CDFI Fund's CIIS Explanation of Rationale for Collecting Data

The CDFI Fund collects data from CDFIs and CDEs for several reasons summarized below. On the following pages, one or more of these reasons is assigned to each CIIS question or data point.

I. Performance and Results

As a federal agency, the Fund is accountable to the Administration, Congress and the public for the use of public funds. "Performance and Results" data points will be used to demonstrate the Fund's achievement of its mission and strategic goal:

Mission: To expand the capacity of financial institutions to provide, credit, capital and financial services to underserved populations and communities in the United States.

Strategic Goal: To improve the economic conditions of underserved communities by providing an array of financing and financial services through a nationwide network of sustainable CDFIs and CDEs.

Five types of performance and results are captured in CIIS: institutional sustainability, appropriateness of products and services offered, target markets served, leverage of private sector resources, and community development impacts.

Sustainability - Financial health is critical to sustainability. These data points may be used to measure the ffinancial health of institutions. Specifically, this data can be used to measure portfolio quality, deployment of loan/investment capital, funding source diversity, andkey financial ratios.

Targeted Products and Services - CDFIs and CDEs work in market niches that have not been adequately served by traditional financial institutions. These organizations provide a wide range of financial products and services needed by low-income households and local businesses. These data points may be used to analyze how appropriate CDFI and CDE products and services are for their respective target markets. For each product or service provided, data includes interest rates, fees, terms and other conditions of loans and investments, and types and amounts of technical assistance provided.

Target Markets - Many of the Fund's target markets are determined by geography. As a result, the Fund's accountability, mission, and impact are largely dependent on geographic analysis. Other target markets are population-based. These data points (including address and borrower characteristics) allow the Fund to measure the extent to which CDFIs and CDEs are serving eligible target markets.

Leverage - The Fund provides relatively small infusions of capital to institutions that serve targeted communities and populations. The Fund's activities leverage private-sector investments from banks,

¹ "Underserved communities" include: communities that qualify as Target Markets under the CDFI Program (which include a specific geography called an Investment Area, or a specific community of people with demonstrated lack of access to credit, equity or financial services called a Targeted Population) as well as Hot Zones, the most economically distressed subset of Investment Areas; Low-Income Communities under the NMTC Program; and Distressed Communities under the BEA Program. Many Native American Communities also qualify as underserved communities. "Native American Communities" are defined as any Native American, Alaska Native or Native Hawaiian populations, lands or Census-equivalent entities, with the exception of State or Tribal Designated Statistical Areas.

foundations, and other funding sources. These data points may be used to measure private-sector leverage and the strength of public subsidy.

Improve Economic Conditions - The Fund measures improvements in economic conditions through a number of outcomes: jobs created/retained; new homeowners; housing units developed/rehabilitated; commercial space developed/rehabilitated; etc. These data points identify the type and quantity of outcomes associated with each loan or investment a CDFI or CDE makes.

II. Compliance

Data will be used to measure CDFIs' and CDEs' compliance with the terms and conditions of their Assistance Agreements and Allocation Agreements, respectively.

III. Peer Analysis

This data can be used to benchmark the performance of CDFIs and CDEs against organizations with similar characteristics (including size, type of financing, age, etc.).

IV. Capital Markets

The statutory purpose of the Fund is to promote economic revitalization and community development through investment in and assistance to community development financial institutions, including enhancing the liquidity of community development financial institutions. These data points may help enhance CDFIs' and CDEs' liquidity by providing capital market investors with the data they need to analyze portfolio performance. Such analysis may not only increase these investors' interest in CDFI and CDE portfolios, it may also lead to better terms for CDFIs and CDEs because investors will have the information they need to price these portfolios accurately.

V. Logistics

Identifiers – These data points are for identification and tracking purposes, and to link topublicly available data that may reduce the reporting burden on regulated financial institutions.

Data Submission Process - The Fund is interested in making the submission of data as easy as possible. As a result, the Fund is working with the vendors that provide software systems to CDFIs and CDEs.

Data Cleansing – The Fund will use contact information to follow up with respondents during the "data cleansing" process.

	VIII IPS Compliance Questions										
	VIII. IRS Compliance Questions			X							
1	For each QEI received during the fiscal year have you notified the investor that their investment qualifies for the New Markets Tax Credit?										
2	At any time during the fiscal year did the total dollar amount of QEIs received exceed the amount of the NMTC allocation awarded by the CDFI Fund?										
	a If yes, what was the amount of QEIs received that exceeded the amount authorized in the Allocation Agreement?										

	ODL IIIStitution Level	тере:					
		Performance & Results	Accountability	Compliance	Peer Analysis	Capital Markets	Logistics
3	During the fiscal year did a recapture event, as described in 26 CFR 1.45D-1T(e)(2) occur?						
	a. If yes, complete the following chart for each QEI subject to recapture.						
4	For QLICIs made during the fiscal year, was each QLICI made within 12 months of originally receiving the QEI?						
	a. If no, what was the aggregate dollar amount of QLICIs not made within the required timeframe?						
	b. If Not Applicable, include explantion in Question 11 Narrative Box.						
5	Did you receive any principal repayments on a QLICI (equity or debt), for which these amounts were not reinvested within the time frame required by IRS regulations?						
	a. If yes, what was the aggregate dollar amount of QLICI repayments not reinvested within the required timeframe?						
6	For any QLICIs that you made during the fiscal year to QALICBs, did the businesses qualifiy as QALICBs (per 26 CFR 1.45D-1T(d)(4)) at the tie of the initial investment?						
	a. If No, please describe below.						
7	If you invested in or lent to other CDEs, did you ensure that these entities:						
	a. Were in fact certified as CDEs by the CDFI Fund?						
	b. Invested the funds received into eligible QALICBs?						
8	If you purchased loans from other CDEs, did those loans meet the loan purchasing criteria (per 26CFR 1.45D-1T(d)(1)(ii))?						
9	Did you establish reserves in accordance with 26 CFR 1.45D-1T(d)(3)?						
	a. If yes, what was the aggregate amount of reserves established?						
10	Did you use the direct tracing or safe harbor method for determining substantially all?						
11	Please use the narrative box below to provide any further information regarding you responses to						
	Questions 1-10 of this IRS compliance survey:					1
