Collaborating With Other Agencies to Produce Exciting Environmental Health Programs For Children

Quality efforts today can change the outcome of tomorrow

Build teamwork, improve problem solving skills, and commit to the value of serving others

Let the Fun and Learning Begin

Problem

Why is it so difficult for unwilling and unavailable EH staff to engage children to better appreciate and gain knowledge of EH?

Executive Summary

Issue:

 School age children not introduced to environmental health professional

Barriers:

· Time, resources, and commitment

Solution:

 Look at successful programs and introduce concepts to children

A potential future

Testimonials & Benefits

Testimonials from Principals and Teachers:

- . 'Environmental Health Programs are a highlight of my entire semester'
- . "EVP" in my Foods Unit set the tone with students as to the importance of sanitation
- . "Students learn life-skill concepts that they should know"
- . "Students love the interaction"
- "Students intrigued by aniecdotes about restaurants"
- Titudents intrigued by anecdates about restaurant
- "The Medagascar Hissing Floaches affects students the most"
- . "Thank you for bringing a high-quality EHP to our classes"
- . "One of the best High Interest Programs ever"
- . "Not only do our students have fun but they also learn about EH as well"
- "Students love the Larva Races and the Cricket Houses"

_

Other Ideas:

 Partner with a University and establish a 3-5 day EH camp for students. Students ages 16-18, a college credit could be included.

Other Ideas

- Develop Environmental Health books for those students 3-8 years old that could be used during story time at libraries, or even read by Environmental staff at the library.
- 3. Produce Environmental Health Programming for local cable television.
- 4. Develop a DVD with programs that have been done at the Health Department.
- 5. Develop EH education resource library.

Benefits to Environmental Health:

- . Children begin to dialog about Environmental Health.
- Children can identify EH inspectors and know what kind of
- Children develop respect for the profession
- Children grow into becoming advocates for Environmental
- Together parents and children engage in activities at local
- Many partnerships develop
