RECOMMANDATION DU CONSEIL DE COOPERATION DOUANIÈRE  
SUR L'UTILISATION D'UNITES DE QUANTITE NORMALISEES  
DESTINEES A FACILITER LE RECUEIL, LA COMPARAISON ET L'ANALYSE  
DES STATISTIQUES INTERNATIONALES  
ETABLIES COMPTE TENU DU SYSTEME HARMONISE  
(.. JUIN 2001)

LE CONSEIL DE COOPERATION DOUANIÈRE,

CONSIDERANT que l'un des objectifs visés expressément par le Système harmonisé est de faciliter la collecte, la comparaison et l'analyse des statistiques internationales,

VU que l'article 3 de la Convention sur le Système harmonisé fait obligation aux Parties contractantes d'élaborer leur tarif douanier et leur nomenclature statistique compte tenu du Système harmonisé,

CONSIDERANT que la normalisation et l'harmonisation des unités de quantité utilisées dans l'établissement des statistiques du commerce et des transports internationaux sont considérées par la Commission de statistique de l'ONU comme un moyen important d'améliorer la qualité de ces statistiques et d'en faciliter encore davantage le recueil, la comparaison et l'analyse,

CONSIDERANT que la normalisation et l'harmonisation des unités de quantité constituent également une mesure efficace pour normaliser et faciliter la transmission des données par voie télématique,

PRENANT ACTE des travaux entrepris par le Comité du système harmonisé dans ce domaine,

RECONNAISSANT que l'adoption par les administrations d'unités de quantité acceptées à l'échelon international aux fins de la transmission des données statistiques du commerce international ne les empêchera pas d'utiliser, par ailleurs, d'autres unités ou des unités convertibles directement en unités normalisées dans leurs nomenclatures statistiques nationales,

EU EGARD aux amendements du Système harmonisé acceptés par les Parties contractantes à la Convention sur le Système harmonisé conformément à l'article 16 de ladite Convention, qui entreront en vigueur le 1er janvier 2002,

TENANT COMPTE de la nécessité de révoquer la Recommandation du Conseil du 20 juin 1995 sur l'utilisation d'unités de quantité normalisées, amendée le 25 juin 1999, qui se réfère à la version de 1996 du Système harmonisé,

RECOMMENDATION OF THE CUSTOMS CO-OPERATION  
COUNCIL ON THE USE OF STANDARD UNITS OF QUANTITY  
TO FACILITATE THE COLLECTION, COMPARISON AND  
ANALYSIS OF INTERNATIONAL STATISTICS BASED ON  
THE HARMONIZED SYSTEM  
(.. JUNE 2001)

THE CUSTOMS CO-OPERATION COUNCIL,

CONSIDERING that one of the stated aims of the Harmonized System is to facilitate the collection, comparison and analysis of international statistics,

HAVING REGARD to the obligation under Article 3 of the Harmonized System Convention for Contracting Parties to establish their Customs tariff and statistical nomenclatures on the basis of the Harmonized System,

CONSIDERING that standardization and harmonization of units of quantity used in the compilation of statistical data relating to international trade and transport are regarded by the United Nations Statistical Commission as important means of improving the quality and further facilitating the collection, comparison and analysis of such data,

CONSIDERING that such standardization and harmonization of units of quantity also constitute effective measures for standardizing and facilitating the transmission of data by means of EDI,

NOTING the work carried out by the Harmonized System Committee in this field,

RECOGNIZING that the adoption of internationally agreed standard units of quantity by administrations for the purpose of reporting international trade data will not prevent them from using, in addition, other units of quantity or from using units of quantity that are convertible directly to the standard units, in their statistical nomenclatures,

HAVING REGARD to the amendments to the Harmonized System accepted by the Contracting Parties to the Harmonized System Convention in accordance with Article 16 of that Convention, which will enter into force on 1 January 2002,

TAKING ACCOUNT of the need to revoke the Council Recommendation of 20 June 1995 on the use of standard units of quantity, as amended on 25 June 1999, which refers to the 1996 version of the Harmonized System,

ABROGE la Recommandation du Conseil du 20 juin 1995 sur l'utilisation d'unités de quantités normalisées, amendée le 25 juin 1999,

RECOMMANDÉ que les administrations membres et les Parties contractantes à la Convention sur le Système harmonisé transmettent les données statistiques du commerce international aux Nations Unies et aux autres organisations internationales, en employant le plus grand nombre possible d'unités de quantité normalisées mentionnées dans l'annexe à la présente Recommandation, mais pas moins de 90 % des sous-positions du SH, et

INVITE les administrations membres et les Parties contractantes à la Convention sur le Système harmonisé à informer le Secrétaire général qu'elles acceptent cette Recommandation en indiquant la date à laquelle elle sera mise en œuvre et, en cas d'acceptation partielle (c'est-à-dire si certaines unités normalisées ne sont pas acceptées), à préciser quelles unités normalisées n'ont pas été acceptées et par quelles unités elles sont remplacées

\* \* \*

REVOKESthe Council Recommendation of 20 June 1995 on the use of standard units of quantity, as amended on 25 June 1999,

RECOMMENDSthat Member administrations and Contracting Parties to the Harmonized System Convention report international trade data to the United Nations and other international organizations, in terms of the standard units of quantity specified in the Annex to this Recommendation, employing as many as possible, but not less than 90 percent of the HS subheadings, and

REQUESTSMember administrations and Contracting Parties to the Harmonized System Convention to notify the Secretary General of their acceptance of this Recommendation and of the date of its application and, in the case of partial acceptance (i.e., some standard units being not accepted), to specify which standard units have not been accepted and to indicate what units are used instead.

Nouvelle rédaction :

Page 346. Partie G).

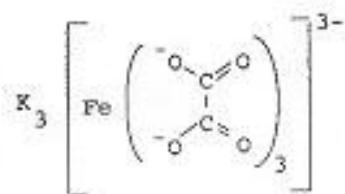

Insérer le nouveau point 3) ci-après :

"3) **Composés de coordination.**

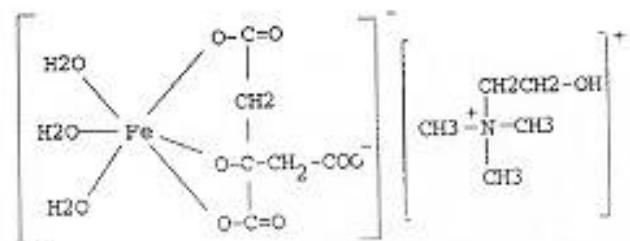

Les composés de coordination des métaux comprennent généralement toutes les espèces, chargées ou non, dans lesquelles un métal est lié à plusieurs atomes (généralement 2 à 9 atomes) mis à disposition par un ou plusieurs ligands. La géométrie du squelette formé par le métal et les atomes qui y sont liés ainsi que le nombre de liaisons métalliques sont généralement caractéristiques pour un métal donné.

Les composés de coordination, autres que les produits relevant du Sous-Chapitre XI ou du n° 29.41, doivent être considérés comme "fragmentés" par clivage de toutes les liaisons métalliques, à l'exception des liaisons métal-carbone, et classés selon le fragment relevant du Chapitre 29, dans la position placée la dernière par ordre de numérotation. On en trouvera ci-après quelques exemples :

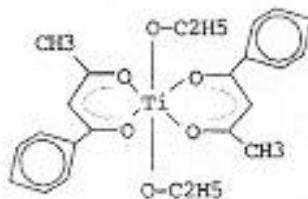

Le trioxalatoferrate (III) de potassium est à classer dans la position dont relève l'acide oxalique (n° 2917.11), correspondant au fragment obtenu après clivage des liaisons métalliques.

Le ferrocholinate (DCI) est à classer dans la position dont relève la choline (n° 2923.10), qui est classée dans une position supérieure à celle de l'acide citrique correspondant à l'autre fragment entrant en ligne de compte pour le classement.

Budotitane (DCI) : après clivage des liaisons métalliques, on obtient 2 fragments, l'un correspondant à l'éthanol (Chapitre 22), l'autre à la benzoylacétone (et ses formes énoliques) classée dans le n° 2914.39. Le budotitane (DCI) doit donc être classé dans le n° 2914.39.

Le point 3) actuel devient le point 4).

ARTICLE 16 PROCEDURE

AMENDMENTS TO THE EXPLANATORY NOTES

[CHAPTER 29.

Page 342. New Note 5 (c) (3).

Insert the following new Note 5 (c) (3) :

"(3) Co-ordination compounds, other than products classifiable in Sub-Chapter XI or heading 29.41, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by "cleaving" of all metal bonds, other than metal-carbon bonds."

"(G) **Classification of esters, salt, co-ordination compounds and certain halides**  
(Chapter Note 5)".

Page 346. General. Part (G).

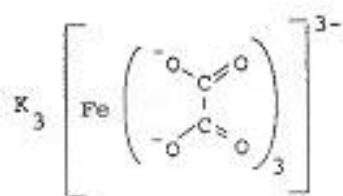

Insert the following new Item (3) :

"(3) **Co-ordination compounds.**

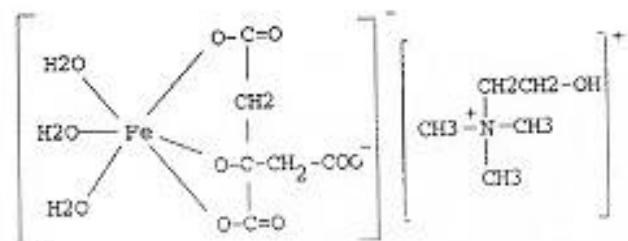

Metal co-ordination compounds generally include all the types, whether or not charged, in which a metal is bound to several atoms (generally 2 to 9 atoms) made available by one or more ligands. The skeletal geometry formed by the metal and the atoms which are bound to it as well as the number of metal links are generally characteristic for a given metal.

Co-ordination compounds, other than products classifiable in Sub-Chapter XI or in heading 29.41, should be considered as being fragmented by "cleaving" of all metal bonds, apart from metal-carbon bonds, and should be classified according to the fragment falling in Chapter 29, in the heading occurring last in numerical order. Examples are shown below :

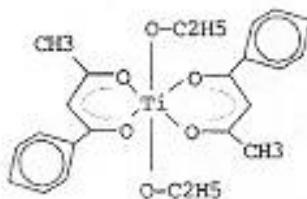

Potassium trioxalatoferrate (III) is classifiable in the heading in which the oxalic acid falls (subheading 2917.11), corresponding to the fragment obtained after cleaving of the metal bonds.

Ferrocholinate (INN) is classifiable in the heading covering choline (subheading 2923.10), which is classified in a higher heading than citric acid corresponding to the other fragment that can be taken into account for classification purposes.

Budotitane (INN) : After cleaving of the metal bonds, two fragments are obtained, one corresponding to ethanol (Chapter 22), the other to benzoylacetone (and its enol-function) classified in subheading 2914.39. Budotitane (INN) must therefore be classified in subheading 2914.39.

Renumber present Item (3) as (4).

CHAPITRE 20.

Page 156. N° 20.01. Deuxième paragraphe.

Nouvelle rédaction :

"Les préparations de la présente position se distinguent des sauces et condiments du **n° 21.03** en ce que ces derniers produits sont essentiellement des liquides, des émulsions ou des suspensions qui ne sont pas destinés à être consommés isolément, mais pour accompagner certains aliments ou préparer certains mets."

CHAPITRE 21.

Page 168. N° 21.03. Rubrique A). Deuxième paragraphe.

Nouvelle rédaction :

"Les sauces sont généralement ajoutées aux aliments pendant leur cuisson ou au moment de les servir. Les sauces donnent du goût, rendent le produit moelleux et permettent d'obtenir des contrastes s'agissant de la texture et de la couleur. Elles peuvent également servir de support aux aliments qu'elles contiennent, comme c'est le cas par exemple de la sauce veloutée du poulet à la crème. Les assaisonnements liquides (sauce au soja, sauce piquante ou sauce au poisson) peuvent aussi bien servir d'ingrédients dans la préparation d'un plat que de condiments à table.

Les produits de la présente position incluent certaines préparations à base de légumes ou de fruits qui sont essentiellement des liquides, des émulsions ou des suspensions et qui contiennent parfois des morceaux visibles de fruits ou de légumes. Ces préparations se distinguent des fruits et des légumes préparés ou en conserve du Chapitre 20, en ce qu'elles sont utilisées en tant que sauces, c'est-à-dire pour accompagner certains aliments ou préparer certains mets, et qu'elles ne sont pas destinées à être consommées isolément."

CHAPTER 20.

Page 156. Heading 20.01. Second paragraph.

Delete and substitute :

“The goods covered by this heading differ from sauces of **heading 21.03** in that the latter are mainly liquids, emulsions or suspensions, which are not intended to be eaten by themselves but are used as an accompaniment to food or in the preparation of certain food dishes.”

CHAPTER 21.

Page 168. Heading 21.03. Item (A). Second paragraph.

Delete and substitute :

“Sauces are normally added to a food as it cooks or as it is served. Sauces provide flavour, moisture, and a contrast in texture and colour. They may also serve as a medium in which food is contained, for example, the velouté sauce of creamed chicken. Seasoning liquids (soy sauce, hot pepper sauce, fish sauce) are used both as ingredients in cooking and at table as condiments.

The heading also includes certain preparations, based on vegetables or fruit, which are mainly liquids, emulsions or suspensions, and sometimes contain visible pieces of vegetables or fruit. These preparations differ from prepared or preserved vegetables and fruit of Chapter 20 in that they are used as sauces, i.e., as an accompaniment to food or in the preparation of certain food dishes, but are not intended to be eaten by themselves.”

Celle-ci peut être avancée et équipée d'un petit tableau de bord comportant un interrupteur pour le démarrage, des boutons correspondant à quatre vitesses et des leviers pour accélérer, freiner et effectuer une marche arrière. Le démarrage de ces véhicules s'effectue au moyen d'une clé et, après sélection de la vitesse voulue, le véhicule accélère par pression sur le levier de vitesse et ralentit automatiquement lorsqu'on relâche ce levier. Il effectue une marche arrière par pression sur le levier de vitesse opposé. Il peut être muni d'un certain nombre de commandes à main pour les personnes n'ayant qu'une seule main ou souffrant d'arthrite, ou bien pour les droitiers/gauchers, ou encore être adapté aux besoins du conducteur. Ces véhicules peuvent circuler sur des chemins piétonniers et dans des lieux publics pour effectuer des achats, aller à la pêche, se déplacer sur un parcours de golf, etc.

Le modèle à trois roues a une largeur de 650 mm, une longueur de 1170 mm, et un poids total (sans batteries) de 44 kg; sa charge utile maximale est de 100 kg et il est équipé d'un moteur électrique d'une puissance de 150 W. Les deux modèles à quatre roues ont une largeur de 650 mm, une longueur de 1260 mm ou de 1290 mm et un poids total (sans batteries) de 54 ou de 60 kg, respectivement; leur charge utile maximale est de 127 kg et ils possèdent deux moteurs électriques (d'une puissance de 150 W chacun).

The steering column can be moved forward and is equipped with a small control panel with an ignition switch, four speed buttons and levers for accelerating, braking and reversing the vehicle. The motor is started with a key and, after selection of the desired speed, the vehicle is accelerated when the speed lever on the handgrip is squeezed and automatically braked when the lever is released. The vehicle is operated in reverse by squeezing the opposite speed lever. It can be equipped with a range of hand controls for one-handed or arthritic users, or with right/left handed options or other custom options for a driver. The vehicles can be used on footpaths and in public places to go shopping, fishing, to golf courses, etc.
