

LEVEL OF UNDERSTANDING

RECORDING THE PATIENT'S RESPONSE TO EDUCATION

The following "Levels of Understanding" can be used in the PCC system:

- Good (G): Verbalizes understanding
Able to return demonstration or teach-back correctly
- Fair (F): Verbalizes need for more education
Incomplete return demonstration or teach-back indicates partial understanding
- Poor (P): Does not verbalize understanding
Unable to return demonstration or teach-back
- Refuse (R): Refuses education
- Group (GP): Education provided in group. Unable to evaluate

SETTING BEHAVIOR GOALS

OBJECTIVE	DEFINITION	MNEMONIC
Goal Set	This is the preparation phase defined as "patient ready to change" (patient is active)	GS
Goal Not Set	This is the pre-contemplation phase defined as "patient is not thinking about change"	GNS
Goal Met	This is the action phase defined as "patient activity making the change" or maintenance phase defined as "patient is sustaining the behavior change"	GM
Goal Not Met	This is the contemplation phase defined as "patient is unsure about the change' or relapse when the patient started making the change and did not succeed due to ambivalence or other factors.	GNM

To view the complete Patient Education Protocols and Codes Manual, visit:

www.ihs.gov

Click on Nationwide Programs and Initiatives, look in the upper right-hand corner, and then click on link to the Patient Education Protocols and Code Manual. You can down-load this pamphlet from the link.

Patient & Family Education Codes (PEPC)

Codes Most Frequently Used by Behavioral Health Providers

13th Edition

January 2007

Documenting and Communication Patient & Family Education

After using the Patient Education Protocols and providing education, the education should be documented using the mnemonics (codes) found in this booklet. Correct documentation requires the completion of 6 elements:

1. Disease state, Illness or Condition
2. Education Topic Discussed
3. Level of Understanding
4. Time
5. Provider Initials
6. Behavior Goal: Goal Set, Goal Not Set, Goal Met, Goal Not Met

1. **AOD** = Alcohol and Other Drugs
2. **SM** = Stress Management
3. **G** = Good Understanding
4. **10 min.** = 10 Minutes
5. **XYZ** = Provider XYZ
6. **Goal Set** = Pt. to walk 30 min/day/5days/wk

Time

Providers should estimate the amount of Time spent providing the patient education and document that Time using whole numbers.

Clinical Reporting System (CRS)

Patient Education is tracked in RPMS via the Clinical Reporting System by 1) Disease state, illness or condition, 2) Education Topic discussed, 3) Level of Understanding, 4) Provider, 5) Time, and, 6) Behavior Goal.

Important Changes in the 13th Edition

The mnemonic CD for Chemical Dependency has been changed to AOD - Alcohol and Other Drugs. The change from the mnemonic CD to AOD was at the request of the Division of Behavioral Health. For the short-term, "CD" will remain a viable mnemonic but will eventually become obsolete in RPMS and totally replaced by AOD. We suggest you begin using the new AOD term now.

2007 Behavioral Health Codes

The codes listed on the next pages are the most commonly used by behavioral health providers. The complete list of behavioral health related codes can be found in the Patient Education Protocols and Codes located at www.ihs.gov under Nationwide Programs and Initiatives—look in the upper right-hand corner for the Patient Education Protocols and Code Manual. Questions regarding how to use and document education in the Behavioral Health GUI should be addressed to Denise Grenier, OIT Tucson.
