

reported by payors on Form MMS-2014 for the majority of its processing. In addition to accounting for royalties reported by payors, AFS, using Form MMS-2014 information, performs numerous other functions. These functions include monthly distribution of mineral revenues to State, Indian, and General Treasury accounts; providing royalty accounting and statistical information to States, Indians, and others who have a need for such information; and identifying under reporting and nonreporting so MMS can promptly collect revenues. Sales and royalty information gathered through AFS is compared with production data collected by an MMS automated production accounting system, the Production Accounting and Auditing System (PAAS). This AFS/PAAS comparison of reported sales with reported production provides MMS with the ability to verify that the proper royalties are being collected.

MMS counts monthly payor responses by line item. Each line represents one reporting transaction. Approximately 274,000 lines are submitted each month by about 2,000 payors. Payors include about 1,750 oil and gas companies plus about 250 solid mineral companies. The total number of payors changes monthly as old wells cease production, new wells are brought into production, mines cease or increase production, or selling arrangements change. We estimate that on the average 7 minutes is needed to manually complete each line. Average time includes data assembly, value and royalty calculations, entering data on the form, and mailing. The total time involved varies considerably from a small company reporting only one or two leases to a large company with a multipage report. For those companies with equipment enabling them to report using electronic media, including electronic data interchange, diskettes and tape, the time to generate and submit the data is estimated to be less than 3 minutes per line. About 20 percent of total lines will be prepared and submitted manually, an estimated 67,000 lines per month in FY 1997. The remaining 80 percent of total lines will be submitted via electronic media, about 208,000 lines per month. We also estimate that each payor will spend 10 hours on related recordkeeping for this collection. We estimate that the total annual burden for this information collection is 155,400 hours.

**SUMMARY:** The Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 (RSFA), Pub. L. 104-185, as corrected by Pub. L. 104-200, establishes the owners of operating rights and/or lease record title (who are jointly defined as "lessees" under RSFA) as responsible for making royalty and related payments on a Federal lease. Currently, it is common for a payor rather than a lessee to make royalty and related payments on a Federal lease. When a payor pays royalties on a Federal lease on behalf of a lessee, RSFA requires that the lessee certify to MMS in writing that a particular payor has been designated by the lessee to make such royalty and related payments to MMS on behalf of the lessee. RSFA made this payor designation requirement effective for lease production beginning September 1, 1996. We may require some payors to provide us information regarding the lessees on whose behalf they are paying if we need to inform those lessees that they must certify to MMS in writing their respective payors as their designees. We are asking payors and lessees to provide data required under RSFA so that we can fully implement the Act.

**SUMMARY:** The Royalty Management Program (RMP) provides training and outreach sessions to its constituents to facilitate their compliance with laws and regulations and to ensure that constituents are well informed. During the last few minutes of each training or outreach session, RMP asks participants to complete and return evaluation questionnaires. Participant response is voluntary. We use the feedback from these questionnaires to enhance future training and outreach sessions and to improve RMP's overall service.

**SUMMARY:** The Secretary of the Interior is authorized to sell royalty oil accruing to the United States from Federal oil and gas leases. "Royalty oil" is crude oil produced from leased Federal lands, both onshore and offshore, in instances in which the Secretary exercises the option to accept a lessee's royalty payment in oil rather than in money. When the Secretary determines that small refiners do not have access to adequate supplies of oil, the Secretary may dispose of any oil taken as royalty by conducting a sale of such oil, or by allocating it to eligible refiners. The Application for the Purchase of Royalty Oil, Form MMS-4070, must be submitted by interested purchasers whenever a sale is held. Information collected is used to determine the applicant's eligibility to purchase royalty oil and also provides a basis for the allocation of available oil among qualified refiners.
