I. BACKGROUND

1. At its 23<sup>rd</sup> Session, the Harmonized System Committee examined the classification of a marine "loading arm" used to safely transfer dangerous liquids in loading or unloading operations, especially at ports and industrial plants.
2. The Committee, by 23 votes to 3, classified the "marine loading arm" in heading 84.28. The Committee then agreed to classify the product, more specifically, in subheading 8428.90 by application of GIR 1 and GIR 6. The Secretariat was requested to draft a Classification Opinion to reflect this decision. The Secretariat was also instructed to draft amendments to the Explanatory Notes to the effect that this heading was not limited to lifting and handling equipment for solid materials but also included such machinery for liquids, gases, etc.

II. SECRETARIAT COMMENTS

3. Acting on the Committee's instructions, the Secretariat has prepared and appended a draft Classification Opinion and Explanatory Note amendment.

File No. 2774

III. CONCLUSION

4. The Committee is invited to approve the appended amendments to the Compendium of Classification Opinions and Explanatory Notes, once they have been finalized by the presessional Working Party.
