## Products and Units of Measurement

<u>Product</u>	<u>Unit of Measurement</u>
Amethyst .....	Grams
Carbon Dioxide .....	Mcf (thousand cubic feet)
Coal .....	Short tons (2,000 pounds)
Copper .....	Short tons
Garnet Concession .....	Tickets
Gas .....	Mcf
Gas Plant Products .....	Gallons
Geothermal and Heated Water Sources .....	Millions of British thermal units (MBtu's)
Helium .....	Mcf
Nitrogen .....	Mcf
Oil .....	Barrels (42 U.S. gallons)
Phosphate .....	Short tons
Potash .....	Short tons
Quartz Crystals .....	Pounds
Sand and Gravel .....	Cubic yards or short tons
Sodium .....	Short tons
Sulfur .....	Short tons
All Other Solid Minerals .....	Short tons

NOTE: Sulfur is reported as either a fluid or solid mineral based on the method of extraction. Fluid mineral sulfur is produced by extracting the commodity from the oil and gas stream. All onshore sulfur and a limited amount of offshore sulfur are currently produced from the oil and gas stream. Solid mineral sulfur is extracted using the Frasch solution mining method. The majority of offshore sulfur is produced using the Frasch mining method.

Sodium figures include sodium borate compounds.

## About This Report

Statistical Highlights provides information addressing Federal and Indian mineral revenue disbursements, revenue collections, underpayment detection program receipts, lease numbers, lease acreage, and program operations in Fiscal Year (FY) 1998. The Minerals Management Service (MMS) Royalty Management Program (RMP) distributes the report annually to Congressional, Federal, State, Indian, and industry representatives.

Some information in this report necessarily includes estimated data that may change after publication. Numbers in parentheses may include current year collections, credits, and prior-year adjustments.

### ***Mineral Lease Revenues***

The report addresses four types of mineral lease revenues: bonuses, rents, minimum royalties, and royalties.

- **Bonuses** — Leases issued in areas known to contain minerals are awarded through a competitive bidding process. Bonuses represent the cash amount successfully bid to win the rights to a lease.
- **Rents** — A rent schedule is established at the time a lease is issued. Rents are annual payments, normally a fixed dollar amount per acre, required to preserve the rights to a lease.
- **Minimum Royalties** — A Federal lease may further contain a minimum royalty provision. Minimum royalty is the annual payment, on a per-acre basis, required to maintain the rights to a lease until production exceeds a minimum value. Once annual production exceeds the minimum value, minimum royalty payments cease.

Minimum royalties are included under the entry "Other Revenues" in this report. "Other Revenues" also includes settlement payments, gas storage fees, estimated payments, recoupments, and fees for sand and gravel used for beach restoration.

- **Royalties** — A royalty is due when production begins. Royalty payments represent a stated share or percentage of the value of the mineral produced. The royalty may be an established minimum, a step-scale, or a sliding-scale. A step-scale royalty rate increases by steps as the average production on the lease increases. A sliding-scale royalty rate is based on average production and applies to all production from the lease.

### ***Revenue Collections and Disbursements***

Revenues collected from mineral leases on Federal lands are distributed to States, to the U.S. Department of the Treasury (Treasury), and to a number of designated special-purpose accounts administered by Federal agencies, depending on the land category and the applicable law involved. The Bureau of Indian Affairs (BIA) disburses revenues collected from Indian leases to the appropriate Indian Tribes and allottees.

Royalty payments are generally due on the last day of the month following the month of production, unless that day falls on a weekend or holiday. Payments are then due on the first business day of the following month. Since revenues collected in one month are disbursed in the following month, collection totals in a given year will not equal disbursement totals for the same year.

Since 1983, MMS has generally disbursed mineral revenues derived from leases on public domain lands and shared with the States in the month following receipt of the payment. Disbursements are made under the provisions of section 104 of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA) which amended the revenue disbursement provisions of the Mineral Leasing Act of 1920 (MLA), 30 U.S.C. 191. The MMS deposits Indian revenues in accounts administered by the Office of Trust Funds Management (OTFM) where they are invested and subsequently distributed to Indian Tribes and allottees by BIA.

The MMS administers mineral leases from different land categories. Legislation and regulations govern formulas for the disbursement of revenues from these leases.

- **Offshore Lands** — Royalty, rent, and bonus revenues from Federal offshore mineral leases on the Outer Continental Shelf (OCS) are deposited to the General Fund of the Treasury through miscellaneous receipts. Under other applicable laws, specified amounts from total offshore revenues are transferred to the Land and Water Conservation Fund (LWCF) and the National Historic Preservation Fund (NHPF).

The LWCF, primarily administered by the National Park Service, provides revenues for the Federal Government, State governments, and local governments to purchase parks and recreation areas and to plan, acquire, and develop land and water resources for recreational use. Offshore mineral leasing provides approximately 70-90 percent of LWCF revenues.

The NHPF, administered by the National Park Service, is designed to expand and accelerate historic preservation plans and activities. The NHPF provides revenues for matching grants-in-aid to States and local governments, and funds the National Trust for Historic Preservation. Offshore mineral leasing provides 100 percent of NHPF revenues.

Section 8(g) of the Outer Continental Shelf Lands Act (OCSLA) Amendments of 1978 provided that the States were to receive a "fair and equitable" division of revenues generated from the leasing of lands within 3 miles of the seaward boundary of a coastal State containing one or more oil and gas pools or fields underlying both the OCS and lands subject to the jurisdiction of the State.

The States and the Federal Government, however, could not reach agreement concerning the meaning of the term "fair and equitable." Revenues generated within the 3-mile boundary were placed into an escrow fund beginning in August 1979. Revenues from the Beaufort Sea in Alaska were placed in a second escrow fund under section 7, beginning in December 1979.

Congress resolved the dispute over the meaning of "fair and equitable" in the OCSLA Amendments of 1985, Public Law 99-272. The law provides for the following distribution of section 8(g) revenues to the States:

- Disbursement of escrow funds in FY 1986-87;
- A series of annual settlement payments disbursed to the States over a 15-year period from FY 1987 to FY 2001; and
- Recurring annual disbursements of 27 percent of royalty, rent, and bonus revenues received within each affected State's 8(g) zone.

Congress passed a second law, Public Law 100-202, permitting distribution of \$322.9 million in section 7 Beaufort Sea escrow funds to Alaska in FY 1988.

Over \$106.5 million in OCS revenues was released to seven States during FY 1998.

- **Public Domain Lands** — The majority of Federal lands are in the public domain. Under section 35 of MLA, States other than Alaska receive 50 percent of all royalties, rents, and bonuses collected from any public domain leases located within their respective boundaries.

Forty percent of remaining mineral revenues is deposited in the Reclamation Fund administered by the Bureau of Reclamation. The Reclamation Fund provides revenues to build, maintain, and operate water and associated power projects on arid and semiarid Western lands. Federal onshore mineral leasing provides approximately 40-50 percent of Reclamation Fund revenues.

The remaining ten percent of mineral revenues from public domain leases is directed into the General Fund of the Treasury through miscellaneous receipts.

Alaska receives 90 percent of all royalties, rents, and bonuses paid for mineral production on public domain leases in Alaska. The State also receives 50 percent of all royalties, rents, and bonuses generated from the National Petroleum Reserve Alaska.

- **Acquired Lands** — The MMS collects all royalties, rents, and bonuses from leases issued under the Mineral Leasing Act for Acquired Lands of 1947, 30 U.S.C. 351 *et seq.*, on behalf of a number of Federal agencies. Revenues are disbursed according to laws applicable to the lands.

Seventy-five percent of mineral receipts from leases on acquired lands within a national forest administered by the U.S. Department of Agriculture is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the State in which the lease is located.

Seventy-five percent of mineral revenues from leases on acquired lands within a national grassland administered by the U.S. Department of Agriculture is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the county in which the lease is located.

Seventy-five percent of mineral receipts from acquired Flood Control Act lands administered by the U.S. Army Corps of Engineers is distributed to the State in which the lease is located. The remaining 25 percent is distributed to the General Fund of the Treasury.

Mineral revenues derived from leases on acquired National Wildlife Refuge lands are shared with the county in which the lease is located, according to one of three alternative formulas prescribed by statute. The remainder is deposited in the General Fund of the Treasury.

All mineral receipts generated from leases on acquired reclamation project lands are paid to the Reclamation Fund.

Mineral revenues collected from leases on acquired military lands issued before 1981 are deposited in the General Fund of the Treasury. Revenues collected from mineral leases on acquired military lands issued beginning January 1, 1981, are disbursed in the same manner as revenues from public domain leases.

Receipts from other acquired lands are deposited in a general Treasury account.

- **Indian Lands** — The BIA collects bonuses and rents from nonproducing leases. The MMS disburses mineral royalties and rents from producing Indian Tribal and allotted leases to OTFM. The BIA subsequently makes disbursements to Tribes and to individual Indian allottees, with the following exceptions:

- Oil and gas payments to four Tribes—the Jicarilla Apache, the Blackfeet, the Navajo Nation, and the Southern Ute—are made directly by the lease payor to financial institutions contracted by the Tribes to receive their mineral payments.
- The BIA has authorized payors to make direct payments to selected individual Indian allottees.
- The Osage Nation manages all mineral leases on its Tribal lands and collects its own revenues.
- Solid mineral royalties are paid directly to the applicable Tribes or to a designated BIA office.

- **Alaska Native Lands** — Payments to the Cook Inlet Region, Inc., in Alaska on behalf of Alaskan Natives for the interests the Region holds in several former Federal leases, are made directly by lease payors to the corporation.

### ***RMP Underpayment Detection Programs***

The accurate determination and collection of mineral revenues require both voluntary compliance by payors and sophisticated RMP audit and exception processing identification programs designed to detect the underpayment of revenues. Cumulative revenue collections from the first of the RMP underpayment detection programs in October 1981 through the end of FY 1998 totaled nearly \$2.1 billion.

- **RMP Audit Programs** — The RMP administers an aggressive audit program. The majority of the RMP audit staff is located in cities where many of the top royalty payors maintain accounting centers.

The RMP maintains cooperative agreements that provided audit funding in FY 1998 to 7 Indian Tribes and 10 States under the authority provided in

sections 202 and 205 of FOGRMA. Cooperative audit agreements under section 202 were in effect at the end of FY 1998 with the following Tribes:

- Blackfeet
- Jicarilla Apache
- Navajo Nation
- Shoshone and Arapaho
- Southern Ute
- Ute
- Ute Mountain Ute

Cooperative agreements under section 205 were in effect in FY 1998 with the following States:

- California
- Colorado
- Louisiana
- Montana
- New Mexico
- North Dakota
- Oklahoma
- Texas
- Utah
- Wyoming

The cooperative agreements with the Navajo Nation, California, Colorado, Montana, New Mexico, North Dakota, Utah, and Wyoming include audits of geothermal steam, coal, and other solid mineral leases, including phosphate, potassium, and sodium.

The cooperative agreements with California, Louisiana, and Texas include the audit of royalties from offshore leases issued under section 8(g) of the OCSLA Amendments of 1985.

The RMP maintained an unfunded Memorandum of Understanding with Alaska and with the Assiniboine Sioux Tribe to share audit information in FY 1998.

This report includes revenues collected from cooperative State and Tribal agreement lease audits in FY 1998. The report further includes Federal expenditures to States and Tribes to fund the cooperative agreements during the year. Many lease audits require more than 1 year to complete. It is subsequently difficult to draw meaningful comparisons between collections and expenditures for a single year.

- **AFS/PAAS Exceptions** — The RMP corrects discrepancies, or exceptions, between sales reported to the Auditing and Financial System (AFS) by payors and production reported to the Production Accounting and Auditing System (PAAS) by lease and agreement operators.

- **AFS Exceptions** — The AFS exceptions identification program promotes accurate and timely reporting and payment. The program detects:

- Late payment of royalties, rents, and bills;
- Insufficient estimated royalty payments; and
- Discrepancies between payments and financial lease terms for rents, bonuses, advance royalties, and minimum royalties.

The RMP issues bills for interest when payments are received after the due dates and when advance estimated royalty payments are insufficient compared to actual royalties paid at a later date.

- **Allowance Exceptions** — All transportation and processing allowances deducted from royalties are subject to RMP review. The RMP currently employs a sophisticated Allowance Limit Exception Processing program to review royalty reports submitted by payors to determine compliance with regulatory allowance limits.

- **Liquidated Damage Assessments** — The RMP formerly issued bills for liquidated damage assessments when royalty or production reports were received after the due date or were submitted with errors. The assessments were in addition to interest on the amount paid late.

Effective October 1, 1995, RMP changed its assessment policy for late and incorrect reporting. Under the new policy, RMP no longer charges reporters for filing late royalty or production reports. In addition, reporters will normally not be charged for incorrect royalty and production reporting unless the overall error rate RMP calculates for a given month exceeds the FY 1995 average error rate of approximately 3 percent. While assessments for late reporting will cease, RMP will continue to assess interest when payments are late.

- **OCS Recoupments** — Section 10 of OCSLA required a payor to file a request with RMP for a recoupment of an overpayment within 2 years of the original payment. The RMP must provide 30 days notification to Congress before approving the

recoupment. Payors who take a recoupment without authorization are contacted by RMP and must explain the recoupment within 30 days. Failure to respond to the notification or to justify the recoupment results in an assessment to recover the unauthorized amount.

Under the provisions of the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996, Public Law 104-185, 110 Stat. 1700, payors will no longer be required to file a request for a recoupment with RMP. This provision will apply to payment receipt dates after August 12, 1996.

- **Indian Recoupments** — Payors who take a recoupment of an overpayment on an Indian lease cannot recoup more than 50 percent of the monthly revenue payment on an allotted lease or 100 percent of the monthly revenue payment on a Tribal lease.
- **Improper Adjustments** — The RMP compares every credit line submitted by a payor with the most recent payment line. Payors who submit a credit line that does not match the original payment line must repay the credit amount.
- **Royalty Rate Monitoring** — The RMP calculates a royalty rate from monthly sales information provided by payors. The calculated royalty rate is compared with the royalty rate in the lease.

If the calculated rate from the payor is lower than the lease rate, RMP notifies the payor of the error and provides 90 days to correct the mistake. The RMP bills payors for additional royalties based on the higher lease rate if the payor does not correct the error.

### ***Program Operations Summary***

This report provides a variety of information addressing RMP program operations. Current year information includes the number of operators, mines, and wells on Federal and Indian lands; active oil and gas payors; average oil and gas lines processed each month; and average payor and lease data base changes completed each month.

Current and historical information includes AFS and PAAS error rates, late disbursement interest, and on time disbursements.

### ***Producing and Nonproducing Leases***

Lease and acreage totals in this report represent both producing and nonproducing mineral leases within State boundaries or offshore areas. The totals include leases for Federal offshore, Federal onshore, and Indian lands.

### ***Source Documents***

Information addressed in this report was derived from a variety of sources. Disbursement data for FY 1998 and cumulative disbursement statistics for the period FY 1982-98 were compiled from U.S. Department of the Interior records that have been confirmed with Treasury. Federal onshore mineral revenue disbursements to States represent cumulative distributions by both MMS and the Bureau of Land Management. Disbursement information for FY 1998 is published in the following MMS reports:

- 1998 Mineral Revenues;
- 1998 Federal Offshore Statistics;
- FY 1998 State Mineral Summaries; and
- The FY 1998 MMS Annual Report to Congress submitted under the provisions of section 302 of FOGPMA and section 602 of OCSLA Amendments of 1978.

Mineral revenue collections for FY 1998 were derived from AFS, the RMP Monthly Activity Report, and nonstandard Indian collections administered by the RMP Accounting and Reports Division.

Information associated with current and historical collections from compliance and enforcement programs was gathered from RMP managers responsible for administration of the programs. Program operations information and lease statistics were assembled from the RMP Monthly Activity Report and the FY 1998 MMS Annual Report to Congress.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

As a bureau of the Department of the Interior, the Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenue from the Federal OCS and onshore Federal and Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the **Offshore Minerals Management Program** administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil and other mineral resources. The MMS **Royalty Management Program** meets its responsibilities by ensuring the efficient, timely and accurate collection and disbursement of revenue from mineral leasing and production due to Indian tribes and allottees, States and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of: (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially affected parties and (2) carrying out its programs with an emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.
