SUMMARY OF SURVEYS AND DATA SYSTEMS

National Center for Health Statistics

August 2008

NAME Current NCHS S	Surveys and Data Systems	OF DATA PRODUCED	SAMPLE	AND SES [1]	PERIODICIT	Y FY 2005-2009 PLANS
Vital Statistics Cooperative Program (VSCP)	* State vital registration * Births * Deaths * Linked Birth/Infant Death Program * Matched multiple birth data sets	* Life expectancy * Causes of death * Infant mortality (IM) * Prenatal care and birthweight * Birth rates * Nonmarital births * Pregnancy outcomes * Occupational mortality * Teenage pregnancy * Method of delivery * IM rates by birth and period cohorts * IM rates by birthweight * IM by cause of death * Preterm delivery * Multiple births * Perinatal mortality * Maternal smoking	* All births (4 million records annually) * All deaths (about 2.4 million records annually) * Reported fetal deaths of 20+ weeks gestation (about 26,000 annually) * Counts of marriages and divorces	For births, deaths, and fetal deaths: * White, black, 5 API groups, American Indian, multiple race * 5 Hispanic groups * Education * Births and deaths: 10 API groups from 11 states * Marital status	Annual	* Continue monthly, annual data system * Assist states in automating and/or re-engineering their IT systems to enhance timeliness and qualilty of reporting ! Implement revised certificates as part of re-engineering process ! Implement new OMB race guidelines * Evaluate quality of new data items ! Implement new data access methods and reports * Re-engineer internal DVS systems ! Develop and publish birth certificate regulations in response to IRTPA
National Health and Nutrition Examination Survey (NHANES)	* Personal interview * Physical examination * Laboratory tests * Nutritional assessment * DNA repository	* Total prevalence of disease or conditions including those unrecognized or undetected * Nutrition monitoring + Heart disease * Diabetes * Osteoporosis * Iron deficiency anemia and other nutritional disorders * Environmental exposures monitoring * Children's growth & development * Infectious disease monitoring * Overweight	* ~5,000 persons per year, all ages * Oversample 60+ * Oversample blacks & Hispanics	* Income and poverty index * Education * Occupation * Type of living quarters * Social services * Black, white and Mex. Amer. * Prior to 1982 * White, black, Other * Birthplace 1988 + * OMB categories * Acculturation questions re: langua usually spoken at home	Annual, with capability for longitudinal followup	* Data collection for annual sample * Data releases on two-year cycles * Surveys of other population groups or State and local geographic areas (Community HANES) are being considered
National Health Interview Survey (NHIS)	* Personal interviews	Annual data on: * Health status and limitations * Utilization of health care * Injuries * Family resources * Health insurance * Access to care * Selected conditions * Health Behaviors * Functioning * HIV/AIDS testing * Flu shots/sprays for all ages * Pneumonia shots for adults 18+	* ~40,000 households * In 2006, oversample includes blacks, Hispanics, and Asians. Sample adults are now oversampled if 65+ and one of these minorities.	* OMB categories * Hispanic groups * API groups * Family and individual income and poverty level * Education and occupation (sample person only) * Type of living quarters * Acculturation questions re: langua used during interview		* Continue annual survey * Provide sampling frame to the Medical Expenditure Panel Survey * Supplements 2005: Cancer Control 2006: Healthy People 2010 Objectives (arthritis, stroke, diabetes) 2007: Complementary and alternative medicine and hearing 2008: Oral health, HPV, Cancer screening (adult only) 2009: Arthritis (others as yet undecided) * Re-design sample implemented (2006) * Annual release of paradata files on interview process
National Hospital Discharge Survey (NHDS)	* Hospital records * Computerized data sources	* Patient characteristics * Hospital characteristics * Length of stay * Diagnosis and multiple diagnoses * Surgical and diagnostic procedures	* 500 hospitals * 300,000 discharges	* OMB categories	Annual	* Continue annual survey of hospitals * Re-design in process (2010)
National Ambulatory Medical Care Survey (NAMCS)	 * Encounter forms completed by office-based physicians and other staff * Physician-level personal interviews 	* Characteristics of patients' visits * Diagnoses and treatment * Prescribing patterns * Characteristics of practice	* 3,400 physicians in office-based practices * Three providers at each of 104 community health centers * ~30,000 patient visits	* OMB categories	Annual	* Continue annual survey * Special focus on chronic diseases (2005-8) * Cervical cancer screening supplement Separate strata of community health centers and medical and surgical oncologists (2006-7)

NAME	DATA SOURCE/ METHODS	SELECTED APPLICATIONS OF DATA PRODUCED	PLANNED SAMPLE	RACE/ETHNICITY AND SES [1]	PLANNED PERIODICITY	FY 2005-2009 PLANS
Current NCHS S	urveys and Data Systems (co	ont.)				
National Hospital Ambulatory Medical Care Survey (NHAMCS)	* Encounter forms completed by physicians and other hospital staff * Facility and personal interviews	* Characteristics of patients' visits to hospital outpatient departments (OPD) and emergency departments (ED) * Diagnoses and treatment * Prescribing patterns * Characteristics of facility	* 600 hospitals * 70,000 patient visits	* OMB categories	Annual	* Continue annual survey * Add content on electronic medical records * Emergency pediatric preparedness - supplement (2006) * Special focus on chronic diseases * (OPD) (2005-8) Cervical cancer screening supplement
National Survey of Family Growth (NSFG)	* Personal interviews * Men and women 15-44 years	* Contraception & sterilization * Teenage sexual activity & pregnancy * Family planning & unintended pregnancy * Infertility, adoption, breastfeeding * Marriage, divorce, and cohabitation * Fatherhood involvement * HIV risk behavior	* 5,000 men and women * Oversample blacks, Hispanics and teens	* OMB categories * 4 Hispanic groups * Family & individual income, & poverty level * Sources of income * Education	Continuous since mid-2006	* Design for continuous interviewing ongoing * First data set from continuous interviewing release (2009)
National Immunization Survey (NIS) (in partnership with CDC/NIP)	* Telephone interviews * Provider record check component * Weighting adjustment for non- telephone households	* Evaluation of immunization status of preschool population (NIS) * Demographic characteristics * Family resources data * Health care utilization	* Over 1 million households screened to find NIS sample of households with children 19-35 months * 400 completed NIS interviews in each of 55 non-overlapping areas (at least) which includes the 50 states, DC and 5 or more grantees. Add'l areas maybe included subject to fundir * Option allows for additional data collection on other topics from the households screened for the NIS sample	* OMB categories * Income * Education of the mother	Continuous with quarterly 12 month moving averages	* Currently conducting interviews for all areas * New contract to cover data collection (CY 2005-2007)
National Survey of Children with Special Health Care Needs	* Conducted using the State and Local Area Integrated Telephone Survey (SLAITS) mechanism * Telephone interviews * Statistical adjustments for house- holds without telephones * Utilizes NIS sample frame * Sponsored and funded by Maternal and Child Health Bureau, HRSA * Additional funding by OASPE (200)	* Children with special health care needs * Health care utilization and barriers * Performance partnership initiatives * Health insurance coverage * State Children's Health Insurance Program (SCHIP) attitudes and experience * Characteristics of SCHIP eligible but unenrolled children (2001)	* State-based samples of children 0-17 years of age * All 50 states plus DC * Detailed interview for children identified with special needs * Detailed interview for low-income uninsured children (2001) * Detailed interview for referent sample (2005-2006)	* OMB categories * Income and poverty levels * Parental education * TANF participation	Periodic implementation (every 4 years)	* Data files released (FY 2003) * Released chartbook & numerous journal articles * Provision of technical assistance to states * Focus of an issue of the Maternal and Child Health Journal * Repeated (CY 2005-2006)
National Survey of Children's Health	* Conducted using the SLAITS mechanism * Telephone interviews * Statistical adjustments for households without telephones * Utilizes NIS sample frame * Sponsored and funded by the Maternal and Child Health Bureau, HRSA	* Physical, emotional, and dental health * Health insurance coverage * Health care utilization and barriers * Medical home * Child, family, and neighborhood well-being * Children with special health care needs * Performance partnership initiatives	* State-based samples of children 0-17 years of age * All 50 states plus DC	* OMB categories * Income and poverty levels		* Release public use data files (2005) * Released chartbook, numerous journal articles * Provision of technical assistance to states * Will be repeated (CY 2007) * Focus of a supplement to Pediatrics

Current NCH	S Surveys and Data Systems (:OHL.)				
National Death Index (NDI)	* State registration areasdeath certificates	Facilitates epidemiological follow-up studies Verification of death for individuals under study Optional release of coded causes of death available to users upon request Most NCHS surveys are linked to NDI	* All deaths	* Same race groups as VSCP	Annual	* Continue ongoing matching operations
National Nursing Home Survey (NNHS)	* Long-term care providers * Interviews with facility administrators and staff familiar with residents * For patient level data, respondents refer to facility/medical records	* Facility-level * Facility and staffing characteristics * Facility practices * Resident-level * Health status (functional status, diagnoses and conditions) * Medications * ED visits and hospitalizations * End of life care * Pain assessment, management and relief	* 1,500 nursing homes * 18,000 current residents	* OMB categories	Last conducted in 2004. Period between surveys to be determined.	* Release preliminary data 2006 * Release public-use data files (2006) * Release summary statistics and journal articles (2006-2008)
National Nursing Assistant Survey (NNAS)	* Sample of nursing assistants (NAs) working in sub-sample of facilities participating in the 2004 NNHS * Telephone interviews	* Characteristics of Nas * Why NAs remain in the field * Factors that influence entering/leaving the field * Factors affecting retention * Factors that affect workers' attitudes, relationships with managers and clients, and job satisfaction	* 690 facilities * 5,520 nursing assistants	* OMB categories	One time in 2004	* Revise survey for use in survey * of home health aides (2007) Release summary statistics, journal articles (2007)
National Survey of Residential Care Facilities	* Methods are being evaluated	* Characteristics of residential care facilities, number and characteristics of residents along with medical diagnoses and functional status	* 1,500-2,200 facilities * Data on 8,000-10,000 residents	* OMB categories; others (if any) to be determined	To be fielded first time in 2009; periodicity to be determined	* Survey design (2006-2008) * Survey to be fielded (2009)
National Survey of Ambulatory Surgery (NSAS)		* Patient characteristics * Facility characteristics * Diagnosis and multiple diagnoses * Surgical and diagnostic procedures	* 696 facilities * 60,000 surgery visits	* OMB categories	1994-1996; 2006	* Data release (2008)
National Survey of Adoptive Parents (NSAP)	* Conducted using the State and Local Area Integrated Telephone Survey (SLAITS) mechanism * Telephone interview * Utilized all identified target cases (children adopted from the domestic foster care system, private domestic adoption, or international adoption) from the 2005-2006 NS-CSHCN & 2007 NSCH samples (both of which were statistically adjusted . for non-resp * Sponsored by DHHS (ASPE and ACF) with technical assistance on international adoption content provided by the Dept. of State	* Pre- and post-adoption experiences of parents * Efficacy of post-adoption supports * Characteristics of adoptions * Transracial and/or transcultural adoptions * Parent and child well-being * Adoption agreement and post-adoption services (financial) * Post-adoption supports (non-financial)	* National sample of adopted children 0 to 17 years of age * Approximately 2,000 completed interviews (main NSAP sample) * approximately 2,000 completed interviews in the referent NSAP sample (subsample of the 2007 NSCH and 2005-2006 NS-CSHCN cases) * NSAP referent sample will be asked selected emotional and education indicators to compare to adopted children in the main sample	* OMB categories of responding adoptive parent, and any other adoptive parent living in HH Income and poverty levels (from NSCH or NS-CSHCN) * Program participation (from NSCH or NS-CSHCN) Parental employment status of the responding adoptive parent, and any other adoptive parent living in HH	One time Fielded in 2007	* NSAP file will be released only as a stand-alone file with selected NSCH or NS-CSHCN variable (as applicable) attached * Anticipate the release of numerous journal articles

NAME	DATA SOURCE/ METHODS	SELECTED APPLICATIONS OF DATA PRODUCED	PLANNED SAMPLE	RACE/ETHNICITY AND SES [1]	PLANNED PERIODICITY	FY 2005-2009 PLANS
Current NCHS	Surveys and Data Systems					
Survey of Adult Transition and Health (SATH)	* Mixed mode survey * Telephone, internet data collection * Followback survey of CSHCH ages 14 to 17 years identified in the 2001 NS-CSHCN * In 2007 cases are 19-23 years old * Non-respresentative sample * Pilot test of procedures to locate & interview sample cases using mixed modes of data collection * Sponsored and funded by the Maternal and Child Health Bureau HRSA * Assesses impact of having adequate	* Health and functional status * Activity limitations (daily living, work, home, school, taking care of house or family * Medical Home * Transition services related to health * Community-based services * Health insurance coverage (current, past year, adequacy) * Transition services related to school * Self-determination * Satisfaction and support * Marital status, living arrangements	* Purposive sample of young adults with special health care needs now 19 to 23 years old in identified 2001 NS-CSHCN * the anticipate completing about directly 1,840 SATH interviews with the young adults * Pilot project that will identify target areas of improvement for future followback surveys * Pilot test of mixed-mode capability in SLAITS surveys	* OMB categories (from 2001 NS-CSHCN) * Personal earnings * Program participation * Type of living quarters * Education	One time in 2007	* Subject to addressing confidentiality restrictions and achieving and adequate sample size, a public data file will be released, if possible (2008)
	health-related transition services and a Medical Home in 2001 on health outcomes in 2007 * Non-response adjustment of 2001 NS-CSHCN weight, poststratification to sum to 2001 NS-CSHCN weights					
National Home Health Aide Survey (NHHAS)	* Telephone interviews * Sample of home health aides (HHAs) working in agencies participating in the 2007 NHHCS	* Characteristics of HHAs * Why HHAs remain in the field * Factors that influence entering/leaving the field * Factors affecting retention * Factors that affect workers' attitudes, relationships with managers and clients, and job satisfaction	* 1,255 agencies * 7,000 home health aides	* OMB categories	One time in 2007-2008	* Conduct survey (2007-2008) * Release public use data files (2009) * Release summary statistics (2009)
Recent NCHS S	Surveys					
National Home and Hospice Care Survey (NHHCS)	* Home health agencies and hospices * Interviews with administrators and staff familiar with patients * For patient level data, respondents refer agency/medical records	* Characteristics of home health agencies and hospices * Number and characteristics of patients and discharges * Medical diagnoses and functional status	 * 1,800 home health agencies and hospices * 6,275 current home health patients * 6,275 discharged hospice patients 	* OMB categories	Last conducted in '2000. Period between surveys to be . determined	* Conduct re-designed survey (2007) * 2007 survey includes new information on: medications, end-of-life care, staffing, administration, electronic medical records * Release public use data files (2009)
National Health Interview Survey on Disability (NHIS-D)	* Personal interviews * Follow-up interviews	* Sensory, mobility, and communication impairments * Functional limitations * Personal assistance * Special education * Mental health conditions * Employment and transportation limitations * Therapeutic services * Children w/ special health needs * Post polio syndrome	 * Phase 1 screens 90,000 households * Phase 2 is a followup of those persons with moderate to severe disabilities * Phase 2: approximately 20,400 children and adults in 1994, and approximately 12,400 children and adults in 1995 	* OMB categories * Hispanic groups * API groups * Family income and poverty level * Education and occupation * Type of living quarters	Special 2-year study in 1994-1995	* A public use file of polio data from the Disability Followback Survey (Phase II of the NHIS-D) was released in 2000, the final release of NHIS-D data

NAME	DATA SOURCE/ METHODS	SELECTED APPLICATIONS OF DATA PRODUCED	PLANNED SAMPLE	RACE/ETHNICITY AND SES [1]	PLANNED PERIODICITY	FY 2005-2009 PLANS
Recent NCHS Su	irveys (cont.)					
National Survey of Early Childhood Health	Local Area Integrated Telephone Survey (SLAITS) mechanism * Telephone interviews * Statistical adjustments for house-	* Parents' perceptions of the quality of pediatric care * Content of anticipatory guidance * Health care utilization and barriers * Home safety measures * Health insurance coverage	 National sample of children 4-35 months of age Oversample of Black non-Hispanic and Hispanic children 	* OMB categories * Income and poverty levels * Parental education * Parental employment status * WIC participation	Unspecified periodic implementation subject to funding by sponsors	 Released public use data files and released summary statistics Released supplement to Pediatrics Numerous journal articles released
Joint Canada/United States Survey of Health (JCUSH)	* Same questionnaire administered by telephone in 2002-2003 in both countries, in English or French in Canada, in English or Spanish in U.S.	Directly compare U.S. and Canadian estimates on health status, chronic condition utilization of health care services, etc.	* 5,200 U.S. adults s 3,500 Canadian adults	* OMB categories in US, in GP in Canada; income, wealth, education	One-time in 2002-2003	* Joint data release on Statistics Canada and NCHS' websites, June 2, 2004 Invited Session at 2004 Joint Statistical Meetings in Toronto; numerous other talks and papers
National Asthma Survey	mechanism * Telephone interviews * Statistical adjustments for	Asthma prevalence rates (national sample only) Health care utilization and barriers Asthma management and medication use Family history of asthma	* Four state samples and national samples in 2003 of adults and children	* OMB categories * Income and poverty levels * Education	Last conducted in 2003; there are no plans to repeat this survey	* Conducted survey (2003) * Release public use data files (2005) * Release journal articles, continue analyses
Second Supplement on Aging (SOA II)	* Linked administrative records data from NDI, cause-of-death, CMS,	 Functional status Living arrangements Use of hospitals and nursing homes Death rates by social, economic, family and health characteristics 	* 9,447 persons age 70 and over at the time of Phase 2 of NHIS-D (1994-1996)	* OMB categories * 4 Hispanic groups * Education * Type of housing * Occupation & retirement * Income & income sources	Cross-sectional survey, serves as a baseline to the LSOA II	* Ongoing record matches with the NDI, cause-of-death, CMS Medicare files, and SSA benefit data
Second Longitudinal Study of Aging (LSOA II)	* Linked administrative records data from NDI, cause-of-death, CMS, and SSA	* Changes in functional status, chronic conditions, comorbidity * Causes and consequences of change * Living arrangements, social support * Health care coverage and utilization * Death rates by social, economic, family, and health characteristics	* 9,447 persons age 70 and over at the time of Phase 2 of NHIS-D (1994-1996)	* OMB categories * 4 Hispanic groups * Education * Type of housing * Occupation and retirement * Income and income sources	Baseline plus 2 follow-up waves, each at 2-year intervals	* Ongoing record matches with the NDI, cause-of-death, CMS Medicare files, and SSA benefit data
	lude white, black or African-American, a sked as a separate question.	Asian, Native Hawaiian and other Pacific Island	lers, American Indian or Alaska Nat	ive.	NCHS/Office of Plannin Last updated on August 2	g, Budget and Legislation 2008
