

2005 Inventory of VHA Organizational Characteristics

Profile of Medical Centers in VISN 19

March 2006

Medical Center Profile:

The *Inventory of VHA Organizational Characteristics* was conducted in late summer and fall of 2005 by the *Center for Organization, Leadership & Management Research* and its *Collaborating Partners Council*. The *Inventory* was designed to collect data on a range of structural and process characteristics, both administrative and clinical, that are expected to affect clinical practice and care to veterans. Data were collected by means of a web-based survey sent to VISN and medical center directors. All VISNs and 136 medical centers completed the *Inventory*. One *Inventory* was submitted per organization.

This summary profile presents the *Inventory* results for the medical centers in your VISN. Most but not all information provided by medical centers is included in these reports; information such as organization charts is not easily presented in this format.

Results for each facility are presented by survey item or variable, and organized under four content categories. Frequency distributions are shown for the VISN and nationally. Distributions are based on the number of facilities who responded to that question, unless otherwise noted on the report.

Contents:

- I. Organizational Structures
- II. Organizational Structures: *Integrated VA Health Care Systems Only*
- III. Decision-Making and Leadership Activities
- IV. Performance and Quality

Additional Information:

A sample of the original web-based *Inventory* instrument is available on our website at <http://www.colmr.research.med.va.gov/publications/reports/>.

Additional questions for COLMR regarding the 2005 *Inventory* may be directed to Zoë LeVan at zoe.levan@va.org.

I. ORGANIZATIONAL STRUCTURES

1. List up to 6 clinical areas for which there are integrating structures or processes within the Medical Center.

Free-text response categories. Presented as received.

Facility	Clinical Areas
436	Surgery CBOCs
442	Surgery
554	Multi-disciplinary Clinical Committee Clinical Service Line
575	Transitional Care Unit Skin and Wound Care Pain Management Hospice and Palliative Care
660	Medicine Surgery Mental Health Ambulatory Care Rehabilitation
666	

1a. For each of the areas listed above, select the category that best describes its integrating/coordinating structure:

Shown as % of clinical areas listed for which each option was selected; each cell represents a distinct variable of 0-100%. Multiple responses could be selected per clinical area.
