

this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent 2nd stage HPT rotating airseal cracking, which could result in an uncontained engine failure and damage to the aircraft, accomplish the following:

(a) At the next hot section shop visit after the effective date of this AD, and at each subsequent hot section shop visit, fluorescent penetrant inspect and eddy current inspect 2nd stage HPT rotating airseals for cracks, remove from service cracked airseals, and replace with serviceable parts, in accordance with Pratt & Whitney Alert Service Bulletins No. PW4ENG A72-628, Revision 1, dated February 17, 1998, and No. PW4G-100-A72-80, Revision 1, dated February 17, 1998.

(b) For the purpose of this AD, a hot section shop visit is defined as any time the HPT module is disassembled.

(c) Within 6 years after the effective date of this AD, modify 2nd stage ring segments and vane clusters, and install improved 2nd stage HPT rotating airseals in accordance with Pratt & Whitney Service Bulletins No. PW4ENG 72-636, dated May 16, 1997, No. PW4G-100-72-93, dated May 22, 1997, No. PW4ENG 72-637, dated May 16, 1997, and No. PW4G-100-72-94, dated May 22, 1997. Performance of these modifications and installation of the improved 2nd stage HPT rotating airseal constitutes terminating action to the inspection requirements of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. Operators shall submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on March 17, 1998.
