RE: Report of the International Workshop on In Vitro
Methods for
Assessing
Acute Systemic Toxicity

I am writing to encourage you to phase out animal tests for
chemical
toxicity with in-vitro cell culture tests.

The thought of the procedures using animals is repulsive,
especially
when there are viable alternatives.

I am encouraged that these alternatives are being
considered and that
there has been a response to years of public protest on
behalf of the
animals in the laboratories.

Thank you for your attention to my letter.

Judy Taylor-Atkinson
