Publication experience: Dr. Scarpa has more than 225 peer-reviewed publications and has edited or co-edited 9 books or special journal supplements. Over the years, Scarpa also has served on the editorial boards of 13 scientific journals and served as editor or co-editor for 5 journals.

Society membership and service: Dr. Scarpa has been an officer or board member of many scientific societies, including The Biophysical Society, the Federation of American Societies for Experimental Biology, and the Association of American Medical Colleges.

For more biographical information, please view Dr. Scarpa's full CV and biography on the CSR Web site: <http://cms.csr.nih.gov/AboutCSR/Welcome+to+CSR/>

Information on the National Institutes of Health and its Center for Scientific Review

The National Institutes of Health (NIH) — *The Nation's Medical Research Agency* — includes 27 Institutes and Centers and is a component of the U.S. Department of Health and Human Services. It is the primary federal agency for conducting and supporting basic, clinical and translational medical research, and it investigates the causes, treatments, and cures for both common and rare diseases. For more information about NIH and its programs, visit www.nih.gov.

The Center for Scientific Review organizes the peer review groups that evaluate the majority of grant applications submitted to the National Institutes of Health. We also receive all NIH and many Public Health Service grant applications and assign them to the appropriate NIH Institutes and Centers and PHS agencies. Our primary goal is to see that NIH applications receive fair, independent, expert, and timely reviews that are free from inappropriate influences so NIH can fund the most promising research. Additional information on CSR is available on our Web site (<http://www.csr.nih.gov>) or by calling 301 435-1111.
