

Mississippi

Selected Topics Fact Sheet, Profiles 2006

The **School Health Profiles (Profiles)** is a system of surveys assessing school health policies and programs in states and large urban school districts. Profiles surveys are conducted biennially among representative samples of middle and high school principals and lead health education teachers.

| Health Education | Among States * | | Mississippi |
|--|-----------------------|---------------|--------------------|
| | Median | Range | % |
| Percentage of schools that required students to take 2 or more health education courses | 43.0 | (8.1 – 79.3) | 8.1 |
| Among schools that required a health education course, percentage that required students who failed the course to repeat it | 55.4 | (35.0 – 95.4) | 95.4 |
| Percentage of schools in which the lead health education teacher had professional preparation in health education or in health and physical education combined | 45.5 | (9.5 – 88.9) | 47.3 |
| Percentage of schools in which the lead health education teacher was certified, licensed, or endorsed by the state to teach health education in middle school or high school | 79.6 | (26.7 – 97.7) | 91.9 |
| Percentage of schools that tried to improve student skills in resisting peer pressure to engage in unhealthy behavior related to personal health and wellness in a required health education course | 86.0 | (42.0 – 98.8) | 97.3 |
| HIV, STD, and Pregnancy Prevention | | | |
| Percentage of schools that tried to increase student knowledge on HIV prevention in a required health education course | 84.2 | (35.6 – 99.3) | 97.9 |
| Percentage of schools that tried to increase student knowledge on STD prevention in a required health education course | 79.9 | (30.8 – 98.9) | 96.1 |
| Percentage of schools that tried to increase student knowledge on pregnancy prevention in a required health education course | 80.0 | (29.6 – 99.3) | 96.6 |
| Percentage of schools that taught abstinence as the most effective method to avoid pregnancy, HIV, and STDs in a required health education course | 78.0 | (28.5 – 99.3) | 97.0 |
| Percentage of schools that taught how to correctly use a condom in a required health education course | 24.3 | (1.0 – 59.1) | 28.9 |
| Percentage of schools in which the lead health education teacher received staff development during the past two years on HIV prevention | 43.7 | (21.3 – 63.9) | 41.0 |
| Percentage of schools with a policy on students or staff who have HIV infection or AIDS | 51.6 | (27.0 – 89.5) | 27.0 |
| School Health Councils | | | |
| Percentage of schools that had one or more than one group (e.g., a school health council, committee, or team) that offers guidance on the development of policies or coordinates activities on health topics | 54.9 | (34.7 – 73.9) | 34.7 |

* Among the 36 participating states with weighted principal survey results and the 34 states with weighted teacher survey results.
