

Subject: developement of non animal tests

Date: Tuesday, June 5, 2007 4:44 PM

Dear Sir, I am writhing to you to urge your agency to continue your work on developing non animal tests. Animaal tests are inherently flawed due to differences from human physiology. Millions of animals die needless and cruel deaths every year. I urge the adoption of the tests that have been approved by your european counterpart and devote your resources on developing new animal tests. This sharing of information will save millions of animal lives. Sincerely, Rasika Jain
