Air Traffic Organization

Data Package for Stakeholders

November 15, 2005

Federal Aviation Administration

Overview of Air Traffic Organization Data Package

Background

- Cost Accounting Data
- Data Sources
- Definitions: Terminal Facility Types

• Activity and Cost Data for Fiscal Year 2004

- Summary of Flights
- Summary of Costs by Facility Type
- ATO Terminal Services Activity and Costs
- ATO En Route (Domestic and Oceanic) Services Activity and Costs
- ATO Flight Service Stations Activity and Costs

• Fiscal Year 2004 Aviation User Taxes Summary

Supporting Electronic Data and Definitions available for downloading at http://www.faa.gov/about/office_org/headquarters_offices/aep/aatf/

Background: Using Cost Accounting Data to Support ATO Cost Allocation

- FAA's FY 2004 cost accounting system (CAS) records costs of ATO services.
 - In FY 2006, CAS will be expanded to cover all FAA lines of business and will improve the assignments of cost to services and SDP's
 - Multiple cost elements (approximately 11,000) at each of four levels
 - Facility costs (Level 1) are largely driven by payroll

CAS can be used for multiple levels and types of allocation

- Average and incremental costs
- Accounting and cost model driven
- Activity based costing and other concepts

Appropriate allocation methods and uses vary by application of CAS:

- Managerial reporting (cost management, internal benchmarking, productivity studies)
- Rates and charges analysis and reporting (marginal or incremental costing, etc.)

Cost reports presented <u>herein</u> are for <u>managerial reporting</u> purposes:

- Purpose is to help ATO stakeholders understand ATO costs from management's view
- Reports herein <u>should not be construed</u> as the basis for future rates and charges
- However, the same underlying CAS cost elements will support both managerial reporting and future rates and charges analysis

Background: Sources of FY 2004 Data Used in Estimates*

Source File	Description of Data	Use in the Analysis	Limitations
Cost Accounting System (CAS)	Data for FY 2004 by Service Type and Service Delivery Point (SDP)	Determine ATO cost of service by location and service type.	Requires adjustments to put on same basis as required budget. Largest change is to reflect the F&E budget.
Enhanced Traffic Management System (ETMS)	File of all flights under control in En Route System	Measure usage of en route domestic, oceanic and some terminal services.	Requires assignment of flights to detailed user groups. Use of approach control services tracked by relationship of FAA facilities serving specific origin-destination airports.
Air Traffic Activity Data System (ATADS)	File of operations/services produced at staffed facilities	Used to track non-ETMS usage in the terminal environment.	Users are in broad groups. No data to describe individual flights.
Aircraft Identity File	ETMS and other data sets to determine aircraft attributes	depend on allociati capacity, load	Not possible to identify small number aircraft; no identity for non-ETMS activity beyond broad user type.
Aircraft Operating Costs and Related Data	Aircraft operating cost estimates from Form 41, Conklin & deDecker and military services.	Used in calculation of aircraft operating costs, fuel consumption rate, and related measures.	Not available for some aircraft.
Extended Master Decode File (EMDF)	Decode File for ATO Facility Relationship	Terminal type classification. Relationship between airport used and ATO terminal facilities used.	When ATO facilities change category, EMDF, ATADS, and CAS updates may not be available at same time.
U.S. DOT Data Bank 1B and air cargo operator financial data	Ten percent sample of airline tickets reporting fares and revenues for all cargo operator. Data adjusted to flight segment level.	Estimate unit revenues to use in conjunction with aircraft type to estimate revenue-based taxes.	Sparse financial data for foreign carriers; estimation of yield curves at aggregate level, and limited data for all cargo operators.

*See MS Excel workbook and data description document for more detail.

Summary of Enhanced Traffic Management System (ETMS) Flights by Geography and User Type for FY 2004

User Identification	A:Domestic Within 225 Exclusion Zone	B:Domestic Rural, AK-AK,HI-HI	C:CONUS-AK/HI, AK-HI	D:Rural CONUS- AK/HI, AK-HI	E:International US,AK,HI to Intl	F:International Overflight (billed)	G:International Overflight (not billed)*	Total Flights

*Certain flights with limited usage of U.S. airspace, exempt aircraft and others are not billed.

Background: FAA Cost Accounting System and Adjustments Major Categories and Content

- Level 1: Facility—Principally controller and technical operations labor and related site costs including training, payroll adjustments,* telecommunications, utilities, logistics, etc., at the service delivery point (SDP)
- Level 2: Service Unit—Facilities and Equipment (F & E) budget* and contract weather
- Level 3: ATO—National and regional service centers, workers compensation, charting, contract maintenance, ATO overhead, etc.
- Level 4: FAA—FAA overhead and change in accrued liabilities
- Other: Service level costs not allocated to SDPs*
- *Adjustments to CAS costs to reflect ATO FY 2004 budget. Full definitions of CAS data fields and adjustment methods are contained in the electronic file available for downloading at http://www.faa.gov/about/office_org/headquarters_offices/aep/aatf/

*Excludes \$154.6 million of cost not yet assigned to one of the four levels, as shown on page 8.

Total FY 2004 ATO Costs by Level and Service (\$millions)

Summary ATO Costs for ATO Managerial Reporting										
SDP Type	Number of Facilities	Level 1 - Facility	Level 2 - Service Unit	Level 3 - ATO	Level 4 - FAA	Other				
Total En Route	26	\$2,015.5	\$1,333.0	\$489.6	\$253.0	\$60.4				
Total Terminal	528	\$2,342.2	\$1,462.0	\$433.8	\$319.8	\$68.1				
Flight Service	61	\$374.9	\$59.9	\$46.1	\$46.7	\$26.1				
ATO Total	615	\$4,732.6	\$2,854.9	\$969.5	\$619.5	\$154.6				

Due to activity measures available, Honolulu (en route and terminal) is counted as one facility included in Radar Towers; Guam (en route) is included in Oakland oceanic costs.

Totals may not add due to rounding.

The costs are based on CAS data used for managerial reporting which may not reflect an allocation of cost for other purposes.

Definitions: Terminal Facility Types

- **TRACON**—An FAA air traffic control facility using radar and air/ground communications to provide approach control services to aircraft arriving, departing, or transiting the airspace controlled by the facility.
- Limited Radar Tower—An air traffic control tower (ATCT) that uses radar and non-radar capabilities to provide approach control services to aircraft arriving, departing, or transiting airspace controlled by the facility and to aircraft operating in the vicinity of one or more civil and/or military airports in the terminal area.
- **Radar Tower**—Single facilities that combine an approach control with an ATCT providing both radar and non-radar air traffic control services.
- Non-Radar Tower—An ATCT providing approach control service without the use of radar.
- **FAA VFR Tower (with controllers)**—An ATCT providing takeoff and landing services only. It does not provide approach control services.
- **Federal Contract Tower**—Low activity VFR ATCTs providing air traffic control services for a municipality or subdivision thereof while under contract to the FAA.
- **ATO Maintained FAA Terminal Location (no controllers)**—Facilities that have FAA operating and maintenance costs, but where there is not a tower staffed by FAA or Contract Tower Program controllers.
- **Non-FAA Facilities**—Non-federal low activity VFR ATCT providing air traffic control services for a municipality or subdivision thereof which IS NOT under contract to the FAA. The municipality has the option of using its own employees or subcontracting for these services.

*ETMS Operations for Limited Radar Tower.

**ETMS Operations with no user type are not used in calculation of non-ETMS operations.

***Radar Towers provide approach control (radar) and tower functions. The "radar tower" row in the upper table represents the approach control function, and the row "radar tower" in the lower table represents the tower function.

Note: Yellow-highlighted fields represent those used in calculating non-ETMS operations and costs.

FY 2004 Terminal Facility Level 1 Costs at Service Delivery Points (\$millions)

Terminal	Cost by Facility Grou	p
Facility Type	Number of Facilities	Level 1 - SDP
TRACONS	14	\$313.0
Radar Tower	178	\$1,373.5
Limited Radar Towers	28	\$202.1
Non-Radar Towers	2	\$2.8
FAA VFR Towers	73	\$194.2
Federal Contract Towers	224	\$99.8
Non-FAA Facilities	9	\$0.3
ATO Maintained FAA Location	N/A*	\$156.5
Total	528	\$2,342.2

*CAS does report these SDPs individually; most are grouped at various levels.

Totals may not add due to rounding.

Note: All terminals classified by type; CAS SDP reports summed for each type; other reflects allocation of service level costs within terminal service.

FY 2004 Flight Service Cost for Managerial Reporting and Activity

FY 2004 Flight Service Station Cost for Managerial Reporting and Activity by Facility Group (\$millions)

Total Cost	Number of Facilities	Level 1 - Facility	Level 2 - Service Unit	Level 3 - ATO	Level 4 - FAA	Other
	61*	\$374.9	\$59.9	\$46.1	\$46.7	\$26.1

*There are a number of satellite flight service stations that are grouped with 61 AFSS facilities.

Activity	Flight Service Aircraft Contacted	Flight Service Flight Plans Originated	-	Flight Service Pilot Briefings	Total Customer Contacts
	2,684,131	5,389,147	468,773	6,801,072	15,343,123

A contract to provide Flight Services was awarded to Lockheed Martin in February 2005 through an A-76 public/private competition. Lockheed Martin is scheduled to assume Flight Service operations (excluding Alaska) beginning in FY2006.

Once this transition is complete, operating costs are expected to decrease through consolidations and program efficiencies.

The FAA anticipates that this award will result in savings of approximately \$2.2 billion from program inception over the 10-year potential contract program.

Airport and Airway Trust Fund Aviation Excise Tax Rates for FY 2004

- Taxes calculated on flights based on user type code from ETMS and user group classification by GRA:
 - Fuel Tax (4.3¢ to 21.8¢ per gallon) calculated for Commercial, Air Taxi, Freight and General Aviation*
 - Passenger Ticket Tax (7.5% of revenue) for Commercial and Air Taxi
 - Segment Fee (\$3.10 per passenger) for Commercial and Air Taxi flights terminating at certain airports
 - Alaska/Hawaii Departure Fee (\$6.90 per passenger) for Commercial and Air Taxi flights leaving these states to U.S. mainland and flights between the two states
 - International Departure/Arrival Fee (\$13.70 per passenger) for international Commercial and Air Taxi
 - Waybill Tax (6.25% of revenue) for Freight (domestic only-belly and all cargo)
 - Exclusion Zone—Domestic taxes apply to flights to points in Canada and Mexico within 225 miles of the border with the Continental U.S.
- **Non-ETMS Taxes**—Based on assumed flight length for GA operations and taxes paid by turboprop passenger flights for commercial operations

Note: Flights with user codes for Military, Other or Unknown not taxed.

*Analysis excludes \$0.01 per gallon for leaking underground storage tanks that does not go to Airport and Airway Trust Fund.

FY 2004 Taxes Distributed by User Type Using Tax Certification Totals (\$millions)

User Identification	Passenger Tax	Segment Tax	International Passenger Tax	Alaska-Hawaii Passenger Tax	Waybill Tax	Commercial Fuel Tax	GA Turbine Fuel Tax	GA AvGas Tax	Total User Tax	Total User Tax (Percent)
US Commercial Passenger Carriers	\$3,772.5	\$1,319.4	\$724.5	\$57.2	\$24.8	\$281.7	\$0.0	\$0.0	\$6,180.1	64.5%
