6. The configuration of any larger mining unit of which the tract may be a part.

7. Restrictions to mining which may affect coal recovery.

8. The price that the mined coal would bring when sold.

9. Costs, include mining and reclamation, of producing the coal and the times of production.

11. Depreciation and other tax accounting factors.

12. The value of any surface estate where held privately.

13. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area.

14. Any comparable sales data of similar coal lands.

Coal values developed by BLM may or may not change as a result of comments received from the public and changes in market conditions between now and when final economic evaluations are completed.
