#### **Product information, including uses/applications and source(s) of imports:**

This product is a plain shaft bearing mounted on an aluminum plate. The essential feature of the subject bearing is the anti-friction (i.e., plastic) tube in which the shaft turns. According to the proponent, these plain shaft bearings are imported primarily from China, Taiwan, and the European Union. Dutiable U.S. imports under HTS subheading 8483.30.80 (a broader category than is covered by this bill) totaled \$364 million in 2007, of which Japan accounted for \$97.2 million, Germany \$57.8 million, and China \$43.4 million in shipments. Taiwan ranked tenth among suppliers, at \$10.2 million in shipments.

#### **Technical comments:**<sup>4</sup>

The article description should be amended as shown on page 1, in order to be more consistent with other tariff provisions. Customs may have difficulty administering this provision because the physical dimensions of the part are very specific and thus may be burdensome; because not every product of the type named may have exactly the specified dimensions, some goods of interest to the proponent may be excluded.

<sup>&</sup>lt;sup>4</sup> The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
