Comments: PLEASE PLEASE PLEASE do something about the methods for approving non-animal testing methods. Since Europe has officially approved 12 methods and the United States has only approved one, it would only seem right that we approve more methods to try and eliminate animal testing for once and for all. Many reasons support this view, including the fact that you cannot effectively apply the results of an animal test to what may or may not happen to humans. I beg of you, as a 18 year old fresh out of high school, to please, PLEASE allow the government to approve new methods to help end animal testing and the use of animals in laboratories forever.

Thank you so much for your time, and for the animals.

Alicia Fredrickson
