

OFFICE OF COAST SURVEY

[HTTP://NAUTICALCHARTS.NOAA.GOV/](http://NAUTICALCHARTS.NOAA.GOV/)

CAPT Steve Barnum, Director

Katie Ries, Deputy Director

MISSION: Providing the nation with navigation products and information for transportation safety and to make sound decisions in U.S. coastal and ocean waters.

PRODUCTS AND SERVICES

- Navigation services
- Hydrographic surveys
- Mapping and nautical charting
- Cartographic/hydrographic technology research and development
- Marine modeling

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Hydrographic Services Improvement Act Amendments
- Coast and Geodetic Survey Act
- Coastal Zone Management Act
- Coral Reef Conservation Act

Policy Drivers:

- Ocean Action Plan
- Committee on the Marine Transportation System National Strategy
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report
- Homeland Security National Response Framework

BUDGET AND PERSONNEL

- **Budget Line:** Mapping and Charting Base, Joint Hydrographic Center, Electronic Navigational Charts, Address Survey Backlog
- **FY08 Budget:** \$85.6 million
- **Personnel:** 226 FTE

KEY PARTNERS

- U.S. Coast Guard, U.S. Army Corps of Engineers, U.S. Navy, National Geospatial Intelligence Agency
- State transportation and port authorities
- Commercial and recreational mariners
- U.S. Power Squadrons

FISCAL YEAR 2008 HIGHLIGHTS

- **Surveying the coast following deadly and costly hurricanes and tropical storms** with success due to NOAA's rapid response survey capabilities and pre-planning efforts with Gulf Coast maritime authorities. NOAA's Navigation Response Teams and a new torpedo-shaped autonomous underwater vehicle surveyed critical shipping lanes for navigational obstructions on the sea floor. Additionally, the Office of Coast Survey's regional Navigation Managers worked directly with port authorities and pilot organizations to determine if ports and shipping lanes were safe for vessel traffic.
- **Finding, reporting, and removing navigation hazards throughout the Nation's ports.** From charting and notifying mariners about a 600-pound World War II-era torpedo in the Gulf of Mexico to locating for removal 600 tons of rock hazards from the entrance to Port Fourchon, Louisiana, the Office of Coast Survey was hard at work responding to survey requests near some of the Nation's busiest ports.
- **Improving the quality and efficiency of navigation products**, which is the goal of Nautical Charting System II, a project initiated in 2004 that aims to redefine the production of the Office of Coast Survey's navigation products. Tying together legacy applications with streamlined workflows, this system will better manage data and output timely, consistent, and up-to-date navigation products.
- **Publishing new editions of nautical charts** that depict the boundaries of the Papahānaumokuākea Marine National Monument, the newly designated Particularly Sensitive Sea Area, Ship Reporting System Areas, and special zones known as "Areas to be Avoided." The updated nautical charts will help mariners navigate the waters of the monument's remote and pristine 1,200-mile stretch of coral islands, seamounts, banks, and shoals in the Northwestern Hawaiian Islands.
- Together with the NOAA Office of Marine and Aviation Operations, putting into motion plans to replace existing surveying vessels and **upgrade and modernize NOS's hydrographic data collection fleet.** Two new vessels are currently under construction and the NOAA Ship *Rainier* added a new survey launch that features increased speed, expanded deck space, and an updated interior layout.
- Releasing a **new version of the Web mapping portal NowCOAST** (<http://nowcoast.noaa.gov/>) that provides users with near real-time coastal environmental information, including weather forecasts and global sea-surface temperature analyses. NowCOAST is used to help recreational and commercial mariners, emergency responders, coastal managers, coastal ocean modelers, marine educators, and others plan and manage coastal uses.

ORGANIZATION

- The **Coast Survey Development Laboratory** provides many of the tools required to carry out the mission of the Coast Survey, including exploring and developing new and efficient techniques to accomplish the Coast Survey mission.
- The **Hydrographic Surveys Division** directs programs for ship and shore-based hydrographic survey units and conducts general hydrographic survey operations.
- The **Marine Chart Division** acquires and maintains the marine navigational database to construct and maintain nautical charts and related marine products for the United States.
- The **Navigation Services Division** provides a focal point for customer requests and associated responses on charting issues, emergency response, hydrographic surveys, and maintains Coast Pilot Volumes.

NATIONAL GEODETIC SURVEY

[HTTP://GEODESY.NOAA.GOV/](http://geodesy.noaa.gov/)

Juliana Blackwell, Director

Mike Weaver, Acting Deputy Director

MISSION: To deliver and evolve the foundation of reference throughout the United States for latitude, longitude, height, velocity, shoreline, and gravity with consistency, accuracy, timeliness, and easy access to support public safety, economic prosperity, and environmental wellbeing.

PRODUCTS AND SERVICES

- Coastal mapping and remote sensing
- Continuously Operating Reference Stations
- Height modernization
- Online Positioning User Services
- Airport surveys
- Global Positioning System specifications and guidelines

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Coast and Geodetic Survey Act
- Coastal Zone Management Act
- Hydrographic Services Improvement Act Amendments

Policy Drivers:

- Ocean Action Plan
- Gulf of Mexico Regional Alliance
- Committee on the Marine Transportation System National Strategy
- Climate Change Science Program Synthesis and Assessment Reports

BUDGET AND PERSONNEL

- **Budget Line Items:** Geodesy Base, National Height Modernization, Shoreline Mapping
- **FY08 Budget:** \$28.4 million
- **Personnel:** 220 FTE

KEY PARTNERS

- Federal Emergency Management Agency, U.S. Army Corps of Engineers, Federal Aviation Administration, U.S. Geological Survey
- State departments of transportation, State Spatial Reference Centers
- Coastal managers, emergency planners
- Aviation industry, surveyors, geographic information system users

FISCAL YEAR 2008 HIGHLIGHTS

- **Beginning proof of concept projects and test flights of an airborne gravimeter** in support of the Gravity for the Redefinition of the American Vertical Datum (GRAV-D) program. GRAV-D is an effort to use gravity data to redefine the vertical datum of the United States by 2017. The GRAV-D program, if fully funded, will allow NOAA to increase the accuracy of the geoid model and, ultimately, give users the ability to use the Global Positioning System (GPS) to determine elevations relative to sea level. Without a comprehensive, cohesive, and accurate geoid model, GPS cannot be used to accurately determine elevations.
- **Releasing a new version of the Online Positioning User Service (OPUS)**. By using as little as 15 minutes' worth of dual-frequency Global Positioning System (GPS) data, the new version, known as OPUS-Rapid Static (OPUS-RS), saves time and money relative to the standard OPUS, which requires at least two hours of GPS data. OPUS and OPUS-RS allow users to submit their GPS observations to NOAA, where the data are processed to determine corresponding three-dimensional positional coordinates. Each OPUS solution is estimated to save the user \$600 over traditional positioning methods.
- Supporting NOAA's Integrated Ocean and Coastal Mapping initiative to **serve the greatest possible range of ocean and coastal geospatial data users** through collaborative partnerships, the development of common standards, and technological innovation. Pilot projects in North Carolina, New Hampshire, and Alaska helped enhance coordination of ocean and coastal mapping activities and maximize usefulness of data and products.
- Beginning the **installation of a sentinel climate change monitoring network** that will monitor coastal land elevations in relation to local sea level throughout the National Estuarine Research Reserve System. In the coming years, the program will be expanded to include all reserves within the system and will become an essential component in the climate change monitoring toolbox, establishing the reserves as sentinel sites for measuring and monitoring the impacts of climate change on estuarine systems.

ORGANIZATION

- **The Remote Sensing Division** conducts airport charting and shoreline mapping using traditional methods while exploring more efficient technologies to complement current practices.
- **The Geodetic Services Division** manages the state advisor program; tests and evaluates geodetic equipment; evaluates, markets, and distributes products; and provides various training programs.
- **The Spatial Reference System Division** maintains the Continuously Operating Reference Station network and plans, coordinates and provides technical guidance for geodetic field projects and products.
- **The Observation and Analysis Division** conducts geodetic surveys to support the National Spatial Reference System and the production of maps, charts, and special products and conducts field surveys to support photogrammetric and hydrographic surveys.
- **The Systems Development Division** manages the information technology and telecommunications and network systems, and peripheral input and output systems for the National Geodetic Survey.
- **The Geosciences Research Division** coordinates the research, development, and management of new geodetic data products and designs and programs scientific and geodetic software applications and procedures.

CENTER FOR OPERATIONAL OCEANOGRAPHIC PRODUCTS & SERVICES

[HTTP://TIDESANDCURRENTS.NOAA.GOV/](http://tidesandcurrents.noaa.gov/)

Mike Szabados, Director

Rich Edwing, Deputy Director

MISSION: To provide accurate, reliable, and timely tide, water level, current, and other coastal information, which supports safe and efficient navigation, the understanding of climate change, coastal hazards preparedness and response, and sound ecosystem management.

PRODUCTS AND SERVICES

- Oceanographic predictions, real-time observations and forecasts
- Tidal zoning and correctors for charting and shorelines
- Tidal datums for charting, marine boundaries, and property
- Long-term sea level information to monitor climate change
- Inundation analyses to manage and restore coastal ecosystems
- Data collection, quality control, and analysis standards

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Hydrographic Services Improvement Act Amendments
- Coast and Geodetic Survey Act
- Tsunami Warning and Education Act

Policy Drivers:

- Committee on the Marine Transportation System National Strategy
- Ocean Action Plan
- Climate Change Science Program Synthesis and Assessment Reports
- Ocean Research Priorities Plan

BUDGET AND PERSONNEL

- **Budget Line:** Tide and Currents Data Base
- **FY08 Budget:** \$29.0 million
- **Personnel:** 119 FTE

KEY PARTNERS

- Commercial and recreational mariners
- Coastal zone managers
- Local emergency managers
- State transportation and port authorities
- U.S. Coast Guard, U.S. Army Corps of Engineers, U.S. Navy

FISCAL YEAR 2008 HIGHLIGHTS

- **Expanding the Physical Oceanographic Real-Time System (PORTS®)** to four new locations in the Gulf of Mexico and on the West Coast while enhancements were made to existing PORTS® along some of the Nation's busiest waterways. NOAA PORTS® provides accurate, real-time oceanographic and meteorological data to mariners and can reduce the risk of vessel groundings as well as increase the amount of cargo moved through a port. PORTS® data are accessible online at <http://tidesandcurrents.noaa.gov/ports.html>.
- **Releasing three new products that use data from PORTS®.** These products include a Web site that delivers a brief paragraph capturing the conditions of an estuary, port, or harbor in real time; a Web site that allows users to customize PORTS® displays to include plots from any station and data type; and an application that allows PORTS® users with Internet access on their mobile phones to view PORTS® data products directly on their mobile devices.
- **Installing NOAA "Sentinels of the Coast"** at four locations in the Gulf of Mexico. These water-level observing stations are built to withstand Category 4 hurricanes and deliver real-time storm-tide data during severe coastal weather events. NOAA water-level and meteorological data are key components of coastal decision making before, during, and after major storms.
- Initiating a two-year effort to **add meteorological sensors to National Water Level Observation Network stations**, with 25 stations upgraded in fiscal year 2008. The upgrades included the installation of wind, barometric pressure, and air temperature sensors, followed by monitoring and validation of the data. NOAA water-level and meteorological data have long been key components of safe navigation, marine weather forecasting, and coastal decision making.
- **Conducting major tidal current surveys** in Alaska, Florida, New York, and New Hampshire to update tidal current predictions at over 200 locations in the last three years.

ORGANIZATION

- The **Engineering Division** is responsible for the engineering design, development, procurement, testing, and maintenance of measurement systems and develops engineering system requirements, standards, and standard operating procedures for the Center's ocean observing systems.
- The **Field Operations Division** operates and maintains the oceanographic and Great Lakes observing systems needed to support the protection of life and property.
- The **Oceanographic Division** assesses oceanographic requirements, plans programs and projects to meet those requirements, and ensures the quality of all data collected by CO-OPS.
- The **Information Systems Division** provides computer-based system and application support services to the Center.

NOAA COASTAL SERVICES CENTER

[HTTP://CSC.NOAA.GOV/](http://csc.noaa.gov/)

Margaret Davidson, Director

Jeff Payne, Deputy Director

MISSION: To support the environmental, social, and economic well-being of the coast by linking people, information, and technology.

PRODUCTS AND SERVICES

- Human dimensions and socioeconomic studies
- Coastal remote sensing
- Conservation planning and marine spatial planning tools
- Regionally focused products and services
- Training and technical assistance
- Geographic information system (GIS)-related tools
- Data, information, and standards development
- Hazards mapping and assessment

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Coastal Zone Management Act
- Hydrographic Services Improvement Act Amendments
- Coast and Geodetic Survey Act
- National Marine Sanctuaries Act
- Oceans and Human Health Act
- Inland Flood Forecasting and Warning System Act

Policy Drivers:

- Ocean Action Plan
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Northeast Regional Ocean Council
- Great Lakes Regional Collaboration
- Chesapeake Bay Program
- Hawaii Ocean and Coastal Council
- Coastal Enterprise Report
- Executive Order 12906 (Coordinating Geographic Data Acquisition and Access to the National Spatial Data Infrastructure)
- Systematic needs assessments

BUDGET AND PERSONNEL

- **Budget Line:** Ocean Assessment Program (Coastal Services Center, Ocean Research Priorities Plan Implementation, Gulf of Mexico Regional Collaboration, Coastal Storms Program, Oceans and Human Health)
- **FY08 Budget:** \$25 million
- **Personnel:** 88 FTE (96 CONTRACTOR FTE)

KEY PARTNERS

- U.S. Geological Survey, U.S. Army Corps of Engineers, Environmental Protection Agency, Federal Emergency Management Agency, and other federal agencies
- Regional Ocean Observing Systems and Integrated Ocean Observing System Regional Associations
- State coastal and natural resource agencies and programs
- State emergency and floodplain managers
- NOAA's Northern Gulf Institute
- Conservation organizations such as The Land Trust Alliance and The Nature Conservancy

FISCAL YEAR 2008 HIGHLIGHTS

- **Making land-cover change maps and information available** for nearly all developed areas of the nation's coasts. These data show how much of a region is covered by forests, wetlands, impervious surfaces, and other land and water types and can be used to document land-use trends and changes over time.
- **Providing accurate, accessible shoreline data** and related information from NOAA and other federal agencies on one Web site – the NOAA Shoreline Web site (<http://shoreline.noaa.gov>). Local and state officials use this information to predict sea-level rise, establish setback lines, and perform a multitude of ocean and coastal community planning tasks.
- **Developing a tool that combines weather forecasts with hazards planning data**, allowing officials in California to display and animate forecasts for weather conditions such as waves, winds, temperature, humidity, and rainfall. The tool, called the Southern California Weather and Hazards Data Viewer (http://maps.csc.noaa.gov/CSP_SoCal/), makes the data easier to comprehend and use.
- **Providing new coastal LIDAR (Light Detection and Ranging) data** for portions of the Great Lakes, Florida, South Carolina, Mississippi, Oregon, and Southern California. LIDAR is a remote sensing technology used to collect topographic and bathymetric data. The sensors are typically mounted on an aircraft and represent a great savings of time and money for states that have used ground surveys to get this information.
- **Bringing new partners together through the Digital Coast Web site** (<http://www.csc.noaa.gov/digitalcoast/>) to address coastal issues. The Web site provides data, tools, information, and training.
- **Advancing regional ocean governance** by serving as an integral partner, providing federal leadership, participation, and collaborative mechanisms for local, state, and federal agencies to address coastal challenges. The range of current regional efforts has included the Gulf of Mexico Alliance, Northeast Regional Ocean Council, West Coast Governors' Agreement on Ocean Health, Great Lakes regional collaboration, Chesapeake Bay Program, Gulf of Maine Council on the Marine Environment, and the South Atlantic Alliance.
- **Training over 1,100 coastal professionals** from 42 different states or territories; users of CSC's E-learning courses logged thousands of user sessions.

ORGANIZATION

- The **Coastal Geospatial Services Division** helps state and local coastal partners use technology to address coastal resource management issues.
- The **Coastal Management Services Division** provides state and local partners with products and services related to social sciences, training, and communications.
- The **Integrated Information Services Division** helps customers make the best use of data resources and provides internal Web and computer management and services support.
- The **Regional Coastal Services Division** facilitates the delivery of products and services to state and local partners, to give the organization a better (local) understanding of customer needs and support NOAA's engagement with regional governance structures.
- The **Management and Budget Division** is in charge of all things administrative, including grants, facilities, budgeting, and policy and planning.

NOAA INTEGRATED OCEAN OBSERVING SYSTEM PROGRAM

[HTTP://IOOS.NOAA.GOV/](http://ioos.noaa.gov/)

Zdenka Willis, Director

Suzanne Skelley, Deputy Director

MISSION: To lead the integration of ocean, coastal, and Great Lakes observing capabilities, in collaboration with federal and non-federal partners, to maximize access to data and generation of information products, inform decision making, and promote economic, environmental, and social benefits to our nation and the world.

PRODUCTS AND SERVICES

- Integration of NOAA ocean observations to improve decision-support tools
- Regional observations, data management, and regional-scale products and services
- Regional, interagency, and international collaboration

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Draft IOOS[®] legislation (to be developed in the first quarter of FY09)

Policy Drivers:

- Ocean Action Plan
- Committee on the Marine Transportation System National Strategy
- Ocean Research Priorities Plan
- Gulf of Mexico Alliance - Governors' Action Plan for Healthy and Resilient Coasts
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report

BUDGET AND PERSONNEL

- **Budget Line:** Ocean Assessment Program (IOOS[®] Implementation, IOOS[®] Regional Observations)
- **FY08 Budget:** \$27.3 million, including \$0.9 million directed to the Alliance for Coastal Technologies
- **Personnel:** 13 FTE

KEY PARTNERS

- Seventeen federal agencies of the Interagency Working Group on Ocean Observations (IWGOO)
- National Federation of Regional Associations for Coastal Ocean Observing
- Academia (regional coastal ocean observing system development)
- Industry (system design, value add, and beneficiaries)
- State, local, and tribal governments

FISCAL YEAR 2008 HIGHLIGHTS

- **Developed a set of Web-based tools and resources** to simplify submission, review, and approval of data standards on an interagency level. Participants, including 17 federal agencies, as well as state, regional, and non-governmental partners, can now actively participate to ensure standards are well vetted and appropriate for use across the IOOS® community. Results were almost immediate, with 12 new standards under active review by the end of fiscal year 2008. The standards process is central to the NOAA IOOS® Program's broader strategy to increase integration within the ocean observing community.
- **Leading efforts to make selected ocean observation data compatible**, thereby increasing their value and utility for decision-support tools, products, and services. In FY08, NOAA IOOS® focused on integration of an initial set of five observations, including temperature, salinity, water level, currents, and ocean color. The program assembled a cross-NOAA team to develop standard processes for reporting and exchanging these data and identified three major NOAA data providers to implement standards and begin delivering their data in a consistent manner. NOAA IOOS® targeted four NOAA applications to use and evaluate benefits of standardized, integrated data, including harmful algal bloom forecasts, coastal flooding predictions, integrated ecosystem assessments, and hurricane intensity forecasts.
- **Administering a merit-based, competitive funding process** to develop and maintain a national network of 11 Regional Associations of Coastal Ocean Observing Systems. This network of observing systems is designed to complement federal observations, data management, and decision-support tools by providing regional-scale data, products, and services to meet regionally specific needs for coastal-ocean information.

ORGANIZATION

- The **Operations Team** leads the establishment of technical infrastructure, standards, and protocols needed to improve delivery of IOOS® oceanographic variables defined in the U.S. IOOS® Development Plan.
- The **Regional Implementation, Program Policy and Communications Team** leads development of program policy, manages development and implementation of Regional IOOS®, and manages the program's external communications and Congressional affairs.
- The **Management, Budgeting and Programming Team** is responsible for execution to the annual budget for NOAA IOOS® and leads efforts to resource the program through NOAA's planning, programming, budgeting, and execution system.

OFFICE OF RESPONSE AND RESTORATION

[HTTP://RESPONSE.RESTORATION.NOAA.GOV/](http://response.restoration.noaa.gov/)

David Westerholm, Director

Brian Julius, Deputy Director

MISSION: As the lead trustee for the public's coastal natural resources, the Office of Response and Restoration responds to, protects, and restores habitats, communities, and economies injured by oil spills, hazardous waste sites, and marine debris.

PRODUCTS AND SERVICES

- 24/7 response capability for coastal oil and chemical spills
- Spill planning, prevention, modeling, and risk assessment tools
- Scientific expertise for enhanced cleanup at spills and waste sites
- Restoration of coastal habitats, fishery resources, and recreational services via damages recovered from responsible parties
- Marine debris research, prevention, and reduction

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Oil Pollution Act
- Comprehensive Environmental Response, Compensation, and Liability Act
- Marine Debris Research, Prevention and Reduction Act
- Clean Water Act

Policy Drivers:

- Ocean Action Plan
- National Contingency Plan
- National Response Framework
- Committee on the Marine Transportation System National Strategy
- Ocean Research Priorities Plan
- Coastal Enterprise Report

BUDGET AND PERSONNEL

- **Budget Line:** Response and Restoration Base, Estuary Restoration Program, Marine Debris
- **FY08 Budget:** \$19.8 million (includes the Office of Response and Restoration, Marine Debris Program, and Pribilof Islands project)
- **Personnel:** 103 FTE

KEY PARTNERS

- U.S. Coast Guard, Environmental Protection Agency, Department of the Interior
- State trustee agencies
- Industry and non-governmental organizations (e.g., Restore America's Estuaries)
- NOAA Restoration Center and General Council for Natural Resources

FISCAL YEAR 2008 HIGHLIGHTS

- **Responded to more than 179 hazardous spill incidents**, including two large oil spills: the M/V *Cosco Busan* in San Francisco Bay, California, and an estimated 419,000 gallon fuel oil spill from a barge on the Mississippi River near New Orleans, Louisiana. Also responded to hundreds of reported spills in the Gulf that occurred as a result of Hurricanes Ike and Gustav.
- **Recovered approximately \$21.3 million from responsible parties** for assessment and restoration of habitats, resources, and services through the Damage Assessment Remediation Restoration Program (DARRP), which includes OR&R, the NOAA Restoration Center, and NOAA General Counsel for Natural Resources. DARRP also **achieved settlements of \$12.9 million** with potentially responsible parties for assessment and restoration of contamination in Commencement Bay, WA. This includes a wetland restoration project on Hylebos Creek, which will enhance and restore salmon spawning and rearing habitat, restore riparian vegetation, and provide habitat for birds. With these most recent settlements, DARRP has settled natural resource damage liability with over 50 parties and implemented restoration projects totaling over 200 acres.
- **Investigating environmental contaminants in and around the National Reserve Fleet** in Suisun Bay, California. More than 70 vessels make up the fleet, which is maintained by the United States Maritime Administration for national defense or emergency purposes. By Congressional request, NOAA is working with all involved stakeholders to evaluate potential environmental concerns, including heavy metals and antifouling agents in paint that is peeling off of the vessels.
- **Supporting the Republic of Korea in their assessment and restoration planning** activities after the 3.3 million gallon *Hebei Spirit* oil spill in December 2007. As part of ongoing NOAA assistance to South Korea, OR&R and the NOAA Restoration Center are advising on approaches to assess the spill-related impacts and appropriate types of restoration.
- Working to **reduce the amount of derelict fishing gear** in fishing communities and the marine environment. Developed the Fishing for Energy Project, a partnership project that provides a place for a fishing community to dispose of, at no cost, old or derelict fishing gear recovered while at sea. This debris is then recycled by Covanta Energy to provide electricity to New England communities. New Bedford, Massachusetts, was the first port on the Eastern Seaboard to launch the program, with an additional six sites added and plans to expand to the entire East Coast.
- Completed the **decade-long cleanup of the Pribilof Islands**.

ORGANIZATION

- The **Emergency Response Division** promotes effective spill response by increasing preparedness at the national and local levels, and providing scientific expertise during emergency response operations.
- The **Assessment and Restoration Division** protects and restores coastal natural resources injured by hazardous substances.
- The **Marine Debris Program** coordinates NOAA's marine debris prevention, restoration, and research activities.
- The **Business Services Group** provides critical mission support, including cost documentation, Information Technology, and logistical support.

NATIONAL CENTERS FOR COASTAL OCEAN SCIENCE

[HTTP://COASTALSCIENCE.NOAA.GOV/](http://coastalscience.noaa.gov/)

Gary Matlock, Director

Alicia Jarboe, Deputy Director

MISSION: To provide coastal managers with the scientific information and tools needed to balance society's environmental, social, and economic goals.

PRODUCTS AND SERVICES

- Integrated assessments
- Ecological forecasting
- Marine forensics
- Scientific information from applied research
- Technology development
- Ecosystem conditions and dynamics assessments
- Identification of the causes and consequences of ecosystem stress

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Coastal Zone Management Act
- National Marine Sanctuaries Act
- Harmful Algal Bloom and Hypoxia Research and Control Act
- Oceans and Human Health Act
- Coral Reef Conservation Act
- Clean Water Act
- Coastal Ocean Program
- Estuary (Estuarine) Protection Act
- Invasive Species Executive Order
- National Coastal Monitoring Act
- Magnuson-Stevens Fishery Conservation and Management Act
- Marine Mammal Protection Act
- Endangered Species Act
- National Contaminated Sediment Assessment and Management Act
- National Environmental Policy Act

Policy Drivers:

- Ocean Action Plan
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report

BUDGET AND PERSONNEL

- **Budget Line:** National Centers for Coastal Ocean Science Extramural Research, NCCOS Competitive Research
- **FY08 Budget:** \$51.4 million
- **Personnel:** 179 FTE, 143 Contractors

KEY PARTNERS:

- NOAA Line Offices and NOS Program Offices
- Coastal managers and coastal state environmental agencies
- Federal agencies, including the Food and Drug Administration, National Institute of Standards and Technology, Environmental Protection Agency, U.S. Army Corps of Engineers, U.S. Geological Survey, U.S. Department of Agriculture, National Science Foundation, NASA, U.S. Coast Guard, U.S. Fish and Wildlife Service, U.S. Navy, Department of the Interior, National Institutes of Health, Department of Homeland Security, Department of Education, Department of Justice, Department of Energy, Department of Transportation
- Universities and research grantees

FISCAL YEAR 2008 HIGHLIGHTS

- Funding research that **predicted that the 2008 hypoxic zone, or “dead zone,”** in the northern Gulf of Mexico would be the largest on record. Later research found that the actual size of this low-oxygen zone was slightly smaller than predicted, but was still the second-largest dead zone on record. The Gulf of Mexico dead zone threatens critical commercial and recreational fisheries. Predictions of the dead zone’s size help determine the relationships between hypoxia and nutrient pollution and provide the scientific foundation for management.
- Releasing a 20-year study that shows that **environmental laws have had a positive effect on reducing overall contaminant levels** in U.S. coastal waters. The report, which presents findings in a quick reference format, nevertheless points to continuing concerns with elevated levels of metals and organic contaminants found near urban and industrial areas of the coasts.
- Funding the first-ever **prediction of a larger-than-normal harmful algal bloom** in the Gulf of Maine in the summer of 2008. The prediction allowed shellfish farmers and fishermen to shift the timing of their harvests and state resource and public health managers to make better decisions regarding closures of shellfish beds. These efforts helped reduce economic losses and prevented people from eating contaminated shellfish.
- Releasing *The State of Coral Reef Ecosystems of the United States and Pacific Freely Associated States: 2008*, a report assessing the condition of coral reef ecosystems in 15 locations ranging from the U.S. Caribbean and Gulf of Mexico to the western Pacific. Research in the report shows that **nearly half of the Nation’s coral reefs are now considered to be in “poor” or “fair” condition.** The report also describes the impacts of 13 major threats in each location and offers recommendations for conservation actions.

ORGANIZATION

- The **Center for Sponsored Coastal Ocean Research** (Silver Spring, MD) uses a multi-disciplinary approach to understand and predict the impacts of natural and human influences on coastal regional ecosystems, communities, and economies through collaboration with external grantees and other partners.
- The **Center for Coastal Monitoring and Assessment** (Silver Spring, MD) assesses and forecasts coastal and marine ecosystem conditions through research and monitoring; conducts field observations on regional and national scales; and provides scientific information and technical advice to resource managers and researchers.
- The **Center for Coastal Fisheries and Habitat Research** (Beaufort, NC, and Kasitsna Bay, AK) conducts research on estuarine processes, biological productivity of nearshore and ocean ecosystems, dynamics of coastal and reef fishery resources, and the effects of human influences on resource productivity.
- The **Center for Coastal Environmental Health and Biomolecular Research** (Charleston, SC, and Oxford, MD) conducts interdisciplinary research on issues related to coastal ecosystem health, environmental quality, and related public health impacts.
- The **Center for Human Health Risk** (Charleston, SC) conducts collaborative research at the Hollings Marine Laboratory, a NOAA-operated multi-institutional facility, to provide science and biotechnology applications to sustain, protect, and restore coastal ecosystems, emphasizing linkages between environmental and human health.

OFFICE OF OCEAN & COASTAL RESOURCE MANAGEMENT

[HTTP://COASTALMANAGEMENT.NOAA.GOV/](http://coastalmanagement.noaa.gov/)

David Kennedy, Director

Donna Wieting, Deputy Director

MISSION: To lead the nation's efforts to manage and conserve ocean and coastal resources.

PRODUCTS AND SERVICES

- Coastal management
- Research, education, and stewardship in estuarine reserves
- Coral reef conservation
- Coastal land acquisition
- Marine protected area planning and management
- Partnerships and place-based initiatives

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Coastal Zone Management Act
- National Marine Sanctuaries Act
- Coral Reef Conservation Act

Policy Drivers:

- Ocean Action Plan
- Committee on the Marine Transportation System National Strategy
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report
- National Coral Reef Action Plan and Strategy
- Executive Order 13089: Coral Reef Protection
- Executive Order 13158: Marine Protected Areas

BUDGET AND PERSONNEL

- **Budget Line:** ORF: Coastal Management (Coastal Zone Management [CZM] Grants, CZM Program Administration, National Estuarine Research Reserve System [NERRS], Marine Protected Areas) and Ocean Assessment Program (Coral Reef, Cooperative Institute for Coastal and Estuarine Environmental Technology); PAC (Coastal and Estuarine Land Conservation Program, NERRS)
- **FY08 Budget:** \$117.5 million in ORF and \$19.5 million in PAC
- **Personnel:** 59 FTE

KEY PARTNERS

- 34 Coastal state and Territory Coastal Zone Management programs, 27 National Estuarine Research Reserve System (NERRS) sites, universities (NERRS partners)
- Cooperative Institute for Coastal and Estuarine Environmental Technology
- U.S. Coral Reef Task Force (members: 11 other Federal Agencies, seven States/territories, three Freely Associated States)
- Environmental Protection Agency, Department of the Interior, Federal Emergency Management Agency, Marine Protected Areas Federal Advisory Committee
- National Fish and Wildlife Foundation and other conservation non-governmental organizations

FISCAL YEAR 2008 HIGHLIGHTS

- **Awarding, in fiscal year 2008, \$68.3 million to state and territory coastal zone management programs** to implement their state coastal zone management and coastal non-point source pollution programs. Through the Coastal Zone Management Program, the Office of Ocean and Coastal Resource Management assists state programs with comprehensive planning and community development and other activities to protect and restore habitats, mitigate hazards, protect water quality, and enhance public access to coastal areas. Awarding \$22.2 million to 27 coastal states to implement programs, construct facilities, and acquire land at 27 National Estuarine Research Reserves and one proposed reserve.
- **Led the development of the NOAA Coastal Strategy**, including coordinating the major NOAA coastal program offices to devise a strategy to focus coastal program office investments, capabilities, and deliverables around three priority objectives: coastal hazards and climate change; competing coastal uses and habitat loss; and coastal pollution and human health effects.
- **Protecting more than 8,000 acres of critical coastal habitat** – including 35 properties – through the Coastal and Estuarine Land Conservation Program (CELCP) in fiscal year 2008. Five new CELCP projects were selected for funding during the year; projects were chosen based on their contributions to ecological conservation, recreational opportunities, aesthetic and historical significance, and technical and scientific merits.
- **Leading activities for the International Year of the Reef**, which launched in January 2008 to raise awareness of the importance of coral reef ecosystems and the threats they face, activities that are under way to protect them, and additional actions still needed.

ORGANIZATION

- The **Coastal Programs Division** oversees the National Coastal Zone Management Program, which is composed of 34 state and territory coastal management programs.
- The **Coral Reef Conservation Program** supports effective management and sound science to preserve, sustain and restore valuable coral reef ecosystems.
- The **Estuarine Reserves Division** oversees the National Estuarine Research Reserve System, a partnership program between NOAA and the coastal states and the Cooperative Institute for Coastal and Estuarine Environmental Technology, a partnership between NOAA and the University of New Hampshire.
- The **Marine Protected Areas Center** facilitates the effective use of science, technology, training, and information in the planning, management, and evaluation of the nation's system of marine protected areas.
- The **National Policy and Evaluation Division** leads national coastal management policy and planning efforts and is responsible for conducting periodic performance evaluations of the national estuarine research reserves and state coastal management programs as required by the Coastal Zone Management Act.
- The **Business Management Division** provides administrative, human resource, budget, financial management, and information technology support.

OFFICE OF NATIONAL MARINE SANCTUARIES

[HTTP://SANCTUARIES.NOAA.GOV/](http://sanctuaries.noaa.gov/)

Daniel Basta, Director

Ellen Clark, Acting Deputy Director

MISSION: To serve as the trustee for the National Marine Sanctuary System and conserve, protect, and enhance their biodiversity, ecological integrity, and cultural legacy.

PRODUCTS AND SERVICES

- Resource protection
- Education and outreach
- Maritime heritage
- Sanctuary management
- Science and exploration

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- National Marine Sanctuaries Act
- Florida Keys Protection Act
- Oceans Act 1992
- National Environmental Policy Act
- Oil Pollution Act
- Coastal Zone Management Act
- Coral Reef Conservation Act
- Marine Debris Research, Prevention and Reduction Act

Policy Drivers:

- Proclamation 8031 – Northwestern Hawaiian Islands
- E.O. 13158 – Marine Protected Areas
- E.O. 13089 – Coral Reef Protection
- Ocean Action Plan
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report

BUDGET AND PERSONNEL

- **Budget Line:** ORF: Marine Sanctuary Program Base; PAC: Marine Sanctuaries Construction/Acquisition
- **FY08 Budget:** \$64.3 million (PAC and ORF)
- **Personnel:** 172 FTE

KEY PARTNERS

- States of Florida, Hawaii, California, Michigan
- Sanctuary Advisory Councils (400 + members)
- Research Institutions (e.g., Monterey Bay Aquarium Research Institute, Mote Marine Laboratory)
- National Marine Sanctuary Foundation

FISCAL YEAR 2008 HIGHLIGHTS

- **Releasing draft management plans** for the Papahānaumokuākea Marine National Monument in Hawaii and Stellwagen Bank National Marine Sanctuary off the coast of Massachusetts. The plans lay the foundation for protecting these marine areas and recommend actions to better manage each area and its resources.
- **Advancing efforts to protect blue whales** in the Santa Barbara Channel, California, following the deaths of five blue whales within the Channel Islands National Marine Sanctuary during 2007. NOS forwarded a draft emergency response plan to members of a special Subcommittee of the Sanctuary Advisory Council. The plan calls for increased surveillance of whales and ships in the Channel, improved coordinated response to possible strandings, and the initiation of precautionary management actions should high-risk conditions appear.
- Commemorating the **designation of the Papahānaumokuākea Marine National Monument as a Particularly Sensitive Sea Area (PSSA)** by the International Maritime Organization, a specialized agency of the United Nations. The monument, which provides habitat for more than 7,000 marine species and contains 4,500 square miles of pristine coral reefs in the Northwestern Hawaiian Islands, is the twelfth PSSA in the world. The PSSA designation deems an area deserving of special protection because of its ecological, socioeconomic, or scientific significance and its potential vulnerability to damage from international maritime activities.
- Leading a scientific **research expedition to the site of the remains of three sunken German submarines** off the coast of North Carolina. As part of an effort to properly document and protect the wrecks, NOS conducted a non-invasive archaeological survey that included photo documentation of the vessels' visible sections and the biological communities found at the sites.

ORGANIZATION

- The **Technical Programs Support Division** supports science and maritime heritage teams, socioeconomic work, geographic information systems work, and research coordination.
- The **Conservation Policy and Planning Division** supports system-wide regulations, legislation, management plans, permitting, consultation, and sanctuary advisory counsels.
- **Communications, Outreach, Education** supports system education, outreach, media, constituent, and legislative communications programs as well as visitor centers and video programming.
- The **Northeast and Great Lakes Region** provides coordination of the Thunder Bay, Stellwagen Bank, and Monitor sanctuaries.
- The **Southeast, Gulf of Mexico, and Caribbean Region** provides coordination of Florida Keys, Gray's Reef, and the Flower Garden Banks national marine sanctuaries.
- The **West Coast Region** provides coordination of the Channel Islands, Cordell Bank, Gulf of the Farallones, Monterey Bay, and Olympic Coast national marine sanctuaries.
- The **Pacific Islands Region** provides coordination of Hawaiian Islands Humpback Whale and Fagatele Bay national marine sanctuaries and the Papahānaumokuākea Marine National Monument.

INTERNATIONAL PROGRAM OFFICE

[HTTP://NOSINTERNATIONAL.NOAA.GOV/](http://nosinternational.noaa.gov/)

Clement Lewsey, Director

MISSION: To build and sustain capacities for global coastal and marine stewardship through effective international partnerships.

PRODUCTS AND SERVICES

- Capacity building in coastal stewardship
- Deemed exports administration
- International outreach
- International partnerships and bilateral agreements
- Policy vetting and operational support across NOS
- Support to U.S. State Department priorities

LEGISLATIVE AND POLICY DRIVERS

Legislative Drivers:

- Coast and Geodetic Survey Act
- Coastal Zone Management Act
- National Marine Sanctuaries Act
- Oil Pollution Act
- Harmful Algal Bloom and Hypoxia Research and Control Act
- Oceans and Human Health Act
- Coral Reef Conservation Act
- Marine Debris Research, Prevention and Reduction Act

Policy Drivers:

- International Agreements
- NOS International Strategic Plan
- Ocean Action Plan
- Committee on the Marine Transportation System National Strategy
- Ocean Research Priorities Plan
- Gulf of Mexico Regional Alliance
- West Coast Governors' Agreement on Ocean Health
- Coastal Enterprise Report

BUDGET AND PERSONNEL

FY08 Budget: \$ 250,000 (excluding salary and benefits)

Personnel: 10 FTE

KEY PARTNERS

- U.S. State Department and U.S. international aid community
- United Nations: Intergovernmental Oceanographic Commission of UNESCO (IOC), United Nations Environment Programme, United Nations Development Programme
- Foreign and Intergovernmental organizations (eq. Wider-Caribbean, China, IUCN-The World Conservation Union)
- State and Local Governments, Universities, and nongovernmental organizations

FISCAL YEAR 2008 HIGHLIGHTS

- Working with governments and the Intergovernmental Oceanographic Commission to develop integrated programs to **build capacity for regional observations and environmental stewardship in the Caribbean Region.**
- **Assisting Trinidad and Tobago, Belize, and Grenada in the development of a National Program of Action (NPA)** to improve watershed management and protect coastal resources. An NPA provides a framework for coastal management and is a national plan to prevent, reduce, control, and/or eliminate marine degradation from land-based activities. NOS helped identify major land-based pollution sources and refined specific actions to mitigate pollutant impacts in these countries.
- **Administering the U.S.-China Integrated Coastal Management Program** with the Chinese State Oceanic Administration. Recent program highlights have included:
 - Providing technical assistance to provincial and regional working groups in developing a watershed management program and implementation plan for the greater Xiamen municipality.
 - Providing technical support to the Chinese government under a United Nations Development Program/Global Environmental Facility Project on Biodiversity Management in the Coastal Area of China's South Sea (2006-2012).
- **Administering a Joint Project Agreement for Integrated Coastal and Ocean Resources Management with Ministries in Korea.** The annual work plan includes a scope of work funded with approximately \$400,000 per year by the Government of Korea. All NOAA line offices are involved in this Program.
- **Developing an agency-wide International Strategic Plan.** Annual Action Plans are developed that represent a full breadth of international engagements throughout the agency, with emphasis on supporting those involving more than one program office.
- **Coordinating International Coral Reef Conservation and Management Initiatives** through the NOAA International Coral Grant Program and the Coral Reef Conservation Fund, a partnership between NOAA and the National Fish and Wildlife Foundation. During the International Year of the Reef, the two grants programs awarded nearly \$1.1 million to 20 coral projects in 15 countries.

ORGANIZATION

By geography and theme:

- **Caribbean and Latin America:** Program priorities include support to the Intergovernmental Oceanographic Commission Sub-commission for the Caribbean and Adjacent Regions and the United Nations Environmental Program and others in ways to improve regional environmental observation capacities and reduce land-based sources of pollution to the marine environment.
- **Asia:** Under several bilateral government-to-government agreements, NOAA works with China, Vietnam, and Korea to build capacity for integrated coastal management through technical assistance, training, and policy advice.
- **Watershed Management:** The NOS International Program Office helps transfer knowledge, information, and tools to parties throughout the world in ways to adopt ecosystem-based management approaches to watershed management.

Agency-wide Organization and Coordination: In addition to the internal organization within IPO, the International Program Office Director represents NOS in the NOAA-wide International Affairs Council and chairs the NOS-wide NOS International Coordination Council. These Councils ensure internal communication, advocacy, and coordination among NOS international programs and positions internally and across NOAA.

NATIONAL OCEAN SERVICE

PROGRAM OFFICE KEY WEB SITES

Office of Coast

Office of Coast Survey (OCS)

<http://nauticalcharts.noaa.gov/>

Includes historic and current nautical charts (available for print-on-demand or as electronic navigational charts), products and services for geographic information systems, and a comprehensive listing of Notice to Mariner updates

NowCoast

<http://nauticalcharts.noaa.gov/csdl/op/nowcoast.htm>

Provides easy and centralized access to online, real-time physical meteorological, oceanographic, river, and air/water quality information

National Geodetic Survey (NGS)

<http://www.ngs.noaa.gov/>

Provides information about NGS, which defines and manages the National Spatial Reference System—the framework of latitude, longitude, height, scale, gravity, orientation, and shoreline throughout the United States

National and Cooperative Continuously Operating Reference Stations (CORS)

<http://geodesy.noaa.gov/CORS/>

Provides information on CORS, including a map of the newest sites, future sites, and information on how to become a CORS site

Center for Operational Oceanographic Products and Services (CO-OPS)

<http://tidesandcurrents.noaa.gov/>

Offers one-stop shopping for real-time and historical observations of water levels, currents, meteorological, tide and tidal current predictions, and other coastal oceanographic data from sites along the U.S. coast

Physical Oceanographic Real-Time System (PORTS®)

<http://tidesandcurrents.noaa.gov/ports.html>

Provides information about the Physical Oceanographic Real-Time System, PORTS®, which measures, integrates, and disseminates observations of water levels, currents, salinity, wind, and bridge clearance

NOAA Coastal Services Center (CSC)

<http://csc.noaa.gov/>

Provides data and products for geographic information systems and social science, access to award-winning coastal publications, and outlines CSC initiatives and priorities such as Digital Coast, Coastal Resiliency, and regional and state initiatives

NOAA Integrated Ocean Observing System Program (IOOS®)

<http://ioos.noaa.gov/>

Highlights the vision, mission, and partnerships of the NOAA IOOS® Program and allows NOAA IOOS® and its partners to disseminate data, information, and publications on coastal waters, Great Lakes, and oceans

Office of Response and Restoration (OR&R)

<http://response.restoration.noaa.gov/>

Provides information about contaminants, tools, and information for emergency responders, restoration planning tools and restoration highlights, and community outreach materials

NOAA Marine Debris Program

<http://marinedebris.noaa.gov/>

Serves as an outreach tool to coordinate, strengthen, and increase the visibility of marine debris issues and efforts within the agency, its partners, and the public

National Centers for Coastal Ocean Science (NCCOS)

<http://coastalscience.noaa.gov/>

Provides scientific publications, coastal monitoring and assessment data, and overviews on current projects focused around five coastal stressors (climate change, extreme events, invasive species, land and resource use, and pollution)

Office of Ocean and Coastal Resource Management (OCRM)

<http://coastalmanagement.noaa.gov/>

Includes information about the Coastal Zone Management Act, publications, and state-specific information for coastal resource managers, planners, educators, scientists, and others interested in balancing the conservation and use of our nation's coastal, estuarine, and ocean resources

NOAA Coral Reef Conservation Program

<http://coralreef.noaa.gov/>

Contains the latest news on NOAA's coral reef conservation activities as well as information on coral reef funding opportunities throughout NOAA and resources for students and educators interested in learning about coral reefs

Marine Protected Areas (MPAs)

<http://mpa.gov/>

Official U.S. Web site on marine protected areas that provides information and resources to assist in national dialogue and decision making about MPAs

National Estuarine Research Reserve System (NERRS)

<http://nerrs.noaa.gov/>

Describes NERRS, a network of 27 protected estuarine areas throughout the nation in which ecological research and environmental education are conducted

Office of National Marine Sanctuaries (ONMS)

<http://sanctuaries.noaa.gov/>

Provides information about the nation's marine sanctuary system, including history, the authorizing legislation and regulations, and descriptions of the different sanctuaries and links to their Web sites

NOS International Program Office (IPO)

<http://nosinternational.noaa.gov/>

Describes IPO, which coordinates the international activities of NOS

Oceans and Human Health Initiative (OHHI)

<http://www.eol.ucar.edu/projects/ohhi/>

Provides an overview on NOAA's OHHI, highlights the three NOAA Centers of Excellence, and access to workshop, training, and external grants information
