

Subject: non-animal testing

Date: Tuesday, June 5, 2007 1:51 AM

I am shocked that the US government has only come up with ONE alternative to animals testing when the European government has approved dozens of alternatives. Animals do not respond exactly like humans when tested so this poses a danger to humans. Animal testing is not necessary and should be immediately stopped. You can help by pushing for more research in alternatives to animal testing. We wouldn't kill or let humans suffer needlessly so why should animals suffer and die needlessly.

Please protect people and animals.

Please take this into consideration.

Thank you for your time.

Sincerely,
Rebecca Weaver
