Comments: You people dont seem to understand what it is your really doing to our community, and our country. Animals are not only valued part of our community. I ask you to look at how the animals feel. Would you like haveing hair spray put into your eyes or haveing medically induced fevers? I think not. These creatures have feelings just like we do. They feel pain and experiance sadness. But physically they are not commpatable with the human anatomy. You dont seem to understand the postion that those animals are in. They are not here to be experimented on. You know that they feel pain. And you know that i animal testing preceedures you ahve in place are in-addiquit. You know that there are better and more afficent ways or testing. That wil not only help animals but make the cummunity safer for humans as well. I ask you to take a look at what you are doing,

put your self were those animals are now. And tell me, can you still proceed with what you are doing? Listen to peta. Take a lesson for them, that animals are not here to be tested on or to be consumed by us, although you people seem to think so.

I thank you for listening to what i have to say about this matter. I may only be a teenager but i still have a voice. And i intend to use it to help protect the animals i have come to love.

Thanks for your time.

~Dominique~
