

Table B – Exceptions to 300 ft. dispersed camping

District	Route No./name	Termini	Restriction
Minidoka	70549/Howell Canyon.	Forest boundary to end	No dispersed camping/camping in developed sites only
Minidoka	70515/Rock Creek	Forest boundary to Diamondfield Jack	Camping in designated dispersed or developed sites only*

*The Minidoka Ranger District is beginning a review of resource issues associated with dispersed camping along lower Rock Creek. This includes looking for additional dispersed camping opportunities as well as identifying areas where dispersed camping should not be allowed. The proposed outcome would be to restrict dispersed camping to designated sites only. Depending on public input and the District’s review, a separate decision may be issued. At this time it is anticipated that this decision will be documented as part of the travel planning decision and not be a separate decision.

District	Route No./name	Termini	Restriction
Ketchum	70097 / Deer Cr., 70103 / No. Fork Deer Creek Road, 70100 / Panther Gulch Road, 70102 / Wolfstone Creek Road	Forest boundary to end of roads 70097 & 70103; Deer Creek Road 70097 to first patented mining claims on 70100 & 70102	Special Order #04-14-03-012 Camping in designated dispersed or developed sites only.

Dispersed camping is designated on the Ketchum Ranger Districts along the Deer Creek, North Fork Deer Creek, Panther Gulch, and Wolfstone Creek Roads under Special Order #04-14-03-012. The special order will remain in place and is not subject to further review under this analysis.

District	Route No./name	Termini	Restriction
Fairfield	70071 – Kelly Creek Flats Dispersed Camping Area		Proposed camping in designated dispersed or developed sites following completion of analysis.

The Fairfield Ranger District is proposing to manage dispersed recreation use, located throughout the area known as Kelly Creek Flats. The area is a very popular site for dispersed camping and OHV riding. The amount of use has resulted in the creation of multiple routes by full size and Off Highway vehicles, soil compaction and vegetation loss in riparian zones and social conflicts with various users. The goal is to manage dispersed recreational use so it can be sustained at this popular site without unacceptable impacts to public health, vegetation, soil, water quality, fish and wildlife habitat, and the overall recreation experience of users. Management options proposed include: designation of dispersed sites, 2 CXT toilet installations, the development of a group use reservable site on the NW side of the intersection of the South Fork of the Boise River and the Baumgartner Bridge. The entire project area is described as portions of sections 7 and 18, T3N, R13 and portions of sections 12, 13 & 14, T3N, R 12E. A separate decision will be made by September, 2006.
