrylonitrile units. Modacrylic tow is made from a polymer containing more than 35 percent but less than 85 percent by weight of acrylonitrile units. The fiber filaments are produced by dry or wet spinning. In dry spinning, the material is dissolved in a solvent and extruded through a spinneret; the solvent is then evaporated, leaving long continuous filaments. In wet spinning, the solution is extruded through the spinneret into a liquid coagulating bath to form filaments. The filaments are grouped into tow, which is then stretched to break the filaments into fibers of varying lengths. Acrylic and modacrylic tow may be sold in a natural state (no color added), pigment-dyed (color added when the fiber is still in a molten form), or dyed (color added after the fibers are formed). Various other additives may be used during the production process, depending on the end-use characteristics desired. Acrylic and modacrylic filament tow are used to produce staple fibers typically used in goods such as craft yarn, apparel, pile fabrics, upholstery fabrics, and home furnishings. Such tow may also be used in non-textile applications.

U.S. imports of acrylic or modacrylic filament tow totaled \$74 million (23.1 million kilograms) in 2007, with dutiable imports of about \$60.9 million. Japan was the primary supplier of such fibers in 2007, followed by the United Kingdom, Portugal, and Turkey.

<sup>&</sup>lt;sup>1</sup> Industry analyst preparing report: Heidi Colby-Oizumi (202-205-3391); Tariff Affairs contact: Jan Summers (202-205-2605).

<sup>&</sup>lt;sup>2</sup> Access to an electronic copy of this memorandum is available at <u>http://usitc.gov/tata/hts/other/rel\_doc/bill\_reports/index.htm</u>.

<sup>&</sup>lt;sup>3</sup> The sponsor/proponent did not identify any additional beneficiaries of this bill.

<sup>&</sup>lt;sup>4</sup> Product definition from Hoechst Celanese, *Dictionary of Fiber & Textile Technology*, 1990, p. 165.

#### **Estimated effect on customs revenue:**

HTS subheading: <u>5501.30.00</u>										
$\searrow$	2009	2010	2011	2012	2013					
Col. 1-General rate of duty	7.5%	7.5%	7.5%	7.5%	7.5%					
Estimated value <i>dutiable</i> imports	\$17,891,200	\$17,436,880	\$17,027,992	\$16,659,993	\$16,328,794					
Customs revenue loss 1/	\$0	\$122,058	\$119,196	\$116,620	\$114,302					

1/ The general duty rate on all goods falling under subheading 5501.30.00 is reduced to 6.8% through the close of 2009 under heading 9902.10.21. Therefore, there will be no revenue loss related to this bill in 2009. The other data shown here reflect the continued reduction of the general rate from 7.5% to 6.8%, a reduction 0f 0.7 percentage points.

Source of estimated dutiable import data: Industry estimates.

#### **Technical comments:**<sup>5</sup>

In view of the large number of pending bills pertaining to this product class, we note the need for coordination to avoid undue confusion. If the intent of Congress is to suspend or reduce the duties on all products falling in the permanent tariff provision, the many bills on specialized subset groupings would not be needed and should not be enacted.

<sup>&</sup>lt;sup>5</sup> The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.

# 110TH CONGRESS 2D SESSION H.R. 5093

To extend the temporary suspension of duty on acrylic or modacrylic filament tow.

### IN THE HOUSE OF REPRESENTATIVES

JANUARY 22, 2008

Mr. COBLE introduced the following bill; which was referred to the Committee on Ways and Means

# A BILL

To extend the temporary suspension of duty on acrylic or modacrylic filament tow.

1 Be it enacted by the Senate and House of Representa-

2 tives of the United States of America in Congress assembled,

**3** SECTION 1. ACRYLIC OR MODACRYLIC FILAMENT TOW.

4 (a) IN GENERAL.—Heading 9902.10.21 of the Har5 monized Tariff Schedule of the United States (relating to
6 acrylic or modacrylic filament tow) is amended by striking
7 "12/31/2009" and inserting "12/31/2011".

8 (b) EFFECTIVE DATE.—The amendment made by9 subsection (a) applies to goods entered, or withdrawn from

- 1~ warehouse for consumption, on or after the 15th day after
- $2 \ \ {\rm the \ date \ of \ the \ enactment \ of \ this \ Act.}$
