

HARMONIZED SYSTEM
REVIEW SUB-COMMITTEE

NR0075E1

-
21st Session
-

O. Eng.

Brussels, 24 January 2000.

QUESTIONS DEALT WITH DURING THE 15th SESSION
OF THE SCIENTIFIC SUB-COMMITTEE

(Item II.A.2 on Agenda)

Reference documents :

NR0072E2 (RSC/20 – Report)
NR0074E1 (RSC/21)
NR0076E1 (RSC/21)
NS0014E2 (SSC/15 – Report)

1. In connection with certain pending questions to be dealt with during its 21st Session, the Review Sub-Committee is requested to consider the conclusions of the Scientific Sub-Committee (15th Session, January 2000) which are summarised in the following paragraphs with reference to the relevant paragraphs of Doc. NR0074E1.

Headings 12.05, 15.14 and 23.06 – Questions related to canola (see para. 12 of Doc. NR0074E1 and paras. 18 to 20 of Doc. NR0076E1 (Agenda Item II.A.3))

2. The Scientific Sub-Committee did not agree with the Japanese proposal to insert a reference to “erucic acid which constitutes esters with triglycerols” in the proposed amendment of the Explanatory Notes, since in oil analysis, free acids and acids in the form of glycerides were normally taken together for measurement purposes. However, it was agreed to insert the word “total” before “erucic acid” in the proposed Explanatory Note amendments to headings 12.05 and 15.14.
3. The texts approved are set out in Annex I to this document. **The Review Sub-Committee is requested to take these texts into account while re-examining the Article 16 amendments to the Explanatory Notes to headings 12.05 and 15.14 which were kept in square brackets at its 20th Session (see Annexes D/2/5 and D/3/2 to Doc. NR0072B2, respectively).**

Heading 29.15 – Question of alignment of Items (V) and (VI) of the Explanatory Note to this heading on the new wording of subheading 2915.60 (see para. 15 of Doc. NR0074E1)

4. When examining this question, the Scientific Sub-Committee took into consideration a paper from the Spanish Administration regarding the IUPAC Nomenclature of Organic Chemistry (1979 Edition). The Sub-Committee agreed to place the trivial names of the goods concerned first and systematic names in parentheses. It was also agreed to list all the isomeric 5-carbon acids under Item (VI), although no trivial name was proposed for 2-methylbutanoic acid.
5. The texts approved are set out in Annex II to this document. **The Review Sub-Committee is requested to take these texts into account while re-examining the Article 16 amendments to the Explanatory Note to heading 29.15 which were kept in square brackets at its 20th Session (see Annex D/6/6 to Doc. NR0072B2).**

List of narcotic drugs, etc. at the end of the Explanatory Notes to Chapter 29 – Question of the amendments to be made to the HS codes given for the products (see para. 18 of Doc. NR0074E1)

6. At its 20th Session, the Secretariat had informed the Review Sub-Committee that it would submit amendments to the HS codes for narcotic drugs, etc., which were listed in pages 447 to 462 of the Explanatory Notes, at its 21st Session (see paragraph 30 of Annex C to Doc. NR0072E2).
7. In this regard, the Scientific Sub-Committee agreed that for the purposes of Chapter 29, a binary compound, which results from the combination of a weak acid and a weak base, should be considered as a salt of the base and examined the proposed amendments on this basis. In this connection, it was agreed that the compounds of methylbromide, methylchloride and methyliodide could be considered as quaternary compounds and be classified as “other”, and not as salts. Phenobarbital prophylexedrine was considered as a salt of phenobarbital.
8. The amendments approved are set out in Annex III to this document. **The Review Sub-Committee is requested to approve these texts while re-examining the Article 16 amendments to the Explanatory Notes to Chapter 29.**

Chapter 39 – Question concerning polymer names (see para. 26 of Doc. NR0074E1)

9. At its 20th Session, the Review Sub-Committee had noted that the Secretariat would forward the questions related to polymer names to the Scientific Sub-Committee together with a paper submitted by Canada (see paragraph 38 of Annex C to Doc. NR0072E2).
10. In this connection, the Scientific Sub-Committee confirmed its previous decision (SSC/14) to bring polymer names into conformity with the chemical nomenclature of the IUPAC with respect to polymers whose unit or monomer was represented by a specific name, but not polymers represented by a general term.
11. Based on this principle, the proposed amendments with respect to “polyvinyl acetals”, “polyacrylic esters”, “polyformaldehyde”, and “polyvinyl ethers”, “polyvinyl esters”, “polyallyl esters” and “polyvinyl ketones” were not adopted. Consequently, corresponding

amendments vis-à-vis the French version adopted by the Sub-Committee at its 13th Session and by the HSC at its 21st Session (see Annex N/5 to Doc. 42.100) should be withdrawn.

12. The Sub-Committee accepted the proposed amendments with respect to “polyethylene glycol”, noting that the reference in the French version should be in the singular (i.e., “polyéthylène glycol”). It was agreed that the new text of subheading 3404.20, as amended in the context of the HS 2002 amendments, should be redrafted accordingly.
13. The Sub-Committee also agreed (i) to replace the expression “esters vinyliques” by “esters de vinyle” in the French version of the Explanatory Note to heading 39.05, on page 605, (ii) to refer to “poly(vinyl alcohol)” (in the singular) instead of “polyvinyl alcohols” and (iii) to retain a reference to “nylon” in the Explanatory Note to heading 85.15. At the suggestion of the Director, it finally agreed that the reference to “polyoxyethylene” in Item (2) of the first paragraph of the Explanatory Note to heading 39.07, on page 607, should be amended to read “poly(oxyethylene) (polyethylene glycol)” for the sake of consistency.
14. In the context of its study, the Scientific Sub-Committee also agreed that the expression “polyethylene glycol” in Classification Opinion 3907.20/1 should be replaced by “poly(oxyethylene) (polyethylene glycol)”.
15. The amendments approved are set out in Annex IV to this document. **The Review Sub-Committee is requested to take these texts into account while re-examining the Article 16 amendments to the Explanatory Notes to Chapters 29, 32, 34, 38, 39 and 85.**

Heading 39.20 – Question of the amendment of the Explanatory Notes concerning subheadings 3920.43 and 3920.49 (see para. 26 of Doc. NR0074E1)

16. At its 14th Session, the Scientific Sub-Committee had agreed to submit draft amendments to the Nomenclature and the Explanatory Notes to the Review Sub-Committee concerning new subheadings 3920.43 and 3920.49 and to re-examine the draft texts of a new Subheading Explanatory Note and appropriate test methods for distinguishing products of these subheadings based on the new criteria of plasticiser content at its next session.
17. In this respect, The Scientific Sub-Committee agreed that the term “should” in the second line of the first paragraph of the draft Subheading Explanatory Note had to be replaced with “must”. It was also agreed that secondary plasticisers could occasionally be used alone as plasticisers and epoxidised soybean oil was more commonly used as a secondary plasticiser than epoxidised linseed oil.
18. Subject to above, and to certain editorial modifications, the Sub-Committee approved the aforementioned draft texts. The texts approved are set out in Annex V to this document.
19. The Sub-Committee also agreed that the ASTM D 2124-70 method, as well as several other methods such as sequential Soxhlet extraction, difference in solubility, etc., could be used for testing the plasticiser content of the products of new subheadings 3920.43 and 3920.49. However, as none of these methods was standardised internationally, it was inappropriate to specify any one of them. Therefore, the choice should be left to administrations.

20. **The Review Sub-Committee is requested to approve the texts mentioned in paragraph 17 above while re-examining the Article 16 amendments to the Explanatory Note to heading 39.20.**
21. Once approved by the Review Sub-Committee, all the texts referred to in paragraphs 3, 5, 8, 15 and 18 above will be incorporated into the relevant parts of the Amendments to the Explanatory Notes Consequential Upon the Article 16 Recommendation of 25 June 1999.
22. The draft Classification Opinion amendment referred to in paragraph 14 above has already been included in the Annex to Doc. NR0090E1 (see Agenda Item B.3).

(SSC/21/Feb. 2000)

ANNEXE I

MODIFICATION DES NOTES EXPLICATIVES VISANT A PRECISER
LA SIGNIFICATION DE L'EXPRESSION "ACIDE ERUCIQUE"

(Point II.A.2 de l'ordre du jour)

ANNEX I

AMENDMENT OF THE EXPLANATORY NOTES TO CLARIFY
THE MEANING OF "ERUCIC ACID"

(Item II.A.2 on the Agenda)

PROCEDURE DE L'ARTICLE 16

MODIFICATION DES NOTES EXPLICATIVES

CHAPITRE 12.

Page 84. N° 12.05.

Nouvelle rédaction :

"12.05 - GRAINES DE NAVETTE OU DE COLZA, MEME CONCASSEES.

1205.10 - **Graines de navette ou de colza à faible teneur en acide érucique**

1205.90 - **Autres**

[Cette position comprend les graines de navette ou de colza traditionnelles (graines de plusieurs espèces de *Brassica*, notamment *B. napus* (navette) et *B. rapa* (ou *B. campestris*)), et les graines de navette ou de colza à faible teneur en acide érucique. Ces dernières fournissent une huile fixe dont la teneur totale en acide érucique est inférieure à 2 % en poids et un composant solide qui contient moins de 30 micromoles par gramme de glucosinolates.]"

CHAPITRE 15.

Page 118. N° 15.14.

2. Partie A). Deuxième alinéa. Deuxième phrase.

Nouvelle rédaction :

"[La présente position comprend également l'huile de navette et l'huile de colza à faible teneur en acide érucique. Ces huiles ont une teneur totale en acide érucique inférieure à 2 % en poids.]"

* * *

ARTICLE 16 PROCEDURE

AMENDMENT TO THE EXPLANATORY NOTES

CHAPTER 12.

Page 84. Heading 12.05.

Delete and substitute :

“12.05 - RAPE OR COLZA SEEDS, WHETHER OR NOT BROKEN.

1205.10 - **Low erucic acid rape or colza seeds**

1205.90 - **Other**

[This heading includes both the traditional rape or colza seeds (the seeds of several species of *Brassica*, particularly *B. napus* (rape) and *B. rapa* (or *B. campestris*)), and the low erucic acid rape or colza seeds. These low erucic acid rape or colza seeds yield a fixed oil which has a total erucic acid content of less than 2 % by weight and yield a solid component which contains less than 30 micromoles of glucosinolates per gram.]”

CHAPTER 15.

Page 118. Heading 15.14.

2. Part (A). Second paragraph. Second sentence.

Delete and substitute :

"[This heading also covers low erucic acid rape or colza oil. Low erucic acid rape or colza oil has a total erucic acid content of less than 2 % by weight.]”

Nouvelle rédaction

“V) **Acides butanoïques, leurs sels et leurs esters.**

- a) **L'acide butyrique (acide butanoïque)** est un liquide dense, d'une odeur rance et désagréable, incolore, huileux que l'on emploie notamment pour le déchaulage des peaux.
- b) **L'acide isobutyrique (acide 2-méthylpropanoïque).**

VI) **Acides pentanoïques, leurs sels et leurs esters.**

- a) **L'acide valérique (acide pentanoïque)** est un liquide huileux, incolore, transparent, d'odeur rance et désagréable.
- b) **L'acide isovalérique (acide 3-méthylbutanoïque).**
- c) **L'acide pivalique (acide 2,2-diméthylpropanoïque).**
- d) **L'acide 2-méthylbutanoïque.”**

Delete and substitute

“(V) **Butanoic acids and their salts and esters.**

- (a) **Butyric acid (butanoic acid)** is a dense, oily liquid with a disagreeable rancid odour; colourless. Used for delimiting hides.
- (b) **Isobutyric acid (2-methylpropanoic acid).**

(VI) **Pentanoic acids and their salts and esters.**

- (a) **Valeric acid (pentanoic acid)** is a colourless, transparent oily liquid with a disagreeable rancid odour.
- (b) **Isovaleric acid (3-methylbutanoic acid).**
- (c) **Pivalic acid (2,2 dimethylpropanoic acid).**
- (d) **2-Methylbutanoic acid.”**

ANNEXE IV

MODIFICATIONS DES NOTES EXPLICATIVES ET DU RECUEIL DES AVIS DE
CLASSEMENT CONCERNANT LES POLYMERES

(Voir Point II.A.2 de l'ordre du jour)

ANNEX IV

AMENDMENTS TO THE EXPLANATORY NOTES AND THE COMPENDIUM OF
CLASSIFICATION OPINIONS CONCERNING POLYMER NAMES

(See Item II.A.2 on the Agenda)

PROCEDURE DE L'ARTICLE 16

A. MODIFICATIONS DES NOTES EXPLICATIVES

CHAPITRE 34.

Page 525. N° 34.04. Quatrième paragraphe. Alinéa 4). Première ligne.

Remplacer “polyéthylène-glycols” par “poly(oxyéthylène) (polyéthylène glycol)”.

Page 526. N° 34.04. Exclusion h).

Remplacer “Les polyéthylène-glycols en mélanges” par “Poly(oxyéthylène) (polyéthylène glycol)”.

CHAPITRE 38.

Page 582. N° 38.24. Alinéa 10).

Nouvelle rédaction :

“10) **Poly(oxyéthylène) (polyéthylène glycol)** d'un poids moléculaire très faible, par exemple les mélanges de di-, tri-, et tétra(oxyéthylène) glycols.

Tous les autres types de poly(oxyéthylène) (polyéthylène glycol) relèvent du n° **39.07** ou, s'ils présentent le caractère de cires artificielles, du n° **34.04**.”

CHAPITRE 39.

Page 592. Considérations générales. Alinéa 2). Cinquième ligne.

Remplacer “de l'oxyde de polyméthylène” par “du poly(oxyméthylène) (polyformaldéhyde)”.

Page 595. Considérations générales. Champ d'application des n°s 39.01 à 39.11. Exemple e). Sixième ligne.

Remplacer “les polyéthylène-glycols en mélanges” par “le poly(oxyéthylène) (polyéthylène glycol)”.

Page 599. Considérations générales. Note explicative de sous-positions. Alinéa A)1). Quatrième paragraphe.

Remplacer “aux alcools polyvinyliques” par “au poly(alcool vinylique)”.

Page 605. N° 39.05.

1. Deuxième paragraphe.

Remplacer “esters vinyliques” par “esters de vinyle”.

2. Troisième paragraphe.

a) Première et deuxième lignes.

Remplacer “Les alcools polyvinyliques peuvent être obtenus” par “Le poly(alcool vinylique) peut être obtenu”.

b) Pénultième ligne.

Remplacer “des alcools polyvinyliques” par “du poly(alcool vinylique)”.

Page 606. N° 39.05. Premier paragraphe.

Nouvelle rédaction :

“Parmi les autres polymères vinyliques, on peut citer les éthers polyvinyliques, le poly(carbazole de vinyle) et le poly(pyrrolidone de vinyle).”

Page 607. N° 39.07. Alinéa 2). Cinquième ligne.

Remplacer “polyoxyéthylène” par “poly(oxyéthylène) (polyéthylène glycol)”.

CHAPITRE 85.

Page 1467. N° 85.15. Alinéa H) 3).

Nouvelle rédaction :

"3) Soudage par haute fréquence.

Les surfaces en matières thermoplastiques (polymères acryliques, polyéthylène, poly(chlorure de vinyle), polyamide (nylon, par exemple), par exemple) ayant des caractéristiques de pertes diélectriques suffisantes sont chauffées à haute fréquence et soudées par pression. Des produits d'apport peuvent être utilisés."

ARTICLE 16 PROCEDURE

A. AMENDMENTS TO THE EXPLANATORY NOTES

CHAPTER 34.

Page 525. Heading 34.04. Fourth paragraph. Item (4), first line.

Delete "Polyethylene glycol" and substitute "Poly(oxyethylene) (polyethylene glycol)".

Page 526. Heading 34.04. Exclusion (h).

Delete "Mixed polyethylene glycols" and substitute "Poly(oxyethylene) (polyethylene glycol)".

CHAPTER 38.

Page 582. Heading 38.24. Item (10).

Delete and substitute :

"(10) **Poly(oxyethylene) (polyethylene glycol)** with a very low molecular weight, e.g., mixtures of di-, tri- and tetra(oxyethylene) glycols.

All other types of poly(oxyethylene) (polyethylene glycol) are, however, excluded (**heading 39.07** or, if having the character of artificial waxes, **heading 34.04**)."

CHAPTER 39.

Page 592. General. Item (2). Fifth line.

Delete "polymethylene oxide" and substitute "poly(oxymethylene) (polyformaldehyde)".

Page 595. General. Scope of headings 39.01 to 39.11. Example (e). Fifth and sixth lines.

Delete "mixed polyethylene glycols" and substitute "poly(oxyethylene) (polyethylene glycol)".

Page 599. General. Subheading Explanatory Note. Item (A) (1). Fourth paragraph. First line.

Delete "polyvinyl alcohols" and substitute "poly(vinyl alcohol)".

Page 605. Heading 39.05.

1. Second paragraph.

French text only.

2. Third paragraph.

(a) First and second lines.

Delete "Polyvinyl alcohols are" and substitute "Poly(vinyl alcohol) is".

(b) Last line.

Delete "polyvinyl alcohols" and substitute "poly(vinyl alcohol)".

Page 606. Heading 39.05. First paragraph.

Delete and substitute :

"Other vinyl polymers include polyvinyl ethers, poly(vinyl carbazole) and poly(vinyl pyrrolidone)."

Page 607. Heading 39.07. Item 2. Fifth line.

Delete "polyoxyethylene" and substitute "poly(oxyethylene) (polyethylene glycol)".

CHAPTER 85.

Page 1467. Heading 85.15. Item (H) (3).

Delete and substitute :

"(3) **High-frequency welding.**

Surfaces of thermoplastic materials (e.g., acrylic polymers, polyethylene, poly(vinyl chloride), polyamide (e.g., nylon)) with reasonably high dielectric losses are heated in a high-frequency alternating field and then joined under pressure. Additives may be used."

°
° °

B. AMENDMENTS TO THE COMPENDIUM OF CLASSIFICATION OPINIONS

Page 13a. Opinion 3907.20/1.

Delete "polyethylene glycol" and substitute "poly(oxyethylene) (polyethylene glycol)".

* * *

Annexe V au Doc. NR0075B1
Annex to

(SCS/21/fév. 2000)
(SSC/21/Feb. 2000)

ANNEXE V

MODIFICATION DES NOTES EXPLICATIVES
CONCERNANT LES N°s 3920.43 ET 3920.49

(Voir Point II.A.2 de l'ordre du jour)

ANNEX V

AMENDMENT OF THE EXPLANATORY NOTES
CONCERNING SUBHEADINGS 3920.43 AND 3920.49

(See Item II.A.2 on the Agenda)

PROCEDURE DE L'ARTICLE 16
MODIFICATION DES NOTES EXPLICATIVES

CHAPITRE 39.

Page 617. N° 39.20.

Libellé.

Ajouter "(+)" à la fin du libellé.

Page 619. N° 39.20. Nouvelle Note explicative de sous-position.

Après le dernier paragraphe, insérer la nouvelle Note explicative de sous-positions ci-après :

"o

o o

Note explicative de sous-position
N°s 3920.43 et 3920.49

On distingue les produits de ces sous-positions en fonction de leur teneur en plastifiants. A cet effet, les plastifiants primaires et les plastifiants secondaires doivent être pris en compte ensemble (voir la Note 2 de sous-position du présent chapitre).

Les plastifiants primaires sont des substances peu volatiles qui, lorsqu'elles sont ajoutées à un polymère, le rendent généralement plus souple (esters phtaliques, adipiques, trimellitiques, phosphoriques, sébaciques et azélaïques, par exemple).

Les plastifiants secondaires, également connus sous le nom d'allonge, sont rarement utilisés seuls en tant que plastifiants. Combinés à des plastifiants primaires, l'action plastifiante primaire est modifiée ou renforcée. Ils agissent également comme ignifugeants (paraffines chlorées, par exemple) ou comme lubrifiants (huile de soja époxydée, huile de lin époxydée, par exemple)."

* * *

ARTICLE 16 PROCEDURE

AMENDMENTS TO THE EXPLANATORY NOTES

CHAPTER 39.

Page 617. Heading 39.20.

Heading Text.

Add "(+)" at the end of the heading text.

Page 619. Heading 39.20. New Subheading Explanatory Note.

After the last paragraph, insert the following New Subheading Explanatory Note :

"o

o o

**Subheading Explanatory Note
Subheadings 3920.43 and 3920.49**

Products of these subheadings are distinguished on the basis of their plasticiser content. For this purpose, primary plasticisers and secondary plasticisers must be taken together (see Subheading Note 2 to this Chapter).

Primary plasticisers are materials of low volatility which, when added to a polymer, generally cause an increase in its flexibility (e.g., phthalate esters, adipate esters, trimellitate esters, phosphate esters, sebacate esters, azelate esters).

Secondary plasticisers, also known as extenders, are seldom used alone as plasticiser. When present in combination with primary plasticisers, the primary plasticising action will be modified or enhanced. Secondary plasticisers also act as fire retardants, (e.g., chlorinated paraffins) or lubricants (e.g., epoxidised soybean oil, epoxidised linseed oil)."
