Dear Colleague,

The purpose of this letter is to inform the mathematical sciences community that the Division of Mathematical Sciences (DMS) currently is not accepting *Vertical Integration in Research and Education (VIGRE)* proposals. The VIGRE program is under review by a National Academy of Sciences committee and DMS is suspending the VIGRE program pending the outcome of that review. Please see the Revision Note in the relevant solicitation [NSF 05-595](#).

VIGRE is one of three components of the DMS workforce program *Enhancing the Mathematical Sciences Workforce for the 21st Century (EMSW21)*. DMS continues to welcome proposals addressing the other components of EMSW21: *Research Training Groups (RTG)* and *Mentoring through Critical Transition Points (MCTP)*.

Please consult the DMS [webpage](#) for the full range of workforce training opportunities.

Sincerely,

Peter March
Director, Division of Mathematical Sciences
National Science Foundation
