Study Team for the Los Alamos Historical Document Retrieval and Assessment (LAHDRA) Project

The Centers for Disease Control and Prevention (CDC) and the Agency for Toxic Substances and Disease Registry (ATSDR) announces the following meeting.

Name: Public Meeting of the Study Team for the Los Alamos Historical Document Retrieval and Assessment Project.

Time and Date: 5 p.m.–7 p.m., (Mountain Time), Wednesday, July 23, 2008.

Place: Cities of Gold Hotel, Nambe Conference Room, Cities of Gold Road exit in Pojoaque (15 miles north of Santa Fe on U.S. 84/285), 10-A Cities of Gold Road, Santa Fe, New Mexico 87506, telephone (505) 455-0515, fax (505) 455-3060.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 200 people.

Background: Under a Memorandum of Understanding (MOU) signed in December 1990 with the Department of Energy (DOE) and replaced by MOUs signed in 1996 and 2000, the Department of Health and Human Services (HHS) was given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, a memo was signed in October 1990 and renewed in November 1992, 1996, and in 2000, between the Agency for Toxic Substances and Disease Registry (ATSDR) and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability

Act (CERCLA or a Superfund). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This study group is charged with locating, evaluating, cataloguing, and copying documents that contain information about historical chemical or radionuclide releases from facilities at the Los Alamos National Laboratory (LANL) since its inception. The purpose of this meeting is to review the goals, methods, and schedule of the project, discuss progress to date, provide a forum for community interaction, and serve as a vehicle for members of the public to express concerns and provide advice to CDC.

Matters To Be Discussed: Agenda items include a presentation from the National Center for Environmental Health (NCEH) and its contractor regarding the status of project work and a summary of recent activities, such as reviews of documents held by LANL groups and divisions and information gathering that has targeted key information gaps that remain. Activities that will be undertaken to complete work by the LAHDRA contractor team within 2009 will be described. There will also be a photographic display and brief presentation by Peter Malmgren of Chimayo, New Mexico, regarding his "Los Alamos Revisited" oral history project. A representative of the Radiation Exposure Screening and Education Program (RESEP) has been invited to review the goals and activities of that program. Administered by the Federal Health Resources and Services Administration, RESEP helps individuals who live (or lived) in areas where U.S. nuclear weapons testing occurred. There will be time for public input, questions, and comments. All agenda items are subject to change as priorities dictate.
