Monitoring of U.S. Imports of Tomatoes

Investigation No. 332-350

Publication 3738

November 2004

Preface

Section 316 of the North American Free-Trade Agreement Implementation Act (NAFTA Implementation Act), Public Law 103-182, requires the U.S. International Trade Commission (Commission) to monitor U.S. imports of "fresh or chilled tomatoes" and "fresh or chilled peppers, other than chili peppers," until January 1, 2009. In response, the Commission instituted investigation No. 332-350, Monitoring of U.S. Imports of Tomatoes, and investigation No. 332-351, Monitoring of U.S. Imports of Peppers, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)).

This report on the Commission's monitoring investigation covers tomatoes for fresh-market use and for processing. The purpose of this monitoring, as expressed in the NAFTA Implementation Act, is to permit the Commission to conduct an expedited investigation and, if appropriate, recommend to the President provisional relief should a petition for relief be filed under section 202 of the Trade Act of 1974 with respect to imports from all countries, or a petition requesting such relief be filed under section 302 of the NAFTA Implementation Act with respect to imports from Canada or Mexico. Generally, such provisional relief would remain in effect pending completion of the investigation by the Commission and the taking of final action by the President.

This report contains statistical information gathered by the Commission on the U.S. tomato industry in the course of its monitoring. This information includes (1) consumption and trade data (including U.S. imports and U.S. exports) and (2) other industry data (including U.S. production quantity, value, unit value, and harvested area; U.S. cost-of-production estimates; shipments; quantities available at major shipping points; and average U.S. retail and shipping-point prices). The information presented in this report on the U.S. tomato industry was obtained from a number of sources, including the U.S. Department of Agriculture, the U.S. Department of Commerce, the Florida Tomato Committee, the University of Florida Cooperative Extension Service, and various other State agencies. This report principally reports 1999-2003 data and partial-year data for 2003 and 2004.¹

¹ Nothing in this report should be construed to indicate how the Commission would find in an investigation conducted under other statutory authority covering the same or similar subject matter.

Monitoring of U.S. Imports of Tomatoes

Highlights

The following are highlights of the statistical data collected on tomatoes for fresh-market use and processing for the 1999-2003 period, with particular emphasis on 2002 and 2003.

Fresh-market Tomatoes

- Apparent U.S. consumption of fresh-market tomatoes has remained stable in recent years, with U.S. production and exports of fresh-market tomatoes trending downward but imports rising dramatically. U.S. imports remain significant relative to production, accounting for two-fifths of consumption in 2003. Principal U.S. trading partners for fresh-market tomatoes are Mexico and Canada. Nogales, AZ continues as the primary entry point for tomatoes from Mexico, with the bulk of such shipments entered during the Florida growing season. Detroit and Seattle continue as the primary entry points for tomatoes from Canada, with the bulk of these shipments entered during those months coinciding with peak domestic production in California and the rest of the United States. Florida and California remain the primary sources for U.S. fresh-market tomato production.
- Apparent U.S. consumption fell by 4 percent to 2.3 million metric tons in 2003, down from 2.4 million metric tons in 2002; consumption in 2003 was valued at \$2.1 billion (table 1). The ratio of import volume to consumption in 2003 was 41 percent, up from 36 percent in 2002. U.S. production of tomatoes for fresh-market use was down by 11 percent from 1.7 million metric tons in 2002 to 1.5 million metric tons in 2003 (table 1). The value of production rose slightly from \$1.18 billion in 2002 to \$1.2 billion in 2003, with a unit value of \$0.81 per kilogram in 2003.
- Florida and California have been the two states with the largest amount of production of fresh-market tomatoes since 1999, accounting for 43 percent and 28 percent, respectively, of total U.S. production volume of tomatoes for fresh-market use in 2003 (table 26). Other states with significant production volume during 1999-2003 included Virginia, Ohio, Tennessee, and South Carolina. Fresh tomatoes are harvested in Florida during October-June, in California primarily during June-November, and in most other States during March-September. U.S. harvested area of fresh-market tomatoes decreased 7 percent from 120,400 acres in 2002 to 111,670 acres in 2003 (table 26). A drop in California production from 2002 to 2003 resulted in tighter supplies and higher prices.
- U.S. exports of fresh-market tomatoes fell by 5 percent from 150,640 metric tons in 2002 to 142,461 metric tons in 2003 (table 1). U.S. export volume was up by 15 percent during January-June 2004 as compared with exports during the corresponding months in 2003 (table 3). Canada was the leading market for U.S. exports of fresh-market tomatoes throughout the 1999-2003 period, accounting for 88 percent of the total volume (87 percent of value) in 2003.
- U.S. imports of fresh-market tomatoes rose by 9 percent from 860,097 metric tons in 2002 to 939,257 metric tons in 2003 (table 1). Imports were valued at \$1.0 billion in 2003, up by 32 percent from the value in 2002. Imports were down by 6 percent in volume during January-June 2004 as compared with imports during the corresponding months in 2003. Mexico, the leading supplier of imports throughout the 1999-2003 period, accounted for 84 percent, by volume, of total imports of fresh-market tomatoes in 2003 (table 5). U.S.

imports of fresh-market tomatoes from Canada rose by 30 percent in volume from 2002 to 2003 and accounted for 14 percent of total imports in 2003. The bulk of imports from Canada are believed to have been greenhouse-grown tomatoes.

- U.S. imports of cherry tomatoes fell by 20 percent from 2002 to 2003 and amounted to 33,490 metric tons in 2003, with Mexico accounting for 97 percent of total imports in 2003 (table 6). Import value rose by 15 percent from \$50.3 million in 2002 to \$58.0 million in 2003. Imports of cherry tomatoes were up in January-June 2004 as compared with the corresponding months in 2003. U.S. imports of roma tomatoes amounted to 346,531 metric tons in 2003, up by 10 percent from 316,397 metric tons in 2002 (table 7). Mexico accounted for 99 percent annually of total imports during the 1999-2003 period. Imports were down slightly in January-June 2004 as compared with imports during January- June 2003.
- U.S. imports of fresh-market tomatoes from Mexico, entered on a July-June crop-year basis, amounted to 747,778 metric tons in July 2003-June 2004, down by 8 percent from 814,333 metric tons in July 2002-June 2003 (table 9). In recent years, about two-thirds of total annual U.S. imports of fresh-market tomatoes from Mexico entered through the Nogales Customs District. Most of the remainder entered through the San Diego District. In recent crop-years, more than four-fifths of total average annual imports from Mexico entered during January-April, overlapping the middle of the Florida shipping season.
- U.S. imports of fresh-market tomatoes from Canada, entered on a July-June crop-year basis, rose by 60 percent from 115,114 metric tons in 2002/03 to 184,150 metric tons in 2003/04 (table 10). During July 2003-June 2004, about 48 percent of total U.S. import volume of fresh-market tomatoes from Canada entered through the Detroit and Buffalo Customs Districts. During the same July 2003-June 2004 period, 58 percent of total crop-year import volume from Canada entered during March-June, coinciding with the latter half of the normal Florida shipping season.
- U.S. imports of fresh-market tomatoes from the Netherlands (the third largest import source), entered on a July-June crop-year basis, fell by 31 percent from 20,039 metric tons in 2002/03 to 13,925 metric tons in 2003/04 (table 11). During July 2003-June 2004, nearly 60 percent of total imports from the Netherlands entered through the New York Customs District and about three-fifths of total crop-year imports entered during November-June, coinciding with the entire normal Florida shipping season.
- Average U.S. retail prices of fresh-market tomatoes have trended upward in recent years, from \$1.43 per pound annually in July 2002-June 2003 to \$1.48 per-pound annually in July 2003-June 2004 (table 36). Average shipping-point prices remained steady at \$0.35 per pound in 2002/03 and 2003/04. These prices usually vary a great deal throughout the season.

Processed Tomatoes

- U.S. production of processed tomatoes has trended downward in recent years, with U.S. imports also falling but exports rising rapidly in 2003. Canada and Mexico remain the principal markets for U.S. processed-tomato exports and the principal sources for U.S. imports, although there have been significant exports to Japan, Italy, and Korea along with

significant import volumes from Spain, Morocco, and Israel in recent years. California remains the primary source for U.S. production of processing tomatoes.

- U.S. production of tomatoes for processing fell by 16 percent from 10.6 million metric tons in 2002 to 8.9 million metric tons in 2003 (table 2). The value of production was estimated at \$575.4 million in 2003, down by 15 percent from an estimated \$678.7 million in 2002. Unit values trended slightly downward throughout the 1999-2003 period.
- California, Indiana, and Ohio have been the leading states producing fresh tomatoes for processing in recent years, with production in these states together accounting for 98 percent of total production volume in 2003 (table 28). Domestic harvested area of tomatoes for processing fell by 6 percent from 311,800 acres in 2002 to 293,720 acres in 2003; California accounted for 93 percent of total harvested area in 2003.
- U.S. exports of processed tomatoes were 182,557 metric tons in 2003, up by 23 percent from 148,799 metric tons in 2002 (table 2). Canada, Mexico, Japan, Italy, and Korea were the leading U.S. export markets for processed tomatoes in 2003, accounting for 81 percent of total export volume that year (table 4). Export volume during January-June 2004 was down by 7 percent over the amount exported during the corresponding period of 2003.
- In 2003, U.S. imports of processed tomatoes fell by 20 percent, from 49,675 metric tons in 2002 to 39,928 metric tons (table 25). Imports were valued at \$52.0 million in 2003, down by 12 percent from \$59.2 million in 2002. Spain, Morocco, Mexico, and Canada were the leading sources of imported processed tomatoes in 2003, together accounting for 56 percent of import volume in that year. Imports during January-June 2004 were down slightly from the level during the corresponding period of 2003.
- In 2000, U.S. imports of processed tomatoes fell dramatically by 71.4 percent, from 126,088 metric tons in 1999 to 36,119 metric tons in 2000. The reason for this decline was a Federal Court ruling that changed the HTS item subheading under which certain processed tomato products, previously entered under one item, were now to be recorded under another item.

CONSUMPTION

Table 1
Fresh-market tomatoes: U.S. production, exports of domestic merchandise, imports for consumption, apparent consumption, and ratio of imports to consumption, 1999-2003

| Year | Production ¹ | Exports ² | Imports ³ | Apparent consumption | Ratio of imports to consumption |
|------------|--|----------------------|----------------------|----------------------|---------------------------------|
| | <i>Quantity (1,000 kilograms)</i> | | | | <i>Percentage</i> |
| 1999 | 1,666,274 | 151,657 | 740,656 | 2,255,273 | 33 |

| 2003 | 1,206,608 | 146,233 | 1,047,361 | 2,107,736 | 50 |
| | <i>Unit value (dollars per kilogram)⁴</i> | | | | |
| 1999 | 0.57 | 0.81 | 0.93 | 0.67 | (⁵) |
| 2000 | .68 | .87 | .88 | .73 | (⁵) |
| 2001 | .67 | .81 | .88 | .73 | (⁵) |
| 2002 | .71 | .90 | .92 | .78 | (⁵) |
| 2003 | .81 | 1.03 | 1.12 | .93 | (⁵) |

¹ Data are for raw product intended for fresh-market use and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram.

² Data are for fresh or chilled tomatoes (Schedule B No. 0702.00.0010, 0702.00.0030, and 0702.00.0050) on a fresh-weight basis.

³ Data are for fresh or chilled tomatoes (Harmonized Tariff Schedule (HTS) subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.

⁴ Calculated by Commission staff using unrounded data.

⁵ Not meaningful.

Note.—Production data are revised annually and data for the most recent calendar years may not match data presented in earlier reports.

Note.—Production data are estimated from raw product intended for fresh-market sales, whereas export and import data are shipments actually recorded. Thus, apparent consumption may be somewhat smaller and the ratio of imports to consumption somewhat larger than shown.

Source: Production data compiled by Commission staff from U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS), *Vegetables*, 2001 Summary: Jan. 2002, Vg 1-2(02), p. 5; 2002 Summary: Jan. 2003, Vg 1-2(03), p. 5; and 2003 Summary: Jan. 2004, Vg 1-2(04), p. 5; exports and imports compiled from official statistics of the U.S. Department of Commerce, except as noted.

| 2001 | 547,473 | 100,624 | 54,250 |
| 2002 | 678,661 | 103,316 | 59,194 |
| 2003 | 575,399 | 116,628 | 51,962 |
| <i>Unit value (dollars per kilogram)⁴</i> | | | |
| 1999 | 0.08 | 0.79 | 0.97 |
| 2000 | .07 | .72 | 1.45 |
| 2001 | .07 | .71 | 1.24 |
| 2002 | .06 | .69 | 1.19 |
| 2003 | .06 | .64 | 1.30 |

¹ Data are for raw product intended for processing and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram. U.S. production of processed tomato products on a processed-weight basis has not been reported for a number of years.

² Data are for prepared or preserved tomatoes (Schedule B No. 2002.10.0000, 2002.90.0060, and 2002.90.0080) on a processed-weight basis.

³ Data are for frozen tomatoes (HTS subheadings 0710.80.40-0710.80.50) on a frozen-weight basis; dried tomatoes (HTS subheadings 0712.90.74 and 0712.90.78) on a dried-weight basis; and prepared or preserved tomatoes (HTS subheadings 2002.10.00, 2002.90.40, and 2002.90.80) on processed-weight basis.

⁴ Calculated by Commission staff using unrounded data.

Note.—Production data are revised annually and figures for the most recent calendar years may not match data presented in earlier reports.

Note.—Consumption of processed tomato products is not applicable since production is on a raw-product basis and imports include frozen, dried, and canned products on their respective processed-weight basis.

Note.—Unit values for U.S. tomato production are low, relative to those for exports and imports, because production includes only raw product intended for processing, not finished product. Exports and imports are finished products.

Note.—Beginning in 2000, U.S. imports of certain processed tomato products which had previously entered under HTS subheadings 2002.90.40 and 2002.90.80 were now entered under different HTS subheadings as a result of a Federal Court ruling.

Source: Production data compiled by Commission staff from USDA, NASS, *Vegetables*, 2001 Summary: Jan. 2002, Vg 1-2(02), p. 79; 2002 Summary: Jan. 2003, Vg 1-2(03), p. 77; and 2003 Summary: Jan. 2004, Vg 1-2(04), p. 79; exports and imports compiled from official statistics of the U.S. Department of Commerce, except as noted.

| Average | .93 | .88 | .88 | .92 | 1.12 | 1.06 | 1.01 |

¹ Data are for fresh or chilled tomatoes (HTS subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.

² Calculated by Commission staff..

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.

Note.—Data for the European Union include only the EU-15 countries.

¹ Data are for fresh or chilled tomatoes (HTS subheadings 0702.00.2030, 0702.00.2035, 0702.00.4030, 0702.00.6030, and 0702.00.6035) on a fresh-weight basis.

² Calculated by Commission staff.

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, New Zealand, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.

Note.—Data for the European Union include only the EU-15 countries.

Source: Compiled from official statistics of the U.S. Department of Commerce, except as noted.

Table 29**Estimated production costs for fresh-market tomatoes grown in Dade County, Florida, by average cost per acre, 2001/02 to 2003/04 crop-years**

(In dollars)

| Cost item | 2001/02 | 2002/03 | 2003/04 |
|------------------------------|---------|---------|---------|
| Preharvest costs: | | | |
| Operating costs: | | | |
| Seed | 202 | 202 | (1) |
| Fertilizer | 361 | 387 | (1) |
| Fumigant | 675 | 750 | (1) |
| Other pesticides | 751 | 781 | (1) |
| Labor | 638 | 619 | (1) |
| Machinery | 434 | 434 | (1) |
| Interest | 214 | 241 | (1) |
| Miscellaneous | 755 | 1,159 | (1) |
| Subtotal | 4,031 | 4,574 | (1) |
| Fixed costs: | | | |
| Land rent | 420 | 420 | (1) |
| Machinery | 139 | 139 | (1) |
| Management | 875 | 978 | (1) |
| Overhead | 1,094 | 1,223 | (1) |
| Subtotal | 2,528 | 2,760 | (1) |
| Total preharvest costs | 6,559 | 7,334 | (1) |
| Harvest and marketing costs: | | | |
| Harvest and hauling | 1,190 | 1,190 | (1) |
| Packing | 2,520 | 2,520 | (1) |
| Containers | 700 | 1,050 | (1) |
| Selling | 210 | 210 | (1) |
| Organization fees | 126 | 126 | (1) |
| Subtotal | 4,746 | 5,096 | (1) |
| Total production costs | 11,305 | 11,430 | (1) |

¹ Data for the 2003/04 crop-year are not available until after this report is completed.

Note.—These cost budgets are constructed based on input prices obtained from various industry sources and are believed to reflect typical costs of production for growers in a given production area, but do not necessarily reflect the actual industry average cost of production.

Note.—Because of rounding, figures may not add to the totals shown.

Table 33

Estimated production costs for fresh-market tomatoes grown in South Carolina,¹ 2004 crop-year, and in California,² 2000 crop-year, by production practices and by average cost per acre³

(In dollars)

| Cost item | State | |
|-------------------------------|-----------------------|-------------------|
| | South Carolina (2004) | California (2000) |
| Preharvest costs: | | |
| Variable costs: | | |
| Seedlings | 336 | 261 |
| Fertilizer | 171 | 85 |
| Fumigant | 1,000 | - |
| Other pesticides | 169 | 132 |
| Labor and machinery | 187 | 200 |
| Interest | 164 | 63 |
| Miscellaneous | 749 | 193 |
| Subtotal | <u>2,776</u> | <u>934</u> |
| Fixed costs: | | |
| Land rent | 25 | 200 |
| Machinery and equipment | 218 | - |
| Overhead | 878 | 57 |
| Subtotal | <u>1,121</u> | <u>257</u> |
| Total preharvest costs | 3,897 | 1,191 |
| Harvest and marketing costs: | | |
| Harvest and hauling | 2,799 | 1,296 |
| Packing | 4,500 | 2,600 |
| Containers | 75 | - |
| Marketing | 825 | 22 |
| Subtotal | <u>8,199</u> | <u>3,918</u> |
| Total production costs | <u>12,096</u> | <u>5,109</u> |

¹ Costs are for tomatoes grown on plastic using drip irrigation.

² Costs are for tomatoes grown with furrow irrigation in the San Joaquin Valley.

³ Cost-of-production budgets for most states are not prepared on an annual basis; these were the most recent budgets available for each state.

Note.—These cost budgets are constructed based on input prices obtained from various industry sources and are believed to reflect typical costs of production for growers in a given production area, but do not necessarily reflect the actual industry average cost of production.

Note.—Because of rounding, figures may not add to the totals shown.
